

Response to Comment Letter I7

Erin Tuatagaloa

- I7-1** The commenter states that the Project “will have another negative imprint on our community in Jacumba.” The commenter also provides a summary of the Proposed Project description and asks the County to reject the plan. In response, the County acknowledges the commenter’s opposition to the Proposed Project. The comment does not raise an issue regarding the adequacy of the analysis contained within the Draft EIR; therefore, no further response is required.
- I7-2** The comment states the residents of this region have endured windmills, solar fields and powerline infrastructure, and if the County needs these projects then the residents should be bought out and assisted in being relocated to safer areas without static electric emissions. The commenter requests the County stop the Proposed Project from advancing. In response, please refer to Global Response GR-4 in the Final EIR regarding electromagnetic fields.
