

Nov. 19, 2020.

Ms. Susan Harris  
SUBJECT: JVR Energy Park (MUP-18-022)

We are protesting the JVR Energy Park (MUP-18-022) for Jacumba, California

We are 14 year home owners and love the Jacumba town and surrounding natural habitat that is used by many residents and visitors for hiking, festivals and vacations at Jacumba Spa and Resort

This project has been ~~so~~ blatantly put together. The files were dropped at Jacumba library with only 3 weeks to study, get out to community and to respond.

There is no concern for the people of Jacumba their animals or the wildlife in the area.

The 75ft. buffers are too small for housing along the outlines of the project. What about the noise factor not just for us but for the animals?

The "heat island effect" will be unbearable for the residents of Jacumba where temperatures reach over 100° in the summer and early fall.

There is no benefit to the community!! What

SUBJECT - JVR Energy Park (MVP-18-022)

about the gliders and Jacumba Airport? Where will they land. They are in danger of high voltage equipment, transformers, overhead connections -

195-7  
contd.

This project takes away from the future growth of Jacumba. There are plans to refurbish the stores, the huge lake and parts of the old spa. This project at the size that it is will only reduce property value, will discourage visitors from visiting.

195-8

The use of water is also in question. Having enough water for all is also a concern.

195-9

I would appreciate it if you would address these concerns. Jacumba seems to be a dumping ground for unwanted projects (i.e. sexual predators!!)

195-10

As it stands now there are 5 other larger projects planned. Why JVR Energy Park (MVP-18-022)? Whoever bought this land for this project has no concern for community wild life or the future of residents and the town of Jacumba!!

195-11

SUBJECT - JVR Energy Park (MVP-18022)

Jacumba has along history of artists, community support and enjoyment of the natural beauty of all surrounding areas. Please re-consider approving this. Surely there can be a better use for that land

195-12
