

Every morning I take my dog Roady at 5:30 AM. for a run on land now proposed to be used for a solar project. This is great open space that reminds me of the midwest and I would hate to see it trashed with fields of solar panels. I love hiking in the fields as the sun is rising and my dog love to chase rabbits in the field. One of the reasons I moved to Jacumba was the easy access to these easy hiking places. Please don't let Jacumba become a suburb of a field of solar panels
