Subject: No County Environmental Comments

I am opposed to the 15183 Exemption for the North County Environmental project. An EIR is needed, as was the original intention.

It is the same family that was involved and found guilty in Local, State and Federal environmental charges. With their history of skirting the law, they may be grinding asbestos, lead, etc.

Now we are supposed to trust that they will comply with all the environmental rules for this project??? Who will enforce the laws if they are not obeyed? Code Enforcement is overlooked.

What is the large building for?

What about all the excavation needed to make the site. There will be more fill needed. This will generate a lot of additional truck traffic.

What will be done about the illegal grading that was done at this site by this current owner?
