TITLE REPORT EXCEPTIONS:

EXCEPTIONS TO TITLE LISTED BELOW ARE PER PRELIMINARY TITLE REPORT DATED SEPTEMBER 30, 2016 BY CHICAGO TITLE COMPANY, ORDER NO. 00057116-996-SD1.

A. PROPERTY TAXES, INCLUDING ANY PERSONAL PROPERTY TAXES AND ANY ASSESSMENTS COLLECTED WITH TAXES, ARE AS FOLLOWS:
AMOUNTS HYPERLINKED HERE.

B. THE LIEN OF SUPPLEMENTAL OR ESCAPED ASSESSMENTS OF PROPERTY TAXES, IF ANY, MADE PURSUANT TO THE PROVISIONS OF CHAPTER 3.5 (COMMENCING WITH SECTION 75) OR PART 2, CHAPTER 3, ARTICLES 3 AND 4, RESPECTIVELY, OF THE REVENUE AND TAXATION CODE OF THE STATE OF CALIFORNIA AS A RESULT OF THE TRANSFER OF TITLE TO THE VESTEE NAMED IN SCHEDULE A OR AS A RESULT OF CHANGES IN OWNERSHIP OR NEW CONSTRUCTION OCCURRING PRIOR TO DATE OF POLICY.

THE FOLLOWING MATTERS AFFECT PARCELS 1 -5

1. AN EASEMENT AND RIGHT OF WAY FOR PUBLIC ROAD OVER AND ACROSS OLD SURVEY NO. 133, ACCORDING TO MAP ON FILE IN THE OFFICE OF THE COUNTY SURVEYOR.

   SAID MATTER AFFECTS PARCELS 1 AND 5

2. THE RIGHTS OF THE PUBLIC IN AND TO THAT PORTION OF THE HEREIN DESCRIBED LAND LYING WITHIN PROCTOR VALLEY ROAD.

   AFFECTS: PARCELS 1 AND 5

⚠ EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT:
GRANTED TO: SAN DIEGO GAS AND ELECTRIC COMPANY
PURPOSE: PUBLIC UTILITIES, INGRESS, EGRESS
RECORDING DATE: JUNE 7, 1983
RECORDING NO: 83-019055 OF OFFICIAL RECORDS
AFFECTS: PARCELS 1 AND 5

4. COVENANTS, CONDITIONS AND RESTRICTIONS BUT OMITTING ANY COVENANTS OR RESTRICTIONS, IF ANY, INCLUDING BUT NOT LIMITED TO THOSE BASED UPON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, FAMILIAL STATUS, MARITAL STATUS, DISABILITY, HANDICAP, NATIONAL ORIGIN, ANCESTRY, SOURCE OF INCOME, GENDER, GENDER IDENTITY, GENDER EXPRESSION, MEDICAL CONDITION OR GENETIC INFORMATION, AS SET FORTH IN APPLICABLE STATE OR FEDERAL LAWS, EXCEPT TO THE EXTENT THAT SAID COVENANT OR RESTRICTION IS PERMITTED BY APPLICABLE LAW, AS SET FORTH IN THE DOCUMENT
RECORDING DATE: JULY 31, 2008
RECORDING NO: 2008-0340383 OF OFFICIAL RECORDS
AFFECTS PARCEL 5

5. THE FACT THAT THE PUBLIC RECORD DOES NOT DISCLOSED THAT THE OWNERSHIP OF SAID LAND INCLUDES RIGHTS OF ACCESS TO OR FROM ANY PUBLIC STREET, NOTWITHSTANDING THE INSURING CLAUSES OF THE POLICY, THE COMPANY DOES NOT INSURE AGAINST LOSS OR DAMAGE BY REASON OF A LACK OF A RIGHT OF ACCESS TO AND FROM THE LAND.

   AFFECTS LOT 7 OF PARCEL 5

6. AN EASEMENT FOR THE PURPOSE SHOWN BELOW AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT.

   GRANTED TO: CITY OF CHULA VISTA AND COUNTY OF SAN DIEGO
   PURPOSE: VEHICULAR AND PEDESTRIAN INGRESS AND EGRESS
   RECORDED: MARCH 20, 2014, AS INSTRUMENT NO. 2014-0111210 OF OFFICIAL RECORDS
   AFFECTS: THE ROUTE THEREOF AFFECTS A PORTION OF SAID LAND AND IS MORE FULLY DESCRIBED IN SAID DOCUMENT.

THE FOLLOWING MATTERS AFFECT PARCEL 6

7. THE RIGHTS OF THE PUBLIC TO USE THAT PORTION OF THE HEREIN DESCRIBED LAND LYING WITHIN OLD SURVEY 113 AND OLD SURVEY 133 (PROCTOR VALLEY ROAD) AS SHOWN ON THE ORIGINAL RECORDS IN THE OFFICE OF THE COUNTY SURVEYOR OF SAN DIEGO COUNTY.

8. AN EASEMENT FOR THE PURPOSE SHOWN BELOW AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT.
   GRANTED TO: VICMAL, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY
   PURPOSE: ROAD AND ACCESS
   RECORDED: JANUARY 21, 2009, AS INSTRUMENT NO. 2009-0025823 OF OFFICIAL RECORDS
   AFFECTS: THE EXACT LOCATION AND EXTENT OF SAID EASEMENT IS NOT DISCLOSED OF RECORD

9. A CERTIFICATE OF COMPLIANCE
   DATED: MAY 5, 2010
   EXECUTED BY: DEPT. OF PLANNING AND LAND USE, COUNTY OF SAN DIEGO
   COMPLIANCE NO.: COE-01058W(C)12
   RECORDED: MAY 5, 2010, AS INSTRUMENT NO. 2010-0226435 OF OFFICIAL RECORDS

10. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT:
    GRANTED TO: JOURNEY PARTNERS, L.L.C., A DELAWARE LIMITED LIABILITY COMPANY
    PURPOSE: ACCESS EASEMENT FOR MONITORING AND MAINTENANCE OF PRESERVE LAND
    RECORDING DATE: DECEMBER 13, 2013
    RECORDING NO: 2013-0718978 OF OFFICIAL RECORDS
    AFFECTS: PARCEL 6

⚠ EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT:
GRANTED TO: JOURNEY PARTNERS, LLC, A DELAWARE LIMITED LIABILITY COMPANY
PURPOSE: INGRESS AND EGRESS
RECORDING DATE: FEBRUARY 6, 2014
RECORDING NO: 2014-0051584 OF OFFICIAL RECORDS
AFFECTS: PARCEL 6

MATTERS AFFECTING PARCELS 7-9

12. THE FACT THAT THE PUBLIC RECORD DOES NOT DISCLOSE THAT THE OWNERSHIP OF SAID LAND INCLUDES RIGHTS OF ACCESS TO OR FROM ANY PUBLIC STREET, NOTWITHSTANDING THE INSURING CLAUSES OF THE POLICY, THE COMPANY DOES NOT INSURE AGAINST LOSS OR DAMAGE BY REASON OF A LACK OF A RIGHT OF ACCESS TO AND FROM THE LAND.

13. A CONDITIONAL CERTIFICATE OF COMPLIANCE
    DATED: MAY 5, 2010
    EXECUTED BY: DEPARTMENT OF PLANNING AND LAND USE
    COMPLIANCE NO.: COE-01058W(C)12
    RECORDED: MAY 5, 2010 AS FILE NO. 2010-0226435, OFFICIAL RECORDS
    CONDITIONS: NOT APPROVED FOR DEVELOPMENT

    REFERENCE IS HEREBY MADE TO SAID DOCUMENT FOR FULL PARTICULARS.

14. THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED ACCESS EASEMENT FOR MONITORING AND MAINTENANCE OF PRESERVE LAND RECORDED FEBRUARY 5, 2013 AS INSTRUMENT NO. 2013-0078595 OFFICIAL RECORDS.

THE FOLLOWING MATTERS AFFECT PARCEL 10

15. THE RIGHTS OF THE PUBLIC TO USE THAT PORTION OF THE HEREIN DESCRIBED LAND LYING WITHIN OLD SURVEY 113 AND OLD SURVEY 133 (PROCTOR VALLEY ROAD) AS SHOWN ON THE ORIGINAL RECORDS IN THE OFFICE OF THE COUNTY SURVEYOR OF SAN DIEGO COUNTY.

THE FOLLOWING MATTERS AFFECT PARCEL 11

16. THE RIGHTS OF THE PUBLIC TO USE THAT PORTION OF THE HEREIN DESCRIBED LAND LYING WITHIN OLD SURVEY 113 AND OLD SURVEY 133 (PROCTOR VALLEY ROAD) AS SHOWN ON THE ORIGINAL RECORDS IN THE OFFICE OF THE COUNTY SURVEYOR OF SAN DIEGO COUNTY.

17. AN EASEMENT FOR THE PURPOSE SHOWN BELOW AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT.
    GRANTED TO: COUNTY OF SAN DIEGO
    PURPOSE: PUBLIC HIGHWAY
    RECORDED: APRIL 28, 1891, IN BOOK 191, PAGE 104 OF DEEDS
    AFFECTS: THE EXACT LOCATION AND EXTENT OF SAID EASEMENT IS NOT DISCLOSED OF RECORD

18. AN EASEMENT FOR THE PURPOSE SHOWN BELOW AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT.
    GRANTED TO: R.H. GIBSON
    PURPOSE: ROAD
    RECORDED: AUGUST 29, 1934 IN BOOK 313, PAGE 437 OF OFFICIAL RECORDS
    AFFECTS: THE EXACT LOCATION AND EXTENT OF SAID EASEMENT IS NOT DISCLOSED OF RECORD

⚠ 19. AN EASEMENT FOR THE PURPOSE SHOWN BELOW AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT.
    GRANTED TO: SAN DIEGO GAS AND ELECTRIC COMPANY
    PURPOSE: PUBLIC UTILITIES, INGRESS, EGRESS
    RECORDED: MARCH 14, 1969 AS DOCUMENT NO. 45460 OF OFFICIAL RECORDS
    AFFECTS: THE ROUTE THEREOF AFFECTS A PORTION OF SAID LAND AND IS MORE FULLY DESCRIBED IN SAID DOCUMENT.

THE FOLLOWING MATTERS AFFECT PARCEL 12

20. THE RIGHTS OF THE PUBLIC TO USE THAT PORTION OF THE HEREIN DESCRIBED LAND LYING WITHIN OLD SURVEY 113 AND OLD SURVEY 133 (PROCTOR VALLEY ROAD) AS SHOWN ON THE ORIGINAL RECORDS IN THE OFFICE OF THE COUNTY SURVEYOR OF SAN DIEGO COUNTY.

⚠ 21. AN EASEMENT FOR THE PURPOSE SHOWN BELOW AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT.
    GRANTED TO: SAN DIEGO GAS AND ELECTRIC COMPANY
    PURPOSE: PUBLIC UTILITIES, INGRESS, EGRESS
    RECORDED: SEPTEMBER 29, 1955 IN BOOK 5812, PAGE 373 OF OFFICIAL RECORDS

REVISED PRELIMINARY GRADING PLAN

OTAY RANCH

VILLAGE 14 AND PLANNING AREAS 16 & 19

County Of San Diego, California

SHEET 17 OF 17

W.O. 2421-0036

R:\1235\&Pln\TM-Grading Plan (Village 14 & PA 19)\PRELIM GRADING PLAN\Village 14 - PRELIM GRADING - Sht 17 (Village 14 & PA 19).dwg[]Dec-18-2

NOT APPLICABLE

3.0 Cover Sheet and General Requirements

- Standard SWQMP Form Table 2 and PDP SWQMP Form Table 3 require the identification of pollutant-generating sources and associated BMPs for development projects.

- In some cases, County staff may request additional, more detailed documentation of source control BMP design details. If requested, applicants must submit a completed copy of this Source Control BMP Worksheet. This requirement can be satisfied either by submitting a copy of BMPDM Attachment E.1 (Source Control BMP Requirements) or equivalent documentation at the County's discretion.

- Submit this documentation using this cover sheet.

- Sources and BMPs must also be shown as applicable on DMA exhibits and construction plans (see Attachment 2).

NOT APPLICABLE

4.0 Cover Sheet

- If this SWQMP implements any requirements of an earlier master SWQMP submittal, a copy of that previous submittal must be attached under cover of this sheet.

5.0 General Requirements

- Each Priority Development Project (PDP) must provide a description of existing site conditions and proposed changes to them, including changes to topography and drainage.
- Has a Drainage Report has been prepared for the PDP?

  ☒ Yes

  - Review of the Drainage Report must be concurrent with the PDP SWQMP.
  - Include the summary page of the Drainage Report with this cover page, and provide the following information:

    Title: Otay Ranch Village 14 and Planning Areas 16/19

    Prepared By: Hunsaker & Associates San Diego Inc.

    Date: 12/2/2019

  - Do not complete the rest of this attachment (also exclude these additional pages from your submittal). Additional documentation of site and drainage conditions is not required unless requested by County staff.

  ☐ No -- Complete and submit the remainder of this attachment below.

5.1 Description of Existing Site Condition

Provide the requested information below for the project site in its existing condition.

a. Current Site Status

Select all that apply to any portion of the site.

- ☒ Existing development
- ☐ Previously graded but not built out
- ☐ Agricultural or other non-impervious use
- ☒ Vacant, undeveloped/natural
- ☐ Demolition completed without new construction

b. Existing Land Cover

Provide the area (in acres or square feet) within all applicable categories of land cover below. The total area should equal that of the entire project site.

	Area (acres or ft^2)
☒ Vegetative Cover	1,276.56 acres
☐ Non-Vegetated Pervious Areas	Click here to enter text.
☒ Impervious Areas	6.94 acres

c. Underlying Soil

Select all soil groups that are present on the site.

NRCS Hydrologic Soil Group(s)			
Type A	Type B	Type C	Type D
☐	☐	☒	☒

5.2 Description of Existing Site Drainage

Describe how storm water runoff is conveyed from the site. At a minimum, address the following:

- Is the existing drainage conveyance ☒ natural or ☐ urban?
- Is runoff from offsite conveyed through the site? ☒ Yes ☐ No
  If yes, quantify all offsite drainage areas, design flows, and locations where offsite flows enter the project site, and summarize how such flows are conveyed through the site.
- Describe the existing project site drainage conveyance network (including any existing storm drains, concrete channels, swales, detention facilities, storm water treatment facilities, natural or constructed channels).
- Identify all discharge locations from the existing project site along with a summary of conveyance system size and capacity for each of the discharge locations. Summarize the pre-project drainage areas and design flows to each of the existing runoff discharge locations.
- Provide additional information as necessary or requested to describe the site drainage.

Description (add pages as necessary to provide all requested information).

Runoff from the Proposed Project Site currently flows to Proctor Valley which acts as a natural drainage way directing flows in a southwesterly direction towards the Upper Otay Reservior. Proctor Valley Road runs parallel to this natural drainage way and currently has minimal, if any, drainage facilities. Runoff from the undisturbed canyons east of Proctor Valley sheet flow over Proctor Valley Road en route to Proctor Valley. In some instances, runoff is conveyed within a storm drain culvert crossing underneath Proctor Valley Road.

The Project area is vast. An existing condition hydrologic analysis was prepared for the site and is included within the Drainage Study for Otay Ranch Village 14 and Planning Areas 16 and 19. The unit hydrograph analysis determined a peak 100-year flow of 12,027 cfs at the discharge point into the Upper Otay Reservior. The tributary area at this discharge point is 10.751 sqaure miles and includes portions of the City of Jamul.

5.3 Description of Proposed Site Development

Provide a general description of the proposed site development, including at a minimum the information requested below. Add pages as necessary.

a. Project description/ Proposed land use and/or activities (project location, development type, size, numbers of units, etc.)

The Proposed Project relates to approximately 1,543 acres of undeveloped land within the 23,000-acre Otay Ranch master planned community, located in southern San Diego County. More specifically, the Proposed Project reflects proposed changes to the Approved Project, which the County Board of Supervisors approved on June 26, 2019 (the "Approved Project"). Both the Approved Project and the Proposed Project Amendment contemplate development within a portion of Otay Ranch Village 14 and Planning Areas 16/19 in the Proctor Valley area of Otay Ranch, as shown on Figure 1.

On June 27, 2019, the owner/applicant, entered into a Dispute Resolution Agreement with the California Department of Fish and Wildlife (CDFW), the United States Fish and Wildlife Service (USFWS), and the County of San Diego (County), pursuant to which GDCI would seek a land exchange with CDFW through a process overseen by the California Wildlife Conservation Board (WCB). The proposed land exchange, if approved by WCB, would require Owner/Applicant to (i) transfer 147.3 acres in Village 14 and 192.4 acres in Planning Areas 16 to CDFW, and (ii) record a conservation easement over 191.5 acres in Planning Area 16, and would require CDFW to transfer 219.4 acres in Village 14 to GDCI. The Proposed Project would then be implemented upon the lands within GDCI's ownership, including those received via the WCB land exchange.

Because the Proposed Project assumes the above-described land exchange between Owner/Applicant and CDFW, it would result in a different development pattern than the Approved Project's development pattern. For this reason, the County will require that Owner/Applicant process a Specific Plan Amendment and a Revised Tentative Map to accommodate the Proposed Project Amendment.

The purpose of this technical analysis is to evaluate whether and to what extent the impacts of the Proposed Project differ from those of (i) the Approved Project and (ii) the EIR Land Exchange Alternative, both of which were assessed in the Final EIR for the Approved Project, certified by the County Board of Supervisors on June 26, 2019 (Final EIR). Note that the while the EIR Land Exchange Alternative and the Proposed Project Amendment both contemplate exchanges of land with CDFW, they differ in important respects.

The Proposed Project proposes 1,266 homes within a Project Area of 1,543 acres. The actual Development Footprint would be approximately 579 acres. Of the 1,266 homes, 1,253 would be located in Village 14 and thirteen (13) would be located in Planning Area 19. As indicated above, the Proposed Project requires a Specific Plan Amendment and Revised Tentative Map, all of which must be approved by the County. The Proposed Project is depicted in Figure 2 and Tables 1-3 Site Utilization Plans and assumes a land exchange between the Applicant and CDFW as depicted in Figure 3. The Proposed Project is further defined in Section 1.0 of the EIR Addendum, which is incorporated herein by reference.

- CEQA Drainage Study, Otay Ranch Village 14 and Planning Areas 16/19 Proposed Project Amendment, Prepared by Hunsaker & Associates (December 19, 2019);
- Priority Development Project (PDP) Storm Water Quality Management Plan (SWQMP), Otay Ranch Village 14 and Planning Areas 16 and 19 Proposed Project Amendment, Prepared by Hunsaker & Associates (December 19, 2019);
- Hydromodification Flow Control Study Otay Ranch Village 14 and Planning Areas 16/19 Proposed Project Amendment, Prepared by Hunsaker & Associates (December 19, 2019);

b. List/describe proposed impervious features of the project (e.g., buildings, roadways, parking lots, courtyards, athletic courts, other impervious features).

The proposed imperviousness includes streets, sidewalks, driveways, pavement, roofs, patios, parking, and athletic courts.

c. List/describe proposed pervious features of the project (e.g., landscape areas):

The site will include pervious surfaces such as landscaped areas, vegetated swales, biofiltration areas, permeable pavement, and areas which will remain in their natural condition.

d. Does the project include grading and changes to site topography? ☒ Yes ☐ No

If yes, describe below.

The overall site drainage towards the Upper Otay Reservoir will remain without diversion. However, drainage patterns within the internal subwatersheds will occur. These changes will be mitigated by the proposed storm drain system consisting of inlets, pipes, cleanouts, energy dissipation, and basins.

5.4 Description of Proposed Site Drainage

A. Changes to Site Drainage -- Does the project include changes to site drainage (e.g., installation of new storm water conveyance systems)? ☐ Yes ☐ No

If yes:

- Describe (1) the proposed project site drainage conveyance network (including storm drains, concrete channels, swales, detention facilities, storm water treatment facilities, natural or constructed channels), and (2) the method for conveying offsite flows through or around the proposed project site.
- Identify all discharge locations from the proposed project site along with a summary of the conveyance system size and capacity for each of the discharge locations.
- Provide a summary of pre- and post-project drainage areas and design flows to each of the runoff discharge locations.

Description (add pages as necessary to provide all requested information).

In the developed condition, the Project Area will drain in the same general direction as existing towards the Upper Otay Reservoir. Developed site topographies range from approximately 595 feet AMSL to 1265 feet AMSL which includes the site of the future water tank located within the northeast portion of the Proposed Project. The higher elevation portions west of the eastern watershed ridge line are not proposed for development. All runoff from the proposed project will discharge to Proctor Valley. Development from the site will not cause any diversion of the 6,880.65 acre sub-watershed area to or from the Upper Otay Reservoir watershed. Onsite developed areas will be conveyed towards water quality and HMP treatment facilities prior to discharging into Proctor Valley. Where feasible and possible, a separate storm drain system will route offsite runoff flow through the site and directly discharge into Proctor Valley rather than comingling with onsite flows which require water quality treatment of the 85th percentile runoff volume. In some instances, natural drainage flows which are being routed around the site will reach the proposed improvements relative to Proctor Valley Road. In those cases, a storm drain or culvert will be constructed under the roadway to convey flows. As the case with the existing condition analysis, a proposed condition unit hydrograph hydrologic analysis was performed due to the vast tributary area of the site and affected areas tributary to the Upper Otay Reservoir (discharge location). The analysis includes onsite detention via the project biofiltration basins and determined that the peak flow decreased from 12,027 cfs to 11,501 cfs. Please refer to the *Drainage Study for Otay Ranch Village 14 & Planning Areas 16/19 Proposed Project Amendment* for associated drainage calculations relative to the proposed development.

6.0 General Requirements

- Use this attachment to document all proposed (1) self-mitigating, (2) de minimis, and (3) self-retaining DMAs. Indicate under "DMA Compliance Option" below which design options will be used to satisfy structural performance requirements for one or more DMA.

DMA Compliance Option	Required Sub-attachments	BMPDM Design Resources
☒ Self-mitigating	• Sub-attachment 6.1	• BMPDM Section 5.2.1
☐ De minimis	• Sub-attachment 6.2	• BMPDM Section 5.2.2
☐ Self-retaining[1]	• Sub-attachment 6.3	• BMPDM Section 5.2.3 (all options)
<u>SSD-BMP Type(s)</u>		
☐ Impervious Area Dispersion	• Sub-attachment 6.3.1	• Fact Sheet SD-B (Appendix E.8)
☐ Tree Wells	• Sub-attachment 6.3.2	• Fact Sheet SD-A (Appendix E.7)

- Submit this cover page and all "Required Sub-attachments" listed for each selected DMA compliance option.
- See the BMPDM sections and appendices listed under "BMPDM Design Resources" for additional explanation of design requirements. Each constructed feature must <u>fully</u> satisfy the requirements described in these resources, and any other guidance identified by the County.
- <u>DMA Exhibits and Construction Plans</u>: DMAs, features, and BMPs identified and described in this attachment must be shown on DMA Exhibits and all applicable construction plans submitted for the project. See Attachment 2 for additional instruction on exhibits and plans.

[1] If "Self-retaining" is selected, also choose the types of Significant Site Design BMPs (SSD-BMPs) to be used. SSD-BMPs are Site Design BMPs that are sized and constructed to fully satisfy all applicable Structural Performance Standards for a DMA.

6.1 Self-mitigating DMAs (complete this page once for ALL self-mitigating DMAs)

Self-mitigating DMAs consist of natural or landscaped areas that drain directly offsite or to the public storm drain system. These DMAs are excluded from DCV calculations.

- Provide the information requested below for each proposed self-mitigating DMA. Add rows or copy the table if additional entries are needed.

DMA #	a. DMA Area (ft^2)	Incidental Impervious Area		Permit # and Sheet #
		b. Size(ft^2)	c. % (b/a*100)	
11	3,035,696			SPA-19-001, TM5616R, STO-19-029
12	859,874			SPA-19-001, TM5616R, STO-19-029

- "DMA #", "DMA Area", and "Permit # and Sheet #" are required for all DMAs listed.
- "Incidental Impervious Area" calculations are required only where applicable (see below).
- Each self-mitigating DMA must <u>fully</u> satisfy all design requirements and restrictions described in BMPDM Section 5.2.1 and any other guidance or instruction identified by the County. Check the boxes below to confirm that all required conditions are satisfied <u>for every DMA listed</u>.

☒ Each DMA is hydraulically separate from other DMAs that contain permanent storm water pollutant control BMPs.

<u>Natural and Landscaped Areas</u>

☒ Each DMA consists solely of natural or landscaped areas, except for incidental impervious areas (see below).

☒ Each area drains directly offsite or to the public storm drain system.

☒ Soils are undisturbed native topsoil, or disturbed soils that have been amended and aerated to promote water retention characteristics equivalent to undisturbed native topsoil.

☒ Vegetation is native and/or non-native/non-invasive drought tolerant species that do not require regular application of fertilizers and pesticides.

<u>Incidental Impervious Areas (if applicable; see above)</u>

Minor impervious areas may be permitted within the DMA if they satisfy the following criteria:

☐ They are not hydraulically connected to other impervious areas (unless it is a storm water conveyance system such as a brow ditch).

☐ They comprise less than 5% of the total DMA. Calculate the % incidental impervious area in the table above (c= b/a). DMAs are <u>not</u> self-mitigating if this area is 5% or greater.

6.2 De Minimis DMAs (complete this page once for ALL de minimis DMAs)

De minimis DMAs consist of areas too small to be considered significant contributors of pollutants and not practicable to drain to a BMP. They are excluded from DCV calculations. Examples include driveway aprons connecting to existing streets, portions of sidewalks, retaining walls, and similar features at the external boundaries of a project.

- Provide the information requested below for each proposed de minimis DMA. Add rows or copy the table if additional entries are needed.

DMA #	DMA Area (ft^2)	Permit # and Sheet #

- "DMA #", "DMA Area", and "Permit # and Sheet #" are required.
- Check the boxes below to confirm that each required condition is satisfied for ALL de minimis DMAs on the site.

☐ Each DMA listed is less than 250 square feet and not adjacent or hydraulically connected to each other.

☐ Each DMA listed <u>fully</u> satisfies all design requirements and restrictions described in BMPDM Section 5.2.2 De Minimis DMAs.

6.3 Self-retaining DMAs using Significant Site Design BMPs

Self-retaining DMAs use Site Design BMPs to fully-retain the entire DCV, at a minimum. Site Design BMPs that fully retain the DCV, at a minimum, therefore replacing the need for a Structural BMP (S-BMP), are classified as Significant Site Design BMPs (SSD-BMPs). To satisfy pollutant control requirements only, self-retaining means retention of the entire DCV. However, under some circumstances, a self-retaining DMA can also satisfy hydromodification management requirements by implementing BMPs that retain a greater volume of runoff.

- Provide the information requested below for each proposed self-retaining DMA. Add rows or copy the table if additional entries are needed.

DMA #	DMA Area (ft²)	BMP Type (choose one per DMA)		Permit # and Sheet #
		Dispersion Area (Att. 6.3.1)	Tree Wells (Att. 6.3.2)

Copy and Paste table here for additional DMAs

- "DMA #", "DMA Area", and "Permit # and Sheet #" are required.
- Select one BMP Type per DMA. Provide detailed documentation for each DMA in Attachments 6.3.1 (Impervious Dispersion Areas) and/or 6.3.2 (Tree Wells) below.
- Each self-retaining DMA must <u>fully</u> satisfy all design requirements and restrictions described in BMPDM Section 5.2.3, applicable BMPDM Appendix E Fact Sheets, and any other guidance or

[2]Applicants wishing to utilize parameters less conservative than listed here must submit modeling to support their proposal. Consult your project manager for more information.
[3]Including the permeable pavement.

instruction identified by the County.

6.3.1 Self-retaining DMAs with Impervious Dispersion Areas

Impervious area dispersion (dispersion) refers to the practice of effectively disconnecting impervious areas from directly draining to the storm drain system by routing runoff from impervious areas such as rooftops (through downspout disconnection), walkways, and driveways onto the surface of adjacent pervious areas. The intent is to slow runoff discharges and reduce volumes. Dispersion with partial or full infiltration results in significant volume reduction by means of infiltration and evapotranspiration. When adequately sized, dispersion can also be used to satisfy both the pollutant control and hydromodification management structural performance standards for a DMA.

- Each self-retaining DMA with impervious area dispersion must fully satisfy all design requirements and restrictions described in BMPDM Section 5.2.3, Fact Sheet SD-B: Impervious Area Dispersion, and any other guidance or instruction identified by the County.
- Documentation of compliance with all applicable conditions must be submitted with this sub-attachment using the Summary Sheet for DMAs with Impervious Area Dispersion on the next page. One version of this Summary Sheet must be completed for each applicable DMA.
- Applicants are responsible to comply with all other applicable requirements, regardless of whether they are included in the summary sheet.
- The following applies if the dispersion area is native soil (SD-B in Appendix E):
    - For pollutant control only, the DMA is considered self-retaining if the impervious to pervious ratio is:
        - 2:1 when the pervious area is composed of Hydrologic Soil Group A
        - 1:1 when the pervious area is composed of Hydrologic Soil Group B
- The following applies if the dispersion area includes amended soil (SD-B in Appendix E):
    - DMAs using impervious area dispersion can be considered to meet both pollutant control and hydromodification flow control requirements if the impervious to pervious area ratio is 1:1 or less and all other design requirements of SD-B are satisfied, including 11 inches of amended soil.
- The following apply if the dispersion area is permeable pavement (SD-D in Appendix E):
    - For pollutant control only, a DMA is considered self-retaining if the ratio of total drainage area (including permeable pavement) to area of permeable pavement is 1.5:1 or less, and all other design requirements of SD-D are satisfied.
    - Hydromodification management performance standards can be satisfied using permeable pavement only if constructed to Structural BMP specifications. In this case, the permeable pavement must be sized and constructed in accordance with the requirements of INF-3.

[2]Applicants wishing to utilize parameters less conservative than listed here must submit modeling to support their proposal. Consult your project manager for more information.
[3]Including the permeable pavement.

Summary Sheet for DMAs with Impervious Area Dispersion (Complete 1 sheet per DMA)

DMA #

A. Minimum Sizing Requirements

Verify that minimum standards are satisfied for the applicable dispersion area type below[2].

Native Soil (Pollutant Control Only) Select one and provide calculations below.

☐ Soil Group A: Ratio I:P is 2:1 or less ☐ Soil Group B: Ratio I:P is 1:1 or less

Impervious Area (ft^2)	Permeable Dispersion Area (ft^2)	Ratio I:P

Amended Soil (Pollutant Control plus Hydromodification Management)

Must satisfy both conditions and provide calculations below.

☐ Ratio I:P is 1:1 or less, AND

☐ 11 inches or more of the top of the pervious area consists of amended soils (Fact Sheet SD-F)

Impervious Area (ft^2)	Permeable Dispersion Area (ft^2)	Ratio I:P

Permeable Pavement (Pollutant Control Only) Provide calculations below.

☐ Ratio DMA area to area of permeable pavement is 1.5:1 or less

DMA Area[3] (ft^2)	Permeable Pavement Area (ft^2)	Ratio DMA:Pavement

B. Minimum Design Criteria

Check the boxes below to confirm that each design criterion has been satisfied for the DMA.

Impervious Areas:

☐ Are graded to ensure area that the full DCV drains to the dispersion area before the runoff discharges from the DMA.

Pervious Dispersion Areas:

☐ Are less than 5% slope and sheet flow over a distance of at least 10 feet from inflow to overflow route.

☐ Have inflow velocities of 3 ft/s or less OR use energy dissipation methods (e.g., riprap, level spreader) for concentrated inflows.

☐ Are densely and robustly vegetated with drought tolerant species.

☐ Consist of soil types capable of supporting or being amended to support vegetation (e.g., with sand or compost). If applicable, media amendments have been tested to verify that they are not a source of pollutants.

☐ Are owned by the project owner and will be dedicated to exclude future uses that might reduce their effectiveness.

[2]Applicants wishing to utilize parameters less conservative than listed here must submit modeling to support their proposal. Consult your project manager for more information.

[3]Including the permeable pavement.

6.3.2 Self-retaining DMAs with Tree Wells

Trees wells can provide a variety of benefits such as interception and increased infiltration of rainfall, reduced erosion, energy conservation, air quality improvement, and aesthetic enhancement. They can also be used to satisfy both pollutant control and hydromodification management performance standards for a DMA.

- Each self-retaining DMA with tree wells must fully satisfy all design requirements and restrictions described in BMPDM Section 5.2.3, Fact Sheet SD-A: Tree Wells, and any other guidance or instruction identified by the County.
- For pollutant control only, the DMA must retain the entire DCV. For hydromodification management, an additional volume must be retained in accordance with the sizing requirements presented in the DCV multiplier table in Fact Sheet SD-A.
- Documentation of compliance with applicable conditions must be submitted using the Summary Sheet for Self-retaining DMAs with Tree Wells on the next page. One version of this Summary Sheet must be completed for each applicable DMA.
- If both pollutant control and hydromodification standards apply, the soil depth of all tree wells in the DMA must be selected before determining the Required Retention Volume (RRV). Each tree well must be constructed to the selected depth. For pollutant control only, tree wells within a DMA may be constructed to different soil depths.
- In most cases tree wells must use Amended Soil per Fact Sheet SD-F. However, Structural Soil is required in some cases (e.g., placing the tree well next to a curb). See Structural Requirements for Confined Tree Well Soil Volume in Fact Sheet SD-A for additional explanation. If applicable, list the DMAs and Tree Well #s below for all tree wells requiring Structural Soil.

DMA #	Tree Wells Requiring Structural Soil (list Tree Well #s)

- The Design Capture Volume (DCV) must be known for each DMA in order to determine the volume to be mitigated by the tree wells. Instructions for DCV calculation are provided in BMPDM Appendix B.1. An automated version of Worksheet B.1 (Calculation of Design Capture Volume) is available at www.sandiegocounty.gov/stormwater under the Development Resources tab.

Summary Sheet for Self-retaining DMAs with Tree Wells (complete one sheet per DMA)

DMA #:	DMA Area (ft^2):

Required Retention Volume (RRV)

a. Design Capture Volume (DCV; ft^3):

b. DCV Multiplier (Fact Sheet SD-A)

Applicable Structural Performance Standards (select one)	Tree well soil depth (inches)	Underlying soil type (A, B, C, or D)	DCV Multiplier
☐ Pollutant control only	Any	All	1.0
☐ Pollutant control plus hydromodification			

c. Required Retention Volume (ft^3) [DCV * DCV Multiplier]

Tree Well Credit Volume (add records or copy this sheet as needed for additional tree wells)

Provide the information below for each tree well or group of tree wells within the DMA. A single entry can be used for any group of tree wells of the same species and soil depth.

Tree species or name		No. tree wells	
Mature Canopy Diameter (ft)		Credit Volume per tree well (ft^3)	
Tree well ID #(s)		Combined Volume (ft^3)	
Tree species or name		No. tree wells	
Mature Canopy Diameter (ft)		Credit Volume per tree well (ft^3)	
Tree well ID #(s)		Combined Volume (ft^3)	
Tree species or name		No. tree wells	
Mature Canopy Diameter (ft)		Credit Volume per tree well (ft^3)	
Tree well ID #(s)		Combined Volume (ft^3)	
Tree species or name		No. tree wells	
Mature Canopy Diameter (ft)		Credit Volume per tree well (ft^3)	
Tree well ID #(s)		Combined Volume (ft^3)	
Tree species or name		No. tree wells	
Mature Canopy Diameter (ft)		Credit Volume per tree well (ft^3)	
Tree well ID #(s)		Combined Volume (ft^3)	

Total Credit Volume (ft3) Add the combined volumes above. Total credit volume must equal or exceed the RRV.	

7.0 General Requirements

- Submit this cover page and all required Sub-attachments for all structural BMPs proposed for the project.
- See the BMPDM sections and appendices listed under "BMPDM Design Resources" in the table below for additional explanation of design requirements. Constructed features must fully satisfy the requirements described in these resources, and any other guidance identified by the County.
- PDPs subject to hydromodification management requirements must also implement structural BMPs for flow control for hydromodification management. Completion of SWQMP Attachment 8 is also required for these BMPs.
- DMA Exhibits and Construction Plans: DMAs, features, and BMPs identified and described in this attachment must be shown on DMA Exhibits and all applicable construction plans submitted for the project. See Attachment 2 for additional instruction on exhibits and plans.
- Structural BMP Certification. All structural BMPs documented this attachment and in Attachment 8 must be certified by a registered engineer in Sub-attachment 7.1.
- Structural BMP Verification. Structural BMP installation must be verified by the County at the completion of construction. Applicants must complete an Installation Verification Form (Attachment 10).

Sub-attachments (check all that are completed)	Requirement	BMPDM Design Resources

7.1 Engineer of Work Certification for Structural BMPs

Project Name Otay Ranch – Village 14 and Planning Areas 16/19
Permit Application Number SPA-19-001, TM-5616R, STP-19-029

CERTIFICATION

I hereby declare that I am the Engineer in Responsible Charge of design of structural storm water best management practices (BMPs) for this project, and that I have exercised responsible charge over the design of the BMPs as defined in Section 6703 of the Business and Professions Code, and that the design is consistent with the PDP requirements of the County of San Diego BMP Design Manual, which is a design manual for compliance with local County of San Diego Watershed Protection Ordinance (Sections 67.801 et seq.) and regional MS4 Permit (California Regional Water Quality Control Board San Diego Region Order No. R9-2013-0001 as amended by R9-2015-0001 and R9-2015-0100) requirements for storm water management. I have read and understand that the County of San Diego has adopted minimum requirements for managing urban runoff, including storm water, from land development activities, as described in the BMP Design Manual.

I certify that this PDP SWQMP has been completed to the best of my ability and accurately reflects the project being proposed and the applicable BMPs proposed to minimize the potentially negative impacts of this project's land development activities on water quality. I understand and acknowledge that the plan check review of this PDP SWQMP by County staff is confined to a review and does not relieve me, as the Engineer in Responsible Charge of design of structural storm water BMPs for this project, of my responsibilities for their design.

☒ In addition to the structural pollutant control BMPs described in this attachment, this certification applies to the Structural Hydromodification Management BMPs described in Attachment 8 (check if applicable).

7.2 Structural BMP Strategy

7.2.1 Narrative Strategy (Continue description on subsequent pages as necessary)

Describe the general strategy for structural BMP implementation at the project site. For pollutant control BMPs, your description must address the key points outlined in Section 5.1 of the BMP Design Manual, and the type of BMPs selected. For projects requiring hydromodification flow control BMPs, indicate whether pollutant control and flow control BMPs are integrated or separate.

This site will include eight regional-type biofiltration basins at the downstream portions of the developed areas and along Proctor Valley Road (PVR) and onsite roadways which will act to address both pollution control and flow control measures. In instances where basins are infeasible (along PVR), proprietary biofiltration devices (Modular Wetland Units) are proposed.

The BMPs were selected based on their effectiveness for pollutant removal and ability to also be used for flow control.
In selection of the biofiltration BMPs, the following steps were taken as presented in Section 5.1 of the BMP Design Manual.

1. Identified the DMAs that are not self-retaining, self-mitigating, or De Minimis.
2. Estimate DCV.
3. Determined that there was not a demand for rainwater harvesting within the development.
4. Determined the feasibility of each basin to infiltrate based on geotechnical engineer recommendations.
5. Computed sizing requirements using the County automated BMP-sizing worksheet.
6. Design BMP for DCV per design criteria and considerations listed in the fact sheets.

The eight onsite biofiltration basins have designated as BF-2-1 through BF-2-6, BF-2-8 and BF-2-10. The prefix, BF-2, designates that the particular treatment facility is either a partial retention or biofiltration facility with Nutrient Sensitive Media Design as defined within the County's BMP Design Manual. The developed areas which were infeasible to be treated via basin facility will be treated by proprietary BMP. This occurs along PVR and tie-in streets. The prefix BF-3 designates that the particular treatment facility is proprietary biofiltration modular facility.

As a pretreatment measure, proprietary flow-through treatment control BMPs are proposed immediately upstream of the three larger biofiltration facilities (BF-2-1, BF-2-2 & BF-2-6). They have been designated as FT-5-1 through FT-5-3 on the DMA exhibit in Attachment 1c.
The eight biofiltration treatment basins will also be sized to address flow control hydromodification for their respective local areas.

Biofiltration basins BF-2-1, BF-2-2 and BF-2-6 have tributary areas of more than 5 acres. In order to address maintenance concerns design features (e.g. flow spreaders) will be implemented to minimize short circuiting of flows in the BMP. Additionally, additional design features for proper performance of the regional BMP will be determined and implemented during the final engineering design and construction phase of the project.

The following summarizes the proposed Village 14 treatment BMP facilities:

- Two roadside proprietary compact biofiltration units along Proctor Valley Road north

Biofiltration areas are proposed as treatment measures for the southern portion of Proctor Valley Road which is south of the major developed areas. The vegetated biofiltration areas

used for treatment control along roadsides will include an engineered fill layer for maximum pollutant removal. This 'biofiltration' subbase will provide a "High" pollutant removal efficiency for pollutants such as coarse sediment and trash and fine particles. Medium pollutant efficiency is attained for dissolved particles

Volume Retention: DMA's 7 & 9 provide compact proprietary biofiltration units. Per calculations in the B.1 through B.3 worksheets the volume retained via the eight biofiltration basins exceeds the cumulative minimum retention requirements of all 10 DMA's, and therefore satisfies the minimum retention requirements.

7.2.2 Structural BMP Summary Table (Complete for all proposed structural BMPs)

- List and provide the information requested below for all pollutant control and hydromodification management BMPs proposed for the project.
- For each BMP listed, complete the Structural BMP Checklist on the next page. Copy the Checklist as many times as needed.

BMP ID #	DMA #	DMA Area (ft^2)	Structural BMP Type: Harvest and Use	Infiltration	Unlined Biofiltration	Lined Biofiltration	Flow-thru treatment	Hydromodification Management [1]	Other	Permit # and Sheet #

7.3 Structural BMP Checklist (Complete once for each proposed structural BMP)

Structural BMP ID # BF-2-1	Permit # and Sheet #
BMP Type	
Infiltration ☐ Infiltration basin (INF-1) ☐ Bioretention (INF-2) ☐ Permeable pavement (INF-3) Unlined Biofiltration ☐ Biofiltration with partial retention (PR-1) Lined Biofiltration ☐ Biofiltration (BF-1) ☒ Nutrient Sensitive Media Design (BF-2) ☐ Proprietary Biofiltration (BF-3)	Harvest and Use ☐ Cistern (HU-1) Flow-thru Treatment (describe below) ☐ With prior lawful approval to meet earlier PDP requirements ☐ Pre-treatment/forebay for an onsite retention or biofiltration BMP[2] ☐ With alternative compliance Hydromodification Management[3] ☐ Detention pond or vault ☐ Other (describe below)
BMP Purpose	
☐ Pollutant control only ☐ Hydromodification control only ☒ Combined pollutant control and hydromodification	☐ Pre-treatment/forebay for another BMP ☐ Other (describe below)
BMP Verification (See BMPDM Section 8.3)	
Provide name and contact information for the party responsible to sign BMP verification forms	TBD

BMP Ownership and Maintenance (See BMPDM Section 7.3 and Attachment 11)				
BMP Maintenance Category	Cat. 1 ☐	Cat. 2 ☒	Cat. 3 ☐	Cat. 4 ☐
Final owner of BMP	☒ HOA	☐ Property Owner	☐ County	☐ Other (describe):
Maintenance of BMP into perpetuity	☒ HOA	☐ Property Owner	☐ County	☐ Other (describe):

Discussion (As needed; Continue on subsequent pages as necessary)

[2] Indicate which onsite retention or biofiltration BMP the pre-treatment/forebay serves.
[3] Hydromodification Management BMPs must be accompanied by BMPs that provide pollutant control.

Structural BMP ID # BF-2-2	Permit # and Sheet #

BMP Type

Infiltration
- ☐ Infiltration basin (INF-1)
- ☐ Bioretention (INF-2)
- ☐ Permeable pavement (INF-3)

Unlined Biofiltration
- ☐ Biofiltration with partial retention (PR-1)

Lined Biofiltration
- ☐ Biofiltration (BF-1)
- ☒ Nutrient Sensitive Media Design (BF-2)
- ☐ Proprietary Biofiltration (BF-3)

Harvest and Use
- ☐ Cistern (HU-1)

Flow-thru Treatment (describe below)
- ☐ With prior lawful approval to meet earlier PDP requirements
- ☐ Pre-treatment/forebay for an onsite retention or biofiltration BMP[2]
- ☐ With alternative compliance

Hydromodification Management[3]
- ☐ Detention pond or vault
- ☐ Other (describe below)

BMP Purpose
- ☐ Pollutant control only
- ☐ Hydromodification control only
- ☒ Combined pollutant control and hydromodification
- ☐ Pre-treatment/forebay for another BMP
- ☐ Other (describe below)

BMP Verification (See BMPDM Section 8.3)

Provide name and contact information for the party responsible to sign BMP verification forms	TBD

BMP Ownership and Maintenance (See BMPDM Section 7.3 and Attachment 11)

BMP Maintenance Category	Cat. 1 ☐	Cat. 2 ☒	Cat. 3 ☐	Cat. 4 ☐
Final owner of BMP	☒ HOA	☐ Property Owner	☐ County	☐ Other (describe):
Maintenance of BMP into perpetuity	☒ HOA	☐ Property Owner	☐ County	☐ Other (describe):

Discussion (As needed; Continue on subsequent pages as necessary)

[2] Indicate which onsite retention or biofiltration BMP the pre-treatment/forebay serves.
[3] Hydromodification Management BMPs must be accompanied by BMPs that provide pollutant control.

Structural BMP ID # BF-2-3	Permit # and Sheet #

BMP Type

Infiltration
- ☐ Infiltration basin (INF-1)
- ☐ Bioretention (INF-2)
- ☐ Permeable pavement (INF-3)

Unlined Biofiltration
- ☐ Biofiltration with partial retention (PR-1)

Lined Biofiltration
- ☐ Biofiltration (BF-1)
- ☒ Nutrient Sensitive Media Design (BF-2)
- ☐ Proprietary Biofiltration (BF-3)

Harvest and Use
- ☐ Cistern (HU-1)

Flow-thru Treatment (describe below)
- ☐ With prior lawful approval to meet earlier PDP requirements
- ☐ Pre-treatment/forebay for an onsite retention or biofiltration BMP[2]
- ☐ With alternative compliance

Hydromodification Management[3]
- ☐ Detention pond or vault
- ☐ Other (describe below)

BMP Purpose
- ☐ Pollutant control only
- ☐ Hydromodification control only
- ☒ Combined pollutant control and hydromodification
- ☐ Pre-treatment/forebay for another BMP
- ☐ Other (describe below)

BMP Verification (See BMPDM Section 8.3)

Provide name and contact information for the party responsible to sign BMP verification forms	TBD

BMP Ownership and Maintenance (See BMPDM Section 7.3 and Attachment 11)

Pre-treatment for BF-2-6

[2] Indicate which onsite retention or biofiltration BMP the pre-treatment/forebay serves.

[3] Hydromodification Management BMPs must be accompanied by BMPs that provide pollutant control.

7.4 Storm Water Pollutant Control Worksheet Calculations

- Use this page as a cover sheet for the submittal of any required worksheets below.
- Complete the checklist to identify which BMPDM Appendix B (Storm Water Pollutant Control Hydrologic Calculations and Sizing Methods) worksheets are included with this attachment.
- See BMPDM Appendix B for an explanation of the applicability of individual worksheets and detailed guidance on their completion.

Worksheet	Requirement
☒ Worksheet B.1 Calculation of Design Capture Volume (DCV)	Required
☒ Worksheet B.2 Retention Requirements	Required
☒ Worksheet B.3 BMP Performance	Required
☐ Worksheet B.4 Major Maintenance Intervals for Reduced-sized BMPs	If applicable
☒ Other worksheets	As required

Automated Worksheet B.1: Calculation of Design Capture Volume (V2.0)

Category	#	Description	i	ii	iii	iv	v	vi	vii	viii	ix	x	Units
Standard Drainage Basin Inputs	1	Drainage Basin ID or Name	BF-1-1	BF-1-2	BF-1-3	BF-1-4	BF-1-5	BF-1-6	BF-3-7	BF-1-8	BF-1-9*	BF-1-10	unitless
	2	85th Percentile 24-hr Storm Depth	0.52	0.52	0.52	0.52	0.52	0.52	0.52	0.52	0.52	0.52	inches
	3	Impervious Surfaces Not Directed to Dispersion Area (C=0.90)	5,011,077	2,332,924	178,705	107,862	162,618	1,817,356	69,594	38,524	71,692	159,589	sq-ft
	4	Semi-Pervious Surfaces Not Serving as Dispersion Area (C=0.30)	4,683,791	2,107,450	87,500	46,626	126,831	1,835,967	41,952	54,773	35,369	381,516	sq-ft
	5	Engineered Pervious Surfaces Not Serving as Dispersion Area (C=0.10)	177,707	82,774	5,627	3,363	5,576	65,829	0	1,537	0	10,020	sq-ft

Attention: Ms. Liz Jackson

Subject: Preliminary Design Infiltration Rates for Proposed Bio-Filtration Basins, Proposed Project Amendment, Otay Village 14 and Planning Areas 16 & 19, County of San Diego, California

Pursuant to your request Advanced Geotechnical Solutions, Inc.'s (AGS) has evaluated the infiltration feasibility in the proposed bio-filtration basins for the Proposed Project Amendment to Otay Village 14 and Planning Areas 16 & 19. AGS previously performed an infiltration feasibility study for the Otay Village 14 and Planning Areas 16 & 19 which included subsurface exploration and site specific infiltration testing (AGS, 2017). Based on our review of the Revised Tentative Map/Preliminary Grading Plan for the Proposed Project Amendment prepared by Hunsaker & Associates, some of the previously proposed basin locations and/or elevations have changed. The current plans indicate eight proposed bio-filtration basins, BF-2-1 through BF-2-6, BF-2-8 and BF-2-10. Previous infiltration testing yielded preliminary design infiltration rates ranging between 0.09 and 0.36 inches/hour utilizing a factor of safety of 2.0. In consideration of the proposed changes to basin location and elevation, revised preliminary infiltration rates recommended for design of each basin are presented in Table 1 below.

TABLE 1
SUMMARY OF PRELIMINARY DESIGN INFILTRATION RATES

Bio-Filtration Basin	Anticipated Geologic Unit	Recommended Preliminary Design Infiltration Rate (in./hr.)
BF-2-1	Older Alluvium	0.100
BF-2-2	Otay Fm. - Fanglomerate	0.050
BF-2-3	Fill/Alluvium	0.025
BF-2-4	Fill/Alluvium	0.025
BF-2-5	Otay Fm. - Fanglomerate	0.050
BF-2-6	Otay Fm. – Fanglomerate/ Santiago Peak Volcanics	0.025
BF-2-8	Fill/Alluvium	0.025
BF-2-10	Santiago Peak Volcanics	0.025

For basins that will be underlain by compacted fill soils, use of select granular soils may be required to achieve the proposed infiltration rates. Dependent upon the final location, size, and depth of the bio-filtration basins, verification of the specific soil/geologic conditions and additional testing may be warranted.

Advanced Geotechnical Solutions, Inc., appreciates the opportunity to provide you with geotechnical consulting services and professional opinions. If you have any questions, please contact the undersigned at (619) 867-0487.

Respectfully Submitted,
Advanced Geotechnical Solutions, Inc.

- Complete this sub-attachment only if flow-thru treatment BMPs are implemented onsite in lieu of retention or biofiltration BMPs. Unless excepted because of a Prior Lawful Approval[4], PDPs must also participate in an alternative compliance program[5].

A. General Description

Describe flow path of storm water from the project site discharge location(s), through urban storm conveyance systems as applicable, to receiving creeks, rivers, and lagoons as applicable, and ultimate discharge to the Pacific Ocean (or bay, lagoon, lake or reservoir, as applicable).

The Village 14 project site is located immediately adjacent to Proctor Valley which directly discharges into the Upper Otay Reservoir. The eastern portion of Planning Area 19 drains towards Jamul Creek. The onsite storm drain which conveys developed flows will be routed through a biofiltration basin prior to discharging into Proctor Valley. Overflow from the Upper Otay Reservoir empties into the Lower Otay Lake (reservoir) whose discharge is monitored by Savage Dam. Any discharge from the Savage Dam will flow west through the Otay River and ultimately empty into San Diego Bay.

B. Water Body Impairments and Priorities

List any 303(d) impaired water bodies[6] within the path of storm water from the project site to the Pacific Ocean (or bay, lagoon, lake or reservoir, as applicable), identify the pollutant(s)/stressor(s) causing impairment, and identify any TMDLs and/or Highest Priority Pollutants from the WQIP for the impaired water bodies:

303(d) Impaired Water Body	Pollutant(s)/Stressor(s)	TMDLs / WQIP Highest Priority Pollutant
Lower Otay Reservior	Ammonia, Color, Iron, Manganese, Nitrogen, Phosphorus	Nitrogen
San Diego Bay	PCBs	Bacteria, Dissolved Copper, Lead, Zinc (Wet Weather)

C. Identification of Project Site Pollutants

Identify pollutants expected from the project site based on all proposed use(s) of the site (see BMP Design Manual Appendix B.6.

8.0 General Requirements

- Completion of this attachment is required for all PDPs subject to hydromodification management requirements (see PDP SWQMP Form Table 5). Do not submit this attachment if exempt from Hydromodification Management requirements. Document the PDP exemption in Attachment 9.
- Submit this cover page and all required Sub-attachments for all structural hydromodification management BMPs proposed for the project.
- Constructed features must fully satisfy the requirements described in applicable BMPDM sections and appendices, and any other guidance identified by the County.
- DMA Exhibits and Construction Plans: DMAs, features, and BMPs identified and described in this attachment must be shown on DMA Exhibits and all applicable construction plans submitted for the project. See Attachment 2 for additional instruction on exhibits and plans.
- Structural BMP Certification. All structural hydromodification management BMPs documented this attachment must be certified by a registered engineer in Attachment 7, Sub-attachment 7.1.
- Structural BMP Verification. BMP installation must be verified by the County at the completion of construction. Applicants must complete an Installation Verification Form (Attachment 10).

Sub-attachments (check all that are completed)
☒ 8.1: Flow Control Facility Design (required)[1] Submit using ☒ the Sub-attachment 8.1 cover sheet provided, or ☐ as a separate stand-alone document labeled Sub-attachment 8.1.
☒ 8.2: Hydromodification Management Points of Compliance (required) Complete the table provided in Sub-attachment 8.2.
8.3: Geomorphic Assessment of Receiving Channels 1. Has a geomorphic assessment been performed for the receiving channel(s)? ☒ No, the low flow threshold is 0.1Q2 (default low flow threshold)
☐ Yes (provide the information below): Low flow threshold: ☐ 0.1Q2 ☐ 0.3Q2 ☐ 0.5Q2
Title: Date: Preparer:
Submit using ☐ the Sub-attachment 8.3 cover sheet provided, or ☐ as a separate stand-alone document labeled Sub-attachment 8.3.
8.4: Vector Control Plan (required if BMPs will not drain in less than 96 hours) ☐ Included with this attachment ☒ Not required

[1] Including Structural BMP Drawdown Calculations and Overflow Design Summary. See BMPDM Chapter 6 and Appendix G for additional design guidance.

Insert Flow Control Facility Design behind this cover page or submit as a separate stand-alone document labeled Sub-attachment 8.1.

Pre-Treatment BMP's FT-1, FT-2 and FT-3 shall be implemented upstream of the larger biofiltration basins BF-2-1, BF-2-2 and BF-2-6 in order to provide enhanced performance and longevity of said biofiltration basins. These pre-treatment devices shall consist of a hydrodynamic separator (CDS Unit or equivalent) to remove larger debris such as trash.

8.2 Hydromodification Management Points of Compliance

- List and describe all points of compliance (POCs) for flow control for hydromodification management.
- For each POC, provide a POC identification name or number, and a receiving channel identification name or number correlating to the project's HMP Exhibit (see Attachment 2).

POC name or #	Channel name or #	POC Description
1	Proctor Valley Creek	POC1 is the northernmost POC for areas within the Village 14 portion of the site. This POC encompasses 616.1 acres of native undeveloped area in existing condition. The western boundary of this POC sub watershed is generally the existing Proctor Valley Road. In proposed condition, the drainage area to this POC is about 311.8 acres of developed area and 304.3 acres of undisturbed or pervious area which will not need to be treated or routed through the proposed water quality basins within POC1. The developed portions of this POC include single- family residences, mixed-use, parks, a school site, a fire station, open space, and community facilities. The two proposed water quality basins tributary to POC1 will be situated within open space areas. The primary basin (Basin #1 [BF-2-1]) will be located at the downstream end of the POC sub-watershed directly adjacent to the Proctor Valley drainage way. Another basin (Basin #6 [BF-2-6]) will be located within the northern portion of the POC east of Proctor Valley Road. This POC includes a dual pipe storm drain system along some parts of Proctor Valley Road to convey the untreated-developed area flows and to convey the offsite flows through the site. The peak developed flows will either be diverted or routed through each basin for water quality treatment and flow control of its respective tributary area. The designed riser outlet structure will include

		flow control discharge orifices and be sized to accommodate peak flows. Both onsite and offsite storm drain systems will confluence immediately downstream of Basin#1 prior to discharging at the POC1 location (west of the P-2 park).
2	Proctor Valley Creek	POC2 is located south of POC1 and is immediately downstream of Basin #2 (BF-2-2). The existing condition tributary area to POC2 consists of about 1,361.4 acres of undisturbed native pervious land east of existing Proctor Valley Road. Similar to POC1, POC2 will include both developed areas as well as undeveloped/unimproved areas. About 1,257.6 acres will remain completely pervious and about 103.8 acres will be developed. The POC2 developed portions in Village 14 will consist of single- family residences, parks, and open space areas. The developed area runoff will be conveyed towards Basin #2 for treatment then confluence with the offsite flows downstream of Basin #2 prior to discharging into Proctor Valley drainage way located immediately west of Proctor Valley Road. The developed flows which were directed into Basin #2 for water quality treatment and flow control will outlet the basin via the designed riser outlet structure which will include flow control discharge orifices.
3	Proctor Valley Creek	The POC3 existing and proposed condition subwatershed was delineated for areas tributary to the point of discharge from proposed Basin #3 (BF-2-3). The HMP analysis for POC3 was prepared to address water quality and HMP compliance related to the widening of and associated improvements to Proctor Valley Road. The

		roadside basin will treat storm water runoff collected by inlets along a portion of Proctor Valley Road. The proposed sewer pump station is also included within this developed sub watershed to POC3.
4	Proctor Valley Creek	The POC4 existing and proposed condition subwatershed was delineated for areas tributary to the point of discharge from proposed Basin #4 (BF-2-4). The HMP analysis for POC4 addresses water quality and HMP compliance related to the widening of and associated improvements to Proctor Valley Road. The roadside basin (Basin #4) will treat storm water runoff collected by inlets along a portion of Proctor Valley Road. This POC also includes some pervious natural areas which will bypass the basin since it does not require any water quality (WQ) treatment.
5	Proctor Valley Creek	POC5 is the southernmost POC. The POC5 existing and proposed condition sub watershed was delineated for areas tributary to the point of discharge from proposed Basin #5 (BF-2-5). The HMP analysis for POC5 addresses water quality and HMP compliance related to the widening of and associated improvements to Proctor Valley Road. The roadside basin (Basin #5) will treat storm water runoff collected by inlets along a portion of Proctor Valley Road. This POC also includes some existing undeveloped areas located north of Proctor Valley Road and east of the Neighborhood 9 portion of Rolling Hills Ranch which is located upstream of POC5. Portions of Rolling Hills Ranch are also tributary to POC5 and were included in both the existing or proposed condition (SWMM) models.

6	Proctor Valley Creek	POC6 is located within the northeast portion of the Proposed Project Amendment within Planning Area 19. The existing area for this POC is undeveloped. When developed, this POC will include undeveloped areas as well as roadway, and a treatment basin (Basin #8, BF-2-8).
7	Proctor Valley Creek	POC7 is located within the northeast portion of the Proposed Project Amendment within Planning Area 19. The existing area for this POC is undeveloped. When developed, this POC will include undeveloped areas as well as roadway, estate residential lots, and a treatment basin (Basin #10, BF-2 -10).

8.3 Geomorphic Assessment of Receiving Water Channels

Insert Geomorphic Assessment behind this cover page or submit as a separate stand-alone document labeled Sub-attachment 8.3.

Not Applicable

Insert Vector Control Plan behind this cover page or submit as a separate stand-alone document labeled Sub-attachment 8.4.

Not Applicable

9.0 General Requirements

- Complete the table below to indicate which compliance pathway was selected in PDP SWQMP Table 6. Include the corresponding sub-attachment with your SWQMP submittal. Other sub-attachments do not need to be included.
- See the BMPDM sections and appendices listed under "BMPDM Design Resources" for additional explanation of design requirements. Constructed features must fully satisfy the requirements described in these resources, and any other guidance identified by the County.
- DMA Exhibits and Construction Plans: CCSYAs and applicable BMPs identified and described in this attachment must be shown on DMA Exhibits and all applicable construction plans submitted for the project. See Attachment 2 for additional instruction on exhibits and plans.

9.1 Documentation of Hydromodification Management Exemption (BMPDM Section 1.6)

- If the PDP is exempt from hydromodification management requirements (see Table 4 Part A.1 of the PDP SWQMP), use this Sub-attachment to document the exemption.
- Select the type of exemption below that applies and provide an explanation of the selection, including maps or other applicable documentation. Additional documentation may be requested by County staff.

Exemption Type per BMPDM Figure 1-2 (select one)
☐ a. The proposed project will discharge runoff directly to existing underground storm drains discharging directly to water storage reservoirs, lakes, enclosed embayments, or the Pacific Ocean.
☐ b. The proposed project will discharge runoff directly to conveyance channels whose bed and bank are concrete lined all the way from the point of discharge to water storage reservoirs, lakes, enclosed embayments, or the Pacific Ocean.
☐ c. The proposed project will discharge runoff directly to an area identified by the County as appropriate for an exemption by the WMAA for the watershed in which the project resides[2].
Explanation (add or attach pages as necessary)

[2] This option must include an analysis of the project using the methodology presented in Attachment E of the Regional Watershed Management Area Analysis.

9.2 Watershed Management Area Analysis (WMAA) Mapping (BMPDM Appendix H.1.1.2)

Watershed Management Area Analysis (WMAA) mapping is a simple way to screen projects to determine the presence of onsite or offsite upstream Potential Critical Coarse Sediment Yield Areas (PCCSYAs). The San Diego County Regional WMAA mapping data can be found on the Project Clean Water website here: http://www.projectcleanwater.org/download/wmaa_attc_data/ .[3]

- Based on the WMAA map and the proposed project design, demonstrate below that both of the following conditions apply to the PDP:

  (a) Less than 5% of PCCSYAs will be impacted (built on or obstructed) by the PDP, and

  (b) All upstream offsite PCCYSAs will be bypassed (see BMPDM Appendix H.3).

A. Mapping Results -- At a minimum, show: (1) the project footprint, (2) areas of proposed development, (3) impacted onsite PCCSYAs, (4) offsite tributary areas[4], and (5) bypass of upstream offsite PCCSYAs.

[3] Applicants may refine initial mapping results using options identified in BMPDM Appendix H.1.2.

[4] Tributary areas must be shown to demonstrate that upstream offsite PCCSYAs do not exist. If bypassing these areas, only the bypass should be shown.

POTENTIAL CRITICAL COARSE SEDIMENT YIELD AREAS

VILLAGE 14 & PLANNING AREAS 16/19

COUNTY OF SAN DIEGO, CALIFORNIA

H&A JOB # 2767-0127

R: \1235\Hyd\ACAD\SWMP\TM – SRP\1235– CCSYA– OTAY 14.dwg[]Dec–02–2019:17:49

B. Explanation -- Provide documentation as needed to demonstrate that (1) impacts to PCCSYAs are below 5%, and (2) upstream offsite PCCYSAs are effectively bypassed. Add pages as necessary.

9.3 Resource Protection Ordinance (RPO) Methods (BMPDM Appendix H.1.1.1)

- Either of two Resource Protection Ordinance (RPO) methods may also be used to demonstrate compliance with CCSYA requirements. Select either option and document the selection below:

  ☐ RPO Scenario 1: PDP is subject to and in compliance with RPO requirements[5]

  - Select if the project requires one or more discretionary permits;
  - Demonstrate that onsite AND upstream offsite CCSYAs will be avoided and/or bypassed.

  ☐ RPO Scenario 2: PDP is entirely exempt/not subject to RPO requirements[6]

  - Select if the project does not require discretionary permits;
  - Demonstrate that all upstream offsite CCSYAs will be bypassed[7].

A. Mapping Results -- At a minimum, show as applicable: (1) the project footprint, (2) areas of proposed development, (3) locations of onsite and upstream offsite CCSYAs, and (4) bypass of all identified CCSYAs.

[5] RPO applicability is normally confirmed during discretionary review. Check with your project manager if you're not sure of your status.
[6] Does not include PDPs utilizing exemption(s) via RPO Section 86.604(e)(2)(cc) or 86.604(e)(3).
[7] This scenario does not impose requirements for onsite CCSYAs.

B. Explanation -- Provide documentation as needed to demonstrate that (1) onsite CCSYAs are avoided and bypassed [if applicable], and (2) upstream offsite CCYSAs are effectively bypassed. Add pages as necessary.

9.4 No Net Impact Analysis (BMPDM Appendix H.4)

- When impacts to CCSYAs cannot be avoided or effectively bypassed, applicants must demonstrate that their project generates no net impact to the receiving water per the performance metrics identified in BMPDM Appendix H.4.
- Use the space below to document that the PDP will generate no net impact to any receiving water.

No Net Impact Analysis (add or attach pages as necessary)

This form must be accepted by the County prior to the release of construction permits or granting of occupancy for applicable portions of a Priority Development Project (PDP). Its purpose is to provide documentation of the final installation of permanent Best Management Practices (BMPs) used to satisfy Structural Performance Standards for the development project. Compliance with these standards reduces the discharge of pollutants and flows from the completed project site. Applicable standards may be satisfied using Structural BMPs (S-BMPs), Significant Site Design BMPs (SSD-BMPs), or both. Applicants are responsible for providing all requested information. Do not leave any fields blank; indicate N/A for any requested item that is not applicable.

INSTALLATION NOTES

1. CONTRACTOR TO PROVIDE ALL LABOR, EQUIPMENT, MATERIALS AND INCIDENTALS REQUIRED TO OFFLOAD AND INSTALL THE SYSTEM AND APPURTENANCES IN ACCORDANCE WITH THIS DRAWING AND THE MANUFACTURERS SPECIFICATIONS, UNLESS OTHERWISE STATED IN MANUFACTURERS CONTRACT.
2. MANUFACTURER RECOMMENDS A MINIMUM 6"LEVEL ROCK BASE UNLESS SPECIFIED BY THE PROJECT ENGINEER. CONTRACTOR IS RESPONSIBLE TO VERIFY PROJECT ENGINEERS RECOMMENDED BASE SPECIFICATIONS.
3. ALL PIPES MUST BE FLUSH WITH INSIDE SURFACE OF CONCRETE. (PIPES CANNOT INTRUDE BEYOND FLUSH).
4. INVERT OF OUTFLOW PIPE MUST BE FLUSH WITH DISCHARGE CHAMBER FLOOR.
5. ALL GAPS AROUND PIPES SHALL BE SEALED WATER TIGHT WITH A NON-SHRINK GROUT PER MANUFACTURERS STANDARD CONNECTION DETAIL AND SHALL MEET OR EXCEED REGIONAL PIPE CONNECTION STANDARDS.
6. CONTRACTOR RESPONSIBLE FOR INSTALLATION OF ALL RISERS, MANHOLES, AND HATCHES. CONTRACTOR TO GROUT ALL MANHOLES AND HATCHES TO MATCH FINISHED SURFACE UNLESS SPECIFIED OTHERWISE.

GENERAL NOTES

1. MANUFACTURER TO PROVIDE ALL MATERIALS UNLESS OTHERWISE NOTED.
2. ALL DIMENSIONS, ELEVATIONS, SPECIFICATIONS AND CAPACITIES ARE SUBJECT TO CHANGE. FOR PROJECT SPECIFIC DRAWINGS DETAILING EXACT DIMENSIONS, WEIGHTS AND ACCESSORIES PLEASE CONTACT MANUFACTURER.

PART 2 DMA and BMP Inventory Information

Use this table to document Structural BMPs (S-BMPs) and Significant Site Design BMPs (SSD-BMPs) for the PDP. All DMAs that are not self-mitigating or de minimis must have at least one Structural BMP or Significant Site Design BMP.

- In Part A, list all Structural BMPs (including both Pollutant Control and/or Hydromodification as applicable) by DMA.
- Complete Part B for all DMAs that contain only Significant Site Design BMPs. SSD-BMPs are Site Design BMPs (SD-BMPs) that are sized and constructed to satisfy Structural Performance Standards for a DMA.
- Documentation of SD-BMPs is not required in this table for any DMA that also contains S-BMPs.
- The information provided for each BMP in the table must match that provided in the Stormwater Quality Management Plan (SWQMP), construction plans, maintenance agreements, and other relevant project documentation.

Table 3: Required Information for Structural BMPs and Significant Site Design BMPs

DMA #	BMP Information			Maintenance Category	Maintenance Agreement or Maintenance Notification Recorded Doc. #	Construction Plan Sheet #	Landscape Plan # & Sheet # (For Vegetated BMPs Only)	FOR DPW-WPP USE ONLY Reviewer concurs that the BMP(s) may be accepted into inventory (date and initial)
	Quantity	Description/Type of Structural BMP	BMP ID #(s)					
Part A Structural BMPs (S-BMPs)								
DMAs 1-6	6	Biofiltraton Basin	BF-2-1, BF-2-2, BF-2-3, BF-2-4, BF-2-5, BF-2-6	2	TBD	TBD	TBD	
DMA 7 & 9	1	Proprietary Biofiltraton	BF-3-7, BF-3-9	2	TBD	TBD	TBD	
DMA 8 & DMA 10	2	Biofiltration Basinn	BF-2-8, BF-2-10	2	TBD	TBD	TBD

PART 3 Required Attachments for All BMPs Listed in Table 3

For ALL projects, submit the following to the County inspector (check all that are attached):

☐ Photographs: Labeled photographs illustrating proper construction of each S-BMP or SSD-BMP.

☐ Maintenance Agreements: Copies of all approved and recorded Storm Water Maintenance Agreements (SWMAs) or Maintenance Notifications (MNs) for all S-BMPs.

Note: All BMPs proposed for County ownership will remain the responsibility of the owner listed on Page 1 until a signed Letter of Acceptance of Completion is received by the DPW Watershed Protection Program.

For Grading and Improvement projects only, ALSO submit:

☐ Construction Plans: An 11" X 17" copy of the most current applicable approved Construction Plan sheets:

- ☐ Grading Plans, AND/OR
- ☐ Improvement Plans, AND/OR
- ☐ Precise Grading Plan(s) (only for residential subdivisions with tract homes), AND/OR
- ☐ Other (Please specify) Click here to enter text.

Note: For each Construction Plan, the sheets submitted must incorporate all of the following:

- ☐ A BMP Table, AND
- ☐ A plan/cross-section of each verified as-built BMP, AND
- ☐ The location of each verified as-built BMP

☐ Landscape Plans: An 11" X 17" copy of the most current applicable Landscape Plan sheets where the BMPs are required to be vegetated, including:

- ☐ The Certification of Completion (Form 407), AND
- ☐ The Certificate of Approval from PDS Landscape Architect

Note: For each Landscape Plan, the sheets submitted must show the location of each verified as-built BMP.

Required only for Verifications for Partial Record Plans

☐ If this is a partial record plan verification, please include the following:

- ☐ A list of previously submitted Verification Forms (Table 2, A)
- ☐ A map of DMAs and BMPs (Table 2, B)

PART 4 Preparer's Certification

By signing below, I certify that the BMP(s) listed in Table 3 of this Verification Form have been constructed and all are in substantial conformance with the approved plans and applicable regulations. I understand the County reserves the right to inspect the above BMPs to verify compliance with the approved plans and Watershed Protection Ordinance (WPO). Should it be determined that the BMPs were not constructed to plan or code, corrective actions may be necessary before permits can be closed.

Note: Structural BMPs (Table 3, Part A) must be certified by a licensed professional engineer.

Please sign and, if applicable, provide your seal below.

Phone Number: (858) 558 4500

Preparer's Signed Name:

Date:

COUNTY - OFFICIAL USE ONLY:

For County Inspectors

County Department: _____

Date verification received from EOW: _____

By signing below, County Inspector concurs that every noted BMP has been installed per plan.

Inspector Name: _____

Inspector's Signature: _____ Date: _____

For Building Division Only

Inspection Supervisor Name: _____

Inspector Supervisor's Signature: _____ Date: _____

PDCI & Building, along with the rest of this package, please provide to DPW WPP:

☐ A copy of the final accepted SWQMP and any accepted addendum

For Watershed Protection Program Only

Date Received: _____

WPP Reviewer: _____

WPP Reviewer concurs that the BMPs accepted in Part 2 above may be entered into inventory.

WPP Reviewer's Signature: _____ Date: _____

11.0 Cover Sheet and General Requirements

- All Structural BMPs must have a plan and mechanism to ensure on-going maintenance. Use the table below to document the types of agreements to be submitted for the PDP and submit them under cover of this sheet.
- See BMPDM Section 7.3 for a description of maintenance categories and responsibilities. Note that since Category 3 and 4 BMPs are County-maintained, they do not require maintenance agreements.

a. Applicability of Maintenance Agreements

Check the boxes below to indicate which types of agreements are included with this attachment.

☐ Maintenance Notification (Category 1 BMPs)

- Exhibit A: Project Site Vicinity; Project Site Map; and a map for each BMP and its Drainage Management Area
- Exhibit B: BMP Maintenance Plan (see below)

☐ Stormwater Maintenance Agreement (Category 2 BMPs)

- Exhibit A: Legal Description of Property
- Exhibit B: BMP Maintenance Plan (see below)
- Exhibit C: Project Site Vicinity Map

Maintenance agreement templates and instructions are provided on the County's website:

www.sandiegocounty.gov/stormwater under the Development Resources tab.

PDP applicants contact County staff to ensure they have the most current forms.

b. Maintenance Plan Requirements

Use this checklist to confirm that each maintenance plan includes the following that as applicable.

☐ Specific maintenance indicators and actions for proposed structural BMP(s). These must be based on based on maintenance indicators presented in BMP Design Fact Sheets in Appendix E and enhanced to reflect actual proposed components of the structural BMP(s).

☐ Access to inspect and perform maintenance on the structural BMP(s).

☐ Features to facilitate inspection (e.g., observation ports, cleanouts, silt posts, or other features that allow the inspector to view necessary components of the structural BMP and compare to maintenance thresholds).

☐ Manufacturer and part number for proprietary parts of structural BMP(s) when applicable.

☐ Maintenance thresholds specific to the structural BMP(s), with a location-specific frame of reference (e.g., level of accumulated materials that triggers removal of the materials, to be identified based on viewing marks on silt posts or measured with a survey rod with respect to a fixed benchmark within the BMP).

☐ Recommended equipment to perform maintenance.

☐ When applicable, necessary special training or certification requirements for inspection and maintenance personnel such as confined space entry or hazardous waste management.

12.0 Alternative Compliance Project (ACP) Requirements NOT APPLICABLE

- This attachment is required for any project proposing to construct an Alternative Compliance Project (ACP) either for crediting toward a concurrently proposed Priority Development Project (PDP) or for the generation of credits to be used in offsetting future PDP compliance deficits.
- This section provides minimum required documentation for proposed ACPs. Consult your project manager for additional required documentation.

Offsite Alternative Compliance Participation Form

PDP INFORMATION	
Record ID:	Click here to enter text.
Assessor's Parcel Number(s) [APN(s)]	Click here to enter text.
ACP Information	
Record ID:	Click here to enter text.
Assessor's Parcel Number(s) [APN(s)]	Click here to enter text.
Project Owner/Address	Click here to enter text.
Is your ACP in the same watershed as your PDP? ☐ Yes ☐ No	Will your ACP project be completed prior to the completion of the PDP? ☐ Yes ☐ No
Does your ACP account for all Deficits generated by the PDP? ☐ Yes ☐ No (PDP and/or ACP must be redesigned to account for all deficits generated by the PDP.	What is the difference between your PDP debits and ACP Credits? *(ACP Credits -Total PDP Debits = Total Earned Credits) Click here to enter text.
