PREPARED FOR: County of San Diego/GDCI Proctor Valley, L.P.

PREPARD BY: Dexter Wilson Engineering, Inc.

DATE: December 2, 2019

SUBJECT: Water Study Update for Otay Ranch Village 14 and Planning

Area 16/19 Proposed Project Amendment

Introduction

This Memorandum reflects proposed changes to the Otay Ranch Village 14 and Planning Areas 16/19 Project that was approved by the San Diego County Board of Supervisors on June 26, 2019 (Approved Project). The changes to the Approved Project would reconfigure the development footprint to consolidate development in Village 14; add 147 units, for a total of 1,266 residential units; and reduce impacts by approximately 230 acres, to 579 acres (the Proposed Project Amendment). Figure 1 in Attachment A, Regional Location Map, shows the regional location of the Approved Project Area and the Proposed Project Amendment Project Area, in the County of San Diego (County).

An Environmental Impact Report (EIR) was prepared for the Approved Project and was certified by the Board on June 26, 2019. The Final EIR analyzed the potential impacts of the Approved Project. The Final EIR also analyzed potential impacts associated with the EIR Land Exchange Alternative, which was one of the alternatives to the Approved Project. The Final EIR is incorporated herein by reference and the results are summarized in Section 3 and mitigation measures are described in Section 5.

The Final EIR analyzed the Approved Project's potential impacts to water service. This Water Technical Memorandum was prepared for the Proposed Project Amendment. The purpose of this analysis is to evaluate whether, and to what extent, the potential impacts of the Proposed Project Amendment to water differ from those of the Approved Project and the EIR Land Exchange Alternative. This technical memorandum includes the following sections: (1) background, (2) Proposed Project Amendment description, (3) summary of the Approved Project's impacts to water service, (4) analysis of the Proposed Project Amendment's impacts to water service, (5) mitigation measures, and (6) conclusion.

For additional context, the following terminology is used in this Technical Memorandum.

Terminology

Approved Project: The project described in Otay Ranch Village 14 and Planning Areas 16/19 Tentative Map 5616, Specific Plan 16-002, and the certified EIR, which the County of San Diego (County) approved on June 26, 2019. The Approved Project permits 1,119 residential units within a Project Area of approximately 1,369 acres. The Development Footprint of the Approved Project is 809 acres.

Conserved Open Space: Conserved Open Space refers to 24.5 acres of land within the Project Area, which, while designated in the Otay Ranch General Development Plan/Otay Subregional Plan (Otay Ranch GDP/SRP) for residential uses within Village 14 and Planning Areas 16/19, will not be developed as part of the Proposed Project Amendment. Instead, the Conserved Open Space will be preserved on site and be (a) added to the Otay Ranch Resource Management Plan (RMP) Preserve (through a future RMP Amendment), (b) managed under a separate RMP, or (c) utilized to mitigate impacts to the City of San Diego Multiple Species Conservation Program Cornerstone Lands. The Conserved Open Space areas are located adjacent to Otay Ranch RMP Preserve and will be conserved by recording a biological open space easement over the land.

Development Footprint: The areas where a given project will cause permanent or temporary ground disturbance. The Development Footprint includes all on-site development, off-site improvements, and impacts resulting from infrastructure and other allowable uses within the Otay Ranch Resource Management Plan (RMP) Preserve.

EIR Land Exchange Alternative: The project alternative identified as the "Land Exchange Alternative" in Chapter 4 of the certified Final EIR. This Land Exchange Alternative contemplated a land exchange with the California Department of Fish and

Wildlife (CDFW) and would develop 1,530 residential units within a Project Area of approximately 2,387.6 acres, with a Development Footprint of 658.3 acres.

Off-Site Improvements: Off-site improvements total approximately 40.1 acres and include Proctor Valley Road, wet and dry utilities, drainage facilities, trails, an off-site sewer pump station in the southern reach of Proctor Valley Road, and off-site sewer facilities to connect to the Salt Creek Interceptor as planned since 1994.

Project Area: The total land area for the Proposed Project Amendment as contemplated in the proposed land exchange between applicant and CDFW.¹ The Project Area consists of approximately 1,283.6 acres currently owned by GDCI Proctor Valley, L.P., the owner/applicant, 219.4 acres currently owned by CDFW, and approximately 40.1 acres of off-site improvements, for a total of 1,543 acres.

Proposed Project Amendment: The Proposed Project Amendment reflects proposed changes to the Approved Project, which would add 147 units for a total of 1,266 residential units and would reduce the Development Footprint by approximately 230 acres, to a total of 579 acres, within a Project Area of 1,543 acres, as shown on Figure 2 in Attachment A and more fully described below in Section 2. The Proposed Project Amendment includes a Revised Tentative Map and Specific Plan Amendment. As contemplated in the Dispute Resolution Agreement, the Proposed Project Amendment assumes and will require a County-initiated amendment to the MSCP County Subarea Plan. Because the amendment to the MSCP County Subarea Plan will be initiated by the County, it is not part of the Proposed Project Amendment.

PV1 and PV3: PV1 and PV3 are areas of the Approved Project located in Village 14 as shown on Figure 3 attached.

Revised Tentative Map: The Revised Tentative Map reflects revisions to the June 26, 2019, Approved Tentative Map #5616 that are necessary to process and implement the land exchange with CDFW and the Proposed Project Amendment in the County.

Specific Plan Amendment: The Specific Plan Amendment reflects revisions to the June 26, 2019, Approved Specific Plan #16-002 that are necessary to process and implement the land exchange with CDFW and the Proposed Project Amendment in the County.

¹ As indicated above, the land exchange necessary to implement the Proposed Project Amendment must be approved by the California Wildlife Conservation Board.

1. Background

The Proposed Project Amendment Project Area comprises approximately 1,543 acres of undeveloped land within the Proctor Valley area of the 23,000-acre Otay Ranch master planned community (see Figure 4 in Attachment A, Proposed Project Amendment Project Area). The Proposed Project Amendment reflects proposed changes to the Approved Project, including a proposed land exchange with the California Department of Fish and Wildlife (CDFW).

On June 27, 2019, the owner/applicant of the Approved Project entered into a Dispute Resolution Agreement with CDFW, the U.S. Fish and Wildlife Service, and the County. Pursuant to this agreement, the owner/applicant would seek a land exchange with CDFW through a process overseen by the California Wildlife Conservation Board. The proposed land exchange, if approved by the Wildlife Conservation Board, would require the owner/applicant to (i) transfer 147.3 acres in Village 14 and 192.4 acres in Planning Area 16 to CDFW, and (ii) record a conservation easement over 191.5 acres in Planning Area 16. In exchange, CDFW would transfer 219.4 acres in Village 14 to the owner/applicant. The Proposed Project Amendment would then be implemented upon the lands within the applicant's ownership, including those received via the Wildlife Conservation Board land exchange. Because the Proposed Project Amendment assumes the above-described land exchange, it would result in a different development footprint than the Approved Project's development footprint. Therefore, a Specific Plan Amendment to the approved Village 14 and Planning Areas 16/19 Specific Plan and a Revised Tentative Map are required processes for the Proposed Project Amendment.

While the Proposed Project Amendment and EIR Land Exchange Alternative both contemplate exchanges of land with the CDFW, the Development Footprints and other aspects differ. It is important to note that the Development Footprint of the Proposed Project Amendment was assessed in the certified Final EIR as part of the Approved Project Development Footprint and as part of the EIR Land Exchange Alternative Development Footprint.

Dexter Wilson Engineering, Inc. prepared the following technical reports for the Final EIR which are incorporated herein by reference:

 Final EIR Chapter 3 Appendix 3.1.8-2 Overview of Water Service dated February 2018.

> Final EIR Chapter 4 Appendix 4.1-15 Land Exchange Alternative Overview of Water Service dated February 2018.

2. Proposed Project Amendment Description and Summary of Amendment/ Revisions

The Proposed Project Amendment proposes 1,266 residential units within a Project Area of 1,543 acres. The Proposed Project Amendment Development Footprint would be approximately 578.6 acres, which would consistent of approximately 513.1 acres within Otay Ranch Village 14, 25.2 acres within Otay Ranch Planning Area 19, and 40.1 acres of off-site improvements (i.e., Proctor Valley Road). Of the 1,266 residential units, 1,253 units would be located in Village 14 (consistent with the Otay Ranch GDP/SRP) and 13 units would be located in Planning Area 19 (consistent with the Otay Ranch GDP/SRP). The Proposed Project Amendment is depicted in Figure 2 in Attachment A, Proposed Project Amendment Site Utilization Plan and summarized in Tables 1 through 3 in Attachment A.

As described above, the Proposed Project Amendment would also include a land exchange between the owner/applicant and CDFW, which would require the owner/applicant to transfer 339.7 acres to CDFW and record a conservation easement over 191.5 acres, and, in exchange, CDFW would transfer 219.4 acres in Village 14 to the owner/applicant to create a consolidated Development Footprint. The proposed land exchange between the applicant and CDFW is depicted in Figure 3 in Attachment A. As defined above, the Proposed Project Amendment requires a Specific Plan Amendment and Revised Tentative Map, which must be approved by the County. The Revised Tentative Map would replace that certain approved Tentative Map TM #5616, approved by the County on June 26, 2019. The Specific Plan Amendment would amend the Specific Plan 16-002 to reflect the Proposed Project Amendment, including the Revised Tentative Map and the land exchange with CDFW.

Proposed Project Amendment Relative to the Approved Project and the EIR Land Exchange Alternative.

The Final EIR evaluated both the Approved Project and the EIR Land Exchange Alternative at a project level of analysis. This Technical Memorandum examines whether the Final EIR, through its analysis of the Approved Project and the EIR Land Exchange Alternative, covered all anticipated impacts of the Proposed Project Amendment. Figure 5 in Attachment A depicts the limits of the development contemplated under the Approved Project, the EIR Land

Exchange Alternative, and the Proposed Project Amendment. Table 4 provides a summary of the components for the Proposed Project Amendment, the Approved Project, and the EIR Land Exchange Alternative. Note that from a geographical perspective, each acre that comprises the Proposed Project Amendment's Development Footprint is located either within the Approved Project Development Footprint or within the EIR Land Exchange Alternative Development Footprint. In other words, no portion of the Proposed Project Amendment Development Footprint is outside the combined Approved Project and EIR Land Exchange Alternative Development Footprints.

TABLE 4 PROPOSED PROJECT AMENDMENT COMPARISON TO APPROVED PROJECT AND EIR LAND EXCHANGE ALTERNATIVE						
Description Proposed Project Amendment Proposed Project Project Alternative						
Development Footprint (Acres)	579	809	658

Offsites (Acres)	40	85	40			
Units	1,266	1,119	1,530			
Proctor Valley Rd.	Same	Same	Same			

3. Approved Project CEQA Findings

To provide the appropriate context to compare the impacts of the Proposed Project Amendment with the impacts anticipated under the Approved Project, this section provides a summary of the Approved Project's Certified EIR Findings related to water impacts. Section 4, below, then describes the impacts of the Proposed Project Amendment and compares the anticipated impacts against the Approved Project and the Environmentally Superior Alternative, the EIR Land Exchange Alternative.

A summary of the key findings from the Approved Project and Land Exchange Alternative reports are provided in the following sections.

A. Approved Project. The Approved Project is within the boundaries of the Otay Water District (OWD) for water service. OWD has existing facilities in the area and has master planned for the extension of facilities through the project site. The proposed facilities within the project will provide a link between the existing 980 Zone system to the southwest and the existing 1296 Zone system to the north.

The Approved Project will receive service from the 980 Zone and 1296 Zone systems. Due to the high elevations in Planning Area 19, there are also 34 lots proposed to be served by forming a new 1460 Zone system. Table 5 summarizes the projected potable water demands for the project by water pressure zone. At the request of the City of San Diego, recycled water is not proposed to be used on the project due to the proximity of the project relative to City of San Diego surface water storage reservoirs.

TABLE 5 APPROVED PROJECT PROJECTED WATER DEMAND SUMMARY			
Pressure Zone	Projected Average Water Demand, gpd		
980	412,050		
1296	351,920		
1460	34,000		
TOTAL	797,970		

In accordance with Senate Bills 610 and 221, OWD prepared and approved a Water Supply Assessment and Verification report for the Approved Project. This study verifies that water supplies are or will be available during normal, single-dry, and multiple-dry years during a 20-year projection to meeting existing and planned future demands, including the demands associated with serving the Proposed Project Amendment.

Water service to the project will be provided by connecting to the existing 980 Zone system within Proctor Valley Road and extending a 20-inch transmission line in Proctor Valley Road. The 20-inch transmission line will supply a 16-inch line that conveys water to a 2.0 million

gallon onsite 980 Zone Reservoir and will also supply a proposed onsite 1296 Zone Pump Station. From the pump station, a 20-inch 1296 Zone transmission line will be installed north in Proctor Valley Road to a point of connection with an existing 10-inch line. These major storage, pumping, and transmission facilities are included in the OWD Master Plan and provide an important link between the District's Central Area and Regulatory Systems.

Within the Approved project, smaller diameter pipelines are installed to meet OWD looping criteria and as necessary to meet fire flow requirements. The 34 lots in Planning Area 19 that cannot be served by the 1296 Zone will be served by a new proposed 1460 Zone. This zone will be formed by connecting to the 1296 Zone system and constructing a 1460 Zone hydropneumatic pump station to supply water to these 34 lots.

B. EIR Land Exchange Alternative. The EIR Land Exchange Alternative would remove development from Planning Areas 16 and 19 and concentrate development within Village 14. Proposed development for the EIR Land Exchange Alternative could be served by the OWD 980 Zone and 1296 Zone systems. Table 6 summarizes the projected potable water demands by pressure zone for the EIR Land Exchange Alternative.

TABLE 6 EIR LAND EXCHANGE ALTERNATIVE PROJECTED WATER DEMAND SUMMARY			
Pressure Zone Projected Average Water Demand, gpd			
980	578,795		
1296	311,420		
TOTAL	890,215		

As with the Approved Project, recycled water use is not proposed for the EIR Land Exchange Alternative due to the proximity of the project relative to City of San Diego surface water storage reservoirs. If the Land Exchange Alternative is implemented, OWD will need to prepare and approve a Water Supply Assessment and Verification report, similar to the one prepared for the Approved Project.

Water service for the Land Exchange Alternative would require the same regional facilities as for the Approved Adara Project. These include 20-inch 980 Zone and 1296 Zone transmission lines in Proctor Valley Road, a 2.0 million-gallon 980 Zone Reservoir, and a 1296 Zone Pump Station. The 980 Zone would be connected to an existing 36-inch line in Proctor Valley Road to the southwest of the project and the 1296 Zone would have a connection to an existing 10-inch 1296 Zone line to the north of the project. These connections and proposed onsite infrastructure provide an important link between the District's Central Area and Regulatory systems.

4. Proposed Project Amendment Impacts to Water

The Proposed Project Amendment can be served by the OWD 980 Zone and 1296 Zone systems. Table 7 summarizes the projected water demands by pressure zone for the Proposed Project Amendment.

TABLE 7 PROPOSED PROJECT AMENDMENT PROJECTED WATER DEMANDS				
Land Use	Quantity	Unit Water Demand	Average Water Demand, gpd	
980 Zone				
R-1	103 units	435 gpd/unit	44,805

R-18	45 units	700 gpd/unit	31,500	
PP-1	2.8 ac	1,900 gpd/ac	5,320	
PP-5	0.9 ac	1,900 gpd/ac	1,520	
PP-6	0.4 ac	1,900 gpd/ac	760	
Irrigated OS	7 ac	1,900 gpd/ac	13,300	
Subtotal 1296 Zone			331,090	
TOTAL			755,060	

Recycled water use is not proposed within the Proposed Project Amendment due to the proximity of the project relative to City of San Diego surface water storage reservoirs. If the Proposed Project Amendment is implemented, OWD will need to prepare and approve a Water Supply Assessment and Verification report, similar to the one prepared for the Approved Project.

Water service for the Proposed Project Amendment would require the same regional facilities as for the Approved Project. These include 20-inch 980 Zone and 1296 Zone transmission lines in Proctor Valley Road, a 2.0 million-gallon 980 Zone Reservoir, and a 1296 zone Pump Station. The 980 Zone would be connected to an existing 36-inch line in Proctor valley Road to the southwest of the project and a connection to and existing 10-inch 1296 Zone line to the north of the project.

Projected water demands for the Proposed Project Amendment as compared to the Approved Project and EIR Land Exchange Alternative are provided in Table 8.

TABLE 8 WATER DEMAND COMPARISON					
	Average Water Demand, gpd				
${f Des}{f cription}$	Proposed Project Amendment Approved Project Alternative				
980 Zone	423,970	412,050	578,795		
1296 Zone	331,090	351,920	311,420		
1460 Zone	0 34,000 0				
TOTAL	755,060	797,970	890,215		

As shown, the projected water demand for the Proposed Project Amendment is lower than the demand projections for the Approved Project and EIR Land Exchange Alternative. Even though the Proposed Project Amendment has more residential units than the Approved Project, the units are generally proposed at a higher density which results in the use of lower per unit water duty factors based on OWD planning criteria.

The proposed water system for the Proposed Project Amendment is provided as Exhibit A in Attachment B of this memorandum. The proposed regional water system does not propose

GDCI Proctor Valley, L.P. December 2, 2019

Page 12

any new facilities or areas of impact that were not already identified for the Approved Project

and EIR Land Exchange Alternative.

5. Certified EIR Mitigation Measures

There are no mitigation measures identified in the certified EIR related to water service. The

Proposed Project Amendment does not require any proposed mitigation measures as a result

of the proposed water system.

6. Conclusion

The Otay Ranch Village 14 and Planning Area 16/19 Final EIR determined that impacts to

water would be less than significant and did not require any mitigation measures for the

Approved Project. Based upon the changes proposed under the Proposed Project Amendment,

no new or greater impacts would occur to water, and no mitigation is required.
