1.1 EXECUTIVE SUMMARY

Coast 2 Coast Environmental, Inc. was retained by Baldwin & Sons, Inc. (on behalf of Lakeview 1, LLC and Lakeview 2, LLC) and Moller Otay Lakes Investment, LLC to conduct an environmental site assessment of Otay Ranch Resort Village 13 (Property.) The Property is located north of Otay Lakes Road, north and east of Lower Otay Reservoir, and east of the Upper Otay Reservoir in unincorporated San Diego County, California. The zip code for the Property is 91935 (Jamul.) Assessor Parcel Numbers (APNs) for the Property include: 598-130-04, 598-140-04, 647-020-14, and 647-030-05 (owned by Lakeview 1, LLC); 598-140-05 (owned by Lakeview 2, LLC); and 598-130-05, 598-130-06, and 598-140-06 (owned by Moller Otay Lakes Investment, LLC.)

The Property consists of eight assessor parcels totaling 1,867.43 acres and is undeveloped land covered with native vegetation except where improved dirt roads and foot paths cross the Property. A site reconnaissance was performed on January 9 and 14, 2020. Improved dirt roads and foot paths across the lower elevations (south end) of the Property were traversed on January 9. An improved road providing views of the upper elevations (north end) of the Property was traversed on January 14.

The Property is unoccupied. Improved dirt roads were generally observed to be in poor condition except for sections in the southern portions of the Property which are accessed by U.S. Department of Homeland Security Immigration and Customs Enforcement (ICE.) Minor amounts of illegal dumping were observed along sections of improved dirt roads on the south end of the Property. The dumping appears limited to construction debris and an abandoned vehicle. The dumping appears to have occurred several years ago as current access to the Property by vehicle is restricted by locked gates along Otay Lakes Road. During the site reconnaissance, an ICE agent was present in a vehicle on the southeast end of the Property (or possibly on the east adjoining site.)

Historically, the Property has been undeveloped land utilized for cattle grazing except for the following uses: a structure in the northwest quarter of Section 6 on a 1903 topographic map which is presumed to have been a residence (it was not visible on a 1928/29 aerial); an approximately 200 acre area on the southwest end of the Property which appears to have been dryfarmed in 1960; and improved dirt roads which have crossed through and adjacent to the Property since at least the 1800s.
Based upon information obtained from Coast 2 Coast’s research and visual observations made during our site visit, we have reached the following conclusions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:
  
  United States Environmental Protection Agency (U.S. EPA) National Priorities List (NPL) (including delisted sites)
  State- and tribal-equivalent priorities list
  U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]
  State- and tribal-equivalent CERCLIS
  U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACTS Facilities
  U.S. EPA RCRA Generators
  U.S. EPA Emergency Response Notification System (ERNS)
  Federal Institutional Control (IC) or Engineering Control (EC) Registries
  State- and tribal-equivalent IC and EC Registries
  State Leaking Underground Storage Tank Program (LUST) and tribal equivalent
  State Registered Underground Storage Tank (UST) and tribal equivalent
  State Solid Waste Information System (SWIS) and tribal equivalent
  State and tribal Voluntary Cleanup Program (VCP) sites
  State and tribal Brownfields sites

- Property APNs appear on the State CPS-SLIC and CERS databases and USEPA FINDS databases. An explanation of these databases may be found in Sections 4.2 and 4.3. These listings are the result of the County Department of Environmental Health (DEH) reviewing prior Phase I ESAs which included Property APNs being considered for acquisition by the County Parks and Recreation Department as open space preserve. (Some of the APNs referenced in these reports have been superseded by the current APNs.) Issues of further environmental concern were not found during DEH’s review of the reports.

- Tactical Air Operations located at 13551 Otay Lakes Road (which adjoins the southeast end of the Property across Otay Lakes Road) appears on the State Aboveground Storage Tank (AST) list and State CERS. The facility has a CUPA permit and may store up to 4,500 gallons of jet fuel in tanker trucks. The site is hydraulically downgradient of the Property and reports of leaks or spills were not found.

- Two additional sites within the designated ASTM radii of the Property appear on one or more of the other lists provided by various government agencies. While the presence of these sites in the vicinity of the Property may constitute an environmental risk to the Property, evidence was not found during the course of our assessment which indicated that the Property has been adversely impacted by these sites nor that they represent an imminent threat to the Property.

- Structures were not observed on the Property.
Hazardous waste was not observed on the Property. Some scattered illegal dumping of construction debris and household solid waste was observed near improved dirt roads on the south end of the Property, but the materials did not appear to be hazardous. The dumped materials appear to have been on-site for quite some time. Locked gates along Otay Lakes Road currently prevent access to the improved dirt roads on the Property.

Coast 2 Coast’s review of historical information sources did not reveal evidence of recognized environmental conditions (RECs) in connection with the historical use of the Property. While there was one mention of possible mining on the Property in the 1880s by Frank Kimball, another resource confirming this activity was not found. Evidence of mines on historical topographic maps and aerial photographs was also not found.

High voltage electrical transformers were not found on the Property.

A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.

RECs were not found during this assessment in connection with the current use of the Property.

Though not necessarily rising to the level of a REC the following environmental issues were noted on the Property:

- A water well is located on the west end of the Property (approximately on the south end of the proposed R-2 residential neighborhood.) The well was observed to be capped.

- A 1960 aerial depicts possible dryfarming on the southwest end of the Property where residential neighborhoods, a school, and other community uses are proposed as part of the Village 13 development. Possible cultivation of the Property was not observed on aerial photographs dated 1953 and earlier and 1964 and later.

Based upon Coast 2 Coast’s review of the information presented in the report, and our resulting conclusions, we recommend the following:

- If there are no plans to use the water well as part of the proposed redevelopment of Village 13, the well should be destroyed under permit from the County of San Diego Department of Environmental Health Land and Water Quality Division (DEH.)

- Due to proposed redevelopment of the southwest end of the Property for a school, residences, and parks, the area observed on a 1960 aerial as possibly having been dryfarmed should be assessed for pesticides, herbicides, and metals to ensure proper worker protection and soil management during excavation activities. DEH Site Assessment & Mitigation Division offers a Voluntary Assistance Program to provide oversight in such cases.

Furthermore, prior to development of an educational facility (School S-1) the school district responsible will be required to submit a preliminary endangerment assessment to the State Department of Toxic Substances Control (DTSC.) It is recommended that sampling and
assessment of the school parcel be completed to meet DTSC’s requirements for contaminants of concern associated with historic cultivation of land for agricultural purposes.

- It is Coast 2 Coast’s opinion that further environmental assessment of this Property, beyond those items listed above, is not warranted at this time.
2.0 INTRODUCTION

2.1 Property Location and Legal Description

Name/Address: Otay Ranch Resort Village 13
North of Otay Lakes Road
Jamul (unincorporated), California 91935

County: San Diego

Owner and Assessor Parcel Number or Other Legal Description:

A legal description for each of the following parcels is provided in a preliminary title report included in Appendix E.

Lakeview 1, LLC: 598-130-04, 598-140-04, 647-020-14, and 647-030-05 (Referred to as Parcels A and B in the title report.)

Lakeview 2, LLC: 598-140-05 (Referred to as Parcels C, D, and E in the title report.)

Moller Otay Lakes Investment, LLC: 598-130-05, 598-130-06, and 598-140-06 (Referred to as Parcels F, G, and H in the title report.)

2.2 Purpose

Coast 2 Coast Environmental Inc. performed a Phase I Environmental Site Assessment of Otay Ranch Resort Village 13 (Property.) The Property is located north of Otay Lakes Road, north and east of Lower Otay Reservoir, and east of the Upper Otay Reservoir in unincorporated San Diego County, California. The zip code for the Property is 91935 (Jamul). This assessment was performed under contract with Baldwin & Sons, Inc. (on behalf of Lakeview 1, LLC and Lakeview 2, LLC) and Moller Otay Lakes Investment, LLC, at the direction of Mr. Eric Johnston, Senior Project Manager, Baldwin & Sons, Inc. Coast 2 Coast’s services were authorized by Mr. Stephen Haase, Senior Vice President of Baldwin & Sons on June 19, 2018 (Contract #785) and Mr. Nicholas Lee, Vice President of Baldwin & Sons on January 14, 2020 (Change Order#1), and Mr. Chuck Miller, Environmental Manager of Moller Otay Lakes Investment on January 21, 2020.

The assessment of this Property was performed at the direction of Baldwin & Sons, Inc. in conjunction with its efforts to conduct “all appropriate inquiry (AAI) into the previous ownership and uses of the Property consistent with good commercial or customary practice”. The purpose of performing AAI is to identify “recognized environmental conditions (RECs)” associated with past and/or present operations at the Property or adjoining sites which may pose liability for Baldwin & Sons, Inc., Lakeview 1, LLC, Lakeview 2, LLC, Moller Otay Lakes Investment, LLC, and County of San Diego. By completing this step in the due diligence process, Baldwin & Sons, Inc., Lakeview 1, LLC, Lakeview 2, LLC, Moller Otay Lakes Investment, LLC, and County of San Diego satisfy one of the requirements to qualify for the "innocent landowner defense” under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 101(35).
2.3 Scope of Services
The assessment was performed in conformance with all of the components of the ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The assessment included, but was not necessarily limited to, the activities listed below:

- A reconnaissance of the Property to observe and assess characteristics of potential environmental concern.
- Observation of adjoining sites and the surrounding area to observe and assess characteristics of potential environmental concern which may impact the Property.
- Interviews with current and past owners, operators and occupants of the Property for the purpose of gathering information regarding the potential for contamination at the Property.
- Review of regulatory agency files and interviews with government agency officials to identify and assess any listings of regulatory permits, registrations, enforcement actions, contaminated sites, etc. likely to affect the Property.
- Review of historical resources to identify previous uses and occupancies of the Property since the Property was first developed or 1940, whichever is earlier.
- Visual inspection or use of other documentation to render an opinion as to the existence of asbestos, lead-based paint (interior and exterior), lead in the drinking water, and the potential for radon exposure.
- Development of a report to include discussion of the findings of the above tasks.

2.4 Significant Assumptions and Data Gaps
Significant assumptions concerning the Property were not made during this assessment except for the following:

- Lacking Property-specific information on the ground water gradient at the Property, it is assumed that the gradient mimics the topographic gradient.
- Information supplied by others is assumed to be correct and accurate.

2.5 Limitations
The conclusions and recommendations presented in this report are based upon reasonable visual reconnaissance of the Property and research of available materials within the scope and budget of the contract. The information presented is relevant to the dates of Coast 2 Coast’s Property visit and should not be relied upon to represent conditions at later dates.

The opinions expressed herein are based on information obtained during Coast 2 Coast’s effort and on Coast 2 Coast’s experience. If additional information becomes available, we request the opportunity to review the information and modify Coast 2 Coast’s opinions, if necessary.

Coast 2 Coast’s services have been provided using that degree of care and skill ordinarily exercised, under similar circumstances, by environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional opinions presented in this report.
Coast 2 Coast Environmental, Inc. is not responsible for the conclusions, opinions, or recommendations made by others based on this information.

2.6 Exceptions to ASTM Standard Practice E1527-13
Past owners and tenants were not interviewed.

The above exception is not considered to be significant in arriving at our findings and conclusions.

2.7 Special Terms and Conditions
Special terms and conditions which limited access to reasonably ascertainable information concerning the Property were not required by Lakeview 1, LLC, Lakeview 2, LLC, and Moller Otay Lakes Investment, LLC.

2.8 User Reliance
This report has been prepared on behalf of, and for the exclusive use of Baldwin & Sons, Inc., Lakeview 1, LLC, Lakeview 2, LLC, Moller Otay Lakes Investment, LLC, and County of San Diego. The contents of this report may not be relied upon by any party other than Baldwin & Sons, Inc., Lakeview 1, LLC, Lakeview 2, LLC, Moller Otay Lakes Investment, LLC, and County of San Diego without the express written consent of Coast 2 Coast Environmental, Inc.
3.0 Information Provided by Client

3.1 Owner, Property Manager and Occupant Information
The current owner of the Property is Lakeview 1, LLC, Lakeview 2, LLC, and Moller Otay Lakes Investment, LLC. (Refer to Section 2.1 for a description of the parcels owned by each entity.)

The Property is managed by Baldwin & Sons, Inc. Mr. Eric Johnston is Senior Project Manager with Baldwin & Sons.

Mr. Chuck Miller is Environmental Manager for Moller Otay Lakes Investment, LLC.

Mr. Johnston and Mr. Miller completed Owner/User Questionnaires which are included in Appendix E.

The Property is not currently occupied.

3.2 Title Records, Environmental Liens and Activity and Use Limitations
Mr. Johnston provided a preliminary title report for Otay Ranch Village 13 was prepared by First American Title Company on February 7, 2020. Mr. Johnston said he requested First American Title include a search for environmental liens and activity and use limitations (AULs.) First American Title did not report finding environmental liens and AULs.

3.3 Specialized Knowledge
Mr. Johnston and Mr. Miller were not aware of environmental liens, AULs or issues and events of further environmental concern on the Property.

3.4 Valuation Reduction for Environmental Issues
Mr. Johnston and Mr. Miller believe the current assessed value for the Property is within the fair market value range for the Property. They are not aware of environmental issues which may have affected the value of the Property.

3.5 Other Information
Mr. Johnston and Mr. Miller were not aware of other issues of environmental concern associated with the Property.
4.0 RECORDS REVIEW

4.1 Physical Setting

4.1.1 Topographical Characteristics
The Property is located in the east ½ of the northeast ¼ of Section 36 of Township 17 South, Range 1 West; all of Section 31 except a small portion of the southwest ¼ and all of Section 32, Township 17 South, Range 1 East; and the eastern two-thirds of the north ½ of Section 6, the north ½ of Section 5, and approximately ½ of the northwest ¼ of Section 4, Township 18 South, Range 1 East San Bernardino baseline and meridian on the Jamul Mountains, California 7.5 minute United States Geological Survey (USGS) Topographic Map, which was reviewed for surface hydrologic and topographic characteristics.

The topography of the Property is mountainous on the north end and hilly on the south end with the regional topographic gradient tending to the south toward the Lower Otay Reservoir. Site elevation ranges from approximately 1,700 feet above mean sea level (amsl) on the north end of the Property to approximately 500 feet amsl along Otay Lakes Road. Hydraulic flow is generally in a down-gradient direction, usually toward the nearest surface water body. Surface drainage on the Property is anticipated to flow to the south-southwest via five unnamed, seasonal creeks which are located on the Property and drain toward the Lower Otay Reservoir. Lower Otay Reservoir is located south of Otay Lakes. The road generally defines the southern border of the Property. Flood plain zoning for the Property is Zone X, an area of minimal flood hazard.

4.1.2 Geological Setting
The Property is located in the Peninsular Ranges physiographic province of southern California. According to a geologic map of the area (Tan, 2002) the site area is underlain by metavolcanic rocks and Tertiary sedimentary rocks. The metavolcanic rocks are named the Santiago Peak Volcanics, a somewhat metamorphosed sequence of Upper Jurassic volcanic and volcaniclastic rocks underlain by the Southern California Batholith, which is of mostly Cretaceous age. The Tertiary sedimentary rocks, which overlie the older Santiago Peak Volcanics, are classified as Otay formation (Oligocene to Miocene) and consist of sandstone, siltstone, claystone and fanglomerate. No ultramafic or similar rocks are mapped in the Jamul Mountains quadrangle or in other nearby areas; the potential for the presence of naturally-occurring asbestos (NOA), therefore, is very low.

4.1.3 Soil Characteristics
As described by the United States Department of Agriculture (USDA) Natural Resources Conservation Service there are at least seven types of surface soil on the Property (USDA, 1973). A brief description of these soils and their permeability classification are listed below.

<table>
<thead>
<tr>
<th>Soil Type</th>
<th>Permeability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diablo-Olivenhain complex, 9 to 30% slopes (DoE)</td>
<td>Slow</td>
</tr>
<tr>
<td>This soil is found on uplands and consists of deep clays derived from soft, calcareous sandstone and shale.</td>
<td></td>
</tr>
</tbody>
</table>
Friant rocky fine sandy loam, 9 to 30% slopes (FxE)  
This soil is found on mountainous uplands and consists of fine sandy loams that formed in material weathered from fine-grained metasedimentary rock.  
Moderately rapid

Friant rocky fine sandy loam, 30 to 70% slopes (FxG)  
Description same as previous soil.  
Moderately rapid

Olivenhain cobbly loam, 9 to 30% slopes (OhE)  
This soil is found on dissected marine terraces and consists of deep cobbly loams formed in old gravel and cobbly alluvium.  
Moderate

Redding cobbly loam, 9 to 30% slopes (ReE)  
This soil is found on dissected terraces and consists of steep gravelly loams that formed in old mixed cobbly and gravelly alluvium.  
Moderate

San Miguel-Exchequer rock silt loams, 9 to 70% slopes (SnG)  
This soil is found in mountainous areas and consists of Deep silt loams with a clay subsoil that are derived from metavolcanic rock  
Slow to moderate

4.1.4 Hydrogeological Characteristics
The Property is in the Savage Hydrologic Subarea of the Dulzura Hydrologic Area of the Otay Hydrologic Unit of the San Diego Hydrologic Basin (10.31.) Beneficial uses of the groundwater within the Savage Hydrologic Subarea include agricultural, municipal and industrial. Depth to groundwater in this area is estimated to be approximately 300 feet or more below ground surface based on the estimated depth of a water well found on the southwest end of the Property during a previous site reconnaissance. Groundwater flow in the Property area is estimated to generally follow the topographic gradient which is to the south-southwest.

Potable water is not currently provided to the Property area.

4.2 Standard Environmental Record Sources
Coast 2 Coast Environmental reviewed a search of environmental records conducted by Environmental Data Resources, Inc. (EDR). A copy of EDR’s report is located in Appendix D. The following standard environmental records sources were reviewed as specified for the Property, adjoining and nearby sites. Next to each source is its abbreviation as it appears in the database. An explanation of each record source is provided in EDR’s beginning on Page GR-1 which immediately follows the Map Findings.

Information was not found during this assessment which indicated “orphan” sites (sites not plotted because of insufficient geo-coding information) which may appear on the above-listed databases had impacted the Property.

4.4 Historical Use of the Property

4.4.1 Previous Environmental Reports

Copies of the following previous environmental reports for portions of the Property are either publicly available via the County of San Diego Department of Environmental Health web site or were previously prepared by Coast 2 Coast Environmental for Baldwin & Sons, Inc.

A summary of each report and its current relevance to environmental conditions at the Property is provided below. A copy of each text and relevant appendices are included in Appendix F of this current report.

- **Phase I Environmental Site Assessment, Parcel 99, Otay Ranch, February 7, 2000, Snyder Consulting**

  The north portion of Parcel 99 was assessed in accordance with ASTM Standard E1527-97. Figure 3 in Snyder Consulting’s report depicts Parcel 99 as an area currently within APNs 595-090-05 and 595-090-06. The assessed area included 340 acres.

  The primary historical resources reviewed during this assessment included aerial photographs and an interview with a former ranch overseer. Aerial photography did not indicate that Parcel 99 area had been developed between 1928 and 2000. During the assessment, Snyder Consulting interviewed Mr. Jerry Adams, Otay Ranch ranch overseer. Mr. Adams grazed longhorn cattle on the Parcel 99 land from 1989 through 1999. He was not aware of insecticides or herbicides having been applied to the assessed area.

  Snyder Consulting accessed Parcel 99 by hiking along improved dirt roads. Snyder observed that Parcel 99 was undeveloped and unoccupied at the time of the site reconnaissance. Snyder Consulting did not observe chemicals, hazardous materials and waste or underground and aboveground storage tanks on the parcel.

  Snyder Consulting did not find recognized environmental issues and did not recommend additional assessment of the assessed area.

- **Village 13 Open Space Preserve Land, North of Otay Lakes Road, Chula Vista, California 91935, May 17, 2016 and January 31, 2018, Prepared by Coast 2 Coast Environmental for Lakeview 2, LLC (May 17, 2016) and Baldwin & Sons, Inc. (January 31, 2018)**

  The 2016 report was an assessment of 121.55 acres (portion of APN 598-140-05.) The 2018 report assessed 270 acres (portion of APN 598-140-04 and all APN 598-140-05.) Both reports were prepared in accordance with ASTM Standard E1527-13. Historical
information sources did not reveal evidence of recognized environmental conditions (RECs) in connection with the historical use of the Property.

At the time of each site reconnaissance the assessed area was undeveloped and unoccupied. Solid waste, hazardous waste or illegally dumped debris was not observed. RECs were not found during this assessment in connection with the current use of the Property.

Coast 2 Coast did not recommend that additional assessment be conducted on the Property.

- **Other Prior Assessments**

  Coast 2 Coast Environmental, Inc.’s Principal Assessor, Marybeth Norgren, has previously completed Phase I ESAs on portions of the Property currently being assessed. A 2003 Phase I ESA was prepared while Ms. Norgren was employed by another firm. The 2003 assessment included approximately the northern 75% of the Property area currently being assessed. RECs were not found during this assessment in connection with the historical or current use of the Property.

  Between 2005 and 2007, Coast 2 Coast prepared a Phase I ESA of the Property currently being assessed (more or less.) The report was prepared under attorney client privilege on behalf of another client. In 2009 and 2010, Coast 2 Coast prepared a Phase I ESA for another client of APNs 598-130-05 and 598-130-06. Publicly available historical resources obtained for these prior assessments have been incorporated into the current assessment where EDR’s data did not provide similar information for the same year. Environmental issues noted in these two prior assessments are discussed during the current assessment and are not repeated here.

4.4.2 Chronological Review

A search of selected and readily available historical records was performed and interviews conducted with people having knowledge of the Property's history, in an effort to find if past use of the Property or activities conducted on, or in the vicinity of the Property could have adversely impacted the Property.

In summary, the Property has been undeveloped land utilized for cattle grazing except for the following uses: a structure in the northwest quarter of Section 6 on a 1903 topographic map which is presumed to have been a residence (it was not visible on a 1928/29 aerial); an approximately 200 acre area on the southwest end of the Property which appears to have been dryfarmed in 1960; and improved dirt roads which have crossed through and adjacent to the Property since at least the 1800s.

The historical resources used in this assessment, along with Coast 2 Coast’s findings, are presented below in chronological order. Attempts were made to find information on five-year intervals but data gaps may exist if information was not reasonably ascertainable for each interval.

Prior to 1900: In 1829, the west portion of the Property (what is currently APN 598-130-5 and approximately the western 80% of APN 598-130-06) became part of Rancho Janal
when it was granted to Jose Antonio Estudillo, brother of Maria Magdalena Estudillo, the owner of Rancho Otay. The remaining east portion of the Property was not part of a rancho. However, the current “eastern nose” of the Property is defined by its border with Rancho Jamul. This nose shaped boundary was a result of Rancho Jamul obtaining ownership of Jamul Creek which is still adjacent to the southeast corner of the Property. The primary use of the ranchos was to raise cattle for the hide trade. The Estudillos were absentee ranchers who lived in the pueblo of Old Town San Diego.

On May 4, 1846, the Estudillo family’s ownership of Rancho Janal was reaffirmed by Governor Pio Pico. After California became a state, the Land Act of 1851 required the Estudillo family to prove its ownership of Rancho Janal. Heirs of Jose Antonio Estudillo filed a claim to Rancho Janal in 1852 and it was not until June 13, 1872 when Jose G. Estudillo, son of Jose Antonio Estudillo, received a Federal Land Patent signed by President Grant. In 1873, Victoria Dominquez, inherited both Janal and Otay Ranchos after Maria Victoria Estudillo’s death. Rancho Janal has also been known as Otay Dominguez and appears as such on U.S. Geological Survey topographic maps. The Estudillo family continued to use the ranches to grow barley and graze cattle.

In 1882, Frank and Warren Kimball received title to Rancho Janal. The History Center at University of San Diego posted a history of Otay Valley which states that Frank Kimball developed mines on Rancho Janal. The narrative continues on by stating that in 1889, the mines on Rancho Janal were sold to John D. Spreckels. (During the same time period, an attempt was made to mine materials to produce portland cement within a mile of the Property on Rancho Jamul. The venture failed due to the cost of shipping the material from Rancho Jamul to downtown San Diego.) Mr. Kimball also had a brick factory to the north in Sweetwater Valley. It is likely that if mining occurred on the Rancho Janal it was likely the extraction of a natural material used in the building industry. This is the only period where information was found during this assessment indicating that mining had occurred on the Property. By 1894, title to Rancho Janal had been granted to Elisha Spurr Babcock. The dam forming the Lower Otay Reservoir was completed in 1897. The reservoir was much smaller than the one which currently exists and was located more than ½ mile southwest of the Property. Evidence of hazardous materials use on the Property was not found during this period.

1900 to 1920: The Babcocks appear to have continued to own Rancho Janal during this period. The dam which formed the Upper Otay Reservoir was completed in 1901. Mr. Babcock was known to be an avid sportsman and he built a sports lodge on the south end of the Upper Otay Reservoir which later became the home of the Birch family and was known as Rancho del Otay and is located in the northeast corner of Rancho Otay (Estudillo.) This site is named on various U.S. Geological Survey topographic maps (beginning with a 1955 edition.) A 1903 topographic map depicts buildings on the west adjoining site which are likely associated with the sports lodge. The map also depicts a short dirt road on the southwest end of the Property (NWC of Section 6) which connects a structure on the Property to Otay Lakes Road. The map also depicts a different alignment of Otay Lakes Road than currently exists on the southwest end of the Property. The road passed on the north side of the hill on the southwest end of the Property. (Currently, the
road is south of the hill.) A portion of that historic road alignment still exists as an improved dirt road on the southwest end of the Property. The 1903 map does not depict symbols of environmental concern on the Property such as wells or mining pits. In 1916, the dam for the Lower Otay Reservoir collapsed. Flooding occurred to the south-southwest of the Property. A new dam was completed by 1918. Evidence of hazardous materials use on the Property was not found during this period.

1920: Mr. Babcock died in 1922. Rancho Janal was sold in 1926 to Henry Fenton. (Fenton had acquired Western Salt Company in 1922 after creditors foreclosed on Elisha Babcock.) A 1928/1929 aerial photograph depicts the Property as undeveloped land. The Otay Lake Reservoirs and Otay Lakes Road generally appear as they currently exist. Several seasonal creeks are visible across the Property. The structure identified on the 1903 topographic map was not obvious on this aerial. Evidence of hazardous materials use on the Property was not found during this period.

1930: Beginning in 1936, Mr. Stephen Birch began purchasing property in and around Ranchos Otay and Janal. Though Mr. Birch had made his fortune as a mining engineer in Alaska and was chairman of Kennecott Copper Corporation, information was not found during this assessment indicating his purchase of the Property and surrounding lands was due to mining interests. (The story of Otay Ranch included in the Otay Ranch General Development Plan states that Mr. Birch had vacationed in the area in the 1920s and liked it.) Altogether Mr. Birch purchased 35,000 acres of land including the Property. His family included his wife, Mary Celine Marshall Rand, a daughter, Mary, born in 1917 and a son, Stephen, Jr., born in 1918. The family lived at Rancho del Otay and their 29,000 acre ranch originally operated under the name Otay Agricultural Corporation until being renamed United Enterprises. Upon formation of United Enterprises, Mr. Birch, Sr. named his son, Stephen, Jr., as the President and his daughter, Mary, as Vice President. The Stephen and Mary Birch Foundation was formed in 1939. A combination of Birch family members, the foundation and United Enterprises appear on various historical title documents for the Property.

The Birch’s ranchland was used for growing lima beans, hay, and grain and cattle ranching. (The ranch’s branding mark was the same used by Magdalena Estudillo.) Based on comments from Mr. Adams, a former ranch supervisor who was interviewed in January 2000 during a previous Phase I ESA, it appears that cattle ranching was likely the Birch’s primary use for the Property throughout their ownership. Evidence of hazardous materials use on the Property was not found during this period.

1940: In 1940, Mr. Birch died and Miss Mary Birch inherited the ranch, United Enterprises, and Rancho del Otay. (Mr. Stephen Birch, Jr. inherited the family’s New Jersey home and did not have an active role in managing the family’s San Diego County holdings. He died in 1970.) A 1943 topographic map does not depict structures on the Property. One improved dirt road leads to a spring on the near the northeast corner of the Property (NEC of Section 32.) The former alignment of Otay Lakes Road which cuts through the west side of the Property is not depicted on the map (but continues to be depicted on aerials.) The map does not depict features of environmental concern such as wells or mining pits on
or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1945: 1949 aerial photographs do not depict agricultural use or other development of the Property. Two ponds or small reservoirs are visible on the Property. The improved dirt roads on the west side of the Property appear unchanged compared to the 1928 aerial. Additional improved dirt roads on the east half of the Property are visible. These improved dirt roads still currently exist. The edge of Rancho del Otay is visible on the west adjoining site between the upper and lower reservoirs. Evidence of hazardous materials use on the Property was not found during this period.

1950: 1953 aerial photographs do not depict significant changes to the Property compared to the 1949 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1955: In 1955, Miss Mary Birch married Mr. Patrick R. Patrick and they resided at Rancho del Otay. The Patricks did not have children. A 1955 topographic map does not depict significant changes to the Property compared to the 1943 map. A reservoir has been labeled in the NWC of Section 6. Evidence of hazardous materials use on the Property was not found during this period.

1960: A 1960 aerial photograph depicts the southwest end of the Property (where Park 1, School 1, Public Safety 1, Multiuse 1 and 2, and Neighborhoods R-7 and R-8 are currently planned) possibly cultivated for dry farming. A typical dryfarmed crop was barley. (Lima bean production was discontinued across the Birch’s ranch in 1949, after a bindweed morning glory infested the fields.) In conjunction with dry farming, it is possible, but unlikely, that fertilizer, pesticides, and/or herbicides were used on the Property. A third pond is visible south of the reservoir on the westerly half of the Property. 1964 aerial photographs again depict the Property as undeveloped land. Evidence of hazardous materials use on the Property was not found during this period except for possibly the use of agricultural chemicals.

1965: A 1968 aerial photograph does not depict significant changes to the Property compared to the 1964 photograph. Another pond is visible immediately north of Otay Lakes Road and south of the reservoir pond. These two ponds share the same southerly draining seasonal creek. A four-wheel drive road has been graded across the north end of the Property and north adjoining site and ends at Horseshoe Peak. Evidence of hazardous materials use on the Property was not found during this period.

1970: Mr. Patrick died in 1971. 1971 aerial photographs do not depict significant changes to the Property compared to the 1968 aerial photograph. A 1971 photorevised topographic map is consistent with the 1971 aerial. Structures are not depicted on the Property. Both on the 1971 aerial and topographic map an air landing strip has been developed on the site south of the southeast end of the Property. Evidence of hazardous materials use on the Property was not found during this period.
1975: A 1975 photorevised topographic map has labeled the improved dirt road across the north end of the Property and north adjoining site as a “Jeep Trail.” The Jeep Trail ends at the summit of Horseshoe Peak at the center north edge of the Property. 1979 aerial photographs do not depict significant changes to the Property compared to the 1971 photographs. Two objects are visible in the vicinity of the proposed HOA-1 Facility and appear to be water tanks. About 500 feet south of the objects a small area has been cleared. Another pond is visible about 2,000 feet west-northwest of the objects. Evidence of hazardous materials use on the Property was not found during this period.

1980: A November 1983 aerial photograph does not depict significant changes on the Property compared to the previous photographs. The water tanks previously observed were not visible in this photograph. Mrs. Mary Birch Patrick died in November 1983 and she named Mrs. Rose Patek as co-executor of her estate along with Southern California First National Bank. The estate included controlling interest in United Enterprises. During the 1980s, United Enterprises began planning for the development of Otay Ranch. In 1984 or 1985, City National Bank replaced Southern California First National Bank as the co-executor of the estate. Evidence of hazardous materials use on the Property was not found during this period.

1985: 1985 aerial photographs do not depict significant changes to the Property compared to the 1983 aerial. The resolution of these aerials more clearly depicts improved dirt roads and foot paths that cross through the Property. On November 4, 1988, United Enterprises granted the Property to First American Title Insurance Company (Document #88-0567316) which in turn granted the Property to Baldwin Vista Associates L.P. on December 7, 1988 (Document #88-0629805). Baldwin Vista Associates was a company owned by James and Alfred Baldwin. 1989 aerial photographs do not depict significant changes to the Property compared to the 1985 photograph except that the current four-wheel drive tract that cuts east-west through the middle of the Property had been graded. In addition, the four-wheel drive tract along the north border of the Property had been extended east of Horseshoe Peak. Due to topography, the tract continues east mostly on the north adjoining site and not the Property. A four-wheel drive tract has been added on the west side of the Property leading to the top of the hill where a water well is located. (The water well is capped.) Mr. Adams said that in 1989 he began using the Property for cattle grazing. Evidence of hazardous materials use on the Property was not found during this period.

1990: In 1993, Baldwin Vista Associates, L.P. amended its partnership name to Otay Vista Associates, L.P. (Document #93-0310558) and again in 1994 to The Otay Ranch L.P. (Document #94-0522559). 1994 aerial photographs do not depict significant changes to the Property compared to the 1989 photograph except that a cattle feeding station has been constructed on the west end of the Property. Mr. Adams said he continued to graze cattle on the Property during this period. A 1994 topographic map depicts the “4WD” dirt road along the north border of the Property having been extended east-northeast. The map also shows the alignment of the dirt tract on the Property which was the former alignment of Otay Lakes Road. Evidence of hazardous materials use on the Property was not found during this period.
1995: 1996 aerial photographs do not depict significant changes on the Property compared to the previous photographs. Magnification of the cattle feeding area on the 1996 photograph, shows the cattle feeding shed and two water tanks. The Baldwin Company declared bankruptcy in July 1995 but they retained the Property as part of the bankruptcy settlement. In August 26, 1997, Otay Ranch L.P. granted the Property to South Bay Project, LLC (Document #97-0411918) which on the same day transferred the Property to Otay Project, LLC (Document #97-0411919) which was still a company controlled by the Baldwins. On July 30, 1999, Otay Project, LLC granted the Property to Otay Project, L.P. (Document #99-0527467.) Mr. Kim Kilkenny told Snyder Consulting during its 2000 Phase I ESA that cattle grazing on the Property ended in 1999. Evidence of hazardous materials use on the Property was not found during this period.

2000: 2002 aerial photographs do not depict significant changes to the Property. Evidence of hazardous materials use on the Property was not found during this period.

2005: 2005 aerial photographs do not depict significant changes to the Property. In 2009, Mr. Robert Cameron, then with The Otay Ranch Company, told Coast 2 Coast that the cattle feed station canopy and water tanks were removed from the Property in 2007 and the nearby water well was capped in 2009. 2009 aerial photographs do not depict significant changes to the Property.

Between September and December 2009, multiple grant deeds were recorded for various Property APNs. In September 2009, Otay Project, L.P. granted interest in the following Property APNs: 598-130-01, 598-130-03, 598-140-01, 647-020-08, 647-020-09 and 595-090-03 to Avalanche Partners, LLC (Document #2009-0506309); portions of APNs 598-130-01, 598-130-03, and 598-140-01 and all of 647-020-08, 647-020-09, 647-020-12, and 647-030-05 to Lakeview 1, LLC (Document #2009-0508601); and portions of APNs 598-130-01, 598-130-03, and 598-140-01 and all of 647-020-08, 647-020-09, 647-020-12, and 647-030-05 to Lakeview 2, LLC (Document #2009-0508602.) In October 2009 Otay Project, L.P. granted interest in a portion of 598-010-01 and 598-130-03 to Raindrop Group, LLC (Document #2009-0553299.) In December 2009, Avalanche Group, LLC and Raindrop Group, LLC granted interest in Property APNs 598-130-01, 598-130-03, 598-140-01, 595-090-03, 647-020-08 and 647-020-09 to Otay Village (San Diego) ASLI V, L.L.P.(Document#2009-0668044.) Also in December 2009, Raindrop Group, LLC granted interest in Property APNs 595-090-03 and 598-130-03 to Otay Village (San Diego) ASLI V, L.L.P. (Document#2009-0668046.) Evidence of hazardous materials use on the Property was not found during this period.

2010: In 2010, several of the APNs which changed ownership in 2009 were split and/or combined to create the APNs which currently exist. 2012 aerial photographs do not depict significant changes to the Property. In 2012, Otay Project, L.P. granted interest in a portion of the Property APN 598-140-05 to Lakeview 2, LLC (Document #2012-0803692.) In 2014, Otay Village San Diego ASLI V, L.L.P. granted interest in a portion of the Property (APNs 598-130-05, 598-130-06, and 598-140-06) to Moller Otay Lakes Investment, LLC (Document #2014-0159131.) Evidence of hazardous materials use on the Property was not found.
2015: 2016 aerial photographs do not depict significant changes to the Property. Evidence of hazardous materials use on the Property was not found.

### 4.4.3 Historical Sources Reviewed

Historical sources between 1829 and the present were reviewed and included the following:

**Building Permits:** The Property is within an unincorporated area of the County of San Diego. The County of San Diego Development Services Department maintains computerized records of building permits dating back to 1987 and descriptions of purged building permits dating for the period 1972 to 1986. As there has been no building activity on the Property since 1972 and because there are no street addresses for the Property, building permit records were not searched.

**City Directories:** City directory listings for the Property were not found. Some listings were found for the south adjoining site currently occupied by Skydive San Diego with the oldest listing found in 1970.

**Chain-of-Title/Assessor Records:** Coast 2 Coast reviewed a preliminary title report for the Property prepared by First American Title. Mr. Johnston said he requested that First American include a search for environmental liens and activity & use limitations. The County of San Diego Tax Assessor requires written permission from the Property owner to review tax files and therefore the files are not readily accessible within the scope and time constraints of this assessment. Coast 2 Coast reviewed readily accessible ownership information for the Property during the current assessment and during prior assessments on the County Recorder’s computerized database which generally has information for parcels dating back to the early 1970s if a corresponding Document #, APN, and grantor/grantee is known.

**Previous Assessments:** Historical resources reviewed during the previous assessments described in Section 4.4.1 were incorporated into the above chronology. In particular, the previous assessment provided access to a 1994 aerial photograph and interviews with Mr. Jerry Adams, a former ranch supervisor on the Property from 1989 to 1999. Coast 2 Coast has also previously interviewed Mr. Robert Cameron, former Executive Vice President of The Otay Ranch Company.

**Sanborn Maps:** EDR reported that Sanborn maps were not available for the Property area.
Other Documents: Refer to Section 12.3 for web pages and articles reviewed for this assessment and prior assessments.

4.5 Historical Use of the Adjoining Sites

Specific historical research was not conducted for the adjoining sites and surrounding area. However, in the process of researching historical data for the Property, the following historical information was obtained for the adjoining sites:

North: The site adjoining the Property to the north has remained undeveloped mountainous land. Access to this adjoining area appears to have always been limited. The improved dirt road graded along the north border of the Property and the north adjoining site in the mid-1960s and extended further east in the late 1980s is the only access to this site that was observed in historical resources reviewed for this assessment. Issues of further environmental concern associated with the past use of these adjoining sites were not found.

East: The site adjoining the Property to the northeast has been undeveloped mountainous land dating back at least 150 years. Rancho Jamul was established adjacent to the southeast corner of the Property in 1829. The portion of Rancho Jamul immediately adjoining the Property is mountainous land. Jamul Creek also passes through Rancho Jamul. These two characteristics indicate the area of the rancho nearest the Property was not occupied for a specific purpose during the years the ranch was actively used. Issues of further environmental concern associated with the past use of these adjoining sites were not found.

South: Bordering the south edge of the Property, a road connecting San Diego with Jamul has existed since at least the time of the ranchos and likely longer. A 1903 topographic map depicts this road initially passing through the southwest corner of the Property and then along the southern border of the Property. However, with the redevelopment of the reservoirs following the 1916 flood, the portion of the road that crossed through the southwest end of the Property was realigned more or less along its current route adjacent to the south border of the Property. (The majority of the historical alignment of the road passing through the southwest end of the Property has remained an improved dirt road on the Property.)

In 1896, Elisha Babcock and John Spreckels combined their water interests to form the Southern California Mountain Water Company. In 1897, this company completed construction of the Lower Otay Dam which created a reservoir that was ¾ -1 mile south-southwest of the Property. However, the dam was built without a spillway and in January 1916 floods washed away the Lower Otay Dam. By 1918 the dam was rebuilt and enlarged and the as a result the Lower Otay Reservoir expanded to its current capacity. The name of the dam was changed to Savage Dam. The ownership of the reservoirs was transferred to the City of San Diego sometime after 1918. Since the transfer, the City has continued to own the land south of Otay Lakes Road.

The only other development observed south of the Property is the John Nichol’s Field Landing Strip, a dirt packed runway which was constructed on City-owned land sometime between
1968 and 1971. The site adjoins the southeast “nose” of the Property. The landing strip and associated buildings have been improved over the years since it was initially development. This site is downgradient of the Property and information was not found indicating the underground storage tanks for fuel have been stored on the site. The site has used aboveground storage tanks for fuel. Records of spills or other unauthorized releases were not found. Issues of further environmental concern associated with the past use of these adjoining sites were not found.

**West:** In 1901, the Upper Otay Dam was built. The dam and its associated reservoir continue to adjoin the northern end of the west border of the Property. This reservoir was originally built as an emergency reserve for the Lower Otay Reservoir. However, beginning in 1959 and continuing through the present, it has been used as a fish hatchery and recreational fishing area for Florida-Strain largemouth bass.

The northwest finger of the Lower Otay Reservoir has adjoined the southern end of the west border of the Property since 1918. The former Rancho del Otay homestead originally developed by Babcock as a sports lodge and later occupied by the Birch family has been located west of the location of the Upper Otay Reservoir dam since it was developed in the early 1900s. The homestead site still owned by the Stephen & Mary Birch Foundation does not directly adjoin the Property.

The remainder of the west adjoining site has included undeveloped mountainous land along the banks of the reservoirs. Issues of further environmental concern associated with the past use of these adjoining sites were not found.

In addition, the surrounding area was historically undeveloped mountainous land or ranch land used for cattle grazing and agricultural production of grains, hay or lima beans. Information was not found during this assessment indicating that these past uses impacted the environmental quality of the Property.
5.0 PROPERTY DESCRIPTION AND SITE RECONNAISSANCE

5.1 Property and Vicinity General Characteristics

Lot Size: 1,867.43 acres

Current Zoning: The Property includes zoning outlined in the Otay Ranch General Development Plan, Otay Subregional Plan, Volume 2. In general, Village 13 has been specified as a Resort Site.

Roads: Paved roads were not observed crossing through the Property. There are several improved dirt roads crossing through the Property. Many of the dirt roads have not been maintained in the last decade and even four-wheel drive access is limited to the southern end of the Property.

The following roads are adjacent to the borders of the Property:

South and West: Otay Lakes Road

5.2 Structures, Other Improvements and Utilities

Site Improvements: The Property is not currently improved.

Other Structures: Sheds, awnings and other secondary structures were not observed on the Property.

Hardscaped Areas: Paved areas were not observed on the Property.

Landscaped Areas: Landscaping was not observed on the Property. Native vegetation observed during the site reconnaissance appeared to be in good condition and did not appear to be damaged or stressed in a manner which could be attributable to the presence of contamination.

Water Retention Areas: Pits, lagoons, and swimming pools were not observed on the Property. Improved dirt roads and stormwater control measures to protect Otay Lakes Road have created a few ponds on the Property. The ponds appeared in good condition and did not appear to be damaged or stressed in a manner which could be attributable to the presence of contamination.

Utilities: The Property is not currently served by water, sewer, gas or electric utilities.

Heating & Cooling Systems: Heating and cooling systems requiring fuel were not observed on the Property.
5.3 Site Reconnaissance Methodology and Limiting Conditions

On January 9 and 14, 2020, Marybeth Norgren conducted a site reconnaissance of the Property to find if current usage or activities on the Property have created, or have the potential to create, an environmental impairment to the Property. Improved dirt roads and foot paths across the lower elevations (south end) of the Property were traversed on January 9. An improved road providing views of the upper elevations (north end) of the Property was traversed on January 14. The results of the site reconnaissance are presented below.

A site reconnaissance typically begins with a guided tour of the interior of the buildings on the Property. During the site reconnaissance an emphasis is placed on viewing areas where activities likely to use and generate hazardous materials occur such as maintenance and repair areas, boiler rooms and manufacturing areas. In addition, accessible common areas and a representative sample of tenant (occupant) spaces are observed. Information gathered during interviews and records review is used during the site reconnaissance to assist in locating improvements and features of environmental concern; however, identification of conditions and uses is limited to what can be visually and/or physically observed during the site reconnaissance. Demolition to access areas is not conducted during a site reconnaissance. Areas requiring personal protective equipment other than sturdy shoes and protective eyewear are not accessed.

The site reconnaissance continues by touring the exterior of the Property buildings and viewing the interior of any secondary structures such as sheds. The site reconnaissance is completed by viewing the Property from all adjacent public thoroughfares and commercial properties (where possible).

During this assessment, access to the Property was authorized by Baldwins & Sons. During the current assessment, the Property appeared to be completely accessible and limitations were not placed on Property access.

5.4 Observed Use of the Property and Current Condition

The Property is unoccupied. Improved dirt roads were generally observed to be in poor condition except for sections in the southern portions of the Property which are accessed by U.S. Department of Homeland Security Immigration and Customs Enforcement (ICE.) Minor amounts of illegal dumping were observed along sections of improved dirt roads on the south end of the Property. The dumping appears limited to construction debris and an abandoned vehicle. The dumping appears to have occurred several years ago as current access to the Property by vehicle is restricted by locked gates along Otay Lakes Road. During the site reconnaissance, an ICE agent was present in a vehicle on the southeast end of the Property (or possibly on the east adjoining site.)

Tenants using or generating hazardous materials were not observed.

In general the Property was observed to be in good condition.

On-site activities observed during Coast 2 Coast’s assessment of the Property did not appear to represent an environmental hazard to the Property.

A Property Plan (Figure 2) depicting the general configuration of the Property as well as pertinent site observations is included in Appendix A. Photographs of the Property are included in Appendix B.
5.5  **Interior and Exterior Observations**
Coast 2 Coast looked for the following improvements and features on the Property and whether the use, treatment, storage, disposal or generation of hazardous substances and petroleum products had occurred on the Property.

**Drains and Sumps:**
Floor drains, floor sinks, trench drains, sumps and clarifiers were not observed on the Property.

**Odors:**
Strong, pungent or noxious odors were not detected during the assessment.

**Oil and Gas Pipelines and Wells**
Map W1-7 prepared by the State of California Division of Oil, Gas and Geothermal Resources did not show oil wells within a one-mile radius of the Property.

**Pest Control:**
The Property does not use regularly-scheduled pest control services.

**Potential PCB-Containing Equipment:**
Transformers and other potential PCB-containing equipment were not observed on the Property.

**Septic Systems and Wells:**
Septic systems were not observed on the Property.

One water well was observed approximately where the south end of Neighborhood R-2 will be located. When Coast 2 Coast first observed the well in 2005, it was not capped. Based on the time it took a stone to hit water, it is estimated that the depth to the water in the well is greater than 200 feet below ground surface. By 2009 the well had been capped and the cap was observed to still be secure during the current site reconnaissance.

**Stains and Corrosion:**
Floors, walls and ceilings were observed for evidence of staining and corrosion caused by sources other than standing water. Evidence of stains or corrosion by hazardous substances was not observed.

**Stained Soil and Pavement:**
Visual observations were made of the soil and paved areas to find discolorations or surface staining which could be indicative of contaminant discharge.

Significant soil and pavement stains were not observed on the Property.

**Hazardous Substances or Petroleum Products:**
Hazardous substances and petroleum products were not observed on the Property.
Drums and Other Containers:
Additional drums (≥ 5 gallons) or other containers for hazardous substances and petroleum products were not observed on the Property.

Storm Drains:
Storm water control improvements along Otay Lakes Road were observed.

Staining around the drains due to the improper disposal of hazardous substances and waste was not observed.

Surface Anomalies/Depression:
Visual observations were also made to find the presence of environmentally unusual and/or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, waste dump sites, leach fields or other subsurface activities.

Surface anomalies and depressions were not observed on the Property.

Surface Drainage on Site:
Surface drainage across the Property appears to flow to the south-southwest via seasonal drainages. Biological studies for Village 13 evaluate wetlands and are not summarized here.

Surface Drainage Obstructions:
During Coast 2 Coast's site reconnaissance it was observed that the Property is protected from surface run-off from adjoining sites by topography.

Underground and Aboveground Storage Tanks:
Underground and aboveground storage tanks were not observed on the Property.

Waste Disposal:
The following vendors provide waste disposal services to the Property:

Trash Collection: No service

Hazardous Waste Disposal: The Property does not currently generate hazardous waste.

Due to the vacant status of the Property, there does not appear to be regular trash disposal service for the Property. Solid waste disposal containers were not observed. Improper disposal of solid waste on the Property was limited to a few areas of illegal dumping of construction debris, household furniture, scattered trash, and an abandoned vehicle along improved roads at the south end of the Property.
Wastewater:
Wastewater or other liquid (other than storm water) was not observed to be discharging into a drain, ditch, underground injection system, or stream on or adjacent to the Property.

5.6 Current Uses of Adjoining Sites
The present land usage of the adjoining sites was also observed to assess their potential to adversely impact the Property. These observations were made “off-site” and in most cases did not involve entering the adjoining site. The results of these observations are presented below:

North: The sites adjoining the Property to the north include eight APNs owned by developers or public agencies. The sites have either been designated as open space preserve or are undeveloped and likely intended to be designated as open space to offset development elsewhere in the region. Owners of the various parcels include the City of San Diego; County of San Diego; United States Government; GDCI Proctor Valley, L.P.; and Otay Land Company, LLC. An improved dirt road weaves back and forth between these sites and the northern edge of the Property. During the site reconnaissance, people were observed to be using the road for recreational hiking and exercise. Visual observations of these parcels did not indicate that current activities on these adjoining parcels had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

East: The sites adjoining the Property to the east includes three APNs owned by the State of California. The sites are undeveloped, mountainous land that slopes to the south toward Jamul Creek and Otay Lakes Road. (Jamul Creek crosses under Otay Lakes Road adjacent to the southeast corner of the Property and does not pass through the Property.) Visual observations of these parcels did not indicate that current activities on these adjoining parcels had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

South: The sites adjoining the Property south of Otay Lakes Road include two APNs owned by the City of San Diego. The western parcel includes land associated with the Lower Otay Reservoir. There is an embankment between Otay Lakes Road and the water in the reservoir. The eastern parcel includes John Nichol’s Field Airport, a dirt landing strip, which is leased by the City. A letter on file with County DEH states that since 2000 Air Adventures Skydving, Inc. has leased this site and that since 2006 Tactical Air Operations, Inc. has sublet the site and operated on site. The business has a CUPA permit from DEH to store jet fuel in a tanker truck stored on site (which is considered an aboveground storage tank.) The facility is permitted to store up to 4,500 gallons of fuel. The address used by Tactical Air Operations is 13531 Otay Lakes Road. Visual observations of these sites did not indicate that current activities on these adjoining sites had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

West: The sites adjoining the Property to the west include two APNs owned by the City of San Diego. The more northerly parcel is undeveloped land surrounding the Upper Otay Reservoir. The more southerly parcel includes land west of Otay Lakes Road surrounding the northwest
bay of the Lower Otay Reservoir. Visual observations of these parcels did not indicate that current activities on these adjoining parcels had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

*APN 598-140-02:* This is a 20-acre parcel in the center of the east side of the Property which is owned by Scott Satterla and Dagmar Satterla since 1997. It is undeveloped and unoccupied. Assessor/Recorder records list Albert Gordon Satterla and Darlene Marie Satterla as the owners prior to 1997. Visual observations of these parcels did not indicate that current activities on these adjoining parcels had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

### 5.7 Area Reconnaissance

A vehicular reconnaissance of the surrounding area in the immediate vicinity of the Property was conducted to observe, in very general terms, the current land use of the sites in the area and to assess if this use poses an environmental threat to the Property. With the exception of the aircraft landing strip adjoining the southeast end of the Property, land usage in the general vicinity of the Property includes undeveloped land similar to the Property. These uses did not appear to pose an environmental threat to the Property.
6.0 INTERVIEWS
Records of communication for interviews and agency contacts completed during this assessment are included in Appendix E.

6.1 Interview with Owner
Mr. Eric Johnston, Senior Project Manager with Baldwin & Sons, completed an Owner/User Questionnaire for Lakeview One, LLC and Lakeview 2, LLC on February 13, 2020. (The Baldwins have been associated with the Property since 1988 though it has been owned by various entities since the initial acquisition from United Enterprises.)

Mr. Chuck Miller, Environmental Manager for Moller Otay Lakes Investment, LLC completed an Owner/User Questionnaire for Moller Otay Lakes Investment, LLC on February 25, 2020. Moller Otay Lakes Investment, LLC has owned its parcels since April 2014.

Neither Mr. Johnston nor Mr. Miller was aware of issues or events of environmental concern associated with the Property.

6.2 Interview with the Property Manager and/or Key Site Manager
Baldwin & Sons manages the Property. Mr. Johnston is currently the Key Site Manager.

6.3 Interviews with Facility Operator and/or Occupants/Tenants
The Property is not occupied. ICE has access to the Property for surveillance but does not have permanent equipment on the Property.

6.4 Interviews with Local Government Officials
Coast 2 Coast contacted the Certified Unified Program Agency (CUPA) for the Property. The CUPA is responsible for enforcement and monitoring of various environmental programs. For the Property, the County of San Diego Department of Environmental Health (DEH) is the CUPA. As there are no street addresses for the Property, DEH used APNs to conduct a search of its records. CUPA permits were not found for the Property. As summarized in the table in Section 4.3, DEH SAM reviewed prior Phase I ESAs which included Property APNs being considered by for acquisition by the County Parks and Recreation Department as open space preserve. Issues of further environmental concern were not found during SAM’s review of the reports.

6.5 Interviews with Others
Other individuals with knowledge of the Property were not found during this assessment.
7.0 ADDITIONAL SERVICES

7.1 Asbestos and Lead-Based Paint
Since the Property was not developed with structures, a visual inspection for asbestos and lead-based paint concerns was not conducted during this assessment.

7.2 Radon
Radon is a colorless, odorless gas that can seep into structures from the ground. It is a leading cause of lung cancer. The USEPA has a recommended action level of 4.0 picoCuries radon per liter (pCi/L) of air. The USEPA has classified San Diego County as Zone 3, indicating that the average indoor radon activity is not expected to exceed 2 pCi/L.

Existing radon testing data summarized by zip code was obtained from the State of California Department of Public Health (CDPH) Indoor Radon Program website. Within the zip code 91935, sampling results from eight homes have been reported to CDPH. Of these samples, the highest reported radon concentration was 2.3 pCi/L. These results suggest there is a low risk of encountering radon in concentrations of 4.0 pCi/L within the vicinity of the Property.

7.3 Vapor Encroachment
The Property is not known to have had current or past contamination that may result in vapor encroachment. Evidence was not found during this assessment indicating that there was a potential environmental concern which may be the result of vapor intrusion with respect to the buildings on the Property.

Information was not found during this assessment indicating that adjoining and nearby sites have had current or past contamination which may have resulted in vapor encroachment.

Maps included in EDR’s report in Appendix D did not indicate a regional groundwater contamination plume. Other information or evidence of a regional groundwater contamination plume was not found during this assessment.

Other conditions which may result in vapor encroachment at the Property were not found during this assessment.
8.0 FINDINGS AND CONCLUSIONS

Based upon Coast 2 Coast’s review of the information obtained during the course of this assessment of the Property and herein presented, we have formed the following opinions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:
  
  United States Environmental Protection Agency (U.S. EPA) National Priorities List (NPL) (including delisted sites)
  State- and tribal-equivalent priorities list
  U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]
  State- and tribal-equivalent CERCLIS
  U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACTS Facilities
  U.S. EPA RCRA Generators
  U.S. EPA Emergency Response Notification System (ERNS)
  Federal Institutional Control (IC) or Engineering Control (EC) Registries
  State- and tribal-equivalent IC and EC Registries
  State Leaking Underground Storage Tank Program (LUST) and tribal equivalent
  State Registered Underground Storage Tank (UST) and tribal equivalent
  State Solid Waste Information System (SWIS) and tribal equivalent
  State and tribal Voluntary Cleanup Program (VCP) sites
  State and tribal Brownfields sites

- Property APNs appear on the State CPS-SLIC and CERS databases and USEPA FINDS databases. An explanation of these databases may be found in Sections 4.2 and 4.3. These listings are the result of the County Department of Environmental Health (DEH) reviewing prior Phase I ESAs which included Property APNs being considered for acquisition by the County Parks and Recreation Department as open space preserve. (Some of the APNs referenced in these reports have been superseded by the current APNs.) Issues of further environmental concern were not found during DEH’s review of the reports. Issues of further environmental concern were not found during DEH’s review of the reports.

- Tactical Air Operations located at 13551 Otay Lakes Road (which adjoins the southeast end of the Property across Otay Lakes Road) appears on the State Aboveground Storage Tank (AST) list and State CERS. The facility has a CUPA permit and may store up to 4,500 gallons of jet fuel in tanker trucks. The site is hydraulically downgradient of the Property and reports of leaks or spills were not found.

- Two additional sites within the designated ASTM radii of the Property appear on one or more of the other lists provided by various government agencies. While the presence of these sites in the vicinity of the Property may constitute an environmental risk to the Property, evidence was not found during the course of our assessment which indicated that the Property has been adversely impacted by these sites nor that they represent an imminent threat to the Property.
• Structures were not observed on the Property.

• Hazardous waste was not observed on the Property. Some scattered illegal dumping of construction debris and household solid waste was observed near improved dirt roads on the south end of the Property, but the materials did not appear to be hazardous. The dumped materials appear to have been on-site for quite some time. Locked gates along Otay Lakes Road currently prevent access to the improved dirt roads on the Property.

• Coast 2 Coast’s review of historical information sources did not reveal evidence of recognized environmental conditions (RECs) in connection with the historical use of the Property. While there was one mention of possible mining on the Property in the 1880s by Frank Kimball, another resource confirming this activity was not found. Evidence of mines on historical topographic maps and aerial photographs was also not found.

• High voltage electrical transformers were not found on the Property.

• A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.

• RECs were not found during this assessment in connection with the current use of the Property.

• Though not necessarily rising to the level of a REC the following environmental issues were noted on the Property:
  
  ➢ A water well is located on the west end of the Property (approximately on the south end of the proposed R-2 residential neighborhood.) The well was observed to be capped.

  ➢ A 1960 aerial depicts possible dryfarming on the southwest end of the Property where residential neighborhoods, a school, and other community uses are proposed as part of the Village 13 development. Possible cultivation of the Property was not observed on aerial photographs dated 1953 and earlier and 1964 and later.
9.0 RECOMMENDATIONS

Based upon Coast 2 Coast’s review of the information presented in the report, and our resulting conclusions, we recommend the following:

- If there are no plans to use the water well as part of the proposed redevelopment of Village 13, the well should be destroyed under permit from the County of San Diego Department of Environmental Health Land and Water Quality Division (DEH.)

- Due to proposed redevelopment of the southwest end of the Property for a school, residences, and parks, the area observed on a 1960 aerial as possibly having been dryfarmed should be assessed for pesticides, herbicides, and metals to ensure proper worker protection and soil management during excavation activities. DEH Site Assessment & Mitigation Division offers a Voluntary Assistance Program to provide oversight in such cases.

Furthermore, prior to development of an educational facility (School S-1) the school district responsible will be required to submit a preliminary endangerment assessment to the State Department of Toxic Substances Control (DTSC.) It is recommended that sampling and assessment of the school parcel be completed to meet DTSC’s requirements for contaminants of concern associated with historic cultivation of land for agricultural purposes.

- It is Coast 2 Coast’s opinion that further environmental assessment of this Property, beyond those items listed above, is not warranted at this time.
10.0 DEVIATIONS

We have performed a Phase I Environmental Site Assessment of Otay Ranch Resort Village 13 (Property.) The Property is located north of Otay Lakes Road, north and east of Lower Otay Reservoir, and east of the Upper Otay Reservoir in unincorporated San Diego County, California. The zip code for the Property is 91935 (Jamul.) The report has been prepared in conformance with the scope and limitations of ASTM Standard E1527-13. Exceptions to, or deletions from, the standard practice are described in Section 1.2 of this report. This assessment did not reveal evidence of recognized environmental conditions in connection with the Property.

12.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Property. I have developed and performed all the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Submitted:

Marybeth Norgren
Principal
13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

Marybeth Norgren
Principal

Education

B.S., Chemistry, California State University Fullerton, 1988
M.S., Environmental Management, University of San Francisco, 1999
Asbestos Fiber Counting (NIOSH 582), McCrone Research Institute
EPA/AHERA Building Inspector and Management Planner, Design for Health
EPA/AHERA Asbestos Abatement Contractor/Supervisor, Design for Health
EPA/AHERA Asbestos Abatement Project Designer, Design for Health
EPA Radon Measurement Operator, Western Regional Radon Training Center
Lead-Based Paint Inspection & Assessment, Project Monitor and Project Designer,
U C Berkeley Extension
Continuing Education for Lead-Based Paint, Homesafe Environmental, Inc.

Registrations

Cal/EPA Registered Environmental Assessor #5548 (State ended program on July 1, 2012.)
Cal-OSHA Certified Asbestos Consultant #92-0720
California DHS Lead-Related Construction Inspector/Assessor and Project Monitor, #541

Experience

Ms. Norgren has 30 years of experience managing and conducting environmental site assessments (ESAs) and hazardous materials surveys on all types of properties including commercial, industrial, residential, agricultural and unimproved properties. She has utilized the ASTM 1527 standard for ESAs since its inception in the early 1990s and incorporated it into client specific standards as requested. She has managed projects involving underground storage tank removals, unauthorized releases and associated sampling. In addition, she has experience conducting all phases of asbestos and lead-based paint abatement projects including comprehensive building surveys, contract bid solicitation, contract administration, project specifications, and contract documentation. Prior to starting Coast 2 Coast Environmental, Inc. in 2004, she worked for both small and large consulting firms on projects primarily located in the western United States.

Relevant Projects

Wells Fargo Bank/First Interstate Bank, Bank of the West, Bank of America, Union Bank and Great Western Bank - Various Locations. Managed and conducted Phase I ESAs for commercial, industrial, retail and agricultural properties throughout California as well as Arizona, Nevada, Oregon, Washington, Texas and Midwest and East Coast sites. Assessment activities included Property reconnaissance, agency record reviews, historical land use research, geologic conditions research, and recommendations for handling identified concerns. Property reconnaissance has included asbestos sampling, radon sampling and/or water and paint sampling for lead. Conducted Phase II ESAs including comprehensive asbestos surveys and soil and groundwater sampling.

City of Ontario Housing Agency, Ontario, CA. Managed a multi-year contract for asbestos and lead-based paint sampling of 600 homes which were part of the Residential Sound Insulation Project to reduce air traffic noise from Ontario Airport. Other work included conducting Phase I ESAs and demolition surveys for asbestos and lead-based paint on properties being purchased by the City in high noise areas.
Paseo Project, San Diego State University Foundation, San Diego, CA. Prepared a Phase I Environmental Site Assessment (ESA) of five city blocks south of San Diego State University. The ESA was part of the Hazardous Materials Technical Study for the SDSU Foundation Master Plan concerning the formation of a redevelopment project area on lands adjacent to the University. The ESA included historical research dating back to the development of the area beginning in 1931 when the University moved to its current location. The report also included a review of agency files for four gas stations which were either currently or historically located on the site.

J Serra High School Expansion, San Juan Capistrano, CA. Prepared a Phase I Environmental Site Assessment Update as part of the Hazardous Materials Technical Study for an environmental impact report for the recreational facilities of the J Serra High School located on approximately 30 acres of land in San Juan Capistrano. As a private school, J Serra High School board chose not to have the project reviewed by the Department of Toxic Substances Control (DTSC), but the report was prepared in a format acceptable to DTSC. Issues associated with the project site included two adjacent and upgradient gasoline stations with active leaking underground storage tank cases and historic use of the site for agricultural orchards.

Various Residential and Commercial Developers and Land Brokers, San Diego County, CA. Managed and prepared Phase I ESAs for San Diego developers including McMillin Companies, The Otay Ranch Company, Baldwin & Sons, Inc., Affirmed Housing Group and Hitzke Development Corporation. Properties assessed have included large tracts of land proposed for use as residential communities, commercial developments, and mitigation bank/open space preserve sites.

Department of the Navy, Southwest Division, San Diego, CA. Conducted lead-based paint surveys and prepared Operations and Maintenance Programs based on survey results. Surveys included all exterior and some interior surveys on 170 buildings at two naval bases in San Diego. Conducted Pollution Prevention Assessment surveys of various naval operation shops to identify processes in each shop that use hazardous chemicals and/or generate hazardous waste. Prepared reports describing and quantifying materials used in the shops' processes.

City of Los Angeles Department of Airports, CA. Managed asbestos survey of approximately fifty buildings at Van Nuys Airport and Van Nuys California Air National Guard Facility. Based on survey results, prepared asbestos abatement specifications. Project included arranging for approval of special abatement procedures from the South Coast Air Quality Management District.

Trizec Properties, Inc., Various Locations. Performed contractor supervision and industrial hygiene services during removal of asbestos-containing fireproofing. All buildings were multi-story commercial structures and projects ranged from abating single suites to full-floor abatement. Responsible for ensuring contractor followed all government regulations and maintained proper work practices.

APPENDIX B

PHOTOGRAPHS
Photograph 1: East-southeast view from the edge of the Property by the north end of the northwest finger of Lower Otay Reservoir. Otay Lakes Road is on the right.

Photograph 2: Northwest view of northwest end of the Property. Otay Lakes Road is on the left.

Photograph 3: Southeast view of Property from edge of improved dirt road in northwest corner of the Property.

Photograph 4: West view of the west adjoining Upper Otay Reservoir and Proctor Valley.
Photograph 5: South view of the Property from the improved dirt road along the north border of the Property near the northwest corner of the Property.

Photograph 6: North-northwest view of the west and north adjoining site. The improved dirt road leads down to Proctor Valley. The Open Space Preserve includes the area in this photo nearer to the photographer on the opposite side of the road.

Photograph 7: South view of the Property from the improved dirt road along the north border of the Property. This photo is further east along the improved dirt road than Photo 5.

Photograph 8: South view of the Property from the improved dirt road along the north border of the Property. This photo is further east along the improved dirt road than Photo 7.
Photograph 9: This view taken from the northern road shows an area where cattle grazing equipment was located in the 1990s (see also Photo 41.) In the center of the photograph near reservoir is a somewhat circular flat area where dryfarming may have occurred (see also Photo 47.)

Photograph 10: North view of the north adjoining undeveloped land. This view is taken near the middle of the north border of the Property.

Photograph 11: West view of the improved dirt road along the north border of the west half of the Property and south end of the north adjoining site.

Photograph 12: South view of the Property near the middle of the north border of the Property. This photo is further east along the improved dirt road than Photo 8.
Photograph 13: Southeast view of the Property taken near the middle of the north border of the Property. This photo is further east along the improved dirt road than Photo 12.

Photograph 14: North view of the area adjoining to the north of the east half of the Property.

Photograph 15: Southeast view of the northeast end of the Property and the south edge of the north adjoining land that borders the east half of the Property.

Photograph 16: South view of the Property and a portion of the north adjoining site near the northeast corner of the Property. This view looks down on the most easterly of the seasonal drainage areas that generally flow north to south across the Property.
Photograph 17: West-southwest view of the Property and a portion of the north adjoining site near the northeast corner of the Property.

Photograph 18: North view of the north end of the east adjoining undeveloped land owned. This site is owned by the U.S. Government.

Photograph 19: West view of the Property from the middle of the east adjoining site.

Photograph 20: South-southwest view of the south end of the east adjoining site and the southeast end of the Property. The skydiving air field is in the center of the photo.
Photograph 21: West view of the Property taken from near the southeast end of the Property.

Photograph 22: Southwest view of the southeast adjoining site including Jamul Creek.

Photograph 23: North view of the east end of the Property with Otay Lakes Road in the foreground.

Photograph 24: South view of the airfield and buildings occupied by Tactical
Photograph 25: East view of the southern border of the Property along Otay Lakes Road and across from the skydiving airfield.

Photograph 26: The pond on the Property located northwest of the entrance to the skydiving airfield.

Photograph 27: East view of the Property just west of the pond in Photo 26.

Photograph 28: East view of the Property near the middle of the southern border of the Property.
**Photograph 29:** South view at the eastern end of the improved dirt road cutting through the middle of the Property. This road has not been maintained and is in poor condition.

**Photograph 30:** West view of the improved dirt road cutting through the middle of the Property taken from near the east end.

**Photograph 31:** Pond at the base of the most easterly of the seasonal drainage areas.

**Photograph 32:** North view on the improved dirt trail which has been visible on topographic maps since at least 1943. The trail is above (to the right) of the west side of the drainage shown in Photo 31.
Photograph 33: West-southwest view continuing west on the improved dirt road cutting through the center of the Property.

Photograph 34: Northeast view of the seasonal drainage at the low point in the road in Photo 33.

Photograph 35: East view of the improved dirt road cutting through the center of the Property. The view is taken from the top of the hill shown on the right side of Photo 33.
Photograph 36: North-northeast view of water collecting at the base of the seasonal drainage in the center of the Property.

Photograph 37: South-southwest view the westerly seasonal drainage path which flows toward Otay Lakes Road.

Photograph 38: North-northwest view of the upper portion of the westerly seasonal drainage.
Photograph 39: Capped well on west end of Property.

Photograph 40: East view from the knoll with the water well.

Photograph 41: West view from the knoll with the water well. The area below was formerly used as a cattle grazing station. A canopy and two tanks for water storage were removed in 2007.
Photograph 42: South-southwest view of seasonal drainage flowing toward Otay Lakes Road. The gate is locked and while there has been some illegal dumping in the past, it does not appear that much has occurred in recent years.

Photograph 43: Seasonal drainage flow on the west end of the Property.
Photograph 44: Metal debris observed to have been used for target practice.

Photograph 45: North view of the upper elevations of the west end of the Property.

Photograph 46: West view of illegal construction debris disposal along the improved dirt road. This section of the dirt road was historically a portion of the original alignment of Otay Lakes Road prior to reconstruction of the Otay Reservoirs between 1916-1918.
Photograph 47: North-northeast view of the upper elevations of the middle of the Property.

Photograph 48: Dryfarming may have occurred in this area in circa 1960.

Photograph 49: East to northeast view of the middle of the Property.

Photograph 50: Small reservoir/pond in the center of the south end of the Property.
Photograph 51: Rusted car (red oval) and debris on the west side of reservoir/pond in the center of the south end of the Property.

Photograph 52: Improved dirt road east of the reservoir/pond.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**NPL: National Priority List**
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2019
Date Data Arrived at EDR: 11/07/2019
Date Made Active in Reports: 11/20/2019
Number of Days to Update: 13

**NPL Site Boundaries**

Proposed NPL: Proposed National Priority List Sites
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019
Date Data Arrived at EDR: 11/07/2019
Date Made Active in Reports: 11/20/2019
Number of Days to Update: 13

**NPL LIENS: Federal Superfund Liens**
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56
Delisted NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2019
Date Data Arrived at EDR: 11/07/2019
Date Made Active in Reports: 11/20/2019
Number of Days to Update: 13
Next Scheduled EDR Contact: 04/13/2020
Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing
A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019
Date Data Arrived at EDR: 04/05/2019
Date Made Active in Reports: 05/14/2019
Number of Days to Update: 39
Next Scheduled EDR Contact: 04/13/2020
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System
SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA’s Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2019
Date Data Arrived at EDR: 11/07/2019
Date Made Active in Reports: 11/21/2019
Number of Days to Update: 14
Next Scheduled EDR Contact: 04/27/2020
Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive
SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/25/2019
Date Data Arrived at EDR: 11/07/2019
Date Made Active in Reports: 11/21/2019
Number of Days to Update: 14

Data Release Frequency: Quarterly

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/16/2019
Date Data Arrived at EDR: 12/16/2019
Date Made Active in Reports: 12/20/2019
Number of Days to Update: 4
Next Scheduled EDR Contact: 04/06/2020
Data Release Frequency: Quarterly
RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date Made Active in Reports: 01/28/2020
Next Scheduled EDR Contact: 03/09/2020
Data Release Frequency: Varies

Number of Days to Update: 67

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/22/2019

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.
State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF (SWIS): Solid Waste Information System
Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

State and tribal leaking storage tank lists

CA LUST REG 9: Leaking Underground Storage Tank Report
Orange, Riverside, San Diego counties. For more current information, please refer to the State Water Resources Control Board’s LUST database.

CA LUST REG 8: Leaking Underground Storage Tanks
California Regional Water Quality Control Board Santa Ana Region (8). For more current information, please refer to the State Water Resources Control Board's LUST database.

CA LUST REG 7: Leaking Underground Storage Tank Case Listing
Leaking Underground Storage Tank locations. Imperial, Riverside, San Diego, Santa Barbara counties.

CA LUST REG 5: Leaking Underground Storage Tank Database
CA LUST REG 6L: Leaking Underground Storage Tank Case Listing
For more current information, please refer to the State Water Resources Control Board’s LUST database.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019 Source: Drug Enforcement Administration

**Local Land Records**

**CA LIENS: Environmental Liens Listing**
A listing of property locations with environmental liens for California where DTSC is a lien holder.
LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

CA DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program’s oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HMIRS: Hazardous Materials Information Reporting System
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Records of Emergency Release Reports
CA CHMIRS: California Hazardous Material Incident Report System
California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

CA LDS: Land Disposal Sites Listing (GEOTRACKER)
Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.
CA MCS: Military Cleanup Sites Listing (GEOTRACKER)
Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

CA SPILLS 90: SPILLS90 data from FirstSearch
Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

FUDS: Formerly Used Defense Sites
The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

DOD: Department of Defense Sites
This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.
FEDLAND: Federal and Indian Lands
 Federally and Indian administered lands of the United States. Lands included are administrated by: Army Corps
 of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land,
 Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management,
 Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Number of Days to Update: 87  Next Scheduled EDR Contact: 04/06/2020
Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST
 EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement
 matters relating to facilities with alleged violations identified as either significant or high priority. Being
 on the Watch List does not mean that the facility has actually violated the law only that an investigation by
 EPA or a state or local environmental agency has led those organizations to allege that an unproven violation
 has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged
 violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and
 local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014  Telephone: 617-520-3000

2020 COR ACTION: 2020 Corrective Action Program List
 The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action
 Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe
 contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but
 have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation.
 Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017  Source: Environmental Protection Agency

Next Scheduled EDR Contact: 03/02/2020
Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 05/01/2019
Date Data Arrived at EDR: 10/23/2019
Date Made Active in Reports: 01/15/2020
Number of Days to Update: 84
Source: EPA
Telephone: 202-564-4203

Next Scheduled EDR Contact: 05/04/2020
Data Release Frequency: Annually

ROD: Records Of Decision
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 10/25/2019
Date Data Arrived at EDR: 11/07/2019
Date Made Active in Reports: 11/20/2019
Number of Days to Update: 13
Source: EPA
Telephone: 703-416-0223
Last EDR Contact: 02/05/2020
Next Scheduled EDR Contact: 03/16/2020
Data Release Frequency: Annually

RMP: Risk Management Plans
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

PRP: Potentially Responsible Parties
A listing of verified Potentially Responsible Parties

PADS: PCB Activity Database System
PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

ICIS: Integrated Compliance Information System
The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.
FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009
Date Data Arrived at EDR: 04/16/2009
Date Made Active in Reports: 05/11/2009
Number of Days to Update: 25
Next Scheduled EDR Contact: 12/04/2017
Data Release Frequency: No Update Planned

HIST FTTS: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

BRS: Biennial Reporting System
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.
INDIAN RESERV: Indian Reservations
This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

FUSRAP: Formerly Utilized Sites Remedial Action Program
DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

LEAD SMELTER 1: Lead Smelter Sites
A listing of former lead smelter site locations.

LEAD SMELTER 2: Lead Smelter Sites
A listing of former lead smelter site locations.

US AIRS (AFS): Air Facility System Data
A listing of minor source facilities.
Date of Government Version: 10/12/2016  
Date Data Arrived at EDR: 10/26/2016  
Date Made Active in Reports: 02/03/2017

ABANDONED MINES: Abandoned Mines  
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.
FINDS: Facility Index System/Facility Registry System
Facility Index System. FINDS contains both facility information and ‘pointers’ to other sources that contain more
detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric
Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial
enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal
Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities
Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

DOCKET HWC: Hazardous Waste Compliance Docket Listing
A complete list of the Federal Agency Hazardous Waste Compliance Docket Facilities.

ECHO: Enforcement & Compliance History Information
ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

UXO: Unexploded Ordnance Sites
A listing of unexploded ordnance site locations

FUELS PROGRAM: EPA Fuels Program Registered Listing
This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels
Programs. All companies now are required to submit new and updated registrations.

Other Ascertainable Records
CA BOND EXP. PLAN: Bond Expenditure Plan
Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989
Date Data Arrived at EDR: 07/27/1994
Date Made Active in Reports: 08/02/1994
Number of Days to Update: 6

- Data Release Frequency: Varies

CA HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

CA WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.
CA WDS: Waste Discharge System
Sites which have been issued waste discharge requirements.

CA WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20220 of Title 27.

CA CIWQS: California Integrated Water Quality System
The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.
CA CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

CA NON-CASE INFO: Non-Case Information Sites (GEOTRACKER)
Non-Case Information sites

CA OTHER OIL GAS: Other Oil & Gas Projects Sites (GEOTRACKER)
Other Oil & Gas Projects sites

CA PROD WATER PONDS: Produced Water Ponds Sites (GEOTRACKER)
Produced water ponds sites

CA SAMPLING POINT: Sampling Point - Public Sites (GEOTRACKER)
Sampling point - public sites

CA WELL STIM PROJ: Well Stimulation Project (GEOTRACKER)
Includes areas of groundwater monitoring plans, a depiction of the monitoring network, and the facilities, boundaries, and subsurface characteristics of the oilfield and the features (oil and gas wells, produced water ponds, UIC wells, water supply wells, etc?) being monitored

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.
EDR RECOVERED GOVERNMENT ARCHIVES

**Exclusive Recovered Govt. Archives**

CA RGA LF: Recovered Government Archive Solid Waste Facilities List
The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health.

OTHER DATABASE(S)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Marybeth Norgren with Coast 2 Coast Environmental, Inc. is the environmental professional preparing a Phase I Environmental Site Assessment (ESA) for your Property in accordance with ASTM E 1527-13. The ASTM standard requires the Property Owner(s) and the Report User(s) to be interviewed. In order to fulfill this requirement, this questionnaire is being sent to you for completion. Coast 2 Coast Environmental, Inc. appreciates your effort to respond to the questions in a timely manner. If you need assistance or have questions, please contact Coast 2 Coast Environmental, Inc. using the contact information listed above.

1. Are you aware of any environmental cleanup liens against the Property?
   - No [✓]  
   - Yes [ ]  
   Please explain:

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site?
   - No [✓]  
   - Yes [ ]  
   Please explain:

3. Do you have any specialized knowledge or experience related to the Property or nearby properties regarding environmental issues on the Property? For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   - No [✓]  
   - Yes [ ]  
   Please explain:

February 12, 2020, Otay Lakes Resort Village, Chula Vista/Jamul, California
4. Does the purchase price being paid or most recent appraised value for this Property reasonably reflect the fair market value of the Property? (We are not asking you to tell us what the selling price or value of the Property is, just whether you know of environmental issues which may have impacted the selling price/market value of the Property.)

Yes  

Please explain further:  

PROPERTY VALUED AT MARKET PRICE.  
NO KNOWN ENV. ISSUES.

No 

5. Are you aware of information about the Property that would help the environmental professional to identify conditions of releases or threatened releases of hazardous materials or waste?

No  

Yes (Please elaborate by responding to Questions 7 through 11.)

6. Please provide as much information as you know about past owners, occupants and uses of the Property.

a. How many years have you been associated with the Property as an owner?

THE PROPERTY HAS BEEN OWNED BY THE BARBO family FOR OVER 25 YEARS.

b. Are there any street addresses used for the Property?

No

c. Please confirm the legal name, address and contact information for the entity which currently owns the Property in the middle box at the top of the 1st page of this questionnaire.

Lakeview L+Z LLCs, 20 Corporate Plaza Dr., Newport Beach CA 92660

d. If you know the names of previous owners please list them here and the approximate years they owned Property.

1)  
2)  
3)  
4)  

e. What businesses currently and previously occupied the Property? (This response can be written or provided as an Excel spreadsheet.)

NONE - ONLY KNOWN HISTORICAL USE WAS CATTLE GRAZING.

7. Do you know of specific chemicals that are present or were previously present at the Property?

No  

Yes Please explain:

8. Do you know of spills or other chemical releases that have taken place on the Property?

No  

Yes Please explain:
9. Do you know of any environmental cleanups that have taken place on the Property?
   No ________
   Yes________ Please explain:

10. Are there previous environmental reports for the Property other than the following?
    a) Phase I ESA, Village 13 Open Space Preserve Land (598-140-05), Lakeview 2, LLC, 5-6-2016
    b) Phase I ESA, Village 13 Open Space Preserve Land (598-140-04 & 598-140-05),
       Baldwin & Sons, Inc., 1-31-2018
   No ________
   Yes________ If yes, please provide copies.

11. Based on your knowledge and experience related to the Property, are there any obvious
    indicators that point to the presence or likely presence of contamination at the Property?
   No ________
   Yes________ Please explain:

12. Any other comments you would like to provide concerning the Property:
   No ________
   Yes________ Please explain:

This form should be signed by the Property owner (e.g. managing member, officer of corporation
or other legal representative).

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

First American Title
Dated as of February 07, 2020 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

LAKEVIEW 1, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY, AN UNDIVIDED 30% INTEREST AND
LAKEVIEW 2, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY, AN UNDIVIDED 70% INTEREST, AS
TENANTS IN COMMON, AS TO PARCELS A AND B

LAKEVIEW 2, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY, AS TO PARCELS C AND E; AND OTAY
PROJECT, L.P., A CALIFORNIA LIMITED PARTNERSHIP, AS TO PARCEL D

MOLLER OTAY LAKES INVESTMENT LLC, A DELAWARE LIMITED LIABILITY COMPANY, AS TO PARCELS F,
G AND H

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said
policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2020-2021, a lien not yet due or
payable.
2. General and special taxes and assessments for the fiscal year 2019-2020.

PARCEL H: (APN 598-140-06-00)

LOTS 1 AND 2 IN SECTION 31 AND THE NORTH HALF OF THE NORTHWEST QUARTER AND THE SOUTHWEST QUARTER OF THE NORTHWEST QUARTER OF SECTION 32, ALL IN TOWNSHIP 17 SOUTH, RANGE 1 EAST, SAN BERNARDINO MERIDIAN, IN THE COUNTY OF SAN DIEGO, STATE OF CALIFORNIA, ACCORDING TO THE OFFICIAL PLAT THEREOF.

EXCEPTING THEREFROM ALL THE COAL AND OTHER MINERALS, TOGETHER WITH THE RIGHT TO PROSPECT FOR, MINE AND REMOVE SAME, PURSUANT TO THE PROVISIONS AND LIMITATIONS OF THE ACT OF CONGRESS OF DECEMBER 29, 1916 (39 STAT. 862), AS EXCEPTED AND RESERVED TO THE UNITED STATES OF AMERICA IN THE PATENT FOR SAID LAND, ISSUED AUGUST 11, 1933 AND RECORDED APRIL 8, 1935 IN BOOK 384, PAGE 430 OF OFFICIAL RECORDS.
Additional APN maps for the Property not included in this title report follow this report.
NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier’s checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier’s checks, or certified checks whenever possible.
**EXHIBIT A**

**LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)**

**CLTA STANDARD COVERAGE POLICY – 1990**

**EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys’ fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.

3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.

4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.

5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.

6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

**EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I**

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.

2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.

3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.

4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.

   (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.

6. Any lien or right to a lien for services, labor or material not shown by the public records.

First American Title
CLTA/ALTA HOMEOWNER’S POLICY OF TITLE INSURANCE (12-02-13)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys’ fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner’s Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

<table>
<thead>
<tr>
<th>Covered Risk</th>
<th>Your Deductible Amount</th>
<th>Our Maximum Dollar Limit of Liability</th>
</tr>
</thead>
<tbody>
<tr>

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys’ fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;

First American Title
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.

5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.

6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II, this policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

PART I

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.

4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

6. Any lien or right to a lien for services, labor or material not shown by the public records.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land;
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.

4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.

5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.

4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land;
   (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d),
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.
We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly in accordance with this Privacy Policy and First American’s Fair Information Values.

We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet. In general, you can visit First American or its affiliates’ Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site.

There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation’s site and its affiliates’ sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American’s Web sites may make use of “cookie” technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive. FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.

Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information.

Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

Form 50-PRIVACY (9/1/10)
Hello Edwin -

Lots of undeveloped land in these requests but there are a couple of LOP cases that turned up during the database search and I have provided those case numbers. I tried researching the online system and was not successful in locating files for the cases. Hopefully, you can find the information.

Thank you -

Marybeth Norgren  
Coast 2 Coast Environmental, Inc.

Good Morning,

Records found for all request forms have been uploaded to WeTransfer due to file size.

**New Search Function**: Scanned files for closed Site Assessment and Mitigation Program cases and Monitoring Well Program permits can be downloaded directly through the new DEH Document Library at:

http://www.sandiegocounty.gov/content/sdc/deh/doclibrary/

You can search by Record ID, APN, address, document category, or keyword.

Thank you,

*Edwin C. Andrus*

DEH-9098 (Rev. 12/12)
December 18, 2002

Ms. Barbara Simmons  
County of San Diego – Department of Parks and Recreation  
5201 Ruffin Road, Suite P – Mail Stop 029  
San Diego, California 92123

Dear Ms. Simmons:

VOLUNTARY ASSISTANCE PROGRAM CASE H39620-001  
(PARCel 99, OTAY RANCH, CHULA VISTA, CALIFORNIA)

The site remediation information submitted to this agency by Snyder Consulting, consultant summarizing the site characterization and mitigation activities at the above-referenced location, has been reviewed. With the provision that the information provided to this agency was accurate and representative and the property remain in its existing condition; no further action is required.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or the Porter Cologne Water Quality Control Act. If previously unidentified contamination is discovered which may affect public health, safety and/or water quality, additional site assessment and cleanup may be necessary.

Changes in the present use of the above site as an open space preserve may require re-evaluation to determine if the change will pose a risk to public health. If there are changes to the existing property use, please confer with this office for guidance.

Thank you for your efforts in resolving this matter. Please contact Darryl Fowler of the Site Assessment and Mitigation Program (SAM), at (619) 338-2371, if you require additional assistance.

Sincerely,

MICHAEL VERNETTI, Program Manager  
Supervising Environmental Health Specialist  
Site Assessment and Mitigation Program

Ms. Mary Niez  
County of San Diego  
Department of Parks and Recreation  
9150 Chesapeake Drive, #200, MS-029  
San Diego, California 92123

Dear Ms. Niez:

OTAY RANCH CONVEYANCE – PKS-00323  
CHULA VISTA, CALIFORNIA  
APN: 598-070-05 AND 598-070-06

On July 13, 2010, the Department of Environmental Health, Site Assessment and Mitigation Program (SAM), received an application from the Department of Parks and Recreation (DPR). The application requested SAM’s review and comments regarding the above-referenced parcels. DPR proposes to acquire a portion of the two parcels totaling approximately 258 acres in fee title for open space preservation (herein referred to as “Site”). The Site includes the southern portion of APN 598-070-06 and the western portion of APN 598-070-05, and is located in unincorporated Chula Vista [Otay Mesa Quadrangle, Portion of Section 30, T.17.S., R.1.E.].

SAM staff reviewed a Site Survey (update to Phase I Report), Phase I Report, County of San Diego Assessor’s records, and County of San Diego KIVA and SAM databases to determine if there are environmental impacts or potential environmental impacts to the Site.

FINDINGS

REVIEW OF PHASE I REPORT

The following Phase I Report was prepared by Coast 2 Coast Environmental, Inc. (C2C), and reviewed by SAM staff:

- Phase I Environmental Site Assessment, Proctor Valley Irrevocable Offer of Dedication, Approximately the South ½ of Section 30, Township 17 South, Range 1 East (SBBM), Chula Vista, California, dated April 20, 2007.

The Phase I Report was prepared in accordance with ASTM Standard E 1527-05 and provided the historical use of the Site, observations made during a site reconnaissance, conclusions, and recommendations.

"Environmental and public health through leadership, partnership, and science"
According to the Phase I Report, the Site has been undeveloped mountainous land since at least 1903, except for a period in the early 1900’s when a structure (probably a house) was located in the northwest end of the Site. There is a four-wheel drive dirt road that transverses the upper ridge of the Site that was graded sometime in the late 1960’s.

C2C’s site reconnaissance confirms that the Site has remained undeveloped since the structure was removed sometime before 1949. They do note dumping of landscape debris on the Site, due to a broken gate allowing access to the four-wheel drive road. Although this is not considered a recognized environmental concern, C2C advises that the gate be repaired to restrict access to the Site. Based upon the due diligence findings, C2C concludes that there are no recognized environmental conditions associated with the Site and recommends that further environmental assessment is not warranted.

REVIEW OF SITE SURVEY

A report titled Site Survey, dated June 18, 2010, prepared by C2C, was reviewed by SAM staff.

The Site Survey is a report of site reconnaissance to observe whether use of the property has changed since the Phase I Report. C2C did not observe significant changes to the Site or adjoining properties. They do note that the previously observed landscaping debris had been removed and that the gate had been repaired to restrict access to the Site. Based upon the due diligence findings, C2C concludes that there are no recognized environmental conditions associated with the Site and that further environmental assessment is not warranted.

COUNTY OF SAN DIEGO ASSESSOR’S RECORDS SEARCH

Due to the Phase I Report finding of a structure on the Site prior to 1949, SAM reviewed the County Assessor’s building history records for the Site. There were no records found for the Site, indicating the Assessor’s Office has no records of any structures on Site. The use of the structure that C2C discovered on a 1903 topographic map is unknown.

COUNTY OF SAN DIEGO KIVA AND SAM DATABASE SEARCH

SAM’s research of available databases indicates that no “Open” SAM cases, Hazardous Materials Division (HMD) permits, or supply wells are associated with the Site or adjacent properties.

Based on the information reviewed, no further inquiry regarding the County of San Diego databases is necessary.

RECOMMENDATIONS

Based on the information reviewed regarding this due diligence environmental evaluation, SAM recommends no further environmental investigation at the Site at this time.

LIMITATIONS

This letter does not relieve current or future property owners and/or facility operators of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the subject property. This letter does not relieve the current or future property owners and/or facility operators of the responsibility to clean up existing, additional, or previously unidentified conditions at the subject property which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.
Ms. Mary Niez

July 28, 2010

Should the proposed use of the subject property change, the recommendations presented in this letter will no longer be valid and the subject property must be reevaluated accordingly.

If you have any questions, please do not hesitate to contact me at (619) 338-2244.

Sincerely,

[Signature]

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

CONSENT TO CONDUCT INSPECTION GRANTED BY: Bob Moses
TITLE: Facilities Manager

INTRODUCTION:
The Hazardous Materials Division (HMD) of the Department of Environmental Health (DEH) is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, HMD regulates businesses that manage hazardous materials and hazardous waste.

A routine inspection was conducted today at Tactical Air Operations to verify compliance with hazardous materials/waste regulations. Consent to conduct this inspection was granted by Bob Moses, Facilities Manager. Bob Moses and Anthony Ayala, Environmental Health Specialist with the HMD, were present for today’s inspection.

This facility is an airfield and tactical skydiving training center, utilizing three aircraft and a single landing/take-off strip. This facility does not have gas, electricity, or water utilities, and instead uses a 10,000 water tank and diesel generators for power.

This facility currently requires a permit with the County HMD for the following programs:
Hazardous Materials Business Plan (HMBP) requirements, for storing hazardous materials including, but not limited to, diesel fuel and oxygen compressed gas above reportable quantities (≥55 gal of a liquid, 500 lbs of a solid, and 200 cu.ft. of a gas).

Aboveground Petroleum Storage Act (APSA) requirements, for having a shell capacity to store ≥1,320 gallons of petroleum based materials in containers of 55 gallons or greater. This facility’s petroleum storage capacity at the time of inspection is 4750 gallons and is subject to Tier I SPCC plan preparation at this time.
VIOLATION # 1
4010001 Failed to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan. HSC 25270.4.5(a), 40 CFR 112.3, 112.6

Classification: Class II

Observations:
This facility is currently subject to the Aboveground Petroleum Storage Act (APSA) and has failed to prepare a Tier I Spill Prevention Control & Countermeasure (SPCC) plan.

Per the previous inspection report on 03/29/2017, a Tier I SPCC plan template was provided to an Operator at this facility.

Per Bob Moses, he is familiar with what a SPCC plan is, however to his knowledge one has not yet been prepared for this facility.

Corrective Action Due By:06/21/2019
A Tier I SPCC plan template was provided to Bob Moses during inspection. Within 30 days, complete the SPCC plan as applicable for your facility and provide a copy of the completed SPCC plan to myself for review.

Ensure your SPCC plan is maintained on site and available for review during inspection, and that it is self-certified and reviewed at least every 5 years.

INSPECTION REMARKS:

The following documents were available for review:
- Hazardous Materials Business Plan (digital copy)
- Employee Training Records
- Monthly APSA Inspection records

Although an SPCC plan has not been prepared, Bob Moses provided daily and quarterly inspection records that he conducts at this facility that includes inspection of petroleum tank systems.

Tenants
Several aircraft hangers were observed on site. When asked if personal aircraft is stored at this facility, Bob Moses stated that several hangers are rented to and operated by individuals for personal use.

Be advised, your facility may be responsible for the mismanagement of hazardous waste from your tenants, if generated. Ensure best management practices are implemented.

Lead Acid Batteries
2 x 12 lead acid battery pack units were observed on site. Per Bob Moses, they may install more battery packs in the future. If stored above the reportable threshold of 55 gallons, the battery electrolyte within lead acid batteries must be reported within your hazardous materials inventory in CERS.

Water Containers
At least 10 x ~250 gallon plastic containers were observed on site. When asked what is stored within these containers, Bob Moses stated that it is just water stored for fire fighting purposes because they are located in a fire zone without water utilities, and that he believes he has up to 30 containers located around the facility.

Maintenance
Vehicle and equipment maintenance was discussed with Bob Moses. Per Bob Moses:
• Vehicle and aircraft maintenance that would generate used oil or other hazardous wastes isn’t conducted at this facility.
• Maintenance for aircraft is done at Brown Field and vehicles are taken to local maintenance shops.

Nitrogen Gas Cylinders
5 x 200 cu.ft. cylinders by volume were observed in the compressed gases cage. The cylinders could not be accessed to determine if they are full or empty, as Bob Moses did not have access to the cage at this time.

ACTION REQUIRED: The reportable threshold of Nitrogen compressed gas is 1,000 cu.ft. If your facility stores greater than or equal to 1000 cu.ft. of nitrogen compressed gas then Nitrogen gas must be submitted within your facility's hazardous materials inventory.

Within 30 days, inform me of what your facility's Nitrogen compressed gas storage volume.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
PARCEL 99, OTAY RANCH
CHULA VISTA, CALIFORNIA

Dear Mr. Kilkenny:

Snyder Consulting is pleased to provide this report on the Phase I Environmental Site Assessment conducted for Otay Ranch Company for the property known as the Parcel 99 located on the Otay Ranch in Chula Vista, California. These services were performed in accordance with our Agreement for Professional Services, dated January 13, 2000 as authorized by you on January 19, 2000.

Snyder Consulting is pleased to have assisted Otay Ranch Company with this project. Following your review of our findings, if you require additional information we can perform a more comprehensive investigation of the subject property. The report was prepared by the undersigned.

Very truly yours,

SNYDER CONSULTING

Michael K. Snyder

INTRODUCTION

Project Background

Snyder Consulting was retained by Otay Ranch Company to conduct a Phase I Environmental Site Assessment (ESA) of an undeveloped property known as the Parcel 99, the Property) located on the Otay Ranch in Chula Vista, California (Figure 1). The Property is comprised of a portion of assessor parcel number (APN) 598-130-01 and all of APN 595-090-03. This ESA was performed in accordance with our Agreement for Professional Services, dated January 13, 2000. We understand that Otay Ranch Company plans to set aside the Property as an environmental mitigation offset and this ESA is a preparatory set for that action.

PROJECT OBJECTIVE

The objective of the ESA was to identify “recognized environmental conditions” that may exist on the property. ASTM Practice E 1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process defines recognized environmental conditions as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.” The extent of research to identify recognized environmental conditions is limited by the scope of services.

SCOPE OF SERVICES

The scope of services conducted for this Phase I ESA consisted of the following tasks:

- Site Reconnaissance - A site reconnaissance was conducted by Mr. Michael Snyder of Snyder Consulting, who is familiar with the Otay Ranch and also experienced in hazardous materials surveys. Surface conditions and current activities on the Property and adjoining properties were observed. An inventory of potential contaminant sources on and adjoining to the Property was completed on the basis of visual observations.

- Records Review and Interviews - During the records review, information was obtained from public agencies to assess whether current and past property usage
within the study area may have created the potential for contamination of the Property. Our study area for the records review is based on the ASTM Practice and consists of the following:

- The Property and adjoining properties (Figure 2) for registered underground storage tanks (USTs) and Resource Conservation and Recovery Act (RCRA) generators.

- ½-mile radius for leaking USTs, landfill sites, and Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) sites.

- 1-mile radius for RCRA treatment, storage and disposal facilities, and state and federal superfund sites.

We also used interviews and historical aerial photographs to characterize past activities on and around the Property. Aerial photography sources included the County Cartographic Services Department and Aerial Fotobank.

- Evaluation, Analysis and Report - Information collected during the above activities was evaluated and analyzed. This ESA report addresses our findings, and presents our conclusions.

The ESA was performed in accordance with ASTM Practice E 1527; no exceptions to or deletions from the Practice were made.

SITE DESCRIPTION

Location and Topography

The Property is located immediately east of Upper Otay Reservoir and north of Otay Lakes Road (Figure 2). It occupies approximately 340 acres and is bound by Upper Otay Reservoir on the west and native, undeveloped land on all other sides. According to the U.S. Geological Survey 7.5 minute quadrangle map (Figure 2), the Property is at the southern end of the Jamul Mountains and ranges in elevation from approximately 500 feet above mean sea level datum (MSL) in the southwest corner to 1510 feet MSL in the northeast corner. The Property is steeply sloped and has a northeast to southwest trending valley in the middle.

Site Improvements

The only improvements to the Property are barbed wire fencing along the western boundary and an unimproved, rocky 4-wheel drive (4-WD) trail that generally runs along the western and northern boundary. There are no utilities servicing the Property.
Environmental Setting

Based on Weber, 1963, the Property is underlain by crystalline basement rocks consisting of metavolcanic and granitic lithologies. According to the Soil Survey of San Diego Area, California (US Department of Agriculture, 1973), soils consist of Friant rocky fine sandy loam, 30 to 70 percent slopes, on roughly the eastern half of the Property and San Miguel-Exchequer rocky silt loams, 9 to 70 percent slopes, on the western half of the Property. Olivenhain cobbly loam, 9 to 30 percent slopes, is present on a small portion of the southwest part of the Property.

According to the “Water Quality Control Plan for the San Diego Basin (9),” prepared by the California Regional Water Quality Control Board, San Diego Region (RWQCB, 1996) and revised San Diego Hydrologic Basin Planning Area Map (1995), the Property lies within the Otay Hydrologic Unit, Dulzura Hydrologic Area, Savage Hydrologic Subarea. Groundwater in the Dulzura Hydrologic Area is designated as having existing beneficial uses for municipal and domestic supply, agricultural supply and industrial service supply. The depth to groundwater beneath the Property is unknown, but is likely influenced at the lower elevations of the Property by the presence of Lower and Upper Otay Reservoirs. The direction of regional groundwater flow is influenced by the local geology and topography of the area and is believed to be generally to the west.

Drainage of surface water on the Property is influenced by topography. In general, surface water flows primarily to the southwest towards Lower Otay Reservoir, except on the very western portion of the Property where surface water flows west to Upper Otay Reservoir.

HISTORY OF SITE USES

Identification of historical uses of the Property and adjoining properties is based on interviews and review of historical aerial photographs. Previous reports on ESAs conducted on the Otay Ranch for other clients by Mr. Michael Snyder while employed by Woodward-Clyde Consultants and by Snyder Consulting were also reviewed. In accordance with the ASTM Standard Practice, the purpose of the historical review is to identify all obvious uses of the Property from the present, back to the Property’s obvious first developed use, or back to 1940, whichever is earlier. Historical information in the previous ESAs was obtained during interviews with Mr. Percy Pedrosa, former head of security for the Otay Ranch from 1989 to 1997, Mr. Jerry Adams, tenant rancher on Otay Ranch since 1989 and now ranch overseer, and Mr. Kim Kilkenny, Vice President, Otay Ranch Company.

Historical aerial photographs were reviewed at Aerial Fotobank and the County Cartographic Services Department. The reviewed photographs cover the years 1928, 1964, 1978, 1989, 1997 and 2000. The 2000 aerial photograph of the vicinity is enclosed as Figure 3.
According to aerial photographs, the Property as well as the adjoining properties (Figure 2) have never been developed and have always been used as rangeland (cattle grazing) since before 1928. From 1989 until recently, Mr. Adams has grazed longhorn cattle on the land. Mr. Kilkenny said the cattle were removed a few months ago. Mr. Adams said to his knowledge, insecticides or herbicides have never been applied to the Property. There are no indications that hazardous materials have ever been used on the Property or adjoining properties.

SITE RECONNAISSANCE

Mr. Snyder conducted a site reconnaissance on February 3, 2000 to identify current site uses and potential sources of hazardous substances onsite and offsite. The reconnaissance was conducted by walking along the 4-WD trail and making observations of the Property and adjoining properties from various vantage points along and just off the trail (Photographs 1, 2 and 3). Binoculars were used to assist in viewing remote areas of the Property. Observations were made of the adjoining property to the east (Upper Otay Reservoir, Photograph 4) by walking along a dirt road that runs between the Property and the Reservoir.

The Property is not publicly accessible; the 4-WD trail, which enters the site in the southwest corner, originates at a dirt road over a mile away to the southeast on the adjoining ranch land; the dirt road leads to a locked gate off Otay Lakes Road. There are few signs of litter on the Property--just a few pieces of broken glass here and there, and an occasional discarded article of clothing--and there are no signs of illegal dumping or storage or usage of hazardous materials or wastes on the Property or on the adjoining properties. What appears to be a cattle-feeding station is present about 200 yards south of the Property (Figure 3). No cattle were present on the Property or surrounding land at the time of the reconnaissance. All the surrounding land, except for Upper Otay Reservoir, is undeveloped and appears to have the same usage (cattle grazing) as the Property.

RECORDS REVIEW

During the records review of this ESA, we reviewed records or databases maintained by the following agencies:

- San Diego County Tax Assessor
- San Diego County Department of Environmental Health (DEH)
- California Environmental Protection Agency (Cal-EPA)
- California Integrated Waste Management Board
- California Regional Water Quality Control Board, San Diego Region (RWQCB)
- United States Environmental Protection Agency (EPA)
The purpose of our records review was to assess the potential presence of hazardous substance contamination on the Property as a result of activities conducted on properties within the study area. The study area is defined by ASTM minimum search distances for regulatory databases; due to the size of the Property all search radii were extended by ½ mile. Many of the local, state and federal databases were searched by VISTA Information Solutions, Inc. (VISTA), an independent database search service. The rationale for contacting these agencies, descriptions of the records/databases reviewed, and acronyms are discussed on pages 9 - 15 of VISTA’s Site Assessment Plus Report in Appendix A.

Agency records reviewed do not indicate use or storage of hazardous materials on the Property. There are no regulatory database-listed sites anywhere within the study area. The VISTA report contained a number of unmapped sites, but none of these are anywhere near the Property (the closest site being the City of San Diego’s Otay Water Filtration Plant over three miles south on Wueste Road.)

DISCUSSION AND CONCLUSIONS

The discussion and conclusions presented below are based on the site reconnaissance and limited records review conducted for this study:

- The Property and surrounding land (except for Upper Otay Reservoir to the west) has historically been in an undeveloped state, used only for rangeland cattle grazing. There are no indications of hazardous materials usage, either current or historic, on the Property or surrounding land, most of which is part of the Otay Ranch.

- There are no regulatory database-listed sites within the study area around the Property.

We have performed a Phase I ESA of Parcel 99 located on APNs 598-130-01 and 595-090-03, the Property, in conformance with the scope and limitations of ASTM Practice E 1527. Exceptions to or deletions from this practice are described in the Scope of Services section of this report. This assessment has revealed no evidence of recognized environment conditions in connection with the Property.

LIMITATIONS

We have performed our services for this project in accordance with our Agreement, and with ASTM Practice E 1527 for ESA investigations. No guarantees are either expressed or implied.

The records search was limited to information available from public sources; this information is changing continually and is frequently incomplete. Unless we have actual knowledge to the contrary, information obtained from interviews or provided to us by the Otay Ranch
Company has been assumed to be correct and complete. We do not assume any liability for misrepresentation of information or for items not visible, accessible, or present on the Property at the time of the site visit.

There is no investigation that is thorough enough to preclude the presence of materials on the Property which presently, or in the future may be considered hazardous. Because regulatory evaluation criteria are constantly changing, concentrations of contaminants present and considered to be acceptable may, in the future, become subject to different regulatory standards and require remediation.

Opinions and judgments expressed herein, which are based on our understanding and interpretation of current regulatory standards, should not be construed as legal opinions. This document and the information contained herein have been prepared solely for the use of the Otay Ranch Company. Any reliance on this report by third parties shall be at such party’s sole risk.

QUALIFICATIONS

This Phase I ESA was conducted by Mr. Michael K. Snyder of Snyder Consulting. Snyder Consulting is a Sole Proprietorship providing services in the areas of environmental litigation support, expert witness testimony, Phase I ESAs, soil and water chemistry evaluations, landfill investigations, and agricultural evaluations. Mr. Snyder’s resume is included as Appendix B.

REPRESENTATIVE EXPERIENCE

Mr. Snyder has been involved in the study and practice of waste management since 1973 and has project experience that encompasses disposal practices for hazardous, agricultural, utility, industrial, and sanitary wastes. In his position as National Practice Manager of Environmental Site Assessments (ESAs) at Woodward-Clyde Consultants (WCC), he oversaw an established network of experienced ESA project managers located in offices around the country, was responsible for standardizing WCC's ESA methodology and reporting format, and taught numerous ESA training courses. Mr. Snyder currently teaches a course in Phase I Environmental Site Assessments at University of California, San Diego Extension.

For the past sixteen years, he has been managing investigations of the presence of hazardous substance contamination. These investigations have usually been associated with assessing compliance with environmental regulations or identifying potential sources of contamination and asbestos containing materials. He has managed over 100 hazardous contamination projects, including the following:
- Performed an ESA of an eight city block area in downtown San Diego around the Amtrak Station which included identifying historical uses of the site and adjacent properties as far back as the 1880's; identifying known and suspected underground storage tank locations within a 1/4-mile radius of the site; documenting known sources of groundwater contamination in the study area; and preparing a report of results that identified sites that posed a threat to the subject site and made recommendations for further investigations. As a result of the search of hundreds of historical records, agency files and aerial photographs, over 80 potential sources of contamination were identified in the study area.

- Performed detailed Phase I ESAs on seven Hughes Missile System manufacturing facilities in southern California and Tijuana, Mexico. The work required extensive knowledge of aerospace manufacturing processes and the types of chemicals used. Because the facilities were undergoing shutdown, it was necessary to conduct detailed interviews with numerous former employees in order to identify prior usage of hazardous materials throughout each facility. Some of the facilities had been in operation for over 50 years and the compilation of historical information was quite extensive. Based on Phase I results, areas of potential contamination were identified and investigated during Phase II. Soil borings and Hydropunch™ borings were advanced in these areas to assess the extent of contamination in soil and groundwater.

- Managed a project for the Resolution Trust Corporation that involved Phase I and Phase II ESA investigations on six golf/tennis resorts across the United States. In addition to the standard Phase I tasks, the project included radon gas and asbestos surveys; identification of cultural resources, wetlands, 100-year floodplains, and endangered species; soil sampling and installation and sampling of groundwater monitoring wells; and recommendations for improvement of hazardous materials handling practices at each of the resorts.

- Performed an ESA of the proposed corridor for a 20-mile sewage pipeline for the San Diego Clean Water Program. The study involved a search of thousands of historical records and regulatory agency listings and a site reconnaissance of the entire alignment. Potential sources of contamination were ranked as to their probable impact on the pipeline construction.

- Performed an ESA and structural/mechanical evaluation at the San Diego Bulk Storage Terminal and bulk loading/unloading facilities at the 10th Avenue Terminal for a major chemical company. In addition to the site assessment and structural/mechanical evaluation, the scope of work also included asbestos and lead-based paint surveys; evaluation of air handling equipment; identification and preparation of appropriate environmental permits necessary to allow shipment of bulk chemical products from the terminal; and recommendations for equipment upgrades to meet material throughput requirements.
- Evaluated North Chollas landfill site having a history of use as a city operations facility, municipal burn dump, an experimental trash baling facility, and a proposed landfill. The study involved a detailed Phase I ESA, a geophysical survey to identify underground tank locations and an experimental baled-trash fill area, a soil sampling program, and a subsurface investigation to evaluate the presence of hazardous substance contamination. As a result of the study, large deposits of heavy metals-laden ash were discovered on and around the property, and Mr. Snyder assisted in evaluating the extent of the deposits and preparing potential remediation measures.

- Conducted Phase I and Phase II ESAs on a portion of a property containing part of the closed South Miramar Landfill. The property was being proposed as the site for a County detention facility. Work assignments included landfill gas sampling, delineation of the landfill, and a screening health risk assessment.

- Assessed the extent of groundwater contamination from a large petroleum storage terminal at Port of Stockton and developed a groundwater remediation program. The project involved a records review to identify regulatory violations, historical spills, and underground tank removals; an historical aerial photograph review to characterize site uses; interviews with petroleum terminal tenants and regulatory agency staff; subsurface investigations to characterize vertical and lateral extent of hydrocarbon contamination; and installation of over 50 monitoring wells and piezometers.

- Performed several Phase I ESAs and a Phase II ESA of the 20,000-acre Otay Ranch which was proposed for residential and commercial development. Services included vehicle and foot reconnaissance, regulatory agency database review, historical aerial photograph review, soil sampling and analysis for pesticides, investigation of underground tanks at the ranch operations center, and a record search of agricultural practices.

- Conducted Phase I and Phase II investigations and prepared a work plan for initial remediation and sampling to identify lateral and vertical extents of contamination from a circuit board manufacturing facility in the Kearny Mesa area of San Diego; negotiated the requirements for remediation with the regulatory agencies; oversaw the implementation of the remediation plan; and conducted sampling to verify completion of remediation.

1.1 EXECUTIVE SUMMARY
Coast 2 Coast Environmental, Inc. was retained by Lakeview 2, LLC to conduct an environmental site assessment of north of Otay Lakes Road, Chula Vista, San Diego County, California (Property). A site reconnaissance was performed on April 27, 2016. The Property consists of a 121.55 acres of undeveloped land covered with native vegetation except for one east-west and two north-south four-wheel drive tracks that cross the Property at various points. The north-south tracks narrow to foot paths as they traverse north (upslope) across the Property.

The Property is unoccupied. The four-wheel drive tracks are in poor condition and accessibility even by a four-wheel drive vehicle appears to be very limited. Illegal disposal along the tracks was not observed.

Historically, the Property has been undeveloped mountainous land since at least 1903. The more easterly of the north-south tracks was first observed crossing through the Property on a 1943 topographic map. The more westerly of the north-south tracks and the east-west track were first observed crossing through the Property on a 1989 aerial photograph. Other improvements to the Property were not observed on historical resources found for years between 1903 and the present.

Based upon information obtained from Coast 2 Coast’s research and visual observations made during our site visit, we have reached the following conclusions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:
  
  United States Environmental Protection Agency (U.S. EPA) National Priorities List (NPL) (including delisted sites)
  State- and tribal-equivalent priorities list
  U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]
  State- and tribal-equivalent CERCLIS
  U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACTS Facilities
  U.S. EPA RCRA Generators
  U.S. EPA Emergency Response Notification System (ERNS)
  Federal Institutional Control (IC) or Engineering Control (EC) Registries
  State- and tribal-equivalent IC and EC Registries
  State Leaking Underground Storage Tank Program (LUST) and tribal equivalent
  State Registered Underground Storage Tank (UST) and tribal equivalent
  State Solid Waste Information System (SWIS) and tribal equivalent
  State and tribal Voluntary Cleanup Program (VCP) sites
  State and tribal Brownfields sites
• Structures were not observed on the Property.

• Solid waste, hazardous waste or illegally dumped debris was not observed on the Property.

• Coast 2 Coast’s review of historical information sources did not indicate that the Property had been subjected to past activities that would represent a potential environmental threat or impact to the Property.

• High voltage electrical transformers were not found on the Property.

• A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.

• Recognized environmental conditions were not found on the Property during this assessment.

Based upon Coast 2 Coast’s review of the information presented in the report, and our resulting conclusions, we recommend the following:

• It is Coast 2 Coast’s opinion that further environmental assessment of this Property is not warranted at this time.
2.0 INTRODUCTION

2.1 Property Location and Legal Description

Name/Address: Village 13 Open Space Preserve Land
North of Otay Lakes Road
Chula Vista, California 91915

County: San Diego

Assessor Parcel Number or Other Legal Description: Portion of APN 598-140-05-00

Owner: Lakeview 2, LLC

2.2 Purpose

Coast 2 Coast Environmental Inc. performed a Phase I Environmental Site Assessment of Village 13 Open Space Preserve Land located at north of Otay Lakes Road in Chula Vista, San Diego County, California (Property). This assessment was performed under contract with Lakeview 2, LLC, at the direction of Ms. Mora de Murguia, Public Finance Manager for Baldwin & Sons, Inc. Coast 2 Coast’s services were authorized by Mr. Stephen Haase, Senior Vice President of Baldwin & Sons, Inc. on April 25, 2016. Both Ms. de Murguia and Mr. Haase are authorized to represent Lakeview 2, LLC.

The assessment of this Property was performed at the direction of Baldwin & Sons, Inc. in conjunction with its efforts to conduct “all appropriate inquiry (AAI) into the previous ownership and uses of the Property consistent with good commercial or customary practice”. The purpose of performing AAI is to identify “recognized environmental conditions (RECs)” associated with past and/or present operations at the Property or adjoining sites which may pose liability for Lakeview 2, LLC, Baldwin & Sons, Inc., County of San Diego and City of Chula Vista, A Municipal Corporation. By completing this step in the due diligence process, Lakeview 2, LLC, Baldwin & Sons, Inc., County of San Diego and City of Chula Vista, A Municipal Corporation satisfy one of the requirements to qualify for the “innocent landowner defense” under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 101(35).

2.3 Scope of Services

The assessment was performed in conformance with all of the components of the ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The assessment included, but was not necessarily limited to, the activities listed below:

- A reconnaissance of the Property to observe and assess characteristics of potential environmental concern.

- Observation of adjoining sites and the surrounding area to observe and assess characteristics of potential environmental concern which may impact the Property.

- Interviews with current and past owners, operators and occupants of the Property for the purpose of gathering information regarding the potential for contamination at the Property.
• Review of regulatory agency files and interviews with government agency officials to identify and assess any listings of regulatory permits, registrations, enforcement actions, contaminated sites, etc. likely to affect the Property.

• Review of historical resources to identify previous uses and occupancies of the Property since the Property was first developed or 1940, whichever is earlier.

• Visual inspection or use of other documentation to render an opinion as to the existence of asbestos, lead-based paint (interior and exterior), lead in the drinking water, and the potential for radon exposure.

• Development of a report to include discussion of the findings of the above tasks.

2.4 Significant Assumptions and Data Gaps
Significant assumptions concerning the Property were not made during this assessment except for the following:

• Lacking Property-specific information on the ground water gradient at the Property, it is assumed that the gradient mimics the topographic gradient.

• Information supplied by others is assumed to be correct and accurate.

2.5 Limitations
The conclusions and recommendations presented in this report are based upon reasonable visual reconnaissance of the Property and research of available materials within the scope and budget of the contract. The information presented is relevant to the dates of Coast 2 Coast’s Property visit and should not be relied upon to represent conditions at later dates.

The opinions expressed herein are based on information obtained during Coast 2 Coast’s effort and on Coast 2 Coast’s experience. If additional information becomes available, we request the opportunity to review the information and modify Coast 2 Coast’s opinions, if necessary.

Coast 2 Coast’s services have been provided using that degree of care and skill ordinarily exercised, under similar circumstances, by environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional opinions presented in this report.

Coast 2 Coast Environmental, Inc. is not responsible for the conclusions, opinions, or recommendations made by others based on this information.

2.6 Exceptions to ASTM Standard Practice E1527-13
Past owners and tenants were not interviewed.

The above exceptions are not considered to be significant in arriving at our findings and conclusions.
2.7 Special Terms and Conditions
Special terms and conditions which limited access to reasonably ascertainable information concerning the Property were not required by Lakeview 2, LLC.

2.8 User Reliance
This report has been prepared on behalf of, and for the exclusive use of Lakeview 2, LLC, Baldwin & Sons, Inc., County of San Diego and City of Chula Vista, A Municipal Corporation. The contents of this report may not be relied upon by any party other than Lakeview 2, LLC, Baldwin & Sons, Inc., County of San Diego and City of Chula Vista, A Municipal Corporation without the express written consent of Coast 2 Coast Environmental, Inc.
3.0 INFORMATION PROVIDED BY CLIENT

3.1 Owner, Property Manager and Occupant Information
The current owner of the Property is Lakeview 2, LLC. The Property manager include employees of Baldwin & Sons, Inc. The Property is not occupied.

3.2 Title Records, Environmental Liens and Activity and Use Limitations
A review of reasonably ascertainable environmental lien records and activity and use limitations (AULs) for the Property was conducted by Coast 2 Coast Environmental on behalf of Lakeview 2, LLC for this assessment. Coast 2 Coast subcontractor, NETR, prepared an Environmental Lien Search Report which is included in Appendix C.

NETR did not find records of environmental liens or AULs for the Property. The most recent grant deed included with the Environmental Lien Search Report did not provide information concerning title to coal, oil, gas petroleum and other hydrocarbons substances naturally deposited beneath the Property’s surface. Coast 2 Coast did not observe warning signs on the Property indicating that underground pipeline easements crossed through the Property. The Property area is not within an area known to have oil and gas reserves.

A search of environmental records conducted by Environmental Data Resources, Inc. (EDR) did not find listings for the Property on the federal NPL Liens database, State Deed Restriction Listing or State Environmental Liens Listing. The federal databases track properties that the United States Environmental Protection Agency has filed liens against to recover remedial action costs or properties where an owner has been notified of potential liability. The State Deed Restrictions listing includes sites where AULs are in effect. The State Environmental Liens Listing includes sites where the State Department of Toxic Substances Control is a lien holder.

3.3 Specialized Knowledge
Mr. Stephen Haase, Senior Vice President of Balkwin & Sons, Inc. and an authorized representative of Lakeview 2, LLC, was not aware of environmental liens, AULs or issues and events of further environmental concern on the Property.

3.4 Valuation Reduction for Environmental Issues
Mr. Haase believes the current assessed value for the Property is within the fair market value range for the Property and is not aware of environmental issues which may have affected the price of the Property.

3.5 Other Information
Mr. Haase was not aware of other issues of environmental concern associated with the Property.
4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources
Coast 2 Coast Environmental reviewed a search of environmental records conducted by Environmental Data Resources, Inc. (EDR). A copy of EDR’s report is located in Appendix D. The following standard environmental records sources were reviewed as specified for the Property, adjoining and nearby sites. Next to each source is its abbreviation as it appears in the database. An explanation of each record source is provided in EDR’s beginning on Page GR-1 which immediately follows the Map Findings.

The Property, adjoining sites and nearby sites were not found within the search radii for the databases reviewed.

Information was not found during this assessment which indicated “orphan” sites (sites not plotted because of insufficient geo-coding information) which may appear on the above-listed databases had impacted the Property.

4.3 Physical Setting

4.3.1 Topographical Characteristics
The Property includes the southeast ¼ of the northwest ¼, the southwest ¼ of the northeast ¼ and the northeast ¼ of the southwest ¼ of Section 32, Township 17 South, Range 1 East (San Bernardino baseline and meridian) on the Jamul Mountains, California 7.5 minute United States Geological Survey (USGS) Topographic Map, which was reviewed for surface hydrologic and topographic characteristics. The topography of the Property is generally mountainous with the regional topographic gradient tending to the south. Site elevation ranges from approximately 850 to 1,200 feet above mean sea level (amsl). Hydraulic flow is generally in a down-gradient direction, usually toward the nearest surface water body. Surface drainage in the Property area is anticipated to flow to the south along unnamed seasonal drainages flowing into the Lower Otay Reservoir, located approximately 6,000 feet south of the Property. Flood plain zoning for the Property is Zone X which includes areas determined to be outside the 0.2% annual chance floodplain.

4.3.2 Geological Setting
The Property is located in the Peninsular Ranges physiographic province of southern California. According to a geologic map of the area (Tan, 2002) the site area is underlain by metavolcanic rocks and Tertiary sedimentary rocks. The metavolcanic rocks are named the Santiago Peak Volcanics, a somewhat metamorphosed sequence of Upper Jurassic volcanic and volcanioclastic rocks underlain by the Southern California Batholith, which is of mostly Cretaceous age. The Tertiary sedimentary rocks, which overlie the older Santiago Peak volcanics, are classified as Otay formation (Oligocene to Miocene) and consist of sandstone, siltstone, claystone and fanglomerate.

4.3.3 Soil Characteristics
As described by the United States Department of Agriculture (USDA) Natural Resources Conservation Service there are two types of surface soil on the Property (USDA, 1973). A brief description of these soils and their permeability classification are listed below.
Soil Type | Permeability
---|---
Friant rocky fine sandy loam, 30 to 70% slopes (FxG) | Moderately rapid
This soil is found on mountainous uplands and consists of fine sandy loams that formed in material weathered from fine-grained metasedimentary rock.

Olivenhain cobbly loam, 9 to 30% slopes (OhE) | Moderate
This soil is found on dissected marine terraces and consists of deep cobbly loams formed in old gravel and cobbly alluvium.

4.3.4 Hydrogeological Characteristics
The Property is in the Savage Hydrologic Subarea of the Dulzura Hydrologic Area of the Otay Hydrologic Unit of the San Diego Hydrologic Basin (10.31). Beneficial uses of the groundwater within the Savage Subarea include agricultural, municipal and industrial. Depth to groundwater in this area is estimated to be approximately 300 feet or more below ground surface based on the estimated depth of the water well found on the south adjoining Property during a previous assessment. Groundwater flow in the Property area is estimated to generally follow the topographic gradient which is to the south-southwest.

Potable water is not currently provided to the Property area.

4.4 Historical Use of the Property

4.4.1 Previous Environmental Reports
Previous environmental assessments and investigations of the Property prepared for Baldwin & Sons, Inc. and Lakeview 2, LLC were not found during this assessment. Coast 2 Coast Environmental, Inc. principal assessor, Marybeth Norgren, previously completed two Phase I ESAs which included the Property. A 2003 Phase I ESA was prepared while Ms. Norgren was employed by another firm. A second Phase I ESA was prepared by Coast 2 Coast in 2005 for another client. Ms. Norgren does not recall recognized environmental concerns on the Property during either previous assessment.

4.4.2 Chronological Review
A search of selected and readily available historical records was performed and interviews conducted with people having knowledge of the Property's history, in an effort to find if past use of the Property or activities conducted on, or in the vicinity of the Property could have adversely impacted the Property.

In summary, the Property has been undeveloped mountainous land since at least 1903. The more easterly of the north-south tracks was first observed crossing through the Property on a 1943 topographic map. The more westerly of the north-south tracks and the east-west track were first observed crossing through the Property on a 1989 aerial photograph. Other improvements to the Property were not observed on historical resources found for years between 1903 and the present.
The historical resources used in this assessment, along with Coast 2 Coast’s findings, are presented below in chronological order. Attempts were made to find information on five-year intervals but data gaps may exist if information was not reasonably ascertainable for each interval.

1900: A 1903 topographic map does not depict structures on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. A seasonal stream bed is visible on the east end of the Property. Evidence of hazardous materials use on the Property was not found during this period.

1910: A specific historical resource was not found for this period.

1920: A 1928/1929 aerial photograph depicts the Property as undeveloped mountainous land. Evidence of hazardous materials use on the Property was not found during this period.

1930: Beginning in 1936, Mr. Stephen Birch began purchasing property in and around Ranchos Otay and Janal after visiting the area in the 1920s. Though Mr. Birch had made his fortune as a mining engineer in Alaska and was chairman of Kennecott Copper Corporation, information was not found during this assessment indicating his purchase of the Property and surrounding lands was due to mining interests. Altogether Mr. Birch purchased 35,000 acres of land including the Property. His family included his wife, Mary Celine Marshall Rand, a daughter, Mary, born in 1917 and a son, Stephen, Jr., born in 1918. The family lived at Rancho del Otay and their 29,000 acre ranch originally operated under the name Otay Agricultural Corporation until being renamed United Enterprises. Upon formation of United Enterprises, Mr. Birch, Sr. named his son, Stephen, Jr., as the President and his daughter, Mary, as Vice President. The Stephen and Mary Birch Foundation was formed in 1939. United Enterprises appeared as the owner of the Property prior to it being granted to Baldwin Vista Associates, L.P. in November 1988.

The Birch’s ranch was used for growing lima beans, hay and grain and cattle ranching. Based on comments from Mr. Adams, a former ranch supervisor who was interviewed in January 2000 during a previous Phase I ESA of an adjoining area, it appears that cattle ranching was likely the Birch’s primary use for the majority of their land throughout their ownership. The Property was too mountainous for agricultural use but it is possible that it was used for cattle grazing. Evidence of hazardous materials use on the Property was not found during this period.

1940: In 1940, Mr. Birch, Sr. died and Miss Mary Birch inherited the ranch, United Enterprises, and Rancho del Otay. (Mr. Stephen Birch, Jr. inherited the family’s New Jersey home and did not have an active role in managing the family’s San Diego County holdings. He died in 1970.)

A 1943 topographic map does not depict structures on the Property. A north-south seasonal stream bed is visible on the east end of the Property and a second seasonal streambed passes
northeast to southwest through the north corner of the Property. The more easterly of the two north-south four-wheel drive/foot tracks is noted on the map. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1945: A 1949 aerial photograph does not depict agricultural use or other development of the Property. There is a trace of the four-wheel drive/foot track noted on the 1943 topographic map. Evidence of hazardous materials use on the Property was not found during this period.

1950: A 1953 aerial photograph does not depict significant changes to the Property compared to the 1949 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1955: In 1955, Miss Mary Birch married Mr. Patrick R. Patrick and they settled at Rancho del Otay. A 1955 topographic map does not depict changes to the Property compared to the 1943 map. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1960: A 1964 aerial photograph does not depict significant changes to the Property compared to the 1953 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1965: A 1968 aerial photograph does not depict significant changes to the Property compared to the 1964 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1970: A 1970 aerial photograph does not depict significant changes to the Property compared to the 1964 and 1968 photographs. Mr. Patrick died in 1971. A 1971 photorevised topographic map does not depict changes to the Property compared with the 1955 map. Structures are not depicted on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1975: A 1975 photorevised topographic map does not depict changes to the Property compared with the 1971 map. Structures are not depicted on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. A 1979 aerial photograph does not depict significant changes to the Property compared to the 1970 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1980: A November 1983 aerial photograph does not depict significant changes on the Property compared to the 1979 photograph. Mrs. Mary Birch Patrick died in November 1983 and she named Mrs. Rose Patek as co-executor of her estate along with Southern California First National Bank. The estate included controlling interest in United
Enterprises. During the 1980s, United Enterprises prepared documents for the development of the Otay Ranch villages. In 1984 or 1985, City National Bank replaced Southern California First National Bank as the co-executor of the estate. Evidence of hazardous materials use on the Property was not found during this period.

1985: On November 4, 1988, United Enterprises granted the Property to First American Title Insurance Company (Document #88-0567316) which in turn granted the Property to Baldwin Vista Associates L.P. on December 7, 1988 (Document #88-0629805). Baldwin Vista Associates was a company owned by James and Alfred Baldwin. A 1989 aerial photograph depicts all three of the current four-wheel drive/foot tracks crossing the Property. Evidence of hazardous materials use on the Property was not found during this period.

1990: A 1994 aerial photograph does not depict significant changes on the Property compared to the 1989 photograph. In 1993, Baldwin Vista Associates, L.P. amended its partnership name to Otay Vista Associates, L.P. (Document #93-0310558) and again in 1994 to The Otay Ranch L.P. (Document #94-0522559). A 1994 topographic map does not depict changes to the Property compared with the 1975 map. (It does not depict the two new four-wheel drive/foot tracks. Structures are not depicted on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1995: The Baldwin Company declared bankruptcy in July 1995 but they retained the Property as part of the bankruptcy settlement. A 1996 aerial photograph does not depict significant changes on the Property compared to the 1994 photograph. In August 26, 1997, Otay Ranch L.P. granted the Property to South Bay Project, LLC (Document #97-0411918) which on the same day transferred the Property to Otay Project, LLC (Document #97-0411919) which was still a company controlled by the Baldwins. On July 30, 1999, Otay Project, LLC granted the Property to Otay Project, L.P. (Document #99-0527467). Evidence of hazardous materials use on the Property was not found during this period.

2000: Mr. Rob Cameron was interviewed by Ms. Norgren in 2003 during an assessment of an area which included the Property. At the time of the interview, Mr. Cameron was an authorized representative of Otay Project, L.P. He stated that The Otay Ranch Company stopped allowing cattle ranching on the Village 13 property in 2000. A 2002 aerial photograph does not depict significant changes to the Property compared to the 1996 photograph. Evidence of hazardous materials use on the Property was not found during this period.

2005: 2005 and 2009 aerial photographs do not depict significant changes to the Property compared to the 2002 aerial. Evidence of hazardous materials use on the Property was not found during this period.

2010: 2010 and 2012 aerial photographs do not depict significant changes to the Property compared to the 2009 photograph. On December 14, 2012, Otay Project, L.P. granted land
including the Property to the current owner, Lakeview 2, LLC (Document #12-0803692.) A 2014 aerial photograph from SanGIS used as the base map for Hunsaker & Associates Access Exhibit of Otay Ranch Village 13 does not depict significant changes to the Property compared to the 2012 photograph. Evidence of hazardous materials use on the Property was not found.

4.4.3 Historical Sources Reviewed
Historical sources between 1903 and the present were reviewed and included the following:

Building Permits: The Property is within an unincorporated area of the County of San Diego. The County of San Diego Development Services Department maintains computerized records of building permits dating back to 1987 and descriptions of purged building permits dating back to 1972. Since there has been no building activity on the Property between 1972 and the present and because there are no street addresses for the Property, building permit records were not searched.

City Directories: As there are no street addresses for the Property, city directories could not be researched for the Property.

Chain-of-Title/Assessor Records: A chain of title was not in the scope of work for this project. Coast 2 Coast reviewed recent assessor information for the Property available on First American Title Company’s FastWeb database. Coast 2 Coast previously reviewed readily accessible ownership information for the Property on the County Recorder’s computerized database.

Sanborn Maps: EDR reported that Sanborn maps were not available for the Property area.

4.5 **Historical Use of the Adjoining Sites**

Specific historical research was not conducted for the adjoining sites and surrounding area. However, in the process of researching historical data for the Property, the following historical information was obtained for the adjoining sites:

**North:** The site adjoining the Property to the north has been undeveloped mountainous land dating back to at least 1903. The oldest of the four-wheel drive/foot tracks continued on to this site from the Property. Issues of further environmental concern associated with the past use of this adjoining site were not found.

**East:** The site adjoining the Property to the east has been undeveloped mountainous land dating back to at least 1903. Issues of further environmental concern associated with the past use of this adjoining site were not found.

**South:** The site adjoining the Property to the south has been undeveloped mountainous land dating back to at least 1903. Issues of further environmental concern associated with the past use of this adjoining site were not found.

**West:** The site adjoining the Property to the west has been undeveloped mountainous land dating back to at least 1903. The two newer four-wheel drive/foot tracks (first observed on a 1989 photograph) continued on to this site from the Property. Issues of further environmental concern associated with the past use of this adjoining site were not found.

In addition, the surrounding area was historically undeveloped land in the surrounding mountains or land used for cattle grazing and some crop cultivation on the lower elevations where Village 13 is planned for development. Information was not found during this assessment indicating that these past uses impacted the environmental quality of the Property.
5.0 PROPERTY DESCRIPTION AND SITE RECONNAISSANCE

5.1 Property and Vicinity General Characteristics

Lot Size: 121.55 acres

Current Zoning: The Property is currently zoned S87 (Limited Control)/S88 (Specific Plan).

Roads: Roads were not observed crossing through the Property.

5.2 Structures, Other Improvements and Utilities

Site Improvements: Buildings were not observed on the Property.

Other Structures: Sheds, awnings and other secondary structures were not observed on the Property.

Hardscaped Areas: Paved areas were not observed on the Property.

Landscaped Areas: Landscaping was not observed on the Property. Observed native vegetation appeared to be in good condition and did not appear to be damaged or stressed in a manner which could be attributable to the presence of contamination.

Water Retention Areas: Pits, ponds, lagoons, swimming pools and other water retention areas were not observed on the Property.

Utilities: The Property is not currently served by water, sewer, gas or electric utilities.

Heating & Cooling Systems: Heating and cooling systems which may require fuel were not observed on the Property.

5.3 Site Reconnaissance Methodology and Limiting Conditions

On April 27, 2016, Marybeth Norgren conducted a site reconnaissance of the Property to find if current usage or activities on the Property have created, or have the potential to create, an environmental impairment to the Property. The results of the site reconnaissance are presented below.

A site reconnaissance typically begins with a guided tour of the interior of the buildings on the Property. During the site reconnaissance an emphasis is placed on viewing areas where activities likely to use and generate hazardous materials occur such as maintenance and repair areas, boiler rooms and manufacturing areas. In addition, accessible common areas and a representative sample of tenant (occupant) spaces are observed.

For an undeveloped Property, the site reconnaissance focuses on walking or driving along the main roads and foot paths surrounding or within the Property in order to view as much of the Property as is readily accessible. The site reconnaissance is completed by viewing the Property from all adjacent public thoroughfares and commercial properties (where possible). During this site reconnaissance,
Ms. Norgren hiked all three tracks that cross the Property. The Property was also viewed from four-wheel drive roads south of the Property.

During this assessment, the access code to the Property gate was provided by Ms. de Murguia. However, upon arrival Coast 2 Coast found the gate was already open. Ms. de Murguia did not accompany Coast 2 Coast during the site reconnaissance.

5.4 Observed Use of the Property and Current Condition

The Property is currently undeveloped and unoccupied. On-site activities of environmental concern were not observed during Coast 2 Coast’s assessment of the Property.

A Property Plan (Figure 2) depicting the general configuration of the Property as well as pertinent site observations is included in Appendix A. Photographs of the Property are included in Appendix B.

6.3 Interior and Exterior Observations

Coast 2 Coast looked for the following improvements and features on the Property and whether the use, treatment, storage, disposal or generation of hazardous substances and petroleum products had occurred on the Property.

Drains and Sumps:
Floor drains, floor sinks, trench drains, sumps and clarifiers were not observed on the Property.

Odors:
Strong, pungent or noxious odors were not detected during the assessment.

Oil and Gas Pipelines and Wells
Map W1-7 prepared by the State of California Division of Oil, Gas and Geothermal Resources did not show oil wells within a one-mile radius of the Property.

Pest Control:
The Property does not use regularly-scheduled pest control services.

Potential PCB-Containing Equipment:
Transformers and other potential PCB-containing equipment were not observed on the Property.

Septic Systems and Wells:
Septic systems and water wells were not observed on the Property.

Stains and Corrosion:
Evidence of staining and corrosion caused by sources other than standing water. Evidence of stains or corrosion by hazardous substances was not observed.
Stained Soil and Pavement:
Visual observations were made of the soil and paved areas to find discolorations or surface staining which could be indicative of contaminant discharge.

Significant soil and pavement stains were not observed on the Property.

Hazardous Materials:
Hazardous materials were not observed on the Property.

Drums and Other Containers:
Drums or other potential chemical containers were not observed.

Storm Drains:
Storm drains were not observed on the Property.

Surface Anomalies/Depression:
Visual observations were also made to find the presence of environmentally unusual and/or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, waste dump sites, leach fields or other subsurface activities.

Surface anomalies and depressions were not observed on the Property.

Surface Drainage on Site:
Based upon Property surface and improvement characteristics observed during Coast 2 Coast’s site reconnaissance of the Property, surface drainage at the Property would flow to the south along two seasonal streambeds that cross the Property.

Surface Drainage Obstructions:
During Coast 2 Coast's site reconnaissance it was observed that the Property is protected from surface run-off from adjoining sites to the south by topography.

Underground and Aboveground Storage Tanks:
Underground and above ground storage tanks were not observed on the Property.

Waste Disposal:
Hazardous Waste Disposal: The Property does not currently generate hazardous waste requiring disposal.

Solid Waste: Solid waste (trash) was not observed on the Property.

Illegal dumping was not observed on the Property.
5.6 Current Uses of Adjoining Sites

The present land usage of the adjoining sites was also observed to assess their potential to adversely impact the Property. These observations were made “off-site” and in most cases did not involve entering the adjoining site. The results of these observations are presented below:

**North:** The site adjoining the Property to the north is occupied by undeveloped mountainous terrain which is part of the Jamul Mountains. Storm water runoff from this site flows onto the Property. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

**East:** The site adjoining the Property to the east is occupied by undeveloped mountainous terrain which is part of the Jamul Mountains. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

**South:** The site adjoining the Property to the south is occupied by undeveloped hilly terrain. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

**West:** The site adjoining the Property to the west is occupied by undeveloped mountainous terrain which is part of the Jamul Mountains. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

5.7 Area Reconnaissance

A vehicular reconnaissance of the surrounding area in the immediate vicinity of the Property was conducted to observe, in very general terms, the current land use of the sites in the area and to assess if this use poses an environmental threat to the Property. Land usage in the general vicinity of the Property included undeveloped mountainous terrain which is part of the Jamul Mountains and the yet to be developed area of Village 13. These uses did not appear to pose an environmental threat to the Property.
6.0 INTERVIEWS
Records of communication for interviews and agency contacts completed during this assessment are included in Appendix E.

6.1 Interview with Owner
Mr. Stephen Haase, Senior Vice President with Baldwin & Sons, Inc., completed an Owner Questionnaire for the Property. Mr. Haase is an authorized representative for Lakeview 2, LLC. He was not aware of issues or events of environmental concern associated with the Property.

6.2 Interview with the Property Manager
Mr. Haase and other staff at Baldwin & Sons including Ms. Mora de Murguia manage the Property. Neither Mr. Haase nor Ms. de Murguia were aware of issues or events of environmental concern associated with the Property.

6.3 Interviews with Occupants
The Property is not occupied.

6.4 Interviews with Local Government Officials
Coast 2 Coast contacted the Certified Unified Program Agency (CUPA) for the Property. The CUPA is responsible for enforcement and monitoring of various environmental programs. For the Property, the San Diego County Department of Environmental Health (DEH) is the CUPA.

DEH is now generally responding to records requests electronically. For each address or APN submitted to the agency, DEH will provide a written response that it has no records or it will provide electronic copies of its files for an address. In general, detailed inspection records dated earlier than the late-1990s for most sites have been purged from DEH’s files and only a brief summary page is available. Copies of past and current Unified Permits, Hazardous Materials Business Plans and Hazardous Materials Inventories are not readily available and require written permission from Business Owner to obtain. Coast 2 Coast attempts to acquire copies of these documents during the site reconnaissance.

On May 4, 2016, DEH responded that it has no records for the Property APN.

6.5 Interviews with Others
Other individuals with knowledge of the Property were not found during this assessment.
7.0 ADDITIONAL SERVICES

7.1 Asbestos and Lead-Based Paint
Since the Property was not developed with structures, a visual inspection for asbestos and lead-based paint concerns was not conducted during this assessment.

7.2 Radon
Radon is a colorless, odorless gas that can seep into structures from the ground. It is a leading cause of lung cancer. The USEPA has a recommended action level of 4.0 picoCuries per liter (pCi/L) of air. The USEPA has classified San Diego County as Zone 3, indicating that the average indoor radon activity is not expected to exceed 2 pCi/L.

Existing radon testing data for the Property area is summarized in EDR’s report which is included in Appendix D. Within the zip code of the Property, no homes have been tested by a State radon program. In the adjoining zip code of 91935, six homes were tested as part of a State program and all the homes were reported to have radon concentrations less than 4.0 pCi/L.

Within San Diego County, thirty homes were tested as part of a Federal program and were reported to have less than 4.0 picocuries/liter (pCi/L) with the average concentration being 0.677 pCi/L on the first floor and 0.400 pCi/L on the second floor. As these results are below the EPA action level, it is not anticipated that radon poses a significant environmental threat to the Property.

7.3 Vapor Encroachment
The Property is not known to have had current or past contamination that may result in vapor encroachment. Evidence was not found during this assessment indicating that there was a potential environmental concern which may be the result of vapor intrusion with respect to the buildings on the Property.

Information was not found during this assessment indicating that adjoining and nearby sites have had current or past contamination which may have resulted in vapor encroachment.

Maps included in EDR’s report in Appendix D did not indicate a regional groundwater contamination plume. Other information or evidence of a regional groundwater contamination plume was not found during this assessment.

Other conditions which may result in vapor encroachment at the Property were not found during this assessment.
8.0 FINDINGS AND CONCLUSIONS

Based upon Coast 2 Coast’s review of the information obtained during the course of this assessment of the Property and herein presented, we have formed the following opinions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:

  United States Environmental Protection Agency (U.S. EPA) National Priorities List (NPL) (including delisted sites)
  State- and tribal-equivalent priorities list
  U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]
  State- and tribal-equivalent CERCLIS
  U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACTS Facilities
  U.S. EPA RCRA Generators
  U.S. EPA Emergency Response Notification System (ERNS)
  Federal Institutional Control (IC) or Engineering Control (EC) Registries
  State- and tribal-equivalent IC and EC Registries
  State Leaking Underground Storage Tank Program (LUST) and tribal equivalent
  State Registered Underground Storage Tank (UST) and tribal equivalent
  State Solid Waste Information System (SWIS) and tribal equivalent
  State and tribal Voluntary Cleanup Program (VCP) sites
  State and tribal Brownfields sites

- Structures were not observed on the Property.

- Solid waste, hazardous waste or illegally dumped debris was not observed on the Property.

- Coast 2 Coast’s review of historical information sources did not indicate that the Property had been subjected to past activities that would represent a potential environmental threat or impact to the Property.

- High voltage electrical transformers were not found on the Property.

- A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.

- Recognized environmental conditions were not found on the Property during this assessment.
9.0 RECOMMENDATIONS

Based upon Coast 2 Coast’s review of the information presented in the report, and our resulting conclusions, we recommend the following:

- It is Coast 2 Coast’s opinion that further environmental assessment of this Property is not warranted at this time.
10.0 DEVIATIONS

We have performed a Phase I Environmental Site Assessment of the Property at North of Otay Lakes Road, Chula Vista, San Diego, California in conformance with the scope and limitations of ASTM Standard E1527-13. Exceptions to, or deletions from, the standard practice are described in Section 1.2 of this report. This assessment did not reveal evidence of recognized environmental conditions in connection with the Property.

12.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Submitted:

Marybeth Norgren
Principal
13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

Marybeth Norgren
Principal

Education
B.S., Chemistry, California State University Fullerton, 1988
M.S., Environmental Management, University of San Francisco, 1999
Asbestos Fiber Counting (NIOSH 582), McCrone Research Institute
EPA/AHERA Building Inspector and Management Planner, Design for Health
EPA/AHERA Asbestos Abatement Contractor/Supervisor, Design for Health

Cal-OSHA Certified Asbestos Consultant #92-0720
California DHS Lead-Related Construction Inspector/Assessor and Project Monitor, #541

Experience
Ms. Norgren has more than 25 years of experience managing and conducting environmental site assessments (ESAs) and hazardous materials surveys on all types of properties including commercial, industrial, residential, agricultural and unimproved properties. She has utilized the ASTM 1527 standard for ESAs since its inception in the early 1990s and incorporated it into client specific standards as requested. She has managed projects involving underground storage tank removals, unauthorized releases and associated sampling. In addition, she has experience conducting all phases of asbestos and lead-based paint abatement projects including comprehensive building surveys, contract bid solicitation, contract administration, project specifications, and contract documentation. Prior to starting Coast 2 Coast Environmental, Inc. in 2004, she worked for both small and large consulting firms on projects primarily located in the western United States.

Relevant Projects
Wells Fargo Bank/First Interstate Bank, Bank of the West, Bank of America, Union Bank and Great Western Bank - Various Locations. Managed and conducted Phase I ESAs for commercial, industrial, retail and agricultural properties throughout California as well as Arizona, Nevada, Oregon, Washington, Texas and Midwest and East Coast sites. Assessment activities included Property reconnaissance, agency record reviews, historical land use research, geologic conditions research, and recommendations for handling identified concerns. Property reconnaissance has included asbestos sampling, radon sampling and/or water and paint sampling for lead. Conducted Phase II ESAs including comprehensive asbestos surveys and soil and groundwater sampling.

City of Ontario Housing Agency, Ontario, CA. Managed a multi-year contract for asbestos and lead-based paint sampling of 600 homes which were part of the Residential Sound Insulation Project to reduce air traffic noise from Ontario Airport. Other work included conducting Phase I ESAs and demolition surveys for asbestos and lead-based paint on properties being purchased by the City in high noise areas.
Paseo Project, San Diego State University Foundation, San Diego, CA. Prepared a Phase I Environmental Site Assessment (ESA) of five city blocks south of San Diego State University. The ESA was part of the Hazardous Materials Technical Study for the SDSU Foundation Master Plan concerning the formation of a redevelopment project area on lands adjacent to the University. The ESA included historical research dating back to the development of the area beginning in 1931 when the University moved to its current location. The report also included a review of agency files for four gas stations which were either currently or historically located on the site.

J Serra High School Expansion, San Juan Capistrano, CA. Prepared a Phase I Environmental Site Assessment Update as part of the Hazardous Materials Technical Study for an environmental impact report for the recreational facilities of the J Serra High School located on approximately 30 acres of land in San Juan Capistrano. As a private school, J Serra High School board chose not to have the project reviewed by the Department of Toxic Substances Control (DTSC), but the report was prepared in a format acceptable to DTSC. Issues associated with the project site included two adjacent and upgradient gasoline stations with active leaking underground storage tank cases and historic use of the site for agricultural orchards.

Various Residential and Commercial Developers and Land Brokers, San Diego County, CA. Managed and prepared Phase I ESAs for San Diego developers including McMillin Companies, The Otay Ranch Company, Affirmed Housing Group and Hitzke Development Corporation. Properties assessed have included large tracts of land proposed for use as residential communities, commercial developments and mitigation bank sites.

Department of the Navy, Southwest Division, San Diego, CA. Conducted lead-based paint surveys and prepared Operations and Maintenance Programs based on survey results. Surveys included all exterior and some interior surveys on 170 buildings at two naval bases in San Diego. Conducted Pollution Prevention Assessment surveys of various naval operation shops to identify processes in each shop that use hazardous chemicals and/or generate hazardous waste. Prepared reports describing and quantifying materials used in the shops' processes.

City of Los Angeles Department of Airports, CA. Managed asbestos survey of approximately fifty buildings at Van Nuys Airport and Van Nuys California Air National Guard Facility. Based on survey results, prepared asbestos abatement specifications. Project included arranging for approval of special abatement procedures from the South Coast Air Quality Management District.

Trizec Properties, Inc., Various Locations. Performed contractor supervision and industrial hygiene services during removal of asbestos-containing fireproofing. All buildings were multi-story commercial structures and projects ranged from abating single suites to full-floor abatement. Responsible for ensuring contractor followed all government regulations and maintained proper work practices.

At the request of Baldwin & Sons, Inc., Marybeth Norgren with Coast 2 Coast Environmental, Inc. is the environmental professional preparing a Phase I Environmental Site Assessment (ESA) for your Property in accordance with ASTM E 1527-13. The ASTM standard requires the Property owner to be interviewed. In order to fulfill this requirement, this questionnaire is being sent to you for completion. Coast 2 Coast Environmental, Inc. appreciates your effort to respond to the questions in a timely manner. If you need assistance or have questions, please contact Coast 2 Coast Environmental, Inc. using the contact information listed above.

1. Are you aware of any environmental cleanup liens against the Property that filed or recorded under federal, tribal, state or local law?
   - No [✓]
   - Yes_____ Please explain:

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed against the Property under federal, tribal, state or local law?
   - No [✓]
   - Yes_____ Please explain:

3. As the owner and occupant of the Property do you have any specialized knowledge or experience related to the Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   - No [✓]
   - Yes_____ Please explain:
4. Does the purchase price being paid or most recent appraised value for this Property reasonably reflect the fair market value of the Property? (We are not asking you to tell us what the Property is worth, just whether you think it is fair and not reduced in value due to environmental concerns.)
   Yes [ ]
   Not applicable [ ]
   Please explain N/A response: ____________________________
   No [ ]
   (Refinancing not buying Property or other reason)

5. If the preceding answer is “No”, is the price lower because contamination is known or believed to be present at the Property?
   Not applicable [ ]
   Yes [ ]
   Please explain: ____________________________
   No [ ]
   Please explain: ____________________________
   (Ex: Foreclosure sale, slow market or other known reason for reduced price)

6. Are you aware of commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions of releases or threatened releases of hazardous materials or waste?
   No [ ]
   Yes [ ]

7. Please provide as much information as you know about past owners, occupants and uses of the Property?
   a. Business names
      Unknown
   b. Approximate years the previous businesses occupied the Property
      Unknown
   c. How the previous businesses used the Property
      Agriculture/grazing
   d. Current or past Property owner names
      Unknown
   e. Reasons for selling (ex. business expanded – needed more room, business closed, estate sale due to death, etc.).
      N/A
   f. Addresses previously used for the Property
      Unknown
8. Do you know of specific chemicals that are present or were previously present at the Property?
   No  
   Yes  Please explain:

9. Do you know of spills or other chemical releases that have taken place on the Property?
   No  
   Yes  Please explain:

10. Do you know of any environmental cleanups that have taken place on the Property?
    No  
    Yes  Please explain:

11. Are there previous environmental reports for the Property (e.g. prior Phase I ESA, Phase II ESA, soil or groundwater sampling reports)?
    No  
    Yes  Please explain and provide copies of the reports: (see Appendix C-9 of EIR)

12. Based on your knowledge and experience related to the Property, are there any obvious indicators that point to the presence or likely presence of contamination at the Property?
    No  
    Yes  Please explain:

13. Any other comments you would like to provide concerning the Property:
    No  
    Yes  Please explain:

This questionnaire should be signed by the Property owner (e.g. managing member, officer of corporation, general partner or other legal representative.)

Prepared by:  Signature:  

Thanks for your assistance. Please return this form as a PDF file to C2CEnvironmental@AOL.com.

APPENDIX F: PREVIOUS REPORTS
APPENDIX G: SCOPE OF WORK
1.0 EXECUTIVE SUMMARY

Coast 2 Coast Environmental, Inc. was retained by Baldwin & Sons, Inc. to conduct an environmental site assessment on a portion of APN 598-140-04 and all of APN 598-140-05 located north of Otay Lakes Road, Chula Vista (unincorporated), San Diego County, California (Property). A site reconnaissance was performed on May 13, 2017 and August 7, 2017. The Property consists of 270 acres of undeveloped land covered with native vegetation except for undeveloped land covered with native vegetation except for one east-west and two north-south four-wheel drive tracks that cross the Property as various points. The north-south tracks narrow to foot paths as they traverse north (upslope) across the Property.

The Property is unoccupied. The four-wheel drive tracks are in poor condition and accessibility even by a four-wheel drive vehicle appears to be very limited. Illegal disposal along the tracks was not observed.

Historically, the Property has been undeveloped mountainous land since at least 1903. The more easterly of the north-south tracks was first observed crossing through the Property on a 1943 topographic map. The more westerly of the north-south tracks and the east-west track were first observed crossing through the Property on a 1989 aerial photograph. Other improvements to the Property were not observed on historical resources found for years between 1903 and the present.

Based upon information obtained from Coast 2 Coast’s research and visual observations made during our site visit, we have reached the following conclusions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:

  United States Environmental Protection Agency (U.S. EPA) National Priorities List (NPL) (including delisted sites)
  State- and tribal-equivalent priorities list
  U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]
  State- and tribal-equivalent CERCLIS
  U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACTS Facilities
  U.S. EPA RCRA Generators
  U.S. EPA Emergency Response Notification System (ERNS)
  Federal Institutional Control (IC) or Engineering Control (EC) Registries
  State- and tribal-equivalent IC and EC Registries
  State Leaking Underground Storage Tank Program (LUST) and tribal equivalent
  State Registered Underground Storage Tank (UST) and tribal equivalent
State Solid Waste Information System (SWIS) and tribal equivalent
State and tribal Voluntary Cleanup Program (VCP) sites
State and tribal Brownfields sites

- Structures were not observed on the Property.
- Solid waste, hazardous waste or illegally dumped debris was not observed on the Property.
- Coast 2 Coast’s review of historical information sources did not reveal evidence of recognized environmental conditions (RECs) in connection with the historical use of the Property
- High voltage electrical transformers were not found on the Property.
- A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.
- RECs were not found during this assessment in connection with the current use of the Property.

Based upon Coast 2 Coast’s review of the information presented in the report, and our resulting conclusions, we recommend the following:

- It is Coast 2 Coast’s opinion that further environmental assessment of this Property is not warranted at this time.
2.0 INTRODUCTION

2.1 Property Location and Legal Description

Name/Address: Village 13 Open Space Preserve Land  
North of Otay Lakes Road  
Chula Vista (unincorporated), California 91935

County: San Diego

Assessor Parcel Number or Other Legal Description: Portion of APNs 598-140-04 and 598-140-05-00

Owner: Lakeview One, LLC (598-140-04) and Lakeview 2, LLC (598-140-05)

2.2 Purpose

Coast 2 Coast Environmental Inc. performed a Phase I Environmental Site Assessment of land which will be dedicated as open space preserve within Village 13 located on a portion of APN 598-140-04 and all of APN 598-140-05 which is north of Otay Lakes Road in Chula Vista (unincorporated), San Diego County, California (Property). This assessment was performed under contract with Baldwin & Sons, Inc. at the direction of Ms. Mora de Murguia, Public Finance Manager. Coast 2 Coast’s services were authorized by Mr. Stephen M. Haase, Senior Vice President on April 27, 2017 and amended August 22, 2017.

The assessment of this Property was performed at the direction of Baldwin & Sons, Inc. in conjunction with its efforts to conduct “all appropriate inquiry (AAI) into the previous ownership and uses of the Property consistent with good commercial or customary practice”. The purpose of performing AAI is to identify “recognized environmental conditions (RECs)” associated with past and/or present operations at the Property or adjoining sites which may pose liability for Baldwin & Sons, Inc., Baldwin & Sons, LLC, Lakeview One, LLC, Lakeview 2, LLC, County of San Diego, and City of Chula Vista, A Municipal Corporation. By completing this step in the due diligence process, Baldwin & Sons, Inc., Baldwin & Sons, LLC, Lakeview One, LLC, Lakeview 2, LLC, County of San Diego, and City of Chula Vista, A Municipal Corporation satisfy one of the requirements to qualify for the "innocent landowner defense” under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 101(35).

2.3 Scope of Services

The assessment was performed in conformance with all of the components of the ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The assessment included, but was not necessarily limited to, the activities listed below:

- A reconnaissance of the Property to observe and assess characteristics of potential environmental concern.
- Observation of adjoining sites and the surrounding area to observe and assess characteristics of potential environmental concern which may impact the Property.
• Interviews with current and past owners, operators and occupants of the Property for the purpose of gathering information regarding the potential for contamination at the Property.

• Review of regulatory agency files and interviews with government agency officials to identify and assess any listings of regulatory permits, registrations, enforcement actions, contaminated sites, etc. likely to affect the Property.

• Review of historical resources to identify previous uses and occupancies of the Property since the Property was first developed or 1940, whichever is earlier.

• Visual inspection or use of other documentation to render an opinion as to the existence of asbestos, lead-based paint (interior and exterior), lead in the drinking water, and the potential for radon exposure.

• Development of a report to include discussion of the findings of the above tasks.

2.4 Significant Assumptions and Data Gaps
Significant assumptions concerning the Property were not made during this assessment except for the following:

• Lacking Property-specific information on the ground water gradient at the Property, it is assumed that the gradient mimics the topographic gradient.

• Information supplied by others is assumed to be correct and accurate.

2.5 Limitations
The conclusions and recommendations presented in this report are based upon reasonable visual reconnaissance of the Property and research of available materials within the scope and budget of the contract. The information presented is relevant to the dates of Coast 2 Coast’s Property visit and should not be relied upon to represent conditions at later dates.

The opinions expressed herein are based on information obtained during Coast 2 Coast’s effort and on Coast 2 Coast’s experience. If additional information becomes available, we request the opportunity to review the information and modify Coast 2 Coast’s opinions, if necessary.

Coast 2 Coast’s services have been provided using that degree of care and skill ordinarily exercised, under similar circumstances, by environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional opinions presented in this report.

Coast 2 Coast Environmental, Inc. is not responsible for the conclusions, opinions, or recommendations made by others based on this information.

2.6 Exceptions to ASTM Standard Practice E1527-13
Information concerning environmental liens or activity and use limitations (AULs) on the Property and a copy of the current title search were not provided.
Past owners and tenants were not interviewed.

The above exceptions are not considered to be significant in arriving at our findings and conclusions.

2.7 Special Terms and Conditions
Special terms and conditions which limited access to reasonably ascertainable information concerning the Property were not required by Baldwin & Sons, Inc.

2.8 User Reliance
This report has been prepared on behalf of, and for the exclusive use of Baldwin & Sons, Inc., Baldwin & Sons, LLC, Lakeview One, LLC, Lakeview 2, LLC, County of San Diego, and City of Chula Vista, A Municipal Corporation. The contents of this report may not be relied upon by any party other than Baldwin & Sons, Inc., Baldwin & Sons, LLC, Lakeview One, LLC, Lakeview 2, LLC, County of San Diego, and City of Chula Vista, A Municipal Corporation without the express written consent of Coast 2 Coast Environmental, Inc.
3.0 INFORMATION PROVIDED BY CLIENT

3.1 Owner, Property Manager and Occupant Information
The current owner of the Property is Lakeview One, LLC and Lakeview 2, LLC, A Municipal Corporation. The Property manager is Baldwin & Sons, Inc. Mr. Stephen Haase, Senior Vice President of Baldwin & Sons, Inc. is an authorized representative of Lakeview One, LLC and Lakeview 2, LLC. The Property is not occupied.

3.2 Title Records, Environmental Liens and Activity and Use Limitations
A review of reasonably ascertainable environmental lien records and activity and use limitations (AULs) for the Property was conducted by Coast 2 Coast Environmental on behalf of Lakeview One, LLC and Lakeview 2, LLC for this assessment. Coast 2 Coast subcontractor, NETR, prepared an Environmental Lien Search Report which is included in Appendix C.

NETR did not find records of environmental liens or AULs for the Property. The most recent grant deed included with the Environmental Lien Search Report did not provide information concerning title to coal, oil, gas petroleum and other hydrocarbons substances naturally deposited beneath the Property’s surface. Coast 2 Coast did not observe warning signs on the Property indicating that underground pipeline easements crossed through the Property. The Property area is not within an area known to have oil and gas reserves.

A search of environmental records conducted by Environmental Data Resources, Inc. (EDR) did not find listings for the Property on the federal NPL Liens database, CERCLIS liens database, State Deed Restriction Listing or State Environmental Liens Listing. The federal databases track properties that the United States Environmental Protection Agency has filed liens against to recover remedial action costs or properties where an owner has been notified of potential liability. The State Deed Restrictions listing includes sites where AULs are in effect. The State Environmental Liens Listing includes sites where the State Department of Toxic Substances Control is a lien holder.

3.3 Specialized Knowledge
Mr. Stephen Haase, Senior Vice President of Baldwin & Sons, Inc. and an authorized representative of Lakeview One, LLC and Lakeview 2, LLC, was not aware of environmental liens, AULs or issues and events of further environmental concern on the Property.

3.4 Valuation Reduction for Environmental Issues
Mr. Haase believes the current assessed value for the Property is within the fair market value range for the Property and is not aware of environmental issues which may have affected the price of the Property.

3.5 Other Information
Mr. Haase was not aware of other issues of environmental concern associated with the Property.
4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Coast 2 Coast Environmental reviewed a search of environmental records conducted by Environmental Data Resources, Inc. (EDR). A copy of EDR’s report is located in Appendix D. The following standard environmental records sources were reviewed as specified for the Property, adjoining and nearby sites. Next to each source is its abbreviation as it appears in the database. An explanation of each record source is provided in EDR’s beginning on Page GR-1 which immediately follows the Map Findings.

The Property, adjoining sites and nearby sites were not found within the search radii for the databases reviewed.

Information was not found during this assessment which indicated “orphan” sites (sites not plotted because of insufficient geo-coding information) which may appear on the above-listed databases had impacted the Property.

### 4.3 Physical Setting

#### 4.3.1 Topographical Characteristics

The Property includes the southeast ¼ of the northwest ¼, the whole northeast ¼ and approximately the northeast ½ of the southeast ¼ of Section 32, Township 17 South, Range 1 East (San Bernardino baseline and meridian) on the Jamul Mountains, California 7.5 minute United States Geological Survey (USGS) Topographic Map, which was reviewed for surface hydrologic and topographic characteristics. The topography of the Property is generally mountainous with the regional topographic gradient tending to the south. Site elevation ranges from approximately 800 to 1,600 feet above mean sea level (amsl). Hydraulic flow is generally in a down-gradient direction, usually toward the nearest surface water body. Surface drainage in the Property area is anticipated to flow to the south along unnamed seasonal drainage that bisects the Property and flows south into the Lower Otay Reservoir, located approximately ¾ mile south of the Property. Flood plain zoning for the Property is Zone X which includes areas determined to be outside the 0.2% annual chance floodplain.

#### 4.3.2 Geological Setting

The Property is located in the Peninsular Ranges physiographic province of southern California. According to a geologic map of the area (Tan, 2002) the site area is underlain by metavolcanic rocks and Tertiary sedimentary rocks. The metavolcanic rocks are named the Santiago Peak Volcanics, a somewhat metamorphosed sequence of Upper Jurassic volcanic and volcaniclastic rocks underlain by the Southern California Batholith, which is of mostly Cretaceous age. The Tertiary sedimentary rocks, which overlie the older Santiago Peak volcanics, are classified as Otay formation (Oligocene to Miocene) and consist of sandstone, siltstone, claystone and fanglomerate.
4.3.3 Soil Characteristics

As described by the United States Department of Agriculture (USDA) Natural Resources Conservation Service there are two types of surface soil on the Property (USDA, 1973). A brief description of these soils and their permeability classification are listed below.

<table>
<thead>
<tr>
<th>Soil Type</th>
<th>Permeability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Friant rocky fine sandy loam, 30 to 70% slopes (FxG)</td>
<td>Moderately rapid</td>
</tr>
<tr>
<td>This soil is found on mountainous uplands and consists of fine sandy loams that formed in material weathered from fine-grained metasedimentary rock.</td>
<td></td>
</tr>
<tr>
<td>Olivenhain cobbly loam, 9 to 30% slopes (OhE)</td>
<td>Moderate</td>
</tr>
<tr>
<td>This soil is found on dissected marine terraces and consists of deep cobbly loams formed in old gravel and cobbly alluvium.</td>
<td></td>
</tr>
</tbody>
</table>

4.3.4 Hydrogeological Characteristics

The Property is in the Savage Hydrologic Subarea of the Dulzura Hydrologic Area of the Otay Hydrologic Unit of the San Diego Hydrologic Basin (10.31). Beneficial uses of the groundwater within the Savage Subarea include agricultural, municipal and industrial. Depth to groundwater in this area is estimated to be approximately 300 feet or more below ground surface based on the estimated depth of the water well found on the south adjoining Property during a previous assessment. Groundwater flow in the Property area is estimated to generally follow the topographic gradient which is to the south-southwest.

Potable water is not currently provided to the Property area.

4.4 Historical Use of the Property

4.4.1 Previous Environmental Reports

Previous environmental assessments and investigations of APN 598-140-04 prepared for Baldwin & Sons, Inc. and Lakeview One, LLC were not found during this assessment. Coast 2 Coast Environmental, Inc. principal assessor, Marybeth Norgren, previously completed two Phase I ESAs which included this APN. A 2003 Phase I ESA was prepared while Ms. Norgren was employed by another firm. A second Phase I ESA was prepared by Coast 2 Coast in 2005 for another client. Ms. Norgren does not recall finding recognized environmental concerns for APN 598-140-04 during either previous assessment.

A previous environmental report for APN 598-140-05 was prepared by Coast 2 Coast in April 2016 for Lakeview 2, LLC. Information from that report has been incorporated into the current report. Recognized environmental conditions were not found during the assessment.
4.4.2 Chronological Review

In summary, the Property has been undeveloped mountainous land since at least 1903. The more easterly of the north-south tracks was first observed crossing through the Property on a 1943 topographic map. The more westerly of the north-south tracks and the east-west track were first observed crossing through the Property on a 1989 aerial photograph. Other improvements to the Property were not observed on historical resources found for years between 1903 and the present.

The historical resources used in this assessment, along with Coast 2 Coast’s findings, are presented below in chronological order. Attempts were made to find information on five-year intervals but data gaps may exist if information was not reasonably ascertainable for each interval.

1900: A 1903 topographic map does not depict structures on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. A seasonal stream bed is visible on the east end of the Property. Evidence of hazardous materials use on the Property was not found during this period.

1910: A specific historical resource was not found for this period.

1920: A 1928/1929 aerial photograph depicts the Property as undeveloped mountainous land. Evidence of hazardous materials use on the Property was not found during this period.

1930: Beginning in 1936, Mr. Stephen Birch began purchasing property in and around Ranchos Otay and Janal after visiting the area in the 1920s. Though Mr. Birch had made his fortune as a mining engineer in Alaska and was chairman of Kennecott Copper Corporation, information was not found during this assessment indicating his purchase of the Property and surrounding lands was due to mining interests. Altogether Mr. Birch purchased 35,000 acres of land including the Property. His family included his wife, Mary Celine Marshall Rand, a daughter, Mary, born in 1917 and a son, Stephen, Jr., born in 1918. The family lived at Rancho del Otay and their 29,000 acre ranch originally operated under the name Otay Agricultural Corporation until being renamed United Enterprises. Upon formation of United Enterprises, Mr. Birch, Sr. named his son, Stephen, Jr., as the President and his daughter, Mary, as Vice President. The Stephen and Mary Birch Foundation was formed in 1939. United Enterprises appeared as the owner of the Property prior to it being granted to Baldwin Vista Associates, L.P. in November 1988.

The Birch’s ranch was used for growing lima beans, hay and grain and cattle ranching. Based on comments from Mr. Adams, a former ranch supervisor who was interviewed in January 2000 during a previous Phase I ESA of an adjoining area, it appears that cattle ranching was likely the Birch’s primary use for the majority of their land throughout their ownership. The Property was too mountainous for agricultural use but it is possible that it was used for cattle grazing. Evidence of hazardous materials use on the Property was not found during this period.
1940: In 1940, Mr. Birch, Sr. died and Miss Mary Birch inherited the ranch, United Enterprises, and Rancho del Otay. (Mr. Stephen Birch, Jr. inherited the family’s New Jersey home and did not have an active role in managing the family’s San Diego County holdings. He died in 1970.)

A 1943 topographic map does not depict structures on the Property. A north-south seasonal stream bed is visible on the east end of the Property and a second seasonal streambed passes northeast to southwest through the center of the Property. West of the seasonal stream is a north-south four-wheel drive/foot track is marked on the map. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1945: A 1949 aerial photograph does not depict agricultural use or other development of the Property. There is a trace of the four-wheel drive/foot track noted on the 1943 topographic map. Evidence of hazardous materials use on the Property was not found during this period.

1950: A 1953 aerial photograph does not depict significant changes to the Property compared to the 1949 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1955: In 1955, Miss Mary Birch married Mr. Patrick R. Patrick and they resided at Rancho del Otay. A 1955 topographic map does not depict significant changes to the Property compared to the 1943 map. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1960: A 1964 aerial photograph does not depict significant changes to the Property compared to the 1953 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1965: A 1968 aerial photograph does not depict significant changes to the Property compared to the 1964 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1970: A 1970 aerial photograph does not depict significant changes to the Property compared to the 1964 and 1968 photographs. Mr. Patrick died in 1971. A 1971 photorevised topographic map does not depict changes to the Property compared with the 1955 map. Structures are not depicted on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1975: A 1975 photorevised topographic map does not depict changes to the Property compared with the 1971 map. Structures are not depicted on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. A 1979 aerial photograph does not depict significant changes to the Property
compared to the 1970 photograph. Evidence of hazardous materials use on the Property was not found during this period.

1980: A November 1983 aerial photograph does not depict significant changes on the Property compared to the 1979 photograph. Mrs. Mary Birch Patrick died in November 1983. Mrs. Patrick’s co-executors were Mrs. Rose Patek and Southern California First National Bank. The estate included controlling interest in United Enterprises. During the 1980s, United Enterprises prepared documents for the development of the Otay Ranch villages. In 1984 or 1985, City National Bank replaced Southern California First National Bank as the co-executor of the estate. Evidence of hazardous materials use on the Property was not found during this period.

1985: On November 4, 1988, United Enterprises granted the Property to First American Title Insurance Company (Document #88-0567316) which in turn granted the Property to Baldwin Vista Associates L.P. on December 7, 1988 (Document #88-0629805). Baldwin Vista Associates was a company owned by James and Alfred Baldwin. A 1989 aerial photograph depicts all three of the current four-wheel drive/foot tracks crossing the Property. Evidence of hazardous materials use on the Property was not found during this period.

1990: A 1994 aerial photograph does not depict significant changes on the Property compared to the 1989 photograph. In 1993, Baldwin Vista Associates, L.P. amended its partnership name to Otay Vista Associates, L.P. (Document #93-0310558) and again in 1994 to The Otay Ranch L.P. (Document #94-0522559). A 1994 topographic map does not depict changes to the Property compared with the 1975 map. (It does not depict the two new four-wheel drive/foot tracks. Structures are not depicted on the Property. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found during this period.

1995: The Baldwin Company declared bankruptcy in July 1995 but they retained the Property as part of the bankruptcy settlement. A 1996 aerial photograph does not depict significant changes on the Property compared to the 1994 photograph. In August 26, 1997, Otay Ranch L.P. granted the Property to South Bay Project, LLC (Document #97-0411918) which on the same day transferred the Property to Otay Project, LLC (Document #97-0411919) which was still a company controlled by the Baldwins. On July 30, 1999, Otay Project, LLC granted the Property to Otay Project, L.P. (Document #99-0527467). Evidence of hazardous materials use on the Property was not found during this period.

2000: Mr. Rob Cameron was interviewed by Ms. Norgren in 2003 during an assessment of an area which included the Property. At the time of the interview, Mr. Cameron was an authorized representative of Otay Project, L.P. He stated that The Otay Ranch Company stopped allowing cattle ranching on the Village 13 property in 2000. A 2002 aerial photograph does not depict significant changes to the Property compared to the 1996 photograph. Evidence of hazardous materials use on the Property was not found during this period.
2005: 2005 and 2009 aerial photographs do not depict significant changes to the Property compared to the 2002 aerial. On September 11, 2009, Otay Project, L.P. granted land including the APN 598-140-04 to the current owner, Lakeview One, LLC (Document #2009-0508601.) Evidence of hazardous materials use on the Property was not found during this period.

2010: 2010 and 2012 aerial photographs do not depict significant changes to the Property compared to the 2009 photograph. On December 20, 2012, Otay Project, L.P. granted land including APN 598-140-05 to the current owner, Lakeview 2, LLC (Document #2012-0803692.) Evidence of hazardous materials use on the Property was not found.

2015: A 2016 aerial photograph does not depict significant changes to the Property compared to the 2012 photograph. Evidence of hazardous materials use on the Property was not found.

4.4.3 Historical Sources Reviewed
Historical sources between 1903 and the present were reviewed and included the following:

Building Permits: The Property is within an unincorporated area of the County of San Diego. The County of San Diego Development Services Department maintains computerized records of building permits dating back to 1987 and descriptions of purged building permits dating back to 1972. Since there has been no building activity on the Property between 1972 and the present and because there are no street addresses for the Property, building permit records were not searched.

City Directories: As there are no street addresses for the Property, city directories could not be researched for the Property.

Chain-of-Title/Assessor Records: Coast 2 Coast reviewed a chain-of-title environmental liens report for the Property and recent assessor information for the Property available on First American Title Company’s FastWeb database. Coast 2 Coast previously reviewed readily accessible ownership information for the Property at the County Recorder’s office.

Sanborn Maps: EDR reported that Sanborn maps were not available for the Property area.
4.5 Historical Use of the Adjoining Sites

Specific historical research was not conducted for the adjoining sites and surrounding area. However, in the process of researching historical data for the Property, the following historical information was obtained for the adjoining sites:

**North:** The site adjoining the Property to the north has been undeveloped mountainous land dating back to at least 1903. The oldest of the four-wheel drive/foot tracks continued on to this site from the Property. Issues of further environmental concern associated with the past use of this adjoining site were not found.

**East:** The site adjoining the Property to the east has been undeveloped mountainous land dating back to at least 1903. Issues of further environmental concern associated with the past use of this adjoining site were not found.

**South:** The site adjoining the Property to the south has been undeveloped mountainous land dating back to at least 1903. Issues of further environmental concern associated with the past use of this adjoining site were not found.

**West:** The site adjoining the Property to the west has been undeveloped mountainous land dating back to at least 1903. One of the four-wheel drive/foot tracks (first observed on a 1989 photograph) which crossed the Property continued onto this site. Issues of further environmental concern associated with the past use of this adjoining site were not found.

In addition, the surrounding area was historically undeveloped land in the surrounding mountains or land used for cattle grazing and some crop cultivation on the lower elevations where Village 13 is planned for development. Information was not found during this assessment indicating that these past uses impacted the environmental quality of the Property.
5.0 PROPERTY DESCRIPTION AND SITE RECONNAISSANCE

5.1 Property and Vicinity General Characteristics

Lot Size: 270 acres

Current Zoning: The Property is currently zoned S87 (Limited Control)/S88 (Specific Plan). Limited Control was a code that was applied to land that was unzoned as of December 1, 1969. It is expected that land within this zone will be converted to more appropriate zoning through implementation of long-range planning programs. Uses which are permitted within Limited Control include agricultural crops or animal grazing. The Specific Plan allows for limited uses as allowed for by the adopted plan.

Roads: Roads were not observed crossing through the Property.

5.2 Structures, Other Improvements and Utilities

Site Improvements: Buildings were not observed on the Property.

Other Structures: Sheds, awnings and other secondary structures were not observed on the Property.

Hardscaped Areas: Paved areas were not observed on the Property.

Landscaped Areas: Landscaping was not observed on the Property. Observed native vegetation appeared to be in good condition and did not appear to be damaged or stressed in a manner which could be attributable to the presence of contamination.

Water Retention Areas: Pits, ponds, lagoons, swimming pools and other water retention areas were not observed on the Property.

Utilities: The Property is not currently served by water, sewer, gas or electric utilities.

Heating & Cooling Systems: Heating and cooling systems which may require fuel were not observed on the Property.

5.3 Site Reconnaissance Methodology and Limiting Conditions

On May 13, 2017 and August 7, 2017, Marybeth Norgren conducted a site reconnaissance of the Property to find if current usage or activities on the Property have created, or have the potential to create, an environmental impairment to the Property. The results of the site reconnaissance are presented below.

A site reconnaissance typically begins with a guided tour of the interior of the buildings on the Property. During the site reconnaissance an emphasis is placed on viewing areas where activities likely to use and generate hazardous materials occur such as maintenance and repair areas, boiler
rooms and manufacturing areas. In addition, accessible common areas and a representative sample of tenant (occupant) spaces are observed.

The site reconnaissance continues by touring the exterior of the Property buildings and viewing the interior of any secondary structures such as sheds. The site reconnaissance is completed by viewing the Property from all adjacent public thoroughfares and commercial properties (where possible).

5.4 Observed Use of the Property and Current Condition

The Property is currently undeveloped and unoccupied. On-site activities of environmental concern were not observed during Coast 2 Coast’s assessment of the Property.

A Property Plan (Figure 2) depicting the general configuration of the Property as well as pertinent site observations is included in Appendix A. Photographs of the Property are included in Appendix B.

6.3 Interior and Exterior Observations

Coast 2 Coast looked for the following improvements and features on the Property and whether the use, treatment, storage, disposal or generation of hazardous substances and petroleum products had occurred on the Property.

Drains and Sumps:
Floor drains, floor sinks, trench drains, sumps and clarifiers were not observed on the Property.

Odors:
Strong, pungent or noxious odors were not detected during the assessment.

Oil and Gas Pipelines and Wells
Map W1-7 prepared by the State of California Division of Oil, Gas and Geothermal Resources did not show oil wells within a one-mile radius of the Property.

Pest Control:
The Property does not use regularly-scheduled pest control services.

Potential PCB-Containing Equipment:
Transformers and other potential PCB-containing equipment were not observed on the Property.

Septic Systems and Wells:
Septic systems and water wells were not observed on the Property.

Stains and Corrosion:
Evidence of staining and corrosion caused by sources other than standing water. Evidence of stains or corrosion by hazardous substances was not observed.
Stained Soil and Pavement:
Visual observations were made of the soil and paved areas to find discolorations or surface staining which could be indicative of contaminant discharge.

Significant soil and pavement stains were not observed on the Property.

Hazardous Materials:
Hazardous materials were not observed on the Property.

Drums and Other Containers:
Drums or other potential chemical containers were not observed.

Storm Drains:
Storm drains were not observed on the Property.

Surface Anomalies/Depression:
Visual observations were also made to find the presence of environmentally unusual and/or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, waste dump sites, leach fields or other subsurface activities.

Surface anomalies and depressions were not observed on the Property.

Surface Drainage on Site:
Based upon Property surface and improvement characteristics observed during Coast 2 Coast’s site reconnaissance of the Property, surface drainage at the Property would flow to the south along two seasonal streambeds that cross the Property.

Surface Drainage Obstructions:
During Coast 2 Coast's site reconnaissance it was observed that the Property is protected from surface run-off from adjoining sites to the south by topography.

Underground and Aboveground Storage Tanks:
Underground and above ground storage tanks were not observed on the Property.

Waste Disposal:
Hazardous Waste Disposal: The Property does not currently generate hazardous waste requiring disposal.

Solid Waste: Solid waste (trash) was not observed on the Property.

Illegal dumping was not observed on the Property.
5.6 Current Uses of Adjoining Sites

The present land usage of the adjoining sites was also observed to assess their potential to adversely impact the Property. These observations were made “off-site” and in most cases did not involve entering the adjoining site. The results of these observations are presented below:

North: The site adjoining the Property to the north is occupied by undeveloped mountainous terrain which is part of the Jamul Mountains. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

East: The site adjoining the Property to the east is occupied by undeveloped mountainous terrain which is part of the Jamul Mountains. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

South: The site adjoining the Property to the south is occupied by undeveloped hilly terrain. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

West: The site adjoining the Property to the west is occupied by undeveloped mountainous terrain which is part of the Jamul Mountains. Visual observations of this site did not indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

5.7 Area Reconnaissance

A vehicular reconnaissance of the surrounding area in the immediate vicinity of the Property was conducted to observe, in very general terms, the current land use of the sites in the area and to assess if this use poses an environmental threat to the Property. Land usage in the general vicinity of the Property includes the undeveloped mountainous terrain which is part of the Jamul Mountains and the undeveloped hilly terrain which is the within the area that will be developed for Village 13. These uses did not appear to pose an environmental threat to the Property.
6.0 INTERVIEWS

Records of communication for interviews and agency contacts completed during this assessment are included in Appendix E.

6.1 Interview with Owner

Mr. Stephen Haase, Senior Vice President with Baldwin & Sons, Inc., completed an Owner Questionnaire for the Property. Mr. Haase is an authorized representative for Lakeview One, LLC and Lakeview 2, LLC. He was not aware of issues or events of environmental concern associated with the Property.

6.2 Interview with the Property Manager

The Property is managed by Mr. Haase and other staff at Baldwin & Sons including Ms. Mora de Murguia, Public Finance Manager. Neither Mr. Haase nor Ms. de Murguia was aware of issues or events of environmental concern associated with the Property.

6.3 Interviews with Occupants

The Property is not occupied.

6.4 Interviews with Local Government Officials

Coast 2 Coast contacted the Certified Unified Program Agency (CUPA) for the Property. The CUPA is responsible for enforcement and monitoring of various environmental programs. For the Property, the San Diego County Department of Environmental Health (DEH) is the CUPA.

DEH is now generally responding to records requests electronically. For each address or APN submitted to the agency, DEH will provide a written response that it has no records or it will provide electronic copies of its files for an address. In general, detailed inspection records dated earlier than the late-1990s for most sites have been purged from DEH’s files and only a brief summary page is available. Copies of past and current Unified Permits, Hazardous Materials Business Plans and Hazardous Materials Inventories are not readily available and require written permission from Business Owner to obtain. Coast 2 Coast attempts to acquire copies of these documents during the site reconnaissance.

DEH responded that it has no records for either Property APN.

6.5 Interviews with Others

Other individuals with knowledge of the Property were not found during this assessment.
7.0 ADDITIONAL SERVICES

7.1 Asbestos and Lead-Based Paint
Since the Property was not developed with structures, a visual inspection for asbestos and lead-based paint concerns was not conducted during this assessment.

7.2 Radon
Radon is a colorless, odorless gas that can seep into structures from the ground. It is a leading cause of lung cancer. The USEPA has a recommended action level of 4.0 picoCuries per liter (pCi/L) of air. The USEPA has classified San Diego County as Zone 3, indicating that the average indoor radon activity is not expected to exceed 2 pCi/L.

Existing radon testing data for the Property area is summarized in EDR’s report which is included in Appendix D. Within the zip code of the Property six homes have been tested as part of a State program and all the homes were reported to have radon concentrations less than 4.0 pCi/L.

Within San Diego County, thirty homes were tested as part of a Federal program and were reported to have less than 4.0 picocuries/liter (pCi/L) with the average concentration being 0.677 pCi/L on the first floor and 0.400 pCi/L on the second floor. As these results are below the EPA action level, it is not anticipated that radon poses a significant environmental threat to the Property.

7.3 Vapor Encroachment
The Property is not known to have had current or past contamination that may result in vapor encroachment. Evidence was not found during this assessment indicating that there was a potential environmental concern which may be the result of vapor intrusion with respect to the buildings on the Property.

Information was not found during this assessment indicating that adjoining and nearby sites have had current or past contamination which may have resulted in vapor encroachment.

Maps included in EDR’s report in Appendix D did not indicate a regional groundwater contamination plume. Other information or evidence of a regional groundwater contamination plume was not found during this assessment.

Other conditions which may result in vapor encroachment at the Property were not found during this assessment.
8.0 FINDINGS AND CONCLUSIONS

Based upon Coast 2 Coast’s review of the information obtained during the course of this assessment of the Property and herein presented, we have formed the following opinions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:
  
  United States Environmental Protection Agency (U.S. EPA) National Priorities List (NPL) (including delisted sites)
  State- and tribal-equivalent priorities list
  U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]
  State- and tribal-equivalent CERCLIS
  U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACKTS Facilities
  U.S. EPA RCRA Generators
  U.S. EPA Emergency Response Notification System (ERNS)
  Federal Institutional Control (IC) or Engineering Control (EC) Registries
  State- and tribal-equivalent IC and EC Registries
  State Leaking Underground Storage Tank Program (LUST) and tribal equivalent
  State Registered Underground Storage Tank (UST) and tribal equivalent
  State Solid Waste Information System (SWIS) and tribal equivalent
  State and tribal Voluntary Cleanup Program (VCP) sites
  State and tribal Brownfields sites

- Structures were not observed on the Property.

- Solid waste, hazardous waste or illegally dumped debris was not observed on the Property.

- Coast 2 Coast’s review of historical information sources did not reveal evidence of recognized environmental conditions (RECs) in connection with the historical use of the Property

- High voltage electrical transformers were not found on the Property.

- A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.

- RECs were not found during this assessment in connection with the current use of the Property.
9.0 RECOMMENDATIONS

Based upon Coast 2 Coast’s review of the information presented in the report, and our resulting conclusions, we recommend the following:

- It is Coast 2 Coast’s opinion that further environmental assessment of this Property is not warranted at this time.
10.0 DEVIATIONS

We have performed a Phase I Environmental Site Assessment of the Property located north of Otay Lakes Road, Chula Vista (unincorporated), San Diego, California in conformance with the scope and limitations of ASTM Standard E1527-13. Exceptions to, or deletions from, the standard practice are described in Section 1.2 of this report. This assessment did not reveal evidence of recognized environmental conditions in connection with the Property.

12.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

*Experience*

Ms. Norgren has more than 25 years of experience managing and conducting environmental site assessments (ESAs) and hazardous materials surveys on all types of properties including commercial, industrial, residential, agricultural and unimproved properties. She has utilized the ASTM 1527 standard for ESAs since its inception in the early 1990s and incorporated it into client specific standards as requested. She has managed projects involving underground storage tank removals, unauthorized releases and associated sampling. In addition, she has experience conducting all phases of asbestos and lead-based paint abatement projects including comprehensive building surveys, contract bid solicitation, contract administration, project specifications, and contract documentation. Prior to starting Coast 2 Coast Environmental, Inc. in 2004, she worked for both small and large consulting firms on projects primarily located in the western United States.

*Relevant Projects*

**Wells Fargo Bank/First Interstate Bank, Bank of the West, Bank of America, Union Bank and Great Western Bank - Various Locations.** Managed and conducted Phase I ESAs for commercial, industrial, retail and agricultural properties throughout California as well as Arizona, Nevada, Oregon, Washington, Texas and Midwest and East Coast sites. Assessment activities included Property reconnaissance, agency record reviews, historical land use research, geologic conditions research, and recommendations for handling identified concerns. Property reconnaissance has included asbestos sampling, radon sampling and/or water and paint sampling for lead. Conducted Phase II ESAs including comprehensive asbestos surveys and soil and groundwater sampling.

**City of Ontario Housing Agency, Ontario, CA.** Managed a multi-year contract for asbestos and lead-based paint sampling of 600 homes which were part of the Residential Sound Insulation Project to reduce air traffic noise from Ontario Airport. Other work included conducting Phase I ESAs and demolition surveys for asbestos and lead-based paint on properties being purchased by the City in high noise areas.
Paseo Project, San Diego State University Foundation, San Diego, CA. Prepared a Phase I Environmental Site Assessment (ESA) of five city blocks south of San Diego State University. The ESA was part of the Hazardous Materials Technical Study for the SDSU Foundation Master Plan concerning the formation of a redevelopment project area on lands adjacent to the University. The ESA included historical research dating back to the development of the area beginning in 1931 when the University moved to its current location. The report also included a review of agency files for four gas stations which were either currently or historically located on the site.

J Serra High School Expansion, San Juan Capistrano, CA. Prepared a Phase I Environmental Site Assessment Update as part of the Hazardous Materials Technical Study for an environmental impact report for the recreational facilities of the J Serra High School located on approximately 30 acres of land in San Juan Capistrano. As a private school, J Serra High School board chose not to have the project reviewed by the Department of Toxic Substances Control (DTSC), but the report was prepared in a format acceptable to DTSC. Issues associated with the project site included two adjacent and upgradient gasoline stations with active leaking underground storage tank cases and historic use of the site for agricultural orchards.

Various Residential and Commercial Developers and Land Brokers, San Diego County, CA. Managed and prepared Phase I ESAs for San Diego developers including McMillin Companies, The Otay Ranch Company, Affirmed Housing Group and Hitzke Development Corporation. Properties assessed have included large tracts of land proposed for use as residential communities, commercial developments and mitigation bank sites.

Department of the Navy, Southwest Division, San Diego, CA. Conducted lead-based paint surveys and prepared Operations and Maintenance Programs based on survey results. Surveys included all exterior and some interior surveys on 170 buildings at two naval bases in San Diego. Conducted Pollution Prevention Assessment surveys of various naval operation shops to identify processes in each shop that use hazardous chemicals and/or generate hazardous waste. Prepared reports describing and quantifying materials used in the shops' processes.

City of Los Angeles Department of Airports, CA. Managed asbestos survey of approximately fifty buildings at Van Nuys Airport and Van Nuys California Air National Guard Facility. Based on survey results, prepared asbestos abatement specifications. Project included arranging for approval of special abatement procedures from the South Coast Air Quality Management District.

Trizec Properties, Inc., Various Locations. Performed contractor supervision and industrial hygiene services during removal of asbestos-containing fireproofing. All buildings were multi-story commercial structures and projects ranged from abating single suites to full-floor abatement. Responsible for ensuring contractor followed all government regulations and maintained proper work practices.

Photograph 19: North of the north adjoining site from approximately the middle of the north Property line of 598-140-04.

Photograph 20: Northeast view from approximately the middle of the dividing line between the NW¼ and the NE¼ of Section 32 within APN 598-140-04.
Photograph 21: South view from approximately the middle of the dividing line between the NW¼ and the NE¼ of Section 32 within APN 598-140-04.

Photograph 22: North view from approximately the middle of the SW¼ and the NE¼ of Section 32 within APN 598-140-05.

Photograph 23: East view from approximately the middle of the SW¼ and the NE¼ of Section 32 within APN 598-140-05.
Photograph 24: West to north view from the SW¼ of the SW¼ of the NE¼ of Section 32 within APN 598-140-05.

Photograph 25: Northeast view of the south adjoining site and the Property from the 4WD road.

Photograph 26: North view of the south end of the Property that is a 598-140-04.
APPENDIX C

HISTORICAL RESEARCH DOCUMENTATION
Certified Sanborn® Map Report

08/07/17

Certification #: 8949-4E4B-A500

Site Name:
Open Space Preserve
North of Otay Lakes Road
Chula Vista, CA 91914

Client Name:
Coast 2 Coast Env.
13964 Boquita Drive
Del Mar, CA 92014

EDR Inquiry #: 5014305.3
Contact: Marybeth Norgren

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Coast 2 Coast Env. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 8949-4E4B-A500
PO # 2017-044
Project 2017-044

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Limited Permission To Make Copies

Coast 2 Coast Env. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR’s copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2017 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.’s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR’s City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The NETR Environmental Lien and AUL Search Report

OTAY RANCH VILLAGE 13 OPEN SPACE PRESERVE
OTAY LAKES ROAD
CHULA VISTA, CALIFORNIA

Wednesday, August 16, 2017

Project Number: L17-01388

2055 East Rio Salado Parkway
Tempe, Arizona 85281

Telephone: 480-967-6752
Fax: 480-966-9422
The NETR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:
- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders’ office, registries of deed, county clerks’ offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved and description); and
- provide a copy of the deed or cite documents reviewed;

Thank you for your business
Please contact NETR at 480-967-6752
with any questions or comments

Marybeth Norgren with Coast 2 Coast Environmental, Inc. is the environmental professional preparing a Phase 1 Environmental Site Assessment (ESA) for your Property in accordance with ASTM E 1527-13. The ASTM standard requires the Property owner to be interviewed. In order to fulfill this requirement, this questionnaire is being sent to you for completion. Coast 2 Coast Environmental, Inc. appreciates your effort to respond to the questions in a timely manner. If you need assistance or have questions, please contact Coast 2 Coast Environmental, Inc. using the contact information listed above.

1. Are you aware of any environmental cleanup liens against the Property?
   No [✓] 
   Yes [ ] Please explain:

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site?
   No [✓] 
   Yes [ ] Please explain:

3. Do you have any specialized knowledge or experience related to the Property or nearby properties regarding environmental issues on the Property? For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   No [✓] 
   Yes [ ] Please explain:

August 10, 2017, APNs 598-14-04 & -05, Chula Vista, California
4. Does the purchase price being paid or most recent appraised value for this Property reasonably reflect the fair market value of the Property? (We are not asking you to tell us what the selling price or value of the Property is, just whether you think environmental issues have impacted the market value of the Property.)

Yes ______ Please explain further:

No ______

5. Are you aware of information about the Property that would help the environmental professional to identify conditions of releases or threatened releases of hazardous materials or waste?

No ______

Yes ______ (Please elaborate by responding to Questions 7 through 11.)

6. Please provide as much information as you know about past owners, occupants and uses of the Property?

No ______

Yes ______ If you know, please provide as much information as possible:

a. Business names Unknown
b. Approximate years the previous businesses occupied the Property Unknown
c. How the previous businesses used the Property Agriculture/Grazing
d. Current or past Property owner names Lakeview One, LLC; Lakeview 2, LLC
e. Reasons for selling (ex. business expanded – needed more room, business closed, estate sale due to death, etc.) N/A

7. Do you know of specific chemicals that are present or were previously present at the Property?

No ______

Yes ______ Please explain:

8. Do you know of spills or other chemical releases that have taken place on the Property?

No ______

Yes ______ Please explain:
9. Do you know of any environmental cleanups that have taken place on the Property?

No_______

Yes_______ Please explain:

10. Are there previous environmental reports for the Property other than the following?

No________

Yes_____ If yes, please provide copies or further explain. (see Appendix C-9)

11. Based on your knowledge and experience related to the Property, are there any obvious indicators that point to the presence or likely presence of contamination at the Property?

No_____ 

Yes_______ Please explain:

12. Any other comments you would like to provide concerning the Property:

No_____ 

Yes_______ Please explain:

This form should be signed by the Property owner (e.g. managing member, officer of corporation or other legal representative).

DEH-9098 (Rev. 12/12)
APPENDIX G

SCOPE OF WORK
The general purpose of the Phase I ESA will be to find recognized environmental conditions which may indicate hazardous substances or petroleum products have been released at the Property, whether the result of current or past activities on or near the Property. Coast 2 Coast endeavors to meet the criteria for "due diligence" as described in the Federal Superfund law and to meet the criteria of the American Society for Testing and Materials (ASTM) Standard E1527-13.

Scope of Services

The scope of services will include:

- Development of an environmental history of the Property including agricultural, industrial, manufacturing or other operations which may have involved the presence of petroleum or other hazardous substances on the Property. Sources of information may include current ownership records, plat plans, assessor’s records, oil and gas maps, building permit records, tenant lists, city and crisscross directories, fire insurance maps, aerial photograph review, interviews with persons knowledgeable about the Property, and interviews with hazardous materials response personnel concerning on site spills or releases of petroleum or hazardous substances. A fifty-year chain-of-title will not be provided as part of this assessment but existing title documents will be reviewed if they are made available by the client to Coast 2 Coast.

- Review topographic, geologic and hydrogeologic literature to establish surface and subsurface conditions, including groundwater depth and flow direction and water quality, if available;

- Conduct a detailed visual site inspection to document the present condition of the Property with respect to the current or past use of petroleum or other hazardous substances on the Property, including the presence of above or below ground storage tanks, electrical equipment that may contain polychlorinated biphenyl (PCB) oil, potential asbestos-containing materials, potential lead-based painted surfaces, drainage patterns onto and leaving the Property, septic systems, impoundments, sumps and other conditions that may create the risk of environmental liability or impairment;

- If petroleum or hazardous substances are or have been used on the Property, Coast 2 Coast will review management practices for the materials, including generation, use, storage, treatment, recycling and disposal; inventory acutely hazardous materials and other hazardous materials in containers larger than five gallons; and review Material Safety Data Sheets (MSDS) and disposal permits required by the Resource Conservation and Recovery Act (RCRA);

- Observe adjoining site usage and attempt to find information indicating whether the adjoining site has adversely affected the Property, including the review of aerial photographs of adjoining and nearby sites;

- Review records and databases, as required by ASTM Standard E1527-13, from federal, state, regional and local agencies to find if current or previous land uses or Property improvements could have generated hazardous substances or petroleum. An attempt will also be made to
find the current regulatory status and to find if nearby sites may be hazardous sites with the potential to affect the Property. Where there are duplicate federal and state sources of information for the Property, Coast 2 Coast will review the most updated source.

- The written report will document the findings of the ESA including an executive summary and Coast 2 Coast’s conclusions and recommendations as to whether the Property is or is not environmentally impaired or whether additional information needs to be obtained. The report will also include:

  A statement of the scope of the assessment;
  A physical and geological description of the Property;
  A location map and a site map;
  A summary of the available site history;
  A summary of the records review;
  A summary of the Property and area reconnaissance;
  A description of the hazardous substances storage and the hazardous waste management practices on the Property;
  A brief description of the historical resources reviewed;
  Conclusions;
  Recommendations;
  References.
