

- ☐ Conditional Waiver 1 - Discharges from on-site disposal systems
- ☒ Conditional Waiver 2 - "Low threat" discharges to land
- ☐ Conditional Waiver 3 - Discharges from animal operations
- NA** Conditional Waiver 4 - Discharges from agricultural and nursery operations*
- ☐ Conditional Waiver 5 - Discharges from silvicultural operations
- ☐ Conditional Waiver 6 - Discharges of dredged or fill materials nearby or within surface waters
- ☐ Conditional Waiver 7 - Discharges of recycled water to land
- ☐ Conditional Waiver 8 - Discharges/disposal of solid wastes to land
- ☐ Conditional Waiver 9 - Discharges/disposal of slurries to land
- ☐ Conditional Waiver 10 - Discharges of emergency/ disaster related wastes
- ☐ Conditional Waiver 11 - Aerially discharged wastes

* Submit waiver-specific Notice of Intent. Contact Regional Board or see Regional Board website to obtain appropriate Notice of Intent form.

V. DESCRIPTION OF DISCHARGE

Describe the discharge (i.e., source(s) of discharge, pollutants of concern, period and frequency, etc.). Use additional pages as needed. Provide a map of the property/facility if necessary.

Groundwater from a deep fractured rock aquifer during well testing activities of Well B. No pollutants of concern are anticipated during well testing activities. The period of well testing is anticipated to occur over four days

VI. DESCRIPTION OF MANAGEMENT MEASURES AND BEST MANAGEMENT PRACTICES

Describe what management measures (MMs) and best management practices (BMPS) will be implemented to minimize or eliminate the discharge of pollutants to waters of the state. Use additional pages as needed. Provide a map of the property/facility showing locations of MMs/BMPs if necessary.

Pollutants are not anticipated to be encountered during well testing since the well is located in a remote, rural environment. All water discharged during the well testing will be dispersed via rain bird sprinklers or discharged to the stock pond located on APN 65913001 per the approval of the property owner.

VII. ADDITIONAL INFORMATION

Please provide additional information, as needed or required, about the discharge and/or how the discharger intends to comply with the waiver conditions of the conditional waiver. Use additional pages as needed.

See attached letter and figures.

VIII. CERTIFICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

APPENDIX F

Laboratory Analytical Report

EnviroMatrix

Analytical, Inc.

12 November 2012

Dudek & Associates, Inc.

EMA Log #: 12J0701

Attn: Trey Driscoll

605 Third Street

Encinitas, CA 92024

Project Name: 7123 Well B/7123

Enclosed are the results of analyses for samples received by the laboratory on 10/24/12 12:52. Samples were analyzed pursuant to client request utilizing EPA or other ELAP approved methodologies. I certify that this data is in compliance both technically and for completeness.

A handwritten signature in black ink, appearing to read 'Dan Verdon'.

Dan Verdon

Laboratory Director

CA ELAP Certification #: 2564

4340 Viewridge Avenue, Suite A - San Diego, California 92123 - (858) 560-7717 - Fax (858) 560-7763

Notes and Definitions

W-02 The sample for nitrate analysis was preserved with H₂SO₄ after the nitrite portion of the analysis was completed to extend the holding time for the sample. Nitrate results are corrected for the nitrite contribution per the method.

QM-4X The spike recovery was outside of the QC acceptance limits for the MS and/or MSD due to analyte concentration at 4 times or greater the spike concentration. The QC batch was accepted based on LCS and/or LCSD recoveries within the acceptance limits.

HT-15 This sample was received outside of the EPA's recommended 15 minute holding time for this analysis. However, the sample was analyzed immediately upon receipt.

Enclosed with this letter are the test results performed by subcontract laboratory for the following analyses:

- Uranium
- Gross Alpha
- EPA 524.2 - VOCs

The samples were received by EnviroMatrix Analytical, Inc. intact and with chain-of-custody documentation. The test results and pertinent quality assurance/quality control data are listed on the attached tables.

I certify that this data report is in compliance both technically and for completeness. Release of the data contained in this hard copy data report has been authorized by the following signature.

A handwritten signature in black ink, appearing to read 'Dan Verdon', is written over a horizontal line.

San Diego, CA 92123

Project Name: Drinking Water
Sub Project: 12J0701

Enclosed are the results of the analyses for samples received at the laboratory on 10/25/12 . Samples were received within temperature range, in correct containers and preservation.

Analyses were performed pursuant to client's chain of custody, within hold times, utilizing EPA or other ELAP approved methodologies.

I certify that the results are within compliance both technically and for completeness. Analytical results are attached to this letter. Please call if any additional information and or assistance are needed.

Thank you for choosing Clinical Laboratory of San Bernardino for your analytical needs.

Sincerely,

A handwritten signature in cursive script that reads 'Stephen Kavousy'.

Current Resident
911 Tierra Del Sol Rd.
Boulevard, CA 91905

Subject: Request to Access Well on Property and Monitor Water Levels during Well Test – Tierra del Sol Solar Farm Project, Major Use Permit 3300-12-010 and Rezone 3600-12-005

Dear Sir/Madam:

Dudek is performing a groundwater study for the Tierra Del Sol Solar Farm Project. The Tierra del Sol Solar Farm consists of the following Assessor Parcel Numbers (APNs): 658-090-31, 658-090-55, 658-120-03, 658-090-54 and 658-120-02. The Project is situated south of Tierra Del Sol Road and immediately north of the US/Mexico International Border and would consist of approximately 2,538 concentrating photovoltaic electric generation systems (CPV Systems) located on 420 acres. Other prominent project components would also include a 4-acre operations and maintenance facility, a 3-acre onsite private collector substation, and a 138 kilovolt (kV) overhead transmission line that would connect the Project substation to SDG&E's proposed new Boulevard Substation.

The use of groundwater has been proposed by the project applicant to meet the construction and operational water needs of the Project. To ensure that your well will not be impacted from the project's water use, the County of San Diego Department of Planning and Land Use (County) has recommended that neighboring wells be monitored during on-site well pumping tests. To comply with this request, a water well located at the Tierra del Sol Solar Farm Project site will be tested and monitored to determine the effects to existing local water levels prior to water pumping for project construction and operations. Testing and monitoring water levels in neighboring wells will allow Dudek to address the concerns of neighboring property owners.

Dudek is submitting this request for permission to access the water well located on your property located at 911 Tierra Del Sol Rd. Boulevard, CA 91905 APN 65809042. Dudek is planning to conduct 2 well tests as shown on the attached figure tentatively scheduled for September 10, 2012. Dudek would like to install a water level measurement device and/or collect manual water level measurements in your well to monitor water levels before, during and after the well testing. This will allow Dudek to both address concerns regarding local water levels and the Tierra Del Sol Solar Farm Project and to satisfy the County Groundwater requirements for the project prior to the start of construction. Dudek will provide you with copies of all data collected from your well during the well tests.

If you agree to allow your well to be monitored, please fill out and return the attached Authorization Form at your earliest convenience. We will contact you after we receive your authorization form.

If you have any questions or wish to discuss this further, please e-mail me at tdriscoll@dudek.com or call at 760.415.1425. You can also contact Jim Bennett, Groundwater Geologist with the County of San Diego at 858.694.3820 or e-mail: jim.bennett@sdcounty.ca.gov.

Sincerely,

Trey Driscoll, PG, CHG

This will allow Dudek to both address concerns regarding local water levels and the Tierra Del Sol Solar Farm Project and to satisfy the County Groundwater requirements for the project prior to the start of construction. Dudek will provide you with copies of all data collected from your well during the well tests.

If you agree to allow your well to be monitored, please fill out and return the attached Authorization Form at your earliest convenience. We will contact you after we receive your authorization form.

If you have any questions or wish to discuss this further, please e-mail me at tdriscoll@dudek.com or call at 760.415.1425. You can also contact Jim Bennett, Groundwater Geologist with the County of San Diego at 858.694.3820 or e-mail: jim.bennett@sdcounty.ca.gov.

Subject: Request to Access Well on Property and Monitor Water Levels during Well Test – Tierra del Sol Solar Farm Project, Major Use Permit 3300-12-010 and Rezone 3600-12-005

Dear Sir/Madam:

Dudek is performing a groundwater study for the Tierra Del Sol Solar Farm Project. The Tierra del Sol Solar Farm consists of the following Assessor Parcel Numbers (APNs): 658-090-31, 658-090-55, 658-120-03, 658-090-54 and 658-120-02. The Project is situated south of Tierra Del Sol Road and immediately north of the US/Mexico International Border and would consist of approximately 2,538 concentrating photovoltaic electric generation systems (CPV Systems) located on 420 acres. Other prominent project components would also include a 4-acre operations and maintenance facility, a 3-acre onsite private collector substation, and a 138 kilovolt (kV) overhead transmission line that would connect the Project substation to SDG&E's proposed new Boulevard Substation.

The use of groundwater has been proposed by the project applicant to meet the construction and operational water needs of the Project. To ensure that your well will not be impacted from the project's water use, the County of San Diego Department of Planning and Land Use (County) has recommended that neighboring wells be monitored during on-site well pumping tests. To comply with this request, a water well located at the Tierra del Sol Solar Farm Project site will be tested and monitored to determine the effects to existing local water levels prior to water pumping for project construction and operations. Testing and monitoring water levels in neighboring wells will allow Dudek to address the concerns of neighboring property owners.

Dudek is submitting this request for permission to access the water well located on your property located at 38663 Alta Vega Rd. Boulevard, CA 91905 APN 65809051. Dudek is planning to conduct 2 well tests as shown on the attached figure tentatively scheduled for September 10, 2012. Dudek would like to install a water level measurement device and/or collect manual water level measurements in your well to monitor water levels before, during and after the well testing. This will allow Dudek to both address concerns regarding local water levels and the Tierra Del Sol Solar Farm Project and to satisfy the County Groundwater requirements for the project prior to the start of construction. Dudek will provide you with copies of all data collected from your well during the well tests.

If you agree to allow your well to be monitored, please fill out and return the attached Authorization Form at your earliest convenience. We will contact you after we receive your authorization form.

If you have any questions or wish to discuss this further, please e-mail me at tdriscoll@dudek.com or call at 760.415.1425. You can also contact Jim Bennett, Groundwater Geologist with the County of San Diego at 858.694.3820 or e-mail: jim.bennett@sdcounty.ca.gov.

Sincerely,

Trey Driscoll, PG, CHG
