Regarding: Board of Supervisors Sortec Solar

San Diego County Planning Commission :
Sortec Solar Project in Boulevard Ca and
Surrounding Areas of McCain Valley, Tierra
Del Sol, Jewel Valley.

We ARE having A drought in CALIF. but yet
this TAX PAYER Funded Project... Proceeds.
How were The Permits granted For this... in A
drought.!!!!

Boulevard subsists. on ground water. they
are NO Sewers, or city water here. yet this
Approved Project, in the middle of a drought..
Continue's.

the over use of ground water for this, Paid
For by TAXPAYERS.... IS A disgrace!! Approved
by the County of San Diego!!!!

So when there is NO water here what do the
People of Boulevard do, to get water?

This Project should have been denied!

there ARE NO Water Storage Containers
IN Boulevard For A Fire of large magnitude.

So then who is Liabil For this TAXPAYER
Funded, illegal use of ground water, threat
of or Fire, loss of Property Value or loss

OF Water, home, belongings & OR Life!

this is all About Money. - by some very Powerful groups, to erect this eye sore at the expence OF the people OF Boulevard & the surrounding area.

once Again the TAX PAYER is on the hook for this disaster, that has the approval OF the County of San Diego, through Approved Permits, that should have been illegal, & should still be considered illegal! why is it that people can't use their water in the city - because of the drought. But these sortec Projects can use All the ground water they want? isn't that discrimination of water use.

Sorry Guys but this is a misjustice OF the highest level.

Stop this Project! Save our water! MAKE decisions that honor the hard working TAX PAYER, Not the Money hungry Companies, that ARE getting Free money to ERRECT this solar Project, using our Ground water & putting every Resident in Boulevard At Risk OF NO water, loss of Vegetation, Mountain growth, Property loss But most important OF All A Drought!

Our County Supervisors need to be responsible for this loss to community here in Boulevard.

Please Deny this Project to proceed any further. This Drought may go on for along time... but I can see now that this issue was never considered.

Please listen to: Dianne Jacobs, Donna Hisdale, Dave Roberts, Ron Roberts and most of all the people of Boulevard... who have no other source of water but from our ground sources.

I have lost 14# 250 year old oak trees from the water level dropping so low. This is a bad project for our community and the San Diego County needs to stand up & say "Enough is Enough".

Do the Right thing & Stop this Project.

Boulevard Resident!
