

**San Diego County Code of Regulatory Ordinances  
TITLE 7 HIGHWAYS AND TRAFFIC\*  
DIVISION 1. PROTECTION OF HIGHWAYS**

---

**SEC. 71.322. WARNING LIGHTS.**

If the permit does not specify what **lights**, barriers, warning signs or other measures must be erected by the permittee, the permittee shall place and maintain warning **lights** at each end of such excavation or obstruction and at distances of not more than 50 feet along such excavation or obstruction from sunset of each day to sunrise of the next day, until such excavation is entirely refilled and resurfaced or such obstruction is removed and every said person shall place and maintain barriers not less than three feet high at each end of any such excavation or obstruction at all times until such excavation is entirely refilled or such obstruction is removed.

The upper portion of each of these barriers shall consist of a substantial sign approximately one foot high and four feet wide and on each side thereof bearing a sign complying with one of the following requirements:

- (a) In letters not less than three inches high and neither yellow nor black, bearing the name of the permittee, on a background of alternate three-inch black and yellow stripes. The stripes shall be at an angle between 45 and 60 degrees from the horizontal.
- (b) In letters not less than six inches high, bearing the word "excavation".
- (c) In conformity with the regulations adopted by the State Division of Highways pursuant to **Section** 465.7 of the Vehicle Code.
