Agricultural resources include active agricultural operations; sites designated as and that meet the definition of a FMMP Important Farmland Category; and sites with a history of agricultural production, such as orchards, nurseries (greenhouse/field nurseries), and row crops (i.e., flowers, strawberries) or other agricultural uses that could be incompatible with the proposed project.  

The LARA model will be applied by County staff unless it is not feasible due to large project size or other peculiar site conditions.  

Specialist provides Project Manager documentation of LARA model results and determination of adequate agricultural preservation and maximization of agricultural feasibility or a technical report.  

Applicant redesigns project to achieve the required agricultural preservation and maximization of agricultural feasibility or a technical report.  

Applicant resubmits redesign project based on scoping /iteration letter or provides technical report.
