1. General

California Plumbing Code

Instructions and labeling. Have no ‘pit’ or ‘sump’ configurations. (PMC 303.7.1)

2. Battery-operated detectors using California Title 24 or equivalents. (CMC 150.0(o))

3. Crawl space, or basement. (CRC R314.3)

4. Acceptable in existing areas with no construction taking place and in alterations not

5. Underfloor ventilation. (CRC R502.3)

6. Be a single member the same size as the floor joist. Single trimmer joists may be used to

7. Lateral support to prevent rotation. (CRC R502.7)

8. Wood stud walls shall be capped with a double top plate installed to provide

9. Exception: One thickness of 23/32-inch wood structural panel with joints backed by 23/32-inch

10. An approved material to resist the free passage of flame and products of combustion

11. Site and莲lations on required Ramatic races to direct control and outlet wiring.

Air inlets.

Sills and sleepers on concrete or masonry slab in direct contact with ground unless

embedded in concrete exposed to weather, such as concrete or masonry slabs, unless separated from such floors or

considered part of the same braced wall line. (CRC R602.10.1.2)

Splicing of structural members. Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of

Drilling, cutting, and notching of roof/floor framing. Ends of wood girders entering masonry or concrete walls with clearances less than 1/2

Shear wall and diaphragm nailing. Shear wall offset.

Joists under parallel bearing partitions shall be of
