		Thirty-fourth Amendment	GPA 99-01	Sep 16, 2009

SHEET 4 of 8

CIRCULATION ELEMENT EXPLANATORY NOTE
This is a Planning Map. It is a schematic representation of the Transportation Corridors
and corridor widths required at ultimate development of the County. It is not a
construction or financing program. This Plan does not set construction timing. The
lines do not differentiate between roads which exist and roads that do not exist.

Line widths showing corridors are not drawn to scale but are exaggerated for ease
of reading.

Corridors shown are for any of four degrees of precision of alignment:
1. Centerline definitely set and not subject to further movement.
2. Centerline set to within a few feet and subject only to final design changes.
3. Centerline positioned only approximately by 200 scale feasibility study and subject to
planning changes.
4. Centerline not studied and shown only schematically to show functional need.

Persons interested in more precise locations of specific Corridors should contact
the Department of Public Works for more specific and detailed information before
making planning decisions based on this map.

The Circulation Element maps also may depict routes located within the territories
of incorporated cities. These incorporated area roads are shown for informational
purposes only. The route locations or classifications are not part of the official
County Circulation Element. County staff will attempt to obtain current
information from the appropriate city and make appropriate revisions to the maps on
a periodic basis; however persons desiring accurate and current information are
referred to the appropriate city.

The Flood Control Division Map (1" = 2 miles) is Sheet 8 of the Circulation
Element of the San Diego County General Map 1999.
