MODIFICATION #3 – Option B (Alternative Condition) MODIFIED SECTION FROM PROJECT BOUNDARY TO WESTERLY ROUNDABOUT (W/ TRANSTION)

DEPARTMENT OF PUBLIC WORKS

Request for a

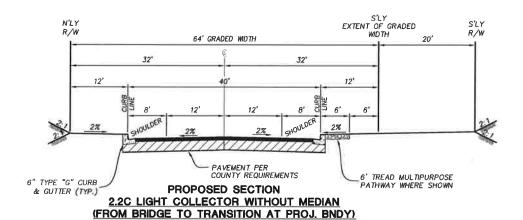

Modification to a Road Standard

and/or Project Conditions

Project Number: TM 5571/5572	Date of Request: August 5, 2015
Project Location: East of Interstate 15 and W. Lilac Road in the County of San Diego, State of California.	
Thos. Bros. Map/Grid: 1049, 1069	APN: 127-072-44, 127-072-28, 127-072-45, 127-072-20, 127-072-14, 127-072-38, 127-072-41, 127-072-40, 127-072-46, 127-072-47, 128-280-42, 128-440-01, 128-280-46, 128-280-27, 128-280-10, 128-440-23, 128-280-37, 128-440-05
Requestor Name: Village Communities, Inc	Telephone:
Address: 11452 El Camino Real, Suite 120, San Diego, CA 92130	
Requested Modification (attach engineering sketches showing existing layout, details, and notes): The standard road section for Light Collector Road 2.2C with an intermittent turn lane has a 54' wide curb to curb width on 78' ROW (64' with no turn lane), 8ft shoulders, and 12' pkwys. The requested modification to the road standard is to decrease the pkwy to a 2' pkwy along the north, add a proposed 10' raised median with 20' of pavement and increased 30' pkwy with 8' meandering multi-purpose trial along the south. West of this modification, the road section consists of the standard for 2.2C Light Collector without an intermittent turn lane, having 40' wide curb to curb width on 64' ROW, 8' shoulders, and 12' parkways. The modification request includes a transition from this typical section to the proposed, non-standard 2.2C Light Collector east of the subdivision boundary. The 320' transition safely handles the reduction of the northern pkwy from 12' to 2' and the introduction of a median.	
Reason for Modification (provide attachment if additional space is required): The existing topography on each side of the	
existing graded road width is very steep in this area. Extensive off-site grading and habitat disturbance as well as the need for	
off-site condemnation to obtain off-site ROW. Permission to grade for to implement the standard roadway section (Light Collector 2.2c). We the requested modification. The modification would provide enhance parkway through the project. The proposed median acts as a splitter	Vest Lilac would operate at LOS D or better with or without ted landscaping with the median and 30' wide southerly
List of Alternatives that could mitigate the requested Modification (attach engineering sketches showing proposed layouts, details, and notes): No alternative is proposed.	
Describe the hardship(s) to the property owner(s) and/or neighbor. The existing topography on each side of the existing graded road wide habitat disturbance as well as the need for off-site condemnation to land owners on both sides would be required to implement the stand would operate at LOS D or better with or without the requested more necessary to provide a transition that is safe for drivers between the modified 2.2C Light Collector. The median is important for proper characteristics.	Ith is very steep in this area. Extensive off-site grading and obtain off-site ROW. Permission to grade from adjacent dard roadway section (Light Collector 2.2c). West Lilac diffication. In addition to these concerns, the transition is standard 2.2C Light Collector and the proposed, onsite,

Provide Design and Cost Estimate for meeting the Condition (see note 3 on reverse): See Attachment 1 for typical sections; See Attachments 2 & 3 for road design with modification; See Attachment 4 for visual simulation is modification is approved.
