Project No. 09524-06-05 March 31, 2014

Ms. Melissa Krause Integral Communities 2235 Encinitas Boulevard, Suite 216 Encinitas, California 92024

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT

VALIANO 29.42 ACRES 1095 LA MOREE ROAD SAN MARCOS, CALIFORNIA

COUNTY OF SAN DIEGO PROJECT NO. PDS2013-SP-13 ENVIRONMENTAL LOG NO. PDS2013-ER-12-08-002

Dear Ms. Krause:

As you requested on behalf of Integral Communities, we have performed a Phase I Environmental Site Assessment (ESA) for a 29.42-acre property located at 1095 La Moree Road referenced as Valiano 29.42-Acres (the Site) in Escondido, California. The Site is located northwest of the termination of Hill Valley Drive and approximately 500 feet south of La Moree Road and is further identified by the County of San Diego Assessor's Parcel Number 228-313-13-00.

You requested a Phase I ESA to provide information regarding the potential for hazardous substances or petroleum product impacts at the Site as part of your due diligence process prior to purchasing the Site. The Site is currently developed with avocado groves. The Client plans to incorporate the Site into the Valiano development but plans to have the Site remain avocado groves.

We appreciate the opportunity to have performed this Phase I ESA for Integral Communities. Please contact us if you have any questions concerning this report or if we may be of further service.

Very truly yours,

GEOCON INCORPORATED

Elizabeth A. Miller Senior Staff Geologist Benjamin G. Eastman Senior Geologist

(2) Addressee

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT

#### 1. INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) for a 29.42-acre property located at 1095 La Moree Road referenced as Valiano 29.42-Acres (the Site) in Escondido, California. The Site is located northwest of the termination of Hill Valley Drive and approximately 500 feet south of La Moree Road. The Phase I ESA was requested by Integral Communities (the Client) to provide information regarding the potential for existing hazardous substances or petroleum product impacts at the Site as part of their due diligence process prior to purchasing the Site. The Site is currently developed with avocado groves. We understand that the Client plans to incorporate this property into the Valiano development, but plans to have the Site remain as avocado groves.

## 1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify 'recognized environmental conditions' (RECs) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.*Section 1.1.1 of ASTM E 1527-13 defines an REC as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions." De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of the enforcement action if brought to the attention of appropriate governmental agencies.

ASTM E1527-13 also defines 'Historical' and 'Controlled' RECs. An 'Historical REC' is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)..." A 'Controlled REC' is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

The Phase I ESA was also conducted in accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

This Phase I ESA also included a vapor encroachment screening (VES) conducted in general accordance with the methods outlined in *ASTM E 2600-10 Standard Guide for Vapor Encroachment Screening (VES)*. The purpose of the VES was to assess the potential for chemicals of concern (COC) to migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property. A VES is not a requirement of and does not constitute, expand, or in any way define "all appropriate inquiry" as defined and approved by the U.S. Environmental Protection Agency (EPA). The goal of a VES is to identify whether or not a vapor encroachment condition (VEC) exists on the Site. A VEC is the presence or likely presence of COC vapors in the sub-surface of the Site caused by the release of vapors from contaminated soil or groundwater either on or near the Site.

The main components of this report and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting:** The objective of reviewing physical setting references was to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.
- **Records Review:** The objective of the records review was to obtain information that could potentially help identify RECs at or potentially affecting the Site. We reviewed publicly available federal, state, and local regulatory agency records for the Site.
- **Site History:** The objective of consulting historical references was to assess previous uses of the Site and surrounding area to identify those that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, and city directories. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical uses of the Site.
- **Site Reconnaissance:** The objective of the site reconnaissance was to observe site conditions and activities for indications of evidence of RECs. Offsite properties and features were also viewed, but solely from the vantage of the Site and public thoroughfares.

Project No. 09524-06-05 - 2 - March 31, 2014

#### 1.2 Scope of Services

The scope of services was performed in general accordance with ASTM Designation E 1527-13, ASTM Designation E2600-10 and our Change Order dated February 6, 2014, as requested by the Client.

## 1.3 Report Limitations

This report has been prepared exclusively for the Client, Integral Communities. The information obtained is only relevant for the dates of the records reviewed or as of the date of the latest site visit. Therefore, the information contained herein is only valid as of the date of the report and will require an update to reflect recent records/site visits.

The Client should recognize that this report is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, a review of the specified regulatory records, and a review of the historical usage of the Site, as presented in this report. The Client should also understand that wetlands, asbestos-containing building materials, lead-containing paint, lead in drinking water, radon, mercury related to mining activities, methane, and mold surveys were not included in the scope of services for this Phase I ESA. Assessment for potential naturally occurring hazards such as asbestos and arsenic also was not included.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the ESA is implied within the intent of this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

#### 1.4 Data Gaps

A data gap is defined by ASTM Standard E 1527-13 as "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information." Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers, etc.) or the lack of access to all parts of a site during the site reconnaissance. No significant data gaps were identified during the preparation of the Phase I ESA.

Project No. 09524-06-05 - 3 - March 31, 2014

#### 2. SITE DESCRIPTION

This section provides information regarding the location and physical characteristics of the Site including its size, topography, geologic, soil, and hydrogeologic conditions.

## 2.1 Location and Legal Description

The 29.42-acre Site is located northwest of the termination of Hill Valley Drive and approximately 500 feet south of La Moree Road in San Marcos, California (Figure 1). The Site is identified by the street address 1095 La Moree Road and San Diego County Assessor's parcel number (APN) 228-313-13-00 (Appendix A). The Site does not include the 3.21-acre Rincon Del Diablo Municipal Water District property located along the southern portion of the Site.

The Site is depicted in the western portion of Section 18 of Township 12 South, Range 2 West, San Bernardino Base and Meridian on the United States Geological Survey's (USGS) *Rancho Santa Fe*, 7.5-minute Topographic Map.

## 2.2 Site and Vicinity General Characteristics

The irregular-shaped Site is located in an area of low-density residential and agricultural properties. Avocado and orange orchards exist to the south and single-family residential homes exist to the north, east, and west of the Site. Hill Valley Drive is located southwest of the Site and La Moree Road is located 500 feet north of the Site.

## 2.2.1 Topography

The topography of the Site consists of a ridgeline that extends to the north-northwest with incised drainages that drain to the northwest and southeast. Based on review of the United States Geological Survey's (USGS 1996) Rancho Santa Fe, 7.5-minute topographic maps, the Site elevations range from approximately 770 feet above mean sea level (MSL) near the southeastern portion of the Site to 920 feet above MSL near the south-central portion of the Site.

## 2.2.2 Geologic Conditions

The Site is located in the Peninsular Ranges geomorphic province of Southern California (Norris and Webb, 1990). This geomorphic province encompasses an area that extends 900 miles south to the tip of Baja California. In general, the province consists of rugged mountains underlain by Mesozoic igneous and metamorphic rocks to the east, and a dissected coastal plain underlain by Cenozoic

Project No. 09524-06-05 - 4 - March 31, 2014

sediments to the west. The province varies in width from approximately 30 to 100 miles, and is traversed by a group of faults and fault zones trending roughly northwest.

Information concerning the surface geologic conditions at and in proximity to the Site was obtained from a review of the *Geologic Map of the Oceanside 30'x60'Quadrangle, California* (United States Geological Survey, 2005). The geologic map indicates that the Site is underlain by mid-Cretaceous Tonalite.

According to our *Geotechnical Investigation, Eden Hills, San Diego County, California*, dated September 12, 2012, the Site is underlain by one surficial soil and one geologic formation. The surficial deposits consist of quaternary alluvium that generally varies in depth depending upon the size of the canyon. It consists of sandy clay, silty sand, and clayey sand with occasional boulders. The formational unit is a Cretaceous-age granitic Tonalite that is associated with the Peninsular Range Batholith that underlies the surficial materials and is the predominant material through the Site. Generally, it is characterized as course-grained, dark gray to grayish brown, and moderately strong to very strong. It's found to be moderately to highly fractured and at various stages of weathering. The most up-to-date site plans depicted on Geologic Maps are included in the *Response to the County of San Diego, Addendum to Geotechnical Investigation Report, Valiano (Eden Hills), San Diego County, California*, dated June 13, 2013 (Appendix B).

We obtained information concerning the surficial soil conditions in proximity to the Site from review of the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS), Web Soil Survey (http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm). The soil survey indicates that the site soil is identified by three types of soil, which include Cieneba very rocky coarse sandy loam, the Vista coarse sandy loam, and the Fallbrook-Vista sandy loam. The Cieneba sandy loam, which covers the majority of the Site, is characterized as unweathered bedrock to 4 inches. The Fallbrook-Vista sandy loam is characterized by sandy loam to a clay loam from 0 to 28 inches, loam to sandy loam from 28 to approximately 47 inches, and weathered bedrock from approximately 47 to 51 inches. The Visalia sandy loam is characterized as a course sandy loam to a sandy loam from 0 to 30 inches, and weathered bedrock from 30 to 34 inches.

## 2.2.3 Hydrologic and Hydrogeologic Conditions

Information pertaining to groundwater quality and occurrence in the vicinity of the Site available from the California Department of Water Resources (DWR) and the California State Water Resources Control Board (SWRCB) was reviewed. The Site is located within the Escondido Hydrologic Subarea (904.62) of the Escondido Creek Hydrologic Area (904.60) of the Carlsbad Hydrologic Unit (904.00) (SWRCB, 1994). Depths to groundwater in the Carlsbad Hydrologic Unit

are generally 50 feet or less. In the Escondido Creek Hydrologic Area the total dissolved solid (TDS) content, like the chemical character, is variable and ranges from about 250 to more than 5,000 milligrams per liter (mg/L) (CDWR, 1967). Groundwater occurring within the Escondido Hydrologic Subarea is listed as having beneficial applications for municipal, agricultural, and industrial purposes. According to the DWR database, one groundwater well referenced as "X4340005" is located approximately two-thirds of a mile east of the Site. The groundwater quality was last documented in May 2002 with a TDS content reported at 1,200 mg/L; depth to water is not reported for this well.

We also checked the SWRCB GeoTracker website (<a href="http://geotracker.swrcb.ca.gov/">http://geotracker.swrcb.ca.gov/</a>) for depth to groundwater at any listed facilities within the site vicinity where groundwater monitoring is ongoing. There are no facilities within approximately one mile of the Site listed on the Geotracker database.

As described in our 2012 Geotechnical Investigation, perched groundwater and/or seepage was encountered in exploratory trenches and borings on the southern adjacent property within the surficial alluvial deposits, suggesting that the surface runoff of rainwater and irrigation is "perched" along the less impervious rock material and is migrating along the contact. Based on general knowledge of the local hydrogeology in the area, depth to groundwater beneath the Site is likely less than 50 feet and is presumed to flow generally in an easterly direction, but may also have a component of flow in a southeasterly direction toward Escondido Creek or northwest towards the canyon. Groundwater elevations and flow direction beneath the Site may vary as a result of seasonal precipitation, pumping withdrawals, irrigation, and land use, among other factors.

## 2.3 Current and Planned Uses of the Site

We understand that the Client plans to incorporate this property into the Valiano development, but plans to have the Site remain avocado groves. The *Valiano Vicinity Map with Site Plan* and the *Valiano Neighborhood Exhibit*, prepared by Fuscoe Engineering and dated February 27, 2014 are in Appendix C.

## 2.4 Descriptions of Structures, Roads, Other Improvements on the Site

The Site is developed with avocado groves and unimproved roads providing access to the groves. Further description of the Site is presented in Section 6.0.

## 2.5 Current Uses of Adjoining Properties

Agricultural properties exist to the south and single-family residential homes are adjacent to the northern, eastern, and western boundaries of the Site.

#### 3. USER-PROVIDED INFORMATION

This section provides responses to inquiries made to the Client for site information. The Client was asked if they know of previous environmental reports or documents that may exist and, if so, whether copies could be provided. They were also asked if they have knowledge of legal or administrative proceedings involving the Site. The Client completed a Client Questionnaire regarding these items; a copy is in Appendix D.

## 3.1 Title, Appraisal and Sale Agreement Records

The Client did not provide a current title report, appraisal, or sales agreement for our review.

## 3.2 Environmental Liens or Activity and Use Limitations

The Client stated that they are unaware of any environmental liens on, or use limitations for, the Site.

## 3.3 Specialized Knowledge

The Client indicated that they have no specialized knowledge regarding the Site or nearby properties.

## 3.4 Commonly Known or Reasonably Ascertainable Information

The Client indicated that they are aware of the avocado groves on the Site.

## 3.5 Owner, Property Manager, and Occupant Information

The Site is owned by the "Hu Family trust 04-15-87" and the farm is managed by Henry Avocado Co.

#### 3.6 Valuation Reduction for Environmental Issues

The Client indicated that they were not aware of any environmental conditions on the Site which could lead to a potential valuation reduction of the Site.

## 3.7 Reason for Performing Phase I ESA

This Phase I ESA was requested by the Client to obtain information regarding the potential for existing hazardous substances or petroleum product impacts at the Site as part of their due diligence process prior to purchasing the Site. This Phase I ESA will be included in the Valiano Tentative Map Specific Plan.

#### 4. RECORDS REVIEW

This section summarizes our review of readily available agency records for the Site and properties and facilities in the surrounding vicinity.

#### 4.1 Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) performed a search of federal, state, and local databases for the Site and surrounding area. The search distance for the review extended one mile from the Site. A copy of the report entitled *The EDR Radius Map Report with GeoCheck*, dated February 26, 2014, is in Appendix E.

#### 4.1.1 Site

The Site is not referenced on the database searched by EDR.

## 4.1.2 Offsite Properties

No properties within 1/8 mile of the Site (or 1/4 mile for leaking underground storage tanks facilities) were listed on the databases searched by EDR.

## 4.1.3 Orphan Summary

The Orphan Summary has identified six properties that have incomplete address information and therefore could not be accurately plotted. It appears that all six properties appear to be located a minimum of one mile from the Site. Based on information provided for the listed properties, their locations, and the databases on which the properties were listed, these properties are not likely to have a significant adverse impact to the Site.

## 4.2 Vapor Encroachment Screening/Conditions

The VEC application provided by EDR is a Tier 1 screening process that follows ASTM E 2600-10 (Appendix F). The VEC application screens known or suspected contaminated properties with volatile or semi-volatile COCs within an area of concern (AOC) around the Site to determine if COCs in vapor from those properties could encroach upon the Site. If the length and widths of a contaminant plume from a property are known, then the AOC for a VEC extends 100 feet beyond the known plume dimensions. If the plume dimensions are not known, then ASTM E 2600-10 specifies AOC dimensions based on each type of COC plume (non-petroleum or petroleum).

The AOC for volatile, non-petroleum hydrocarbon COCs (i.e., COCs from dry cleaner sites, industrial sites, manufactured gas plants, hazardous waste disposal sites, and landfills) extends 1,760 feet (1/3 mile) from the site boundary. The AOC for volatile petroleum hydrocarbon COCs (i.e., COCs from gasoline stations or bulk distribution facilities) extends 528 feet (1/10 mile) from the site boundary. However, the AOC around the Site for both types of COCs can be reduced based on known groundwater flow direction, as summarized in the following table:

Location of COC Release	AOC Distance			
Relative to Groundwater Flow Direction	Volatile Non-Petroleum Hydrocarbon COCs	Volatile Petroleum Hydrocarbon COC		
Up-gradient of the Site	1,760 feet or 1/3 mile	528 feet or 1/10 mile		
Cross-gradient from the Site	365 feet	165 feet		
Down-gradient of the Site	100 feet	100 feet		

If a known release of volatile COCs is within the AOC, there is a potential that a VEC exists on the Site unless it can be ruled out based on the presence of a hydraulic or physical barrier. A river can act as a hydraulic barrier or a clay layer in soil can act as a physical barrier that would impede the migration of volatile COCs in vapor onto the Site. Manmade or natural features or conditions such as utility corridors or fractured bedrock, can also create preferential vapor pathways that enable vapor to encroach onto the Site.

Based on information in *The EDR Vapor Encroachment Screen Report*, dated March 14, 2014, provided by EDR (Appendix F), there are no properties identified within the AOC for the Site having releases of either volatile non-petroleum hydrocarbon COCs or volatile petroleum hydrocarbon COCs, and therefore, a VEC does not exist for the Site.

#### 4.3 Additional Environmental Record Sources

We performed a search of additional readily available environmental record sources. The search distance for the review extended approximately one mile from the Site, unless otherwise noted. A summary of our findings is presented below.

#### 4.3.1 GeoTracker and EnviroStor Websites

Additional environmental record sources including the SWRCB Geotracker database (<a href="http://geotracker.swrcb.ca.gov/">http://geotracker.swrcb.ca.gov/</a>) and the California Department of Toxic Substances Control's (DTSC) Envirostor database (<a href="http://www.envirostor.dtsc.ca.gov/public/">http://www.envirostor.dtsc.ca.gov/public/</a>) were reviewed for information regarding nearby properties/facilities of concern. No properties located within ¼ mile of the Site were listed on either database.

# 4.3.2 State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR)

The State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) website (<a href="http://www.conservation.ca.gov/dog/Pages/Index.aspx">http://www.conservation.ca.gov/dog/Pages/Index.aspx</a>) was reviewed for information on any oil or gas wells on or near the Site. According to the DOGGR map no wells are located within a 1-mile radius of the Site (California Department of Conservation, 2014).

## 4.3.3 County of San Diego Department of Agriculture, Weights and Measures

We submitted a request to the County of San Diego, Department of Agriculture, Weights and Measures-Pesticide Use Enforcement Division regarding restricted pesticide use at the Site. Ms. Karen Melvin with the DAWM provided records indicating that the following herbicide, insecticide, miticide, and rodenticide products were applied to Site under Permit No. 37P1007 (Appendix G):

Product
Roundup Weathermax Herbicide
P.C.Q Pelleted Rodent Bait
Wilco Gopher Getter Ag Bait
EPI-MEK 0.15 EC Miticide/Insecticide
Omni Oil 6-E
Princep Caliber 90 Herbicide
Envidor 2 SC Miticide

The use of these products indicates that there may be a potential that residual pesticides are present in onsite soil. Section 4.4 provides information regarding soil sampling and analytical results conducted in 2005.

Project No. 09524-06-05 - 10 - March 31, 2014

## 4.3.4 San Diego Air Pollution Control District

We submitted a request to the San Diego Air Pollution Control District (APCD) for records pertaining to the Site. According to Ms. Virginia Fox with the APCD, no records were on file for the APN or address associated with the Site.

## 4.3.5 County of San Diego Department of Environmental Health

We submitted a request to the Department of Environmental Health (DEH) for records pertaining to the Site. According to Ms. Joyce Ellman with the DEH, no records are on file for the APN or address associated with the Site.

## 4.4 Previous Documents/Reports

We previously performed a Phase I ESA and limited soil investigation for pesticides on 162.75 acres of land which included the Site and southern adjacent parcels incorporated into the Valiano development (APNs 232-013-01, -02, -03, 232-020-55, and 228-313-14)(Appendix C). We presented our findings in the report entitled *Phase I Environmental Site Assessment Report, Limited Soil Sampling, and Organochlorine Pesticide Analysis, Eden Hills, Northwest of Mount Whitney Road and Calico Lane, San Diego County, California*, dated April 11, 2005.

According to this report, avocado groves existed on the Site and adjacent properties since at least the 1960s. We conducted a limited soil investigation to identify if residual pesticides impacted soil on the 162.75-acre property to identify if there were residual concentrations of organochlorine pesticides (OCPs) from the historical agricultural land use. For the investigation we collected soil samples at approximate depths of 0.5, 1.0, and 2.0 feet from 12 hand auger borings on the property. Two of the twelve borings were located on the current Site and the remaining ten borings are on the southern adjacent parcels. The Site Plan from the April 2005 report depicts the location of the twelve borings (Appendix H). The laboratory combined the twelve 0.5-foot soil samples into six 2-point composite samples. The six composite samples were analyzed for OCPs using Environmental Protection Agency (EPA) Test Method 8081A. The remaining samples collected from 1- and 2-foot depths were held pending analytical results from the 0.5-foot samples. No OCPs were detected in the six 0.5-foot composite samples. Therefore, the 1 and 2 foot samples were not analyzed. Based on these results, the soil does not appear to be impacted with residual pesticides, and no additional assessment of pesticides in soil was recommended for the 162.75-acre property. No additional environmental issues were identified for the 162.75-acre property or adjacent parcels, therefore no additional assessment appeared warranted at that time.

Project No. 09524-06-05 - 11 - March 31, 2014

#### 5. HISTORICAL USE

This section summarizes information obtained from a variety of sources regarding the historical uses of the Site and identifies historical uses that could have led to RECs. The sources of information included historical aerial photographs and historical topographic maps provided by EDR.

## 5.1 Sanborn, Inc. Fire Insurance Maps

According to *EDR's Sanborn Map Report* dated February 25, 2014, Sanborn maps do not exist for the Site or site vicinity.

## 5.2 Aerial Photographs

Historical aerial photographs provided by EDR for the years 1947, 1953, 1963, 1974, 1980, 1990, 1994, 2005, 2009, 2010, and 2012 (Appendix I) were reviewed for indications of past land uses that had the potential to have impacted the Site through the use, storage or disposal of hazardous substances and/or petroleum. The following table summarizes the observations of the Site and adjacent properties on the aerial photographs.

Year	Observations		
rear	Site	Adjacent Properties	
1947 (1" = 500)	The Site was undeveloped land with dense vegetation. Two unimproved roads were near the northeastern portion of the Site and within the ravine along the western portion of the Site. There are a few areas that appear to have been cleared of vegetation on the Site but it is uncertain what those areas were used for.	Adjacent properties to the west and south of the Site appear to be similar use to the Site. Adjacent properties to the north and east appear to have been developed with rural residential properties within the grassland. La Moree Road is located north of the Site.	
1953 (1" = 500)	The Site appears to have undergone a reduction in vegetation. A portion of the northeastern area of the Site appears to have been cleared of vegetation. The remainder of the Site appears similar to that observed in the 1947 photograph.	Adjacent and vicinity properties appear to have undergone a reduction in vegetation. Otherwise the site vicinity appears similar to that observed in the 1947 photograph.	
1963 (1" = 500)	The Site appears similar to that observed in the 1953 aerial photograph.	Adjacent properties to the north and east of the Site have been developed with low density residences.	
1974 (1" = 500)	The ridgeline of the Site appears to have been stripped of vegetation and graded. An undeveloped road provided access to the graded area. Additional smaller trails were developed on the southwestern portion of the Site.	Adjacent property south of the Site has been developed for agricultural use. Properties to the north, east and west of the Site have been developed with low density residences.	

Project No. 09524-06-05 - 12 - March 31, 2014

<b>5</b> 7	Observations			
Year	Site	Adjacent Properties		
1980 (1" = 500)	The Site appears to have been stripped of vegetation and had multiple unimproved roads across the Site.			
1990 (1" = 500)	The Site appears to have been developed with avocado groves.	Additional low density residences were present in the vicinity of the Site.		
1994 (1" = 500)	The Site appears similar to that observed in the 1990 aerial photograph.	Additional rural residential properties were present in the vicinity of the Site. A medium density residential development is located north of La Moree Road.		
2005 (1" = 500)	The Site appears similar to that observed in the 1994 aerial photograph.	The adjacent properties are similar to that observed in the 1994 aerial photograph.		
2009 (1" = 500)	The Site appears similar to that observed in the 2005 aerial photograph.	The adjacent properties are similar to that observed in the 2005 aerial photograph.		
2010 (1" = 500)	The Site appears similar to that observed in the 2009 aerial photograph.	The adjacent properties are similar to that observed in the 2010 aerial photograph.		
2012 (1" = 500)	The Site appears similar to that observed in the 2010 aerial photograph.	The adjacent properties are similar to that observed in the 2012 aerial photograph.		

The aerial photographs indicate that the Site has been developed with avocado groves between 1980 and 1990 until present. Historical agricultural use of the Site may indicate that residual pesticides may be present in soil; however, sampling conducted in 2005 indicates that OCPs were not detected in two soil samples collected from the Site.

## 5.3 Topographic Maps

Historical topographic maps provided by EDR for the years 1893, 1901, 1904, 1947, 1949, 1968, 1983 and 1996 (Appendix J) were reviewed. The following table summarizes the observations of the Site and adjacent properties on the historical topographic maps.

Year	Observations		
rear	Site	Adjacent Properties	
1893 (1:62,500)	The Site is depicted as vacant land. An unimproved road intersects the central portion of the Site from the west-northwest to east-southeast.	Adjacent properties are depicted as undeveloped. A railroad labeled "Southern California R.R. Escondido Branch" is depicted north of the Site and extends from the southeast to northwest. Mount Whitney is depicted southwest of the Site and a network of unnamed roads is depicted to the east.	

Project No. 09524-06-05 - 13 - March 31, 2014

Year	Observations		
rear	Site	Adjacent Properties	
1901 (1:125,000) (1:62,500)	The Site appears similar to the 1893 topographic map, except the unimproved road is no longer depicted on the Site.	The adjacent properties are depicted similarly to the 1893 topographic map. One rural structure is depicted to the west of the Site.	
1904 (1:250,000)	It is not possible to determine if the Site is occupied based on the scale of the topographic map.	It is not possible to determine if adjacent properties are occupied based on the scale of the topographic map.	
1947 (1:50,000)	The Site is depicted similarly to the 1901 topographic map.	A few structures are depicted to the north of the Site. An unnamed road is depicted east of the Site.	
1949 (1:24,000)	The Site is depicted similarly to the 1947 topographic map.	The adjacent properties are depicted similarly to the 1947 topographic map.	
1968 (1:24,000)	The Site is depicted similarly to the 1949 topographic map.	Additional structures are depicted north, southeast, and east of the Site. Two roads, one unimproved and the other improved, provide access to the structures.	
1983 (1:24,000)	The Site is depicted similarly to the 1968 topographic map.	A trailer park is depicted northeast of the Site. Additional structures and roads are depicted north and east of the Site.	
1996 (1:24,000)	The Site is depicted similarly to the 1983 topographic map.	The northern adjacent property is depicted as urban development. Additional rural residences are depicted east of the Site. One residence is depicted west of the Site.	

It appears that the Site has never been developed with structures. No direct evidence of development that would suggest RECs are depicted on the topographic maps for the Site or adjacent properties.

Project No. 09524-06-05 - 14 - March 31, 2014

## 5.4 City Directory

EDR prepared an abstract of cross-reference directories reviewed at approximately 5 year intervals from 1903 through 2013 (Appendix K); however no records for the site vicinity were available prior to 1971. The following table summarizes the directory research information provided by EDR for the nearby properties.

#### HISTORICAL DIRECTORY RESEARCH SUMMARY

Addresses	Directory Listing or Use	Years			
The Site					
1095 La Moree Road	"Morris Howard D Constr Mntce h"	1971			
	Nearby Properties				
1125 -1137 Adele Lane	Residential	2000 and 2006			
314 and 608 Camino De La Cima	Residential, Psychologist	2000 and 2006			
2960 – 3066 Hill Valley Drive	Residential	1976, 1980, 1985, 1991, 1995, 2000, and 2006			
952 – 1200 La Moree Road (a.k.a. Lamoree Road)	Residential, Kingdom Hall of Jehovah's Witnesses , La Moree Mobile Home Estates	1971, 1976, 1980, 1985, 1991, 1995, 2000, and 2006			
980 – 988 Rose Arbor Drive	Residential	2000 and 2006			
1195 S La Moree Road	Residential	1991			
1120 – 1130 Whispering Water Drive	Residential	2000 and 2006			

The above-referenced nearby properties are single-family residences or a religious facility. Based on the uses of the listed properties, the likelihood appears low that activities at the properties have negatively impacted the Site.

Project No. 09524-06-05 - 15 - March 31, 2014

#### 6. SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

#### 6.1 Methodology and Limiting Conditions

Ms. Elizabeth Miller, a Geocon representative, performed the site reconnaissance on March 6, 2014, by driving and walking various portions of the Site. We were unaccompanied during our site reconnaissance, but had access to all areas of the Site with the exception of high density vegetated areas. The offsite survey was performed by observing adjacent properties from the Site and adjacent public streets. Weather on the day of the site reconnaissance was sunny with temperatures in the mid-70s.

Photographs of various site features and offsite properties are appended. Figure 2 is a site plan illustrating selected site features and the locations and orientations of photographs taken during the site reconnaissance.

## 6.2 General Site Setting

The Site is located on moderate- to high-relief terrain consisting of mostly agricultural land. Surrounding properties include low-density residential properties, agricultural, and undeveloped land.

## 6.3 Onsite Survey

The Site is developed as agricultural land with avocado groves and undeveloped land near the northwestern portion of the Site. A dirt road from La Moree Road provided access to the northern portion of the Site (Photograph No. 1). On the northern portion of the Site we observed trash and debris including tires and a car frame, empty cardboard storage bin, and an empty 5-gallon bucket (Photograph No. 2 through 4). Overhead electrical power lines are present along the northern boundary of the Site. The northwestern portion of the Site consisted of undeveloped vegetated. Vegetation in this area of the Site was so dense that we were unable to gain access to this portion of the Site.

The remainder of the Site consisted of avocado groves that were accessible from a dirt road on the southwestern portion of the Site (Photograph No. 5 and 6). Within the avocado groves, we observed white PVC irrigation pipes and tonalite granitic rock outcrops (Photograph No. 7). Along the southeastern portion of the Site, we observed trees that had been chopped down and piles of trimmed

Project No. 09524-06-05 - 16 - March 31, 2014

branches along the roadway (Photograph No. 8). A ravine was observed along the western portion of the Site with elevations decreasing towards the northeast along the ridgeline of the hill. A dirt drainage swale was observed along the eastern site boundary (Photograph Nos. 9 and 10).

We did not observe pools of liquid, drums, significantly stained soil, distressed vegetation, indicators of ASTs or USTs, pits, or ponds at the Site. The Site is developed with avocado groves and there are regulatory records indicating that pesticides have been applied at the Site. However, sampling conducted in 2005 indicates that OCPs were not detected in two soil samples collected from the Site.

## 6.4 Offsite Survey

Properties within the site vicinity include undeveloped land, low density single-family residences, and agricultural properties. Observations of properties adjacent to the Site are summarized below:

- North –We observed evidence of former structures north of the Site, including concrete foundation pads, stockpile of concrete blocks and building materials, an old propane tank, and a PVC pipe from a potential septic system (Photograph No. 11 through 16). La Moree Road is located approximately 500 feet north of the Site. Additional residential structures and motorhomes or trailers were observed north of the Site (Photograph No. 1).
- East Low density residences are east of the Site and a mobile homes estate park is northeast of the Site (Photograph Nos. 17 and 18).
- **South** Hill Valley Drive located to the southeast provides access to the Site. A single family residence is located south of Hill Valley Drive. Avocado and orange groves are located on the southern adjacent property (Photograph No. 19).
- West Adjacent properties to the west include residential and undeveloped land (Photograph No. 20).

No evidence of RECs was observed on the surrounding properties.

#### 7. INTERVIEWS

Ms. Jane Hu, a site owner representative for "Hu Family trust 04-15-87", completed our Site Owner Questionnaire regarding her knowledge of the Site and its past use; her completed questionnaire is included in Appendix C. Ms. Hu indicated that the Site was previously farmed by Henry Avocado Co., as an avocado grove for approximately 35 years. Water services are reportedly supplied to the Site by the Rincon Del Diablo Municipal Water District.

Ms. Hu indicated that she is unaware of any pesticide use or any additional environmental issues associated with the Site. According to her interview Ms. Hu indicated that the evidence of former structures is located on the northern adjacent property. She also indicated that she is unaware of the illegal dumping of trash and debris on the northern portion of the Site.

Project No. 09524-06-05 - 18 - March 31, 2014

#### 8. SUMMARY OF FINDINGS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-13, for the 29.42-acre property referenced as Valiano 29.42-Acres. The Site is located northwest of the termination of Hill Valley Drive and approximately 500 feet south of La Moree Road. The Site is currently developed with avocado groves. We understand that the Client plans to incorporate this property into the Valiano residential development, but plans to have the Site remain avocado groves. The following table presents a summary of findings and our opinions associated with the Phase I ESA performed at the Site, including known or suspect RECs, historical RECs, controlled RECs, and de minimis environmental conditions. Detailed information regarding the recommended actions identified in the table is presented in Section 9.

Assessment Category	Observed (Y/N)	REC (Y/N)	Recommended Actions
Hazardous Substances/Petroleum Products	N	N	NFA
Hazardous Wastes	N	N	NFA
Non-Hazardous Wastes	Y	N	NFA
Aboveground/Underground Storage Tanks	N	N	NFA
Unidentified Substance Containers	N	N	NFA
<b>Equipment Potentially Containing PCBs</b>	N	N	NFA
Wastewater Systems	N	N	NFA
Evidence of Releases	N	N	NFA
Pools of Liquid, Pits, Ponds, Lagoons	N	N	NFA
Wells	N	N	NFA
Other Site Issues	N	N	NFA
Nearby Properties	N	N	NFA
Historical Land Use – Site	Y	N	NFA
Historical Land Use – Nearby Properties	N	N	NFA

**Recommended Action:** 

AA = Additional action recommended.

NFA = No further action required at this time.

DM = De minimis condition where additional activities do not appear warranted at this time.

#### 8.1 Non-Hazardous Wastes

We observed trash and debris including tires and a car frame, empty cardboard storage bin, and an empty 5-gallon bucket on the northern portion of the Site.

#### 8.2 Historical Land Use- Site

Our review of historical aerials indicates that Site was used for agricultural purposes from between 1980 and 1990 until present. Analyses of two soil samples collected during our Phase I and Limited Phase II ESA in 2005 indicated that OCPs were not present in the two soil samples analyzed from the Site.

Project No. 09524-06-05 - 19 - March 31, 2014

## 9. CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-13, for the 29.42-acre property referenced as Valiano in Escondido, California. The Site is currently and has been occupied by avocado groves for approximately 35 years. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

#### 9.1 Non-Hazardous Wastes

We observed trash and debris including tires and a car frame, empty cardboard storage bin, and an empty 5-gallon bucket. We recommend disposing of this material in accordance with applicable County of San Diego disposal regulations.

#### 9.2 Historical Land Use- Site

Our review of historical aerials indicates the Site was used for agricultural purposes from between 1980 and 1990 until present. Analyses of two soil samples collected during our Phase I and Limited Phase II ESA in 2005 indicated that organochlorine pesticides were not present in the two soil samples analyzed from the Site. No additional assessment is warranted at this time.

#### 11. QUALIFICATIONS

This Phase I ESA report was prepared by Ms. Elizabeth Miller and Mr. Benjamin Eastman We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Eastman is a California Professional Geologist with over 26 years of professional geologic experience and training in environmental, geotechnical, and marine geology and engineering. Mr. Eastman received his BS degree and MS degree in Geological Sciences and has over 20 years of experience in the assessment and remediation of petroleum-related impacts to soil and groundwater at fuel terminals, retail service stations, and other commercial and industrial sites. He has extensive project management experience involving multi-site portfolios for major clients, as well as extensive drilling, sampling, field control, and technical writing experience.

Ms. Miller has a BS degree in Geological Science and more than 5 years of experience in the preparation and management of Phase I ESAs and other site investigation activities. Ms. Miller performs research, environmental assessments and field sampling programs for industrial sites, commercial/retail areas, residential and agricultural properties, and transportation corridors.

#### CLIENT-PROVIDED INFORMATION FOR THE SITE

SITE: Valiano 29.42-Acres, Project No. 09524-06-05

\*Please elaborate on any question answered "yes." If the question does not apply to the site, please answer "N/A".

- 1. If possible, please provide us with the title, appraisal, or sale agreement records to review and discuss in the Phase I ESA.
- 2. Are you aware of any environmental liens or activity and use limitations associated with the Site?
- 3. Do you have any specialized knowledge of the Site?
- 4. Please provide any commonly known or reasonably ascertainable information about the Site.

Found as avocado groves

- 5. Who currently owns, manages, and operates the Site?

  HU owns Herry Avocado manages forms pite
- 6. Has the monetary value of the Site been reduced due to environmental issues associated with the Site or adjacent properties?

NOT TO MY KNOWLEDGE

7. Why are you requesting a Phase I ESA for the Site?
She to be included in Valiano Tentable Map specific Plan

- [] Yes [YNo
- 30) Have cesspools or cisterns previously existed on the Site?
- [] Yes [] No
- 31) Other than storm water, does the Site discharge waste water onto the neighboring Site?
- [] Yes [4] No
- 32) Is there a transformer or capacitor that may contain PCBs on the Site?
- [] Yes [| No
- 33) Is there hydraulic equipment such as automobile lifts or elevators on the Site?
- [] Yes [Y No
- 34) Are PCBs contained in hydraulic oil associated with hydraulic equipment located on the Site?
- [] Yes [M No
- 35) Has an asbestos and/or lead-based paint survey been conducted at the Site? If so, what were the findings?
- [] Yes [YNo
- 36) Other than small quantities of legal pesticides used for landscape maintenance (e.g., Roundup), have pesticides, herbicides, or insecticides been applied on the Site?

  [] Yes [] No
- 37) Are you aware of any environmental liens against the Site that are filed or recorded under federal, tribal, state, or local law?

				/
ſ	1	Yes	ΠZ	Νo

- 38) Have any environmental violations or citations associated with activities conducted on the Site been issued?
- [] Yes [] No
- 39) Has the Site been included in other environmental assessments? If so, can copies of the reports be provided?
- [] Yes [YNo
- 40) Have other environmental assessments identified hazardous substances or petroleum products that exist, or may have existed on the Site?
- [ ] Yes [ ] No
- 41) Are there any pending lawsuits that involve the release or threatened release of hazardous substances associated with the Site?
- [] Yes [| No
- 42) Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place on the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
- [] Yes MNo
- 43) Are you aware of any commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of hazardous substance releases or threatened hazardous substance releases?
- [ ] Yes [ ] No
- 44) Do you have any specialized knowledge or experience related to the Site or nearby properties, including the knowledge of the chemicals and processes used by this type of business?
- [] Yes [\] No
- 45) Based in your knowledge or experience related to the Site, are there any obvious indicators that point to the presence or likely presence of contamination at the Site?
- [] Yes [] No

46) If the purchase price of the Site was below fair market value, did this occur because contamination was/is known or believed to be present on the Site?

[] Yes [] No (YN/A

#### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2014 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### TARGET PROPERTY INFORMATION

#### **ADDRESS**

1095 LA MOREE ROAD ESCONDIDO, CA 92029

#### **COORDINATES**

Latitude (North): 33.1258000 - 33° 7' 32.88" Longitude (West): 117.1379000 - 117° 8' 16.44"

Universal Tranverse Mercator: Zone 11 UTM X (Meters): 487136.0 UTM Y (Meters): 3665050.2

Elevation: 911 ft. above sea level

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/06/2013 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Lower Elevation	Address	<b>Direction / Distance</b>	Map ID	Page

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 78 Next Scheduled EDR Contact: 04/21/2014
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

**DELISTED NPL: National Priority List Deletions** 

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

#### Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013

#### Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013

Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013

### State- and tribal - equivalent CERCLIS

**ENVIROSTOR:** EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013 Date Data Arrived at EDR: 12/10/2013 Date Made Active in Reports: 02/13/2014

Number of Days to Update: 65

Source: Drug Enforcement Administration

Telephone: 202-307-1000 Last EDR Contact: 12/05/2013

Next Scheduled EDR Contact: 03/17/2014 Data Release Frequency: Quarterly

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006

**DEED: Deed Restriction Listing** 

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

#### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

#### **Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

#### **Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are

comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

#### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

#### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**FEMA FLOOD ZONE**

YES - refer to the Overview Map and Detail Map

#### **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

#### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

#### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CIENEBA

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 5 inches

Depth to Watertable Min: > 0 inches

	Soil Layer Information										
	Вои	Boundary		Classi	Classification						
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	hydraulic conductivity micro m/sec					
1	0 inches	7 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6 Min: 5.6				
2	7 inches	11 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:				

#### Soil Map ID: 2

Soil Component Name: VISTA

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map. USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### **Disclaimer - Copyright and Trademark Notice**

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANYSUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES.ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assesment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

# **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

## PHYSICAL SETTING INFORMATION

Flood Zone: Available

NWI Wetlands: Available

#### **AQUIFLOW**®

Search Radius: 0.333 Mile.

No Aquiflow sites reported.

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: CIENEBA

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

> 0 inches

water table, or are shallow to an impervious layer.

Soil Drainage Class:

Depth to Watertable Min:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 5 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		Soil Reaction (pH)
1	0 inches	7 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6 Min: 5.6

	Soil Layer Information										
	Boui	ndary		Classif	ication	Saturated hydraulic					
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		Soil Reaction (pH)				
2	7 inches	11 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:				

Soil Map ID: 2

Soil Component Name: **VISTA** 

Soil Surface Texture: coarse sandy loam

Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse Hydrologic Group:

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Soil Layer Information

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

#### STANDARD ENVIRONMENTAL RECORDS

PRP: Potentially Responsible Parties

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of verified Potentially Responsible Parties

Date of Government Version: 04/15/2013 Source: EPA

Number of Days to Update: 72 Telephone: 202-564-6023

Last EDR Contact :01/02/2014

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/01/2013 Source: Environmental Protection Agency

Number of Days to Update: 63 Telephone: 202-564-8600

Last EDR Contact :01/27/2014

ALAMEDA CO. UST: Underground Tanks

Standard Environmental Record Source: State and tribal registered storage tank lists

Underground storage tank sites located in Alameda county.

Date of Government Version: 01/22/2014 Source: Alameda County Environmental Health Services

Number of Days to Update: 20 Telephone: 510-567-6700

Last EDR Contact :12/30/2013

**AST**: Aboveground Petroleum Storage Tank Facilities

Standard Environmental Record Source: State and tribal registered storage tank lists

Search Distance: Property

A listing of aboveground storage tank petroleum storage tank locations.

Date of Government Version: 08/01/2009 Source: California Environmental Protection Agency

Number of Days to Update: 21 Telephone: 916-327-5092

Last EDR Contact :01/03/2014

Alameda County CS: Contaminated Sites

Standard Environmental Record Source: State and tribal leaking storage tank lists

Search Distance: 0.333 Mile

A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Date of Government Version: 01/22/2014 Source: Alameda County Environmental Health Services

Number of Days to Update: 19 Telephone: 510-567-6700

Last EDR Contact :12/30/2013

CA BOND EXP. PLAN: Bond Expenditure Plan

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous

Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989 Source: Department of Health Services

Telephone: 916-255-2118 Number of Days to Update: 6

Last EDR Contact:05/31/1994

CA FID UST: Facility Inventory Database

Standard Environmental Record Source: State and tribal registered storage tank lists

Search Distance: Property

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994 Source: California Environmental Protection Agency

Number of Days to Update: 24 Telephone: 916-341-5851

Last EDR Contact :12/28/1998

CA LA LF: City of Los Angeles Landfills

Standard Environmental Record Source: State and tribal landfill / solid waste disposal

Landfills owned and maintained by the City of Los Angeles.

Date of Government Version: 03/05/2009 Source: Engineering & Construction Division

Number of Davs to Update: 29 Telephone: 213-473-7869

Last EDR Contact :01/20/2014

CDL: Clandestine Drug Labs

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional

cleanup work.

**DEED**: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/09/2013 Source: DTSC and SWRCB Number of Days to Update: 24 Telephone: 916-323-3400

**ENVIROSTOR**: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

**HAZNET**: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011 Source: Environmental Protection Agency

Number of Days to Update: 94 Telephone: 703-412-9810

Last EDR Contact :11/11/2013

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Last EDR Contact :02/06/2014

**EPA WATCH LIST: EPA WATCH LIST** 

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Source: Environmental Protection Agency

Number of Days to Update: 40 Telephone: 202-564-2501

**UMTRA**: Uranium Mill Tailings Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS) Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: 08/28/2009 Source: EDR, Inc.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: 02/20/2007 Source: EDR, Inc.

#### **TOPOGRAPHIC INFORMATION**

#### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

#### HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

#### HYDROGEOLOGIC INFORMATION

#### **AQUIFLOW**<sup>®</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

#### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

#### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

9325 HAZARD WAY, STE. 100, SAN DIEGO, CA 92123-1217 (858) 694-2739 FAX (858) 467-9697 http://www.sdcawm.org ASSISTANT DIRECTOR

SANDY PARKS

March 4, 2014

Elizabeth Miller Geocon 6960 Flanders Dr San Diego, CA 92121

REQUEST FOR PUBLIC INFORMATION NUMBER: 14-RP017

Dear Ms. Miller:

In response to your request, pesticide use records for 2011 through 2013 were reviewed and no pesticide records were found for the site requested 1095 La Moree Road, San Marcos, CA 92078. Pesticide records were found for the site requested APN 228-313-13-00. Please see the attached list.

Please note our records reflect pesticides used in agricultural settings. No other pesticide uses are required to be reported by site. Therefore, our records only include sites where an agricultural commodity was produced at the site in the last four years, and where pesticide use was reported to this department. Our records do not include information on pesticides used in urban settings.

If you need to determine the presence or absence of pesticide residues at a location, you should contact an approved lab. We can provide a list of approved labs, which would provide such a service.

Sincerely,

KAREN MELVIN

Deputy Agricultural Commissioner/ Sealer of Weights and Measures

# The EDR Aerial Photo Decade Package

# **EDR Aerial Photo Decade Package**

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

#### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

#### **EXECUTIVE SUMMARY**

#### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

#### **RECORD SOURCES**

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
