

County of San Diego, Planning & Development Services
FLAGGING PROCEDURE FOR PROJECTS
ZONING

In order to assist County staff in the field evaluation of this project, the applicant or his engineer shall flag the property according to the following procedure:

FOR SUBDIVISION MAPS

1. The Site must be flagged ***not later than 10 days after date of project submittal.***
2. Use laths for flagging to ensure visibility.
3. Mark laths in order that staff can correlate flagged features with the submittal map.
4. The following shall be flagged: the exterior boundary of the project; intersection of streets with exterior boundary; internal street intersections and general alignment of streets and cul-de-sacs.
5. In placing the laths, the use of pacing or other estimation procedures is acceptable.
