	<input type="checkbox"/>	Project <i>IS</i> located within the County 100 year floodplain. Stream/River name _____ Map No. _____
	<input type="checkbox"/>	Pre-application Fee paid.

INSTRUCTIONS

The purpose of this evaluation is to determine whether the project site is located within the FEMA and/or County 100 year floodplain and, therefore, subject to the Resource Protection Ordinance requirements as they relate to floodplains. This form must be completed and submitted as part of a Resource Protection Study application.

- Provide an accurate location map (Thomas Guide) with the boundaries of your project to the Flood Control Counter, and a copy of the Tax Assessor's Map for your parcel.
If all or part of your proposed project is located in a floodplain on a County Floodplain Map, then the project must also be plotted on the County Floodplain Map (available at the Department of Public Works Mapping Counter).
- Bring this form and your map to the Flood Control Section. The counter staff will indicate whether your proposed project is in or out of a floodplain by initialing the appropriate boxes above.
- If your proposed project is located in the floodplain, then further evaluation will be necessary and will require the following:
 - Submit a \$200.00 fee to the Flood Control Counter.
 - Provide a floodplain map with an accurate plotting of the proposed project and submit one copy of project map, indicating type of discretionary permit, to the Flood Control Counter.
 - Submit this form, appropriately marked, as part of your Resource Protection Study application to Planning & Development Services.
- A preliminary check of your map will be made within 7 days. The evaluation will either be completed and returned to the Project Planner, or you will receive Notice that further information and a fee may be requested.
