

Course Title: **Northpointe Suite Software and COMPAS Basic Refresher Training**

Instructional Time: 8- hours

Course Description: This 8-hour agency customized curriculum will provide participants with updated knowledge and practice in scoring of the COMPAS actuarial assessment, results interpretation, case management and case planning. It will also review agency-configured functionality and navigation.

Performance Objectives

1. Demonstrate their working knowledge of the software through active system navigation
2. Create learning anchors between the relationship between EBP, criminological theories, and the COMPAS assessment
3. Identify and attend to responsivity principles as evidenced by the approach used in the assessment, case planning, and supervision phases with the client/offender
4. Demonstrate comprehension of pathways into the system for offenders through discussion and exercises including interview skills and case planning techniques to create a pathway out of the system
