

Course Title: **Custody Credits**

Instructional Time: 8-hours

Course Description:

This newly redesigned course will provide Investigation officers who complete Adult Pre-Sentence Investigative Reports and Supervision officers completing violation reports with information concerning how to accurately compute custody data. This course will include an overview of various codes that govern custody credits, including the authority to do so, case law trends, calculations, goodtime/worktime, and exceptions. The training will include hands-on training exercises using the computer lab.

Recommended for:

The class is designed for ARCSS

Performance Objectives:

1. Articulate the authority for calculating custody credits.
2. Correctly calculate custody credits for an adult offender.
3. Identify when offenders can receive good time/work time credits, and correctly calculate and compute these credits.
4. Identify and articulate the various exceptions/sentencing options that can affect the calculation and computation of custody credits.
