Institutional Services Operations Training Course

Topic: **C.O.R.I**

Instructional Time: 2-hours

COURSE DESCRIPTION:

The purpose of this initial training is to familiarize operators with the laws and policies that govern the California Law Enforcement Telecommunications System (CLETS), the systems and databases that can be accessed, and the ramifications for misuse. Operators may not access every system or database; however, it is important they are familiar with each database/systems and how they interact with each other.

OBJECTIVES:

1) Identify laws, policies, and ramifications governing CLETS misuse.

2) Identify each system database accessible via CLETS**.**
