Good Afternoon I am a private citizen living in the Kensington area of San Diego. I have reviewed the proposed maps by the commission and I am not in favor of any of these maps because they do not follow the laws approved by the citizens. They do not keep contiguous populations in the same district, they do not keep communities of interest intact. And they totally disregard the unique community interests of coastal, urban, suburban and rural areas. I fully support the maps proposed by the San Diego County Community of Interest Maps. These redistricting maps fulfill the requirements of the law and provide a voice for communities with similar interests, schools, churches, geography and ethnicity.
Thank you, Amy Wandel
