ON behalf of the San Diego North EDC I want to express our support for draft maps 3 or 5. In both cases, they look to keep as many "SR78" cities together as possible while also keeping those cities together with immediately adjacent unincorporated areas.

As previously articulated to the commission, the 5 cities along the SR78 have joined together in a unique economic development collaborative and keeping them in the same supervisorial district encouraged county participation and engagement with that effort. Splitting these cities, we fear would adversely impact the interest and engagement of county leadership.
