I have lived in the Julian area for 16 years and San Diego County since 1976. The Julian area, draws in families from all over the County to enjoy the Fall colors and apples, the Winter snow, and the real feel of Spring, and to escape the heat of Summer while enjoying some great pie and sampling our unique wine and beer, listening to the blues and blue grass, and hiking the trails in our surrounding mountains.

Unlike most rural communities we depend on tourism to continue our way of life and feel of community. We need representation that will be supportive of our community.

Our current supervisor appears to care less about us and our issues and only interested in communities that will gather him the most votes, he said as much in a meeting in Julian.

Please take us out of District 2. Put us in a district with representation that understands both the connections Julian has with so many people from all over the County but the need to support us in our community infrastructure to remain a great place to visit, as it is a great place to live. Maps 5, 6, and 8 would do that.
