To everyone on the County and State Commission,

I have lived in the unincorporated part of El Cajon since January of 1985. It is very important to me that East County stay as East County. These wonderful towns, all of which I have had something to do with since living in the county, need to stay together. I see no reason why they should be split up as we all have a lot in common. Also why should any areas that have little to nothing to do with us and in some instances are not even connected land wise be included??

Thank you for considering the above information when making your decisions.

Sincerely,
Sandy Pitman
