I would like to draw attention to an error in the mapping on Draft Map 10, specifically to the boundary lines between proposed Districts 1 and 4 in the area of Alpine.

At the November 1, 2021 meeting, Commissioner Surban made a series of recommended changes to draft map 6 in a motion to direct FLO Analytics to create a new draft map. This map is now on the IRC website as Draft Map 10. Specifically Commissioner Surban directed FLO Analytics to move the communities of Alpine and Pine Valley from District 1 to District 4. Commissioner Surban further clarified, and FLO Analytics confirmed their understanding, that when Commission Surban referred to these communities, he was referring to the areas defined by the existing community planning area boundaries. Draft Map 10 does not properly represent this instruction. The area directly south of Interstate 8 and Viejas Reservation and bounded to the south at Japatul Road and to the East at Japatul Valley Road is all included in the current Alpine Community Planning Area, however on Draft Map 10, this area is still shown in District 1, not District 4 as directed by the motion.

It is clear this is a mapping error and does not reflect the motion made by Commissioner Surban. Furthermore, this mapping error would bifurcate the existing Alpine Community Planning Area which based on a multitude of factors (community planning area, school district boundaries, fire protection districts, zip code and town name) is a distinct Community of Interest, Alpine. Please correct this error on map 10 if possible in advance of the November 13th meeting.

Thank you,
Travis Lyon, Chair
Alpine Community Planning Group
