I live in Santee and own a restaurant in Lakeside. I can appreciate the difficulty faced in redistricting. It's impossible to please everyone and almost nobody is very satisfied with the results. As a business owner much of my focus is on my geographic customer base and the communities I serve. The latest proposal takes Lakeside out of the east county and pairs us with a very different demographic. There is very little doubt in my mind that this most recent proposal will negatively affect my business. I urge the Commission seriously reconsider the potential major disruptive financial and social issues that could very well occur. I also want to encourage you to consider the importance of having our representative to be intimately familiar with the east county and all that he or she absolutely needs to know the needs and listen to the voices of hers or his constituents.

Thank you,
Victor Tongco
