Why? I have lived in Alpine for 34 years, this is the first time I can see a deliberate attempt to take my voice away. You shouldn't be changing things that aren't broke. Rural areas have a totally different set of needs from City. Lumping and splitting up rural is not taking citizens in consideration just self serving consideration. You need to consider everyone and really have a good reason other than controlling votes to make your suggested change.

Research on my part needs to be done, like how you were chosen, what districts you all live in, what rural exposure do you have.

At your next meeting I hope to hear answers about your mapping decisions
