Since the population in district 2 increased slightly it is recommended that we decrease some of the west edge areas of our district to accommodate the population requirements of 660,445 target. The recommended map changes proposed currently are ridiculous unless it is the intent to dilute the District 2 populations Republican presence? You say this is not political but yet the mapping says otherwise. Our District was only minorly over your target by under 4000 people and yet you want to slice up the district by over half and go west with it?? Leave our district alone! You haven't redistricted in decades. Why now?? With the target population per district only being off by under 4000 people?? Looks very suspicious considering the present times we are in??
