Dear members of the IRC. My name is Barry Willis and I serve on the Alpine Fire Board and San Diego LAFCO. As a long time resident of over 25 years in East County I was shocked to see some of the maps that are being considered that would put a dagger in the heart of those of us who live in East County. For the record I want to say that I support the maps outlined at the website: sdcountyredistrictingmap.org/supervisors. The reason I advocate for these maps is because they support the clear Community of Interest (COI) for those of us who live in Santee, Lakeside, El Cajon, Crest, Alpine, Ramona, Pine Valley etc. Most of these communities are "joined at the hip" through the Grossmont Union High School District. There is a very clear common interest for all of us in these communities because of the rural nature of these areas. We need a local County Supervisor that who can continue to hear our concerns and needs! For years it was Diane Jacob. Now, we need to continue to have our representative Joel Anderson who is very "tuned in" to what the COI needs are in these rural areas. To do otherwise and "split up" East County would be an outrageous change that would not serve the common interest of all of these communities. The Padre Dam Water District is also a common thread for the communities of Santee, Alpine and Crest and other areas of East County. As an elected official in East County who works hard to stay in touch with my constituents I strongly urge you to consider the maps that I refer at the beginning of this message.
