Hello I'm a resident of Lakeside for 58 years. The proposed map is very disappointing. Please use caution in drawing up our lines. Lakeside is a rural town that has been my home my whole life. We need to make sure we have access to people that understand we are not a big city we have different issues and concerns that might get overlooked if we are lumped with towns and cities that are not like lakeside. We have many Indian Reservations in these rural areas we need representation that understand Indian country I feel this new map might hurt not help my reservation. Please don't take that away from this group of people. We have Charter schools on some of these reservations how will that affect these schools that have been operating for many years bringing a special need to the people of this area. You are choosing to split Barona Indian away from Lakeside. My whole life I've been a Lakesider, my father, grandfather, great grandfather, its truly disappointing to totally not understand all and what this means to my people. What does this mean and what will it change? Will our voices be heard anymore if you make these changes are you trying to get rid of reservations and take away my voice. Please help me understand.
