Due to illness, we had to cancel the November 4th Boulevard Planning Group meeting and a presentation on redistricting. Therefore, these comments are submitted as my individual comments based on what our previous public discussions entailed. Currently, IRC Item 04, Draft Map 11, District 3 is preferred because it keeps most of our rural communities in the same district. Together, most of us share groundwater dependence, lack of major sewage systems and reliance of septic systems, high fire risk, and frequent public safety power shut off events, pressure to convert open lands into industrial wind, solar, and high voltage transmission / energy storage projects. Regards, Donna Tisdale, Chair, Boulevard Planning Group.
