Dear Commission Members: The idea of redistricting rural country/farm areas with more populated areas does not make sense at all. As a resident of Jamul, it is imperative to me that the Commission strongly consider keeping our small rural town in a district with other East County rural locations. I have lived in the City and know first hand that there are so many differences. Combining a district with those of beach, city, suburbs, and rural living would not be in any of the residents best interests. Each of these area are so different in how we live and by making this change you are compromising our communities. We need a supervisor who can focus on one area that has similar living arrangements. Thank you for your time and consideration.
