I'm writing to express my support for continuing working on draft map 14, rather than 13. I believe map 14 better represents the voices of the community. It keeps urban areas along the 78 together. It maintains the proposed PANA district, keeping the core of the Black and Muslim, as well as keeping the LGBT community together. It creates a majority/minority district that reflects the demography and cultural diversity of San Diego's central region. It ensures the majority Latino district in the South County.

All variations of district map 13 disenfranchise voters in central district, in opposition to IRC's mission stated goals!
