Dear Commission,

I am a San Diego concerned citizen and I noticed that there was not a lot of public comment to the County redistricting commission hearings compared to the City of San Diego. I was doing some research online regarding your capacity and your contractor for that. I noticed looking up your contractor that one of the team members for your contractor is also part of outreach for an advocacy group for the City of San Diego redistricting process. I was wondering your thoughts on this if it's splitting the efforts to attract people to the County process. Thank you
