Hello. Thank you for all of the time spent gathering input on this very important issue, and for considering my comment.

I am writing in support of Draft Map 14, which I think does the best job of maintaining communities of interest throughout the county. In particular, I think it is essential to group the cities along the 78 corridor, as some key issues and concerns, such as transportation, employment, and housing, impact those areas collectively.

Escondido has been grouped with some of the more rural north county areas, and while that may have been appropriate years ago, it is no longer so. Escondido has transitioned from being a predominantly agricultural community to a more urban/industrial area. By grouping Escondido with the other cities on the 78 corridor, key issues that impact that entire area can be handled much more effectively. Thank you.
