eComment :

The population of San Diego county has seen quite a change in the last 10 years. Commissioners - please take this into account when deciding on the appropriate map that represents the residents of SD county. We can not continue with the existing gerrymandered districts as this leaves many of our community members without a voice at the county level. The county has over a \$6B budget; regardless whether or not cities have a council all communities deserve representation at the county level whether urban or rural. The changing demographics of our county are here...we are not the same county of 10 years ago. Please continue to refine map 14 to ensure representation. Listen to the communities that have not had any representation (Black, Muslim, AAPI, LGBTQ, Latinos). Many of our communities of color support a version of map 14 that maximizes community representation and keeps the 78 corridor together. We can not accept the status quo (gerrymandered) districts that are currently in place. Thank you.
