I live in Jacumba and ask the commissioners to please understand that rural unincorporated areas do not have mayors or city councils. Our ONLY representation at the government level is our board of supervisor seat

The large cities already have city councils, mayors, governments, that they have direct access to.

The small, rural, often low-income, unincorporated regions of the county do not have this luxury.

If we have health or safety needs, we request those via the county.

Rural needs are often different than urban and suburban needs.

Please let us keep our voice by allowing the rural unincorporated regions to stay together.

Yes to Map 11 it is acceptable because it keeps large rural areas together so we can have representation.

No to Map 10 - it would bunch our rural community with large cities that have different needs and disenfranchise rural low income communities.
