I have lived in Mira Mesa since 1985, and as it grew into a large community, it continues to be diverse. Mira Mesa is at the edge of coastal communities, and should continue to be grouped with them, not with the large east county district as proposed. We are more urban/suburban than east county and have different needs. While east county has always been more conservative, Mira Mesa has leaned more liberal, and that is who should be representing our constituents. With the new 3 Roots community being built in Mira Mesa, a large planned community with urban identity and higher economic residents, our district's needs should continue to be grouped with the coastal communities. To group us with east county (yellow on the map) would disenfranchise our voters as well as those in rural communities. Thank you.
