I do not support the redistricting plans that are being pushed. As someone proud to call Escondido their home, I do not appreciate the gentrification and agendas being pushed on my community. There have recently been positive changes in the community and given the sudden interest in Escondido I see why. Please stop gerrymandering the people of my community when you have no interest in meeting any of their needs. The cities and communities being tampered with will not be made better by what this commission is suggesting. There are young people in Escondido who are fighting to make real changes for the people and nothing this commission plans to do will amount to half of what the youth of Escondido will do if given the chance. The people need to be involved, not shuffled around for the convenience of some politicians who have no other way of maintaining their privileges.
