Map 13 would allow us to have a voice where map 14 will break up the rural areas no voice. Rural East County decisions would be determined by larger populated cities and we would be effectively ignored of our needs. Currently we are the dumping ground for all the things the cities do not want in their area but want the benefits without changing their quality of life. We get stuck with all the green energy projects, released sexual predators, and our valuable ground water being sold and taken. Map 14 would effectively take away what little voice we do have and further decimate our communities. I ask that you not change the rural area map and further take away our voice on decisions that affect our communities.
