I am an Escondido resident and I love this place and the people who live here. There are beautiful communities here that look out for each other and spread generosity. I would love to see this spirit continued in our government with more consistent resources for our underserved areas. I am in support of map 13A because it keeps North County together. Splitting us apart would split resources and end up leaving some areas under-resourced. That is unacceptable. If your government can't serve you, what can they do?

Please go with map 13A to keep our communities up here together! Please listen to other residents who know more than me, who have lived here far longer, who know which areas need resources. Please use a long-term lens. These districts will impact the next 10 years and we need to make our districts robust so that our people can get support!
