I have to apologize to L A, over my newspaper comments, I just went into the maps shown online, that is the saddest group of different maps I think I've ever seen. A kindergartener could have made better maps. They are blurry, printing on top further blurs maps, just what the U T showed. I am shocked that the current 2nd largest city in the state, puts out such poorly blurry map examples. Actually maybe I need to address this to the supervisors, since it is under their preview. I'm just in shock! WOW! Reply

May Comfort
