My name is Pam Albergo with the Communities Together Coalition. I live in North County, in the city of Escondido. I say North County, because that is what many people call the cities of Escondido, San Marcos, Vista, Oceanside and Carlsbad. We, in the North County have many commonalities. We share school, hospital and water districts, transportation and commerce. We have a large veteran's and Latinx population just to name a few. We are stitched together by the thread of Interstate 78. Give our North County communities of interest the power to have our voices heard and support map 14.

This map gives a unified voice not just to our North County cities, but also:

- Provides a coastal district that unifies the AAIP communities as well as our coastal cities.
- Provides a district that unifies BIPOC and LBGTQ communities.
- Provides for a majority Latino district that respects the Voting Rights Act.
- And provides for the needs of the East County and its rural communities.

It is the most fair and balanced map for all San Diego County communities.

I oppose map 13 and its variations because it disenfranchises voters in the Central district and divides the AAIP communities as well as its division of the 78 corridor cities.

Thank you Board for your hard work these many months.
