I request that the County consider a Coastal District Board of Supervisors representative from Encinitas through Point Loma. Our issues are unique to the coast from bluff erosion to serving local residents, county-wide residents, to tourists from all over the world. The impacts on housing demands for residents conflicts with demands of tourism. Sea-level rise conflicts with pressure to accommodate more housing. Environmental impacts are real and critical. All SD County supervisors need to lend an ear to the coastal crises we face.
