I request that District Five include the entirety of Oceanside, Vista, San Marcos and Escondido.

These cities, along the 78 corridor, share demographic data which render them appropriately considered shared interest communities. The median income in these cities reflect a more working class composition compared to the other coastal cities and as such would give them shared interests in County resources. As a school board member, I can attest to the shared interests of our students across these particular districts. Our student populations are reflective of one another and our families would benefit from a unified voice on the board of supervisors.

Thank you for your careful consideration of this important matter.
