I'm a resident of San Marcos. My community consists of about 100,000 people, which is an increase of almost 16% since the 2010 census. The demographics are primarily: White (non-Hispanic) - 43%; White (Hispanic) - 31%; AAPI - less than 10%; Black - slightly more than 2%. We are diverse both ethnically and economically.

For years, county politicians have included North County communities with rural East County. The current boundaries do not suit the needs of our citizens, but those of politicians.

Our growth has exploded in the last 10 years, changing the needs of the North County population. This has resulted in a strain on resources and increased traffic. We must have one district that meets the transportation needs of the 78 corridor and build a 21st century transportation network that serves the needs of families and businesses.

I ask that you give our community the voice it deserves by making the BOS boundaries fair and reasonable by respecting the differences in North and East Counties.

Thank you.
