For the thousands of people in The North and West part of Escondido along with those in the County area above the Escondido City Limits it is critical that the area within 5 mile radius of the proposed North County Construction Recycling Center proposed just West of I-15 be turned down and never brought back again. If you review the decision of the Board of Supervisors recently you will see they rejected the misguided Sequa attempt which had very dated information and never seriously address the multitude of appeals to the planning commission. We need Terra lawson-Remmer, a strong environmental advocate to cut through the B S on this company which paid millions of \$\$\$ to the Fed and whose CEO was thrown in jail by the Feds for years of fraud resulting in significant environmental damage in 6 of 7 Southern California cities. And they are proposing self monitoring? This would be a travesty and the County would be hammered with law suits for the back room deal in 2003 pushed through by former Supervisor Cox and many not paying attention Supervisors.
