Among other areas, the current District 3 contains the largest concentration of historic communities within San Diego County. These are centered in and around downtown and Balboa Park and Old Town. It is a constant fight to get our politicians to understand the importance of preserving our history and resources AND STILL WORK to make progress in urban renewal, homelessness, and affordable housing. Historical Preservation is a huge common interest in our older neighborhoods and we should be recognized and heard. The NAVWAR proposal is an example of a developer windfall made possible by politicians who do not respect the historic integrity of the area they wish to decimate with overbuilding. We who do not wish to become Miami Beach or Honolulu should have representation as a special interest group.
