#9: Adopt option 2, which will provide the most transparency and opportunity for public input, and is more consistent with the way that other independent commission conduct their hiring of chief consultants.

In addition - and importantly, we urge you to have separate RFPs or applications for the demographer and the line-drawer. These are two very distinct skill sets, and while some line-drawers may have both, not all do, and combining them into one RFP will limit the pool of applicants and may preclude you from getting the best possible consultants.

I wrote to the redistricting email address on Friday, December 18, 2020, asking where to send the following question. I have not received a response. My question is about whether or not neighborhoods are considered when the boundaries are drawn during the redistricting process. For example, the block I live on is a cul-de-sac. It is my understanding that those on one side of my street live in Chula Vista and the other (my side) live in unincorporated Bonita. The latter leaves me disenfranchised from city voting, representation, and services and divides me from half of my neighbors. Is there any chance that this type of situation could be redressed in the current redistricting process and if so, how?

Thank you for your consideration.

We were split from the rest of Peñasquitos to balance things out last time, some other group should be broken up this time. I even got mail calling my home Mira Mesa by city council candidate. We lost out on representation as our issues are different that Mira Mesa. Let us go home.

I would like some clarification on the Mira Mesa Redistricting related to the meeting on January 14, 2021. A community member stated that the Canyon View and Park Village area were being moved in Mira Mesa District. I am the Assistant Director of Planning for the Poway Unified School District and since these areas are within our school boundary I would like to understand the impact of this on the District. I'd appreciate someone getting back to me and ensure the District is included in conversations/notifications when areas within our Boundary are being affected.

Thank you,
Rheia Alschbach

#8: Start the training ASAP to inform your discussions and decisions about your timeline, the formulation of RFPs for the line drawer & the outreach RFP, and the ultimate decisions you make about which consultants you will hire

Please add to your training a slot for speakers from other independent commissions to find out what was helpful - or not helpful - to them as they started their processes.

As a resident of the Park Village neighborhood in San Diego's Rancho Penasquitos community, I would like to request that our Park Village neighborhood be moved from District 6 back to District 5 with the rest of Rancho Penasquitos. That is our community. Our elementary school feeds into D5 schools in the Poway Unified School District. We are very disconnected from the rest of D6 and there's no reason for us to continue to be part of that district. Thank you.

Hello,

I'm located in the Canyon View/Park Village area, and would like to understand the potential implications of redistricting for schools (elementary, middle and high school).

It is crucial to keep the same schools under PUSD for the Canyon View/Park Village areas.

Thank you for your considerations
Benoit

Our family has lived in Park Village since 1998. The first 4 years we lived in West Chase and now our home is at the end of Park Village. Our zip code has always been 92129 which belongs to Ranch Penasquitos NOT Mira Mesa. We bought a home in Ranch Penasquitos because we wanted our girls to attend schools in Poway Unified School District and because Park Village is a diverse community. I call on each of you to do the right thing and give us our Community back. Our family has made wonderful memories in the community of Park Village which is in Rancho Penasquitos. Your committee has an obligation to the right thing so our family respectfully asks you to put our beautiful home with our family back in the community where we live, Rancho Penasquitos.

On behalf of LWV San Diego: If possible, it would be helpful if you could post your agendas earlier so that the public has time to review and prepare to engage on items of interest

The current process for making public comment is challenging, since many members of the public may decide to speak on an item after hearing discussion, and it can take time to register and get in the queue. We understand there may be additional costs involved, but we would urge you to post a dial in number on your agenda, on your website, and on the live feed, and have someone monitor the phone lines to allow callers to make the decision to comment on agenda items as they are discussed and ensure maximum public participation.

On behalf of LWV San Diego: We want to thank the County staff for putting this robust timeline together. It's not clear what action you'll be taking on the timeline today, but we want to confirm that the timeline will be a living document, particularly since you have not yet received training on what is required for the redistricting process and discussed how you want to conduct that process.

For example, the proposed timeline lays out 5 post-draft map hearings. However, 5 hearings is the minimum required by law. You may decide that you will have more hearings, given there are 3 million people in the county, and there is tremendous diversity within each supervisorial district.

Public presentations: It's great to see that the timeline includes ongoing, more formal presentations by community groups and the public. We'd appreciate it if you could share what you envision is the process for groups to request time for those presentations and who they should reach out to for more information. And please let us know if we can make recommendations for topics you may want to cover and groups w/ expertise in those areas.

On behalf of LWV San Diego: This week, the Census Bureau announced that its release of apportionment data to the states would be delayed until at least the beginning of March, if not later. This delay directly impacts the date by which the state and local jurisdictions will receive adjusted Census data for redistricting purposes.

The timeline for your redistricting process that is currently being proposed would not allow enough time for meaningful public engagement in light of the delayed Census data release date and uncertainty.

Given the ongoing uncertainty, we urge you to create a working timeline that has December 15, 2021, as your map adoption deadline, and that you work backwards from that date to determine your windows for pre-and post-mapping public engagement, as well as the critical time period after Census data is released when you will use new Census data to conduct racially polarized voting analysis and assess Voting Rights Act compliance.

The state legislature extended your deadline for final map adoption to December 15, 2021 - with support from the County of San Diego -- for the same reason the California Supreme Court extended the deadline for the state's adoption of final maps to December 15th: Covid, and the challenges it presented for the Census, created uncertainty and delays. An extended - and CERTAIN - deadline facilitates efficient planning, ensures the commission will have the time it needs to engage the public in the more challenging Covid environment, and gives other stakeholders, including community organizations, the certainty they need to plan for and engage the public in the redistricting process.
