Overview

- 2020 Census Tracts

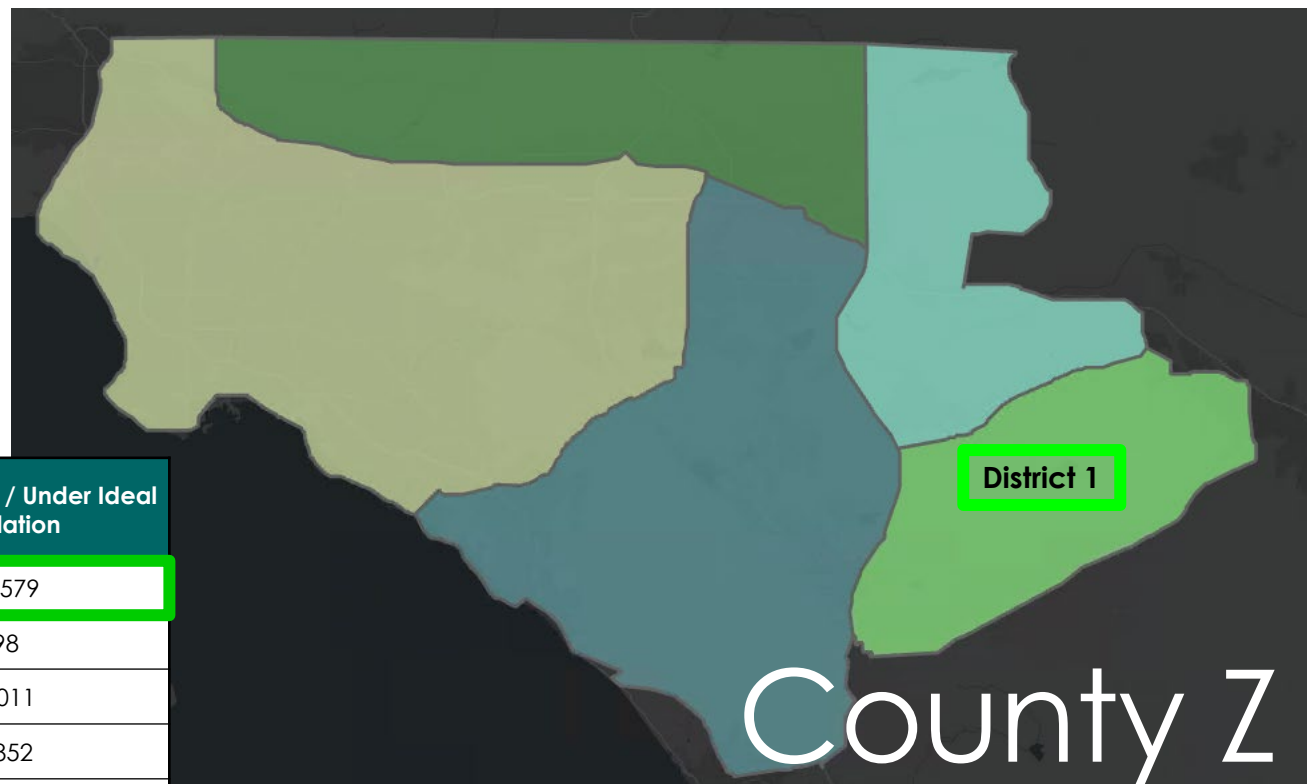

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

- In Example County Z, District 1 is the least populated and requires more population > enlarge area to include more people

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	-19,579
			2	307,025	0.2%	598
			3	326,438	6.5%	20,011
			4	303,575	-0.9%	-2,852
			5	308,249	0.6%	1,822

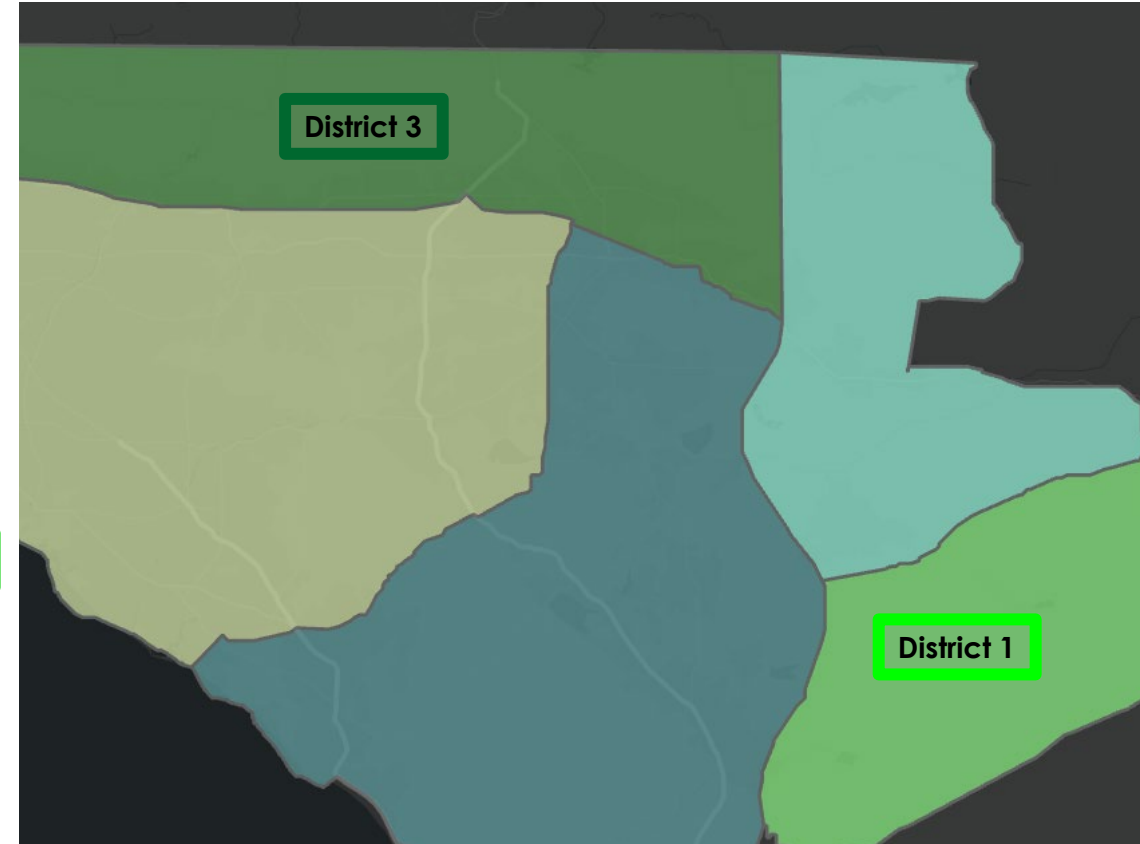

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	-19,579
			2	307,025	0.2%	598
			3	326,438	6.5%	20,011
			4	303,575	-0.9%	-2,852
			5	308,249	0.6%	1,822

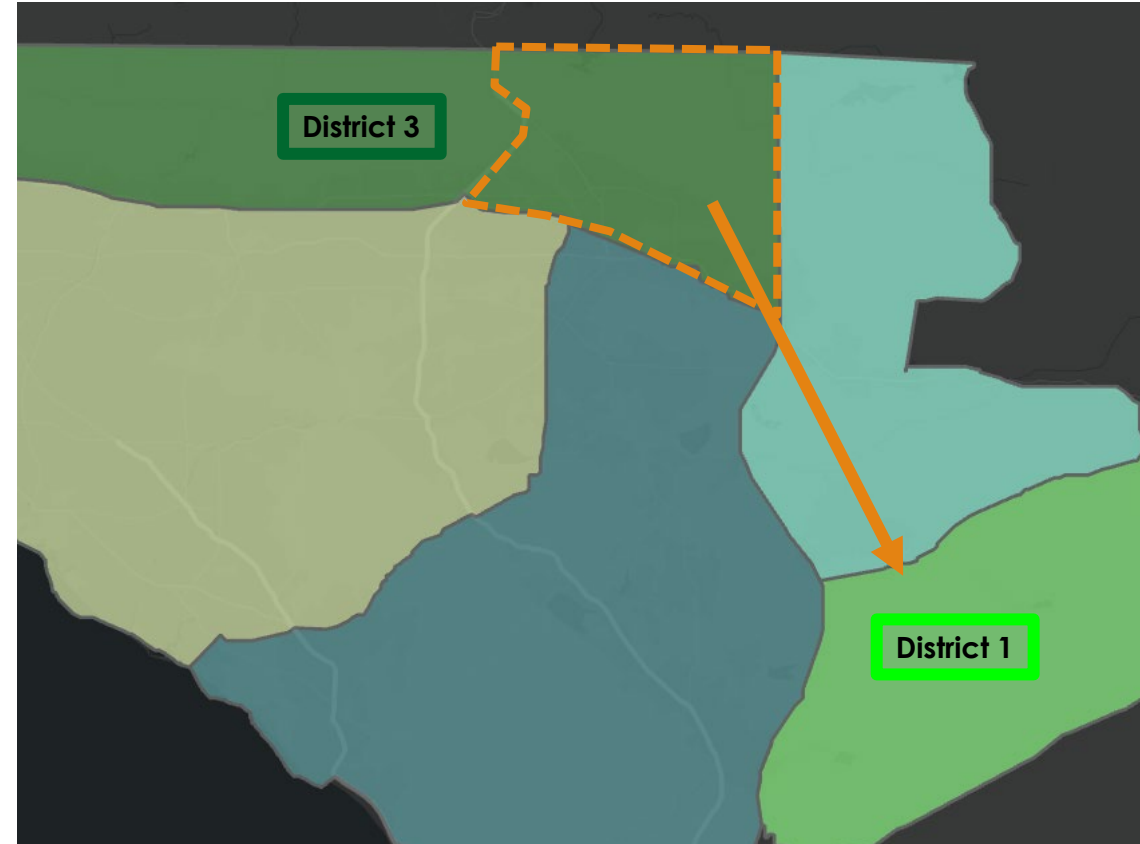

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- Move **area** from District 3 to District 1

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	-19,579
			2	307,025	0.2%	598
			3	326,438	6.5%	20,011
			4	303,575	-0.9%	-2,852
			5	308,249	0.6%	1,822

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- Move **area** from District 3 to District 1

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	-19,579
			2	307,025	0.2%	598
			3	326,438	6.5%	20,011
			4	303,575	-0.9%	-2,852
			5	308,249	0.6%	1,822

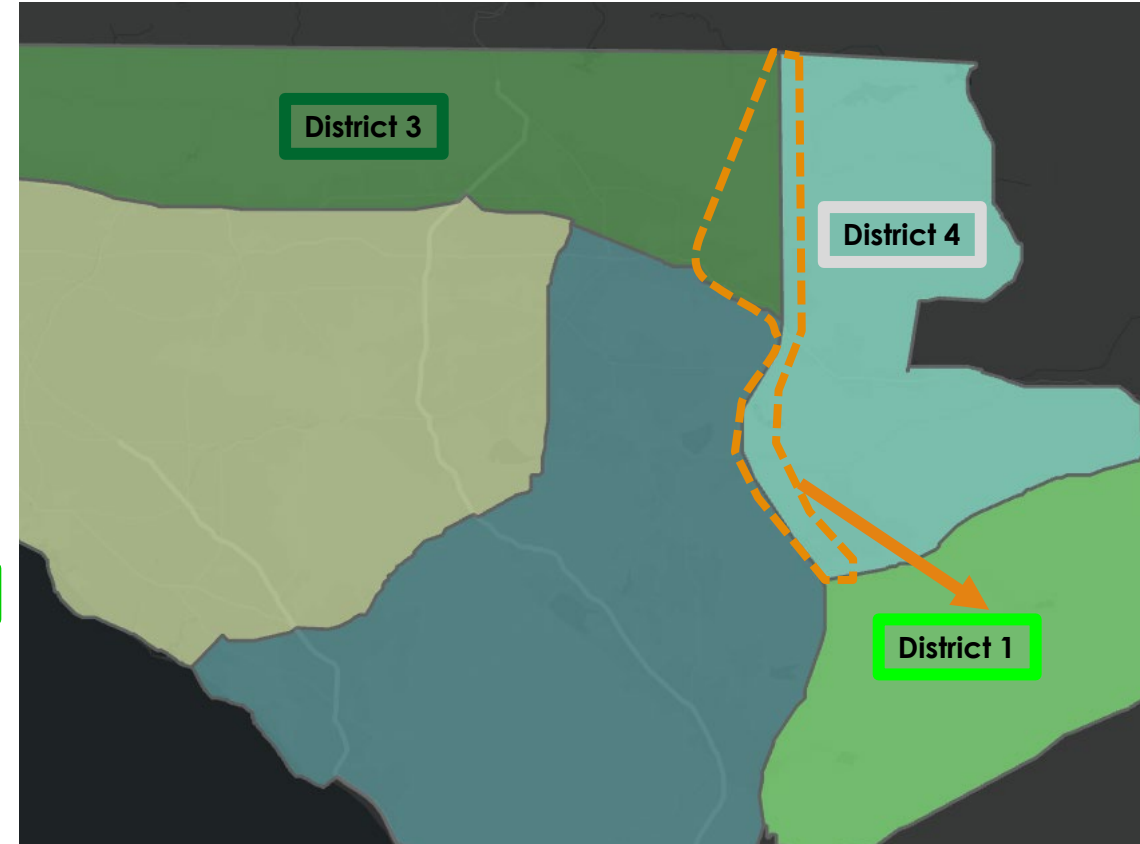

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- Connect District 3 and District 1 by moving **area** from District 4 to District 1

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	-19,579
			2	307,025	0.2%	598
			3	326,438	6.5%	20,011
			4	303,575	-0.9%	-2,852
			5	308,249	0.6%	1,822

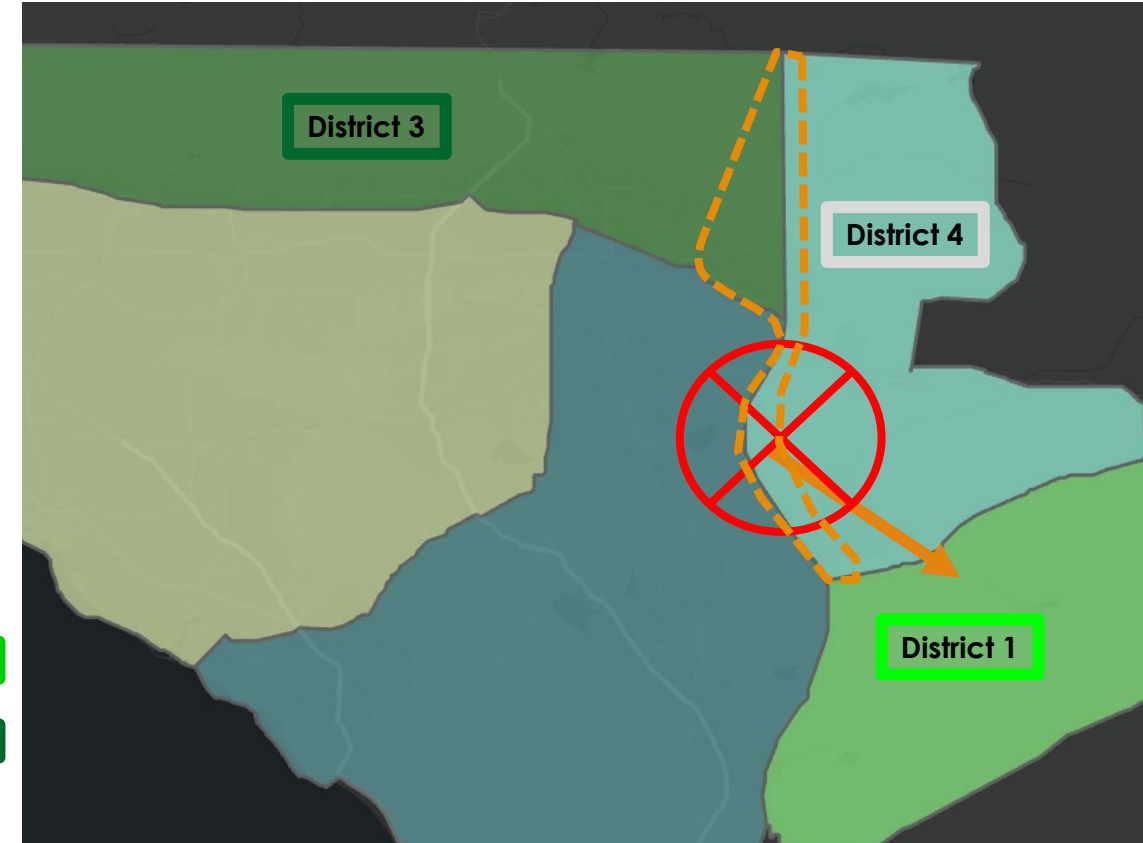

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- ~~◦ Connect District 3 and District 1 by moving area from District 4 to District 1~~
- **District 1 would not be compact**

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	-19,579
			2	307,025	0.2%	598
			3	326,438	6.5%	20,011
			4	303,575	-0.9%	-2,852
			5	308,249	0.6%	1,822

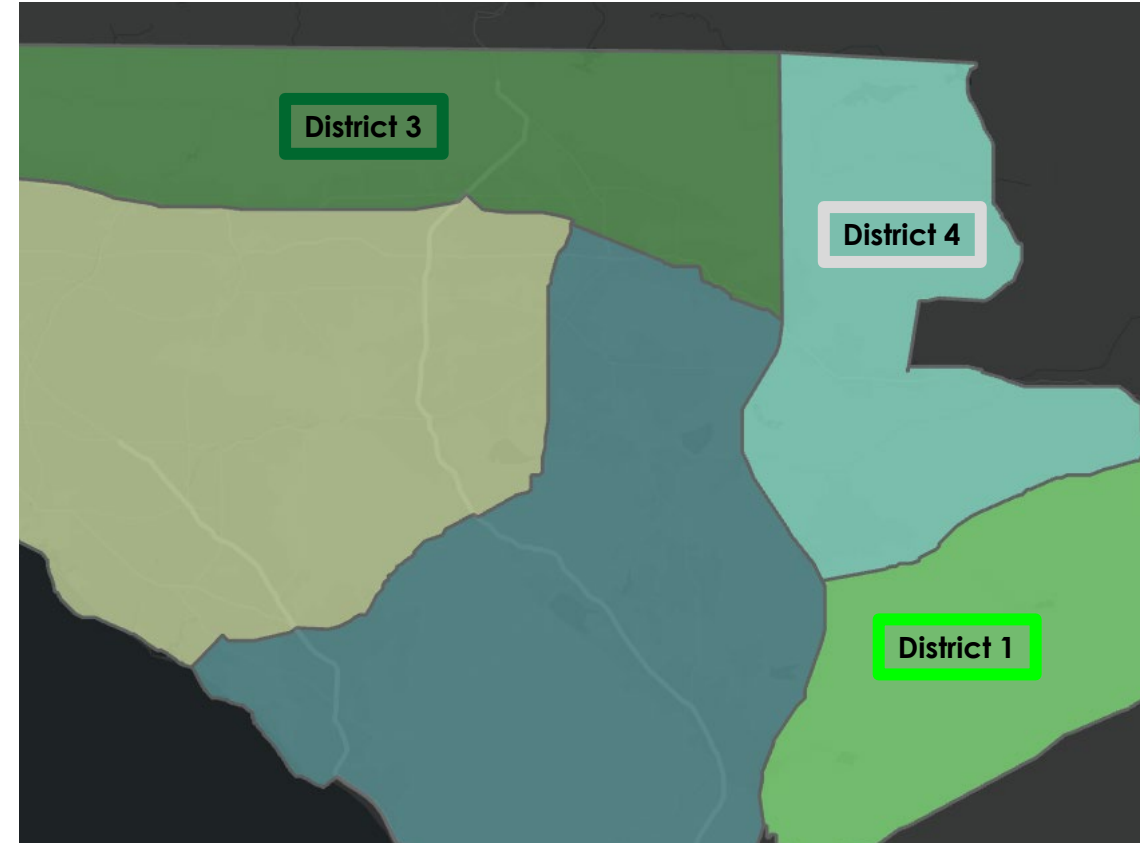

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- District 4 could take on population from District 3, allowing District 1 to take on population from District 4

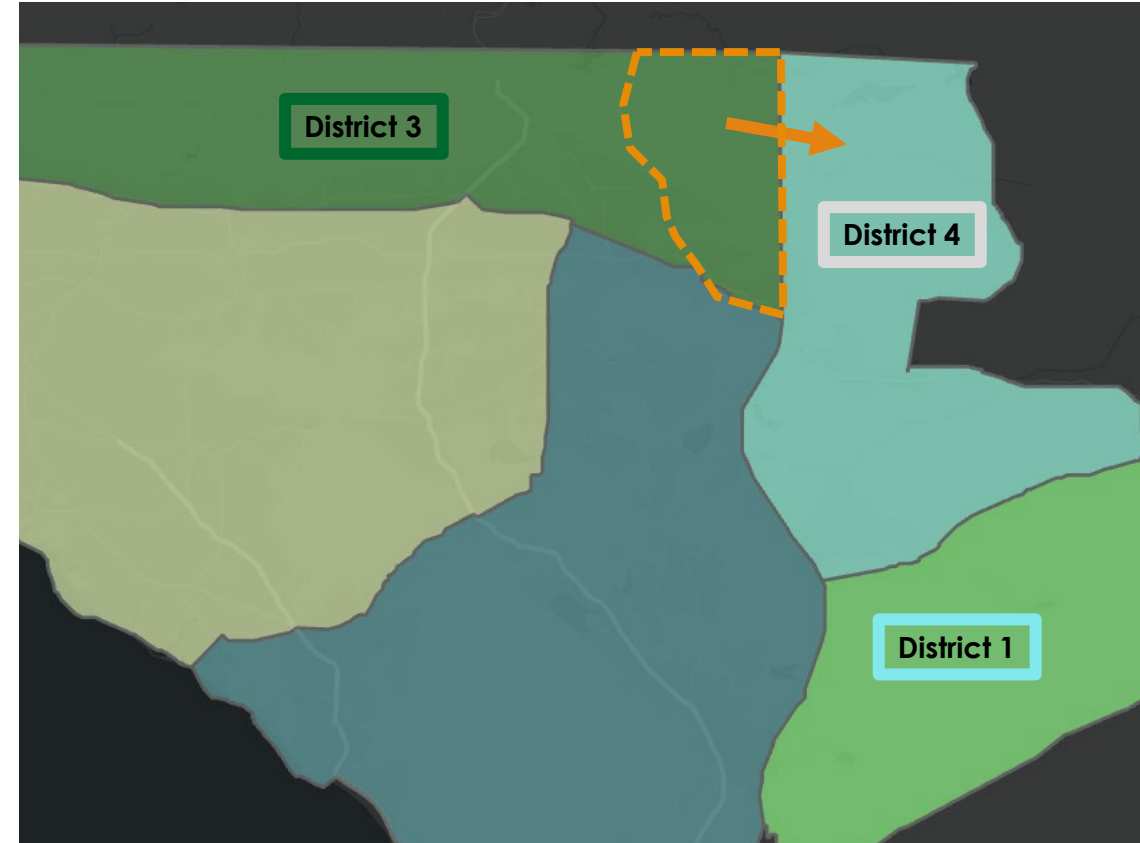

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	-19,579
			2	307,025	0.2%	598
			3	326,438	6.5%	20,011
			4	303,575	-0.9%	-2,852
			5	308,249	0.6%	1,822

Redistricting Example

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- District 4 could take on population from District 3, allowing District 1 to take on population from District 4

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	286,848
			2	307,025	0.2%	307,025
			3	326,438	6.5%	326,438
			4	303,575	-0.9%	303,575
			5	308,249	0.6%	308,249

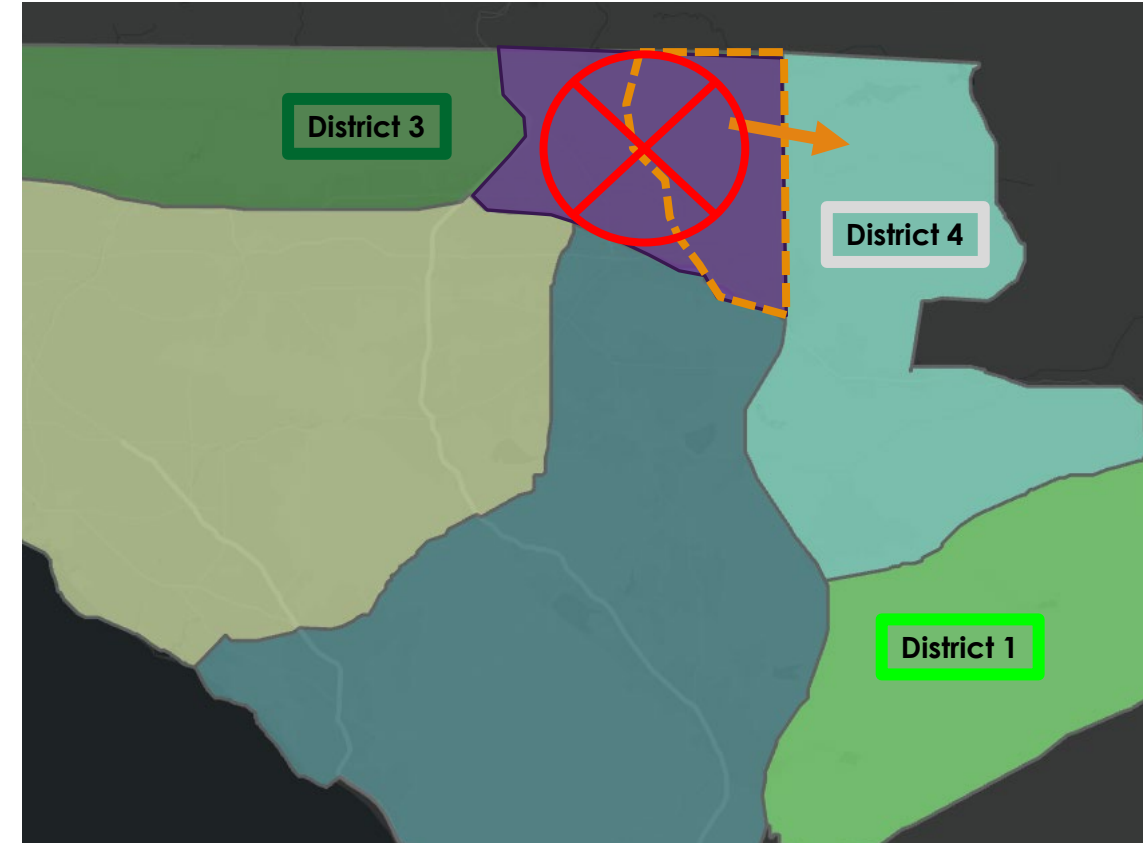

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	286,848
			2	307,123	0.2%	307,123
			3	326,438	6.5%	326,438
			4	303,575	-0.9%	303,575
			5	308,249	0.6%	308,249

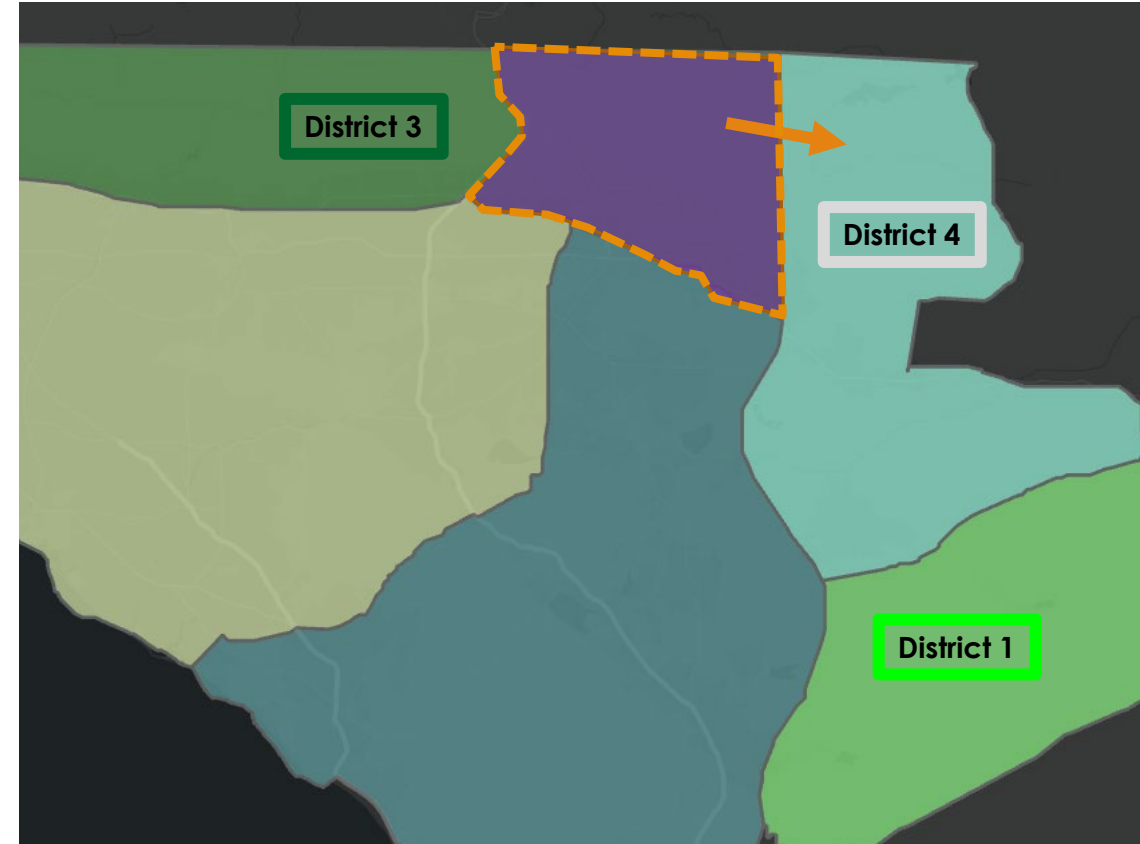

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- District 4 could take on population from District 3, allowing District 1 to take on population from District 4
- ~~Move area from District 3 to District 4~~
- **Change splits a community of interest**

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	286,848
			2	307,123	-0.2%	307,123
			3	326,438	6.5%	326,438
			4	303,575	-0.9%	303,575
			5	308,249	0.6%	308,249

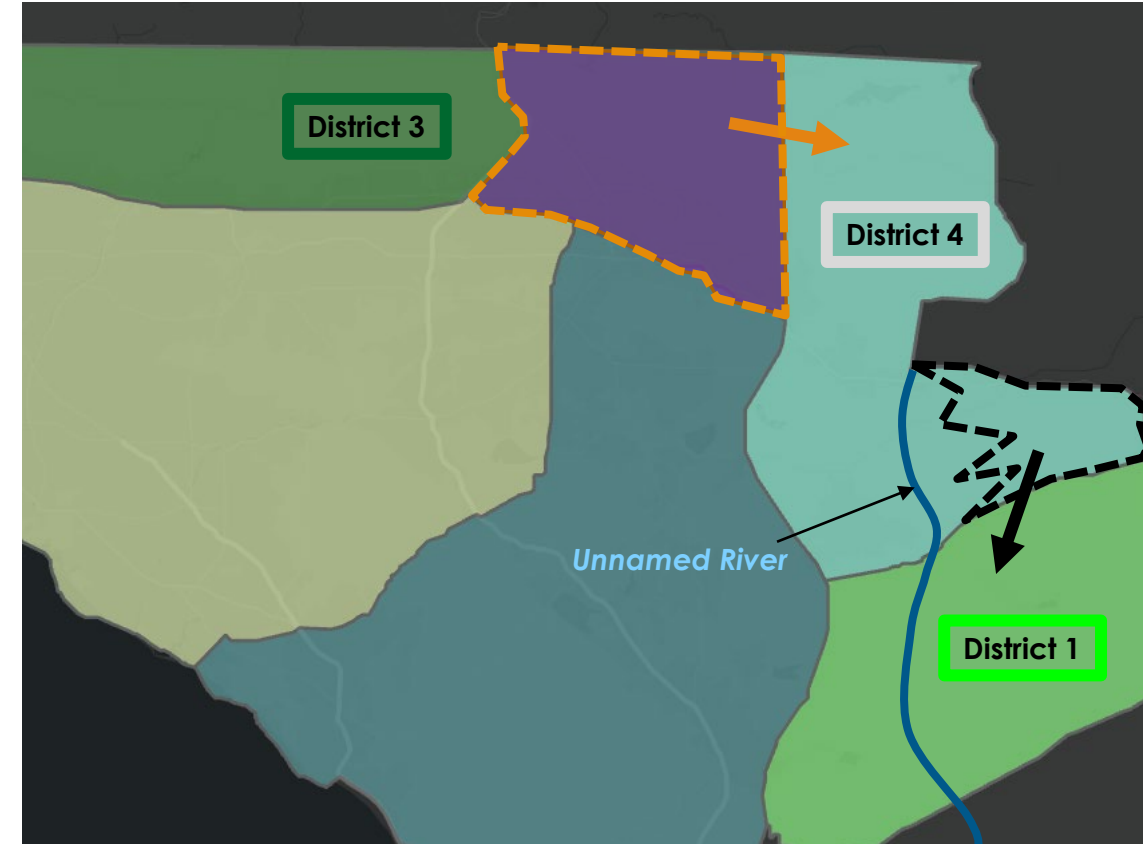

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- District 4 could take on population from District 3, allowing District 1 to take on population from District 4
- Move **area** from District 3 to District 4 that keeps the **community of interest** in a single district

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	286,848
			2	307,123	0.2%	307,123
			3	326,438	6.5%	326,438
			4	303,575	-0.9%	303,575
			5	308,249	0.6%	308,249

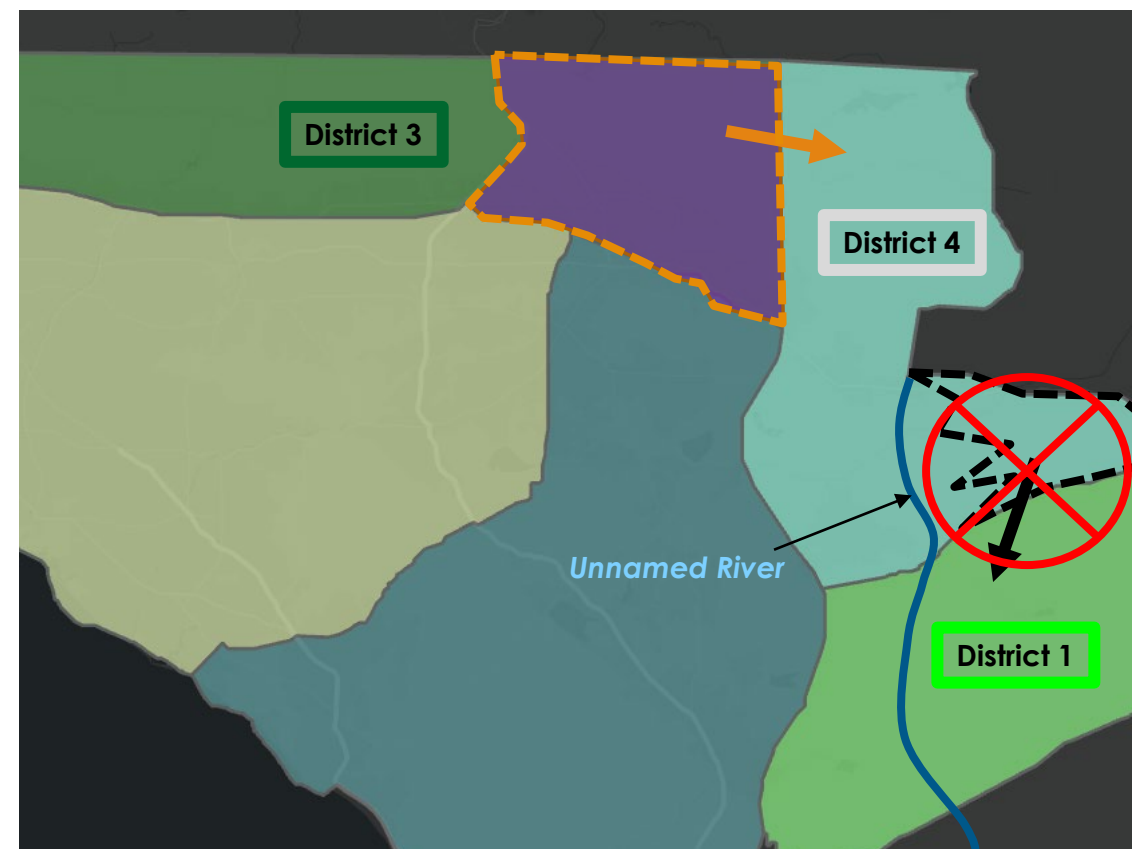

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- District 4 could take on population from District 3, allowing District 1 to take on population from District 4
- Move **area** from District 3 to District 4 that keeps the **community of interest** in a single district
- Move **area** from District 4 to District 1

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	286,848
			2	311,122	1.7%	311,122
			3	326,438	6.5%	326,438
			4	303,575	-0.9%	303,575
			5	308,249	0.6%	308,249

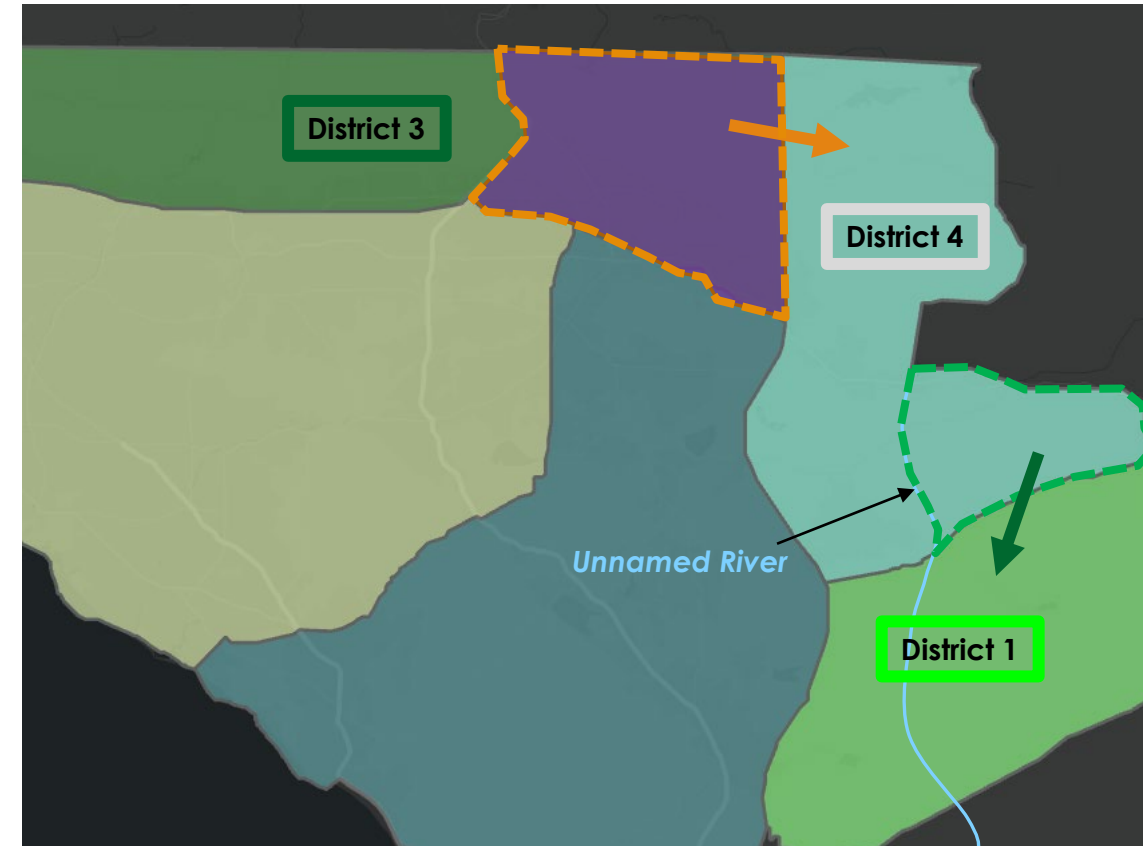

- District 1 is the least populated and requires more population
> enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- District 4 could take on population from District 3, allowing District 1 to take on population from District 4
- Move **area** from District 3 to District 4 that keeps the **community of interest** in a single district
- ~~Move **area** from District 4 to District 1~~
- **Not using easily identifiable and understandable features to create boundary**

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	286,848
			2	307,123	0.2%	307,123
			3	326,438	6.5%	326,438
			4	303,575	-0.9%	303,575
			5	308,249	0.6%	308,249

- District 1 is the least populated and requires more population > enlarge area to include more people
- District 3 has the most population and could provide population to District 1
- District 4 could take on population from District 3, allowing District 1 to take on population from District 4
- Move **area** from District 3 to District 4 that keeps the **community of interest** in a single district
- Move **area** from District 4 to District 1 that uses easily identifiable and understandable features

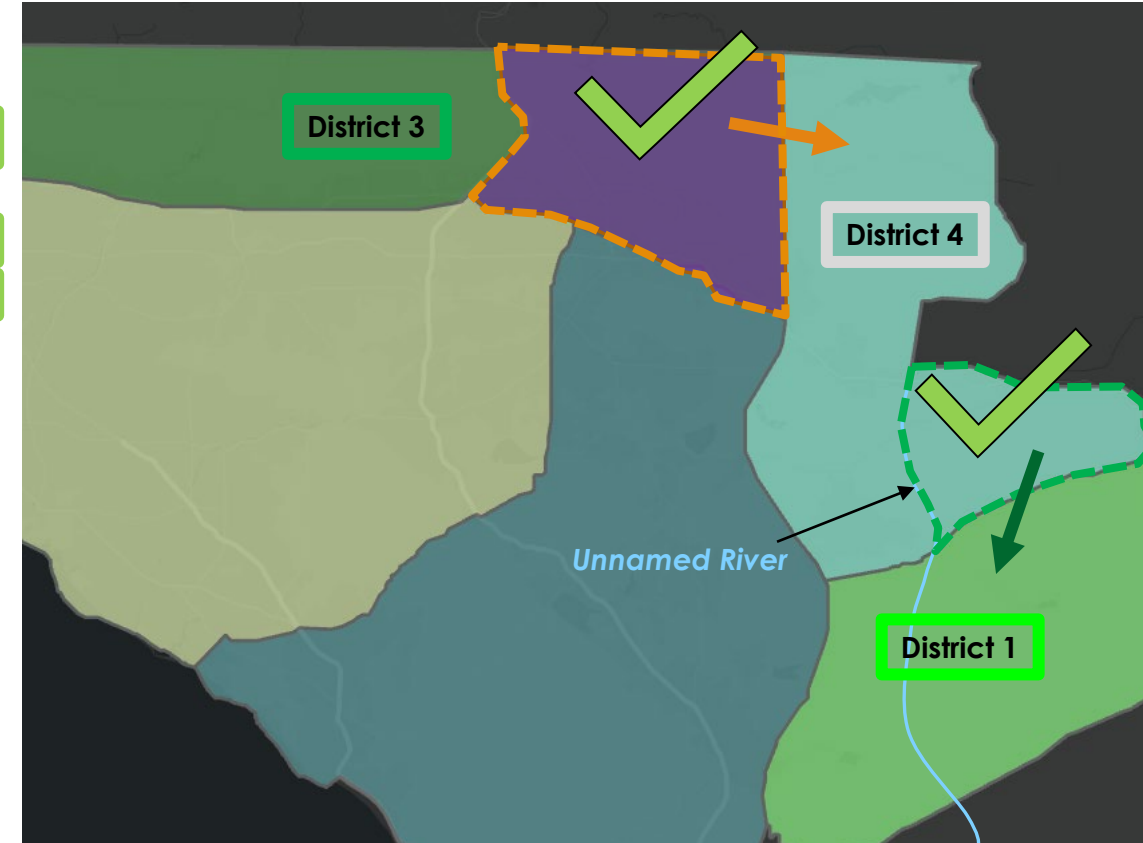

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	12.9%	1	286,848	-6.4%	286,848
			2	307,123	0.2%	307,123
			3	326,438	6.5%	326,438
			4	303,575	-0.9%	303,575
			5	308,249	0.6%	308,249

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	2.2%	1	301,758	-1.5%	-4,669
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	308,467	0.7%	2,040
			5	308,249	0.6%	1,822

- ✓ Changes result in contiguous and compact districts
- ✓ Changes respect communities of interest
- ✓ Changes use identifiable features as boundaries
- ✓ Changes result in a lower overall range of 3.0%

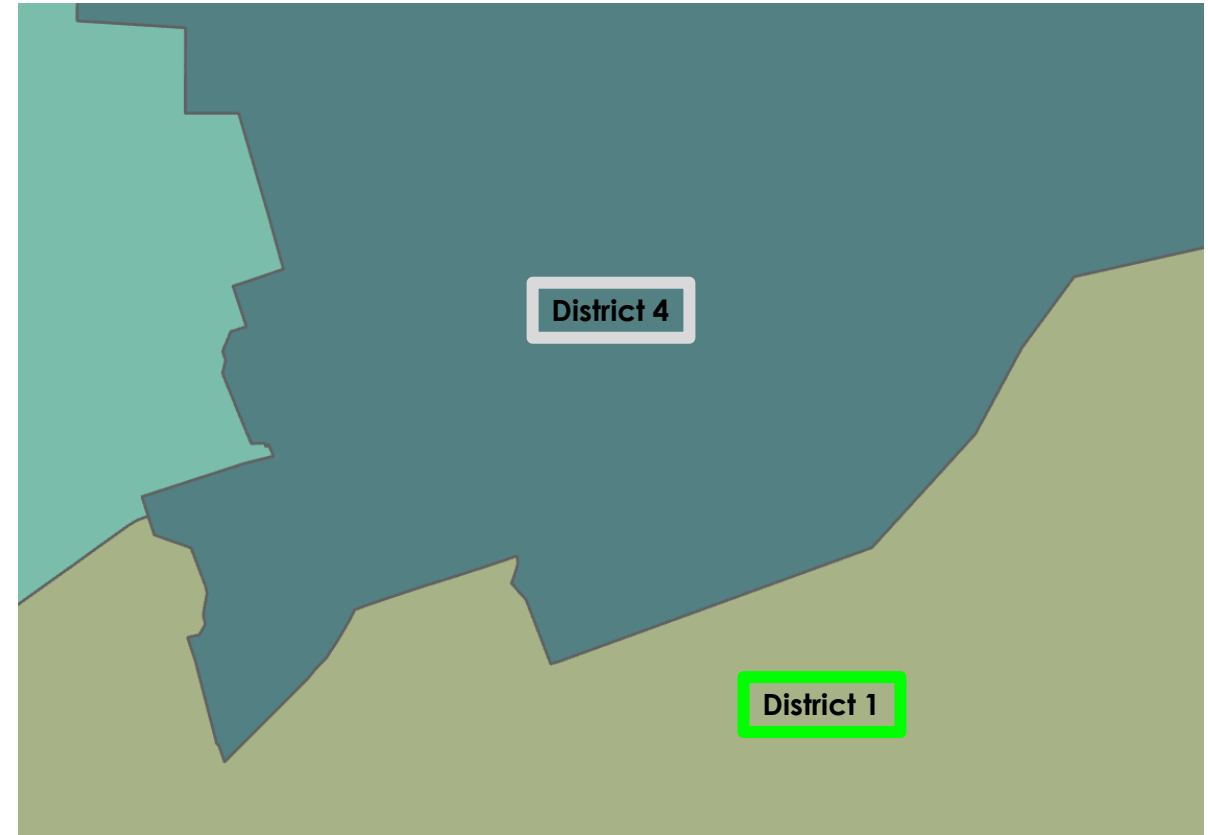

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example – Census Blocks

- In this example, we look at an example at the level of the Census Block:
- District 1 is still the least populated and requires more population > enlarge area to include more people
- District 4 could provide population to District 1

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	11.1	1	288,126	-6.0%	-18,301
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	322,099	5.1%	15,672
			5	308,249	0.6%	1,822

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

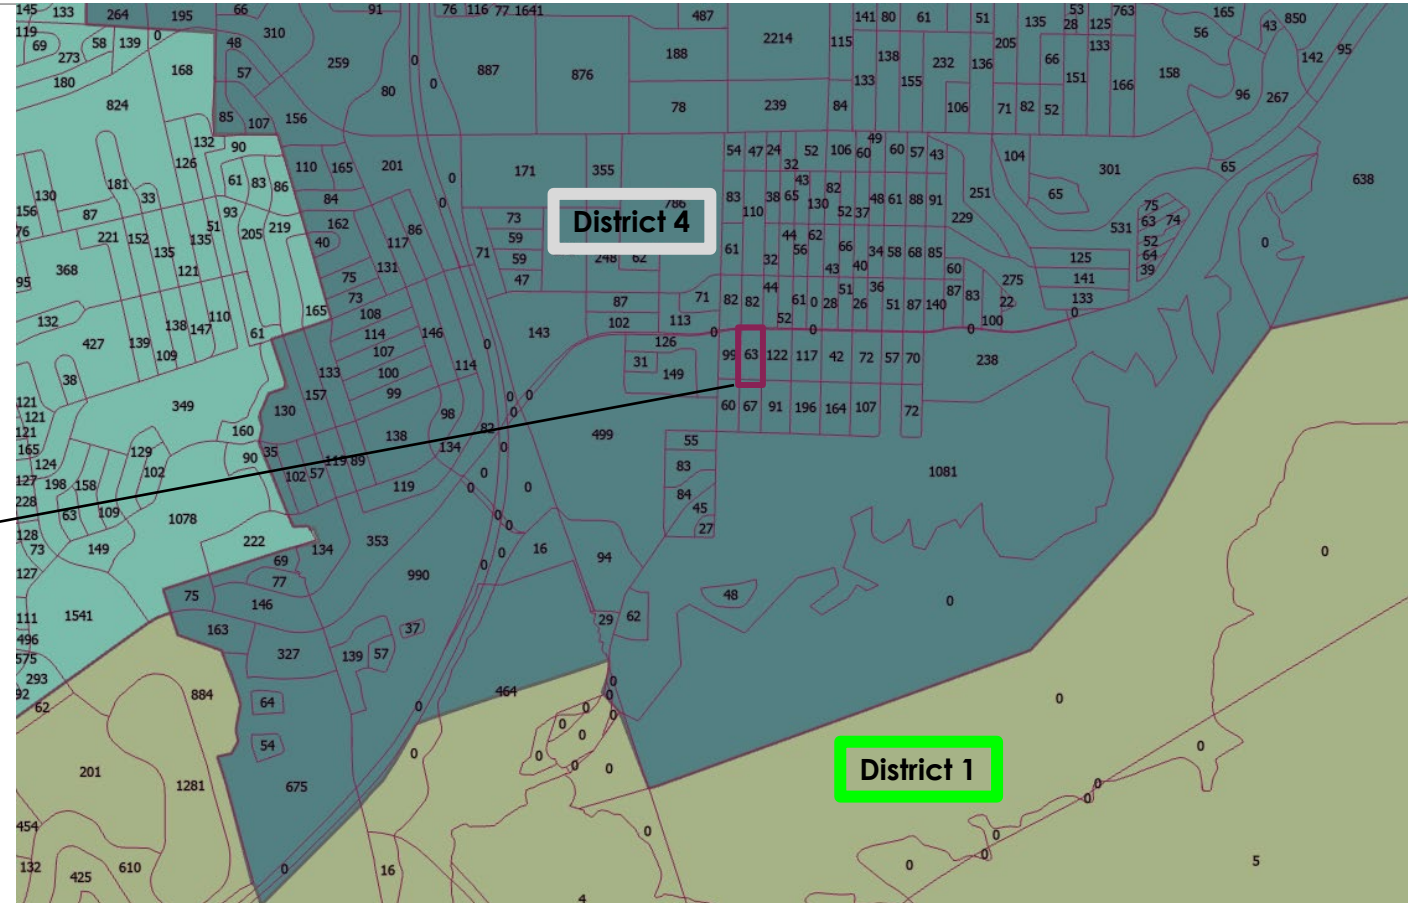

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	11.1%	1	288,126	-6.0%	-18,301
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	322,099	5.1%	15,672
			5	308,249	0.6%	1,822

- District 1 is still the least populated and requires more population > enlarge area to include more people
- District 4 could provide population to District 1
- Use **census blocks** to move population to from District 4 to District 1

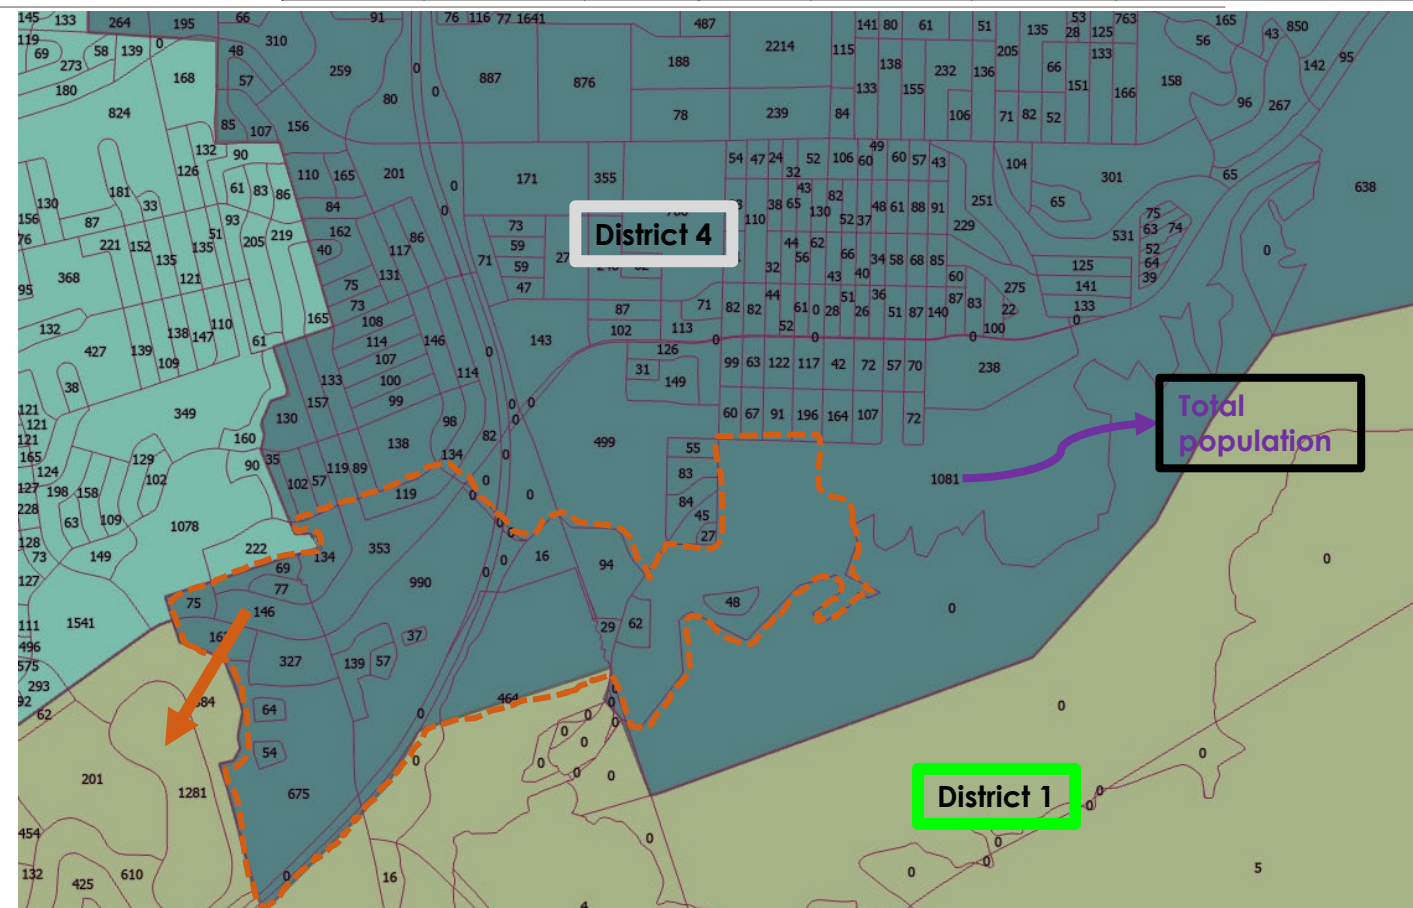

Population
per Census
Block

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	11.1%	1	288,126	-6.0%	-18,301
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	322,099	5.1%	15,672
			5	308,249	0.6%	1,822

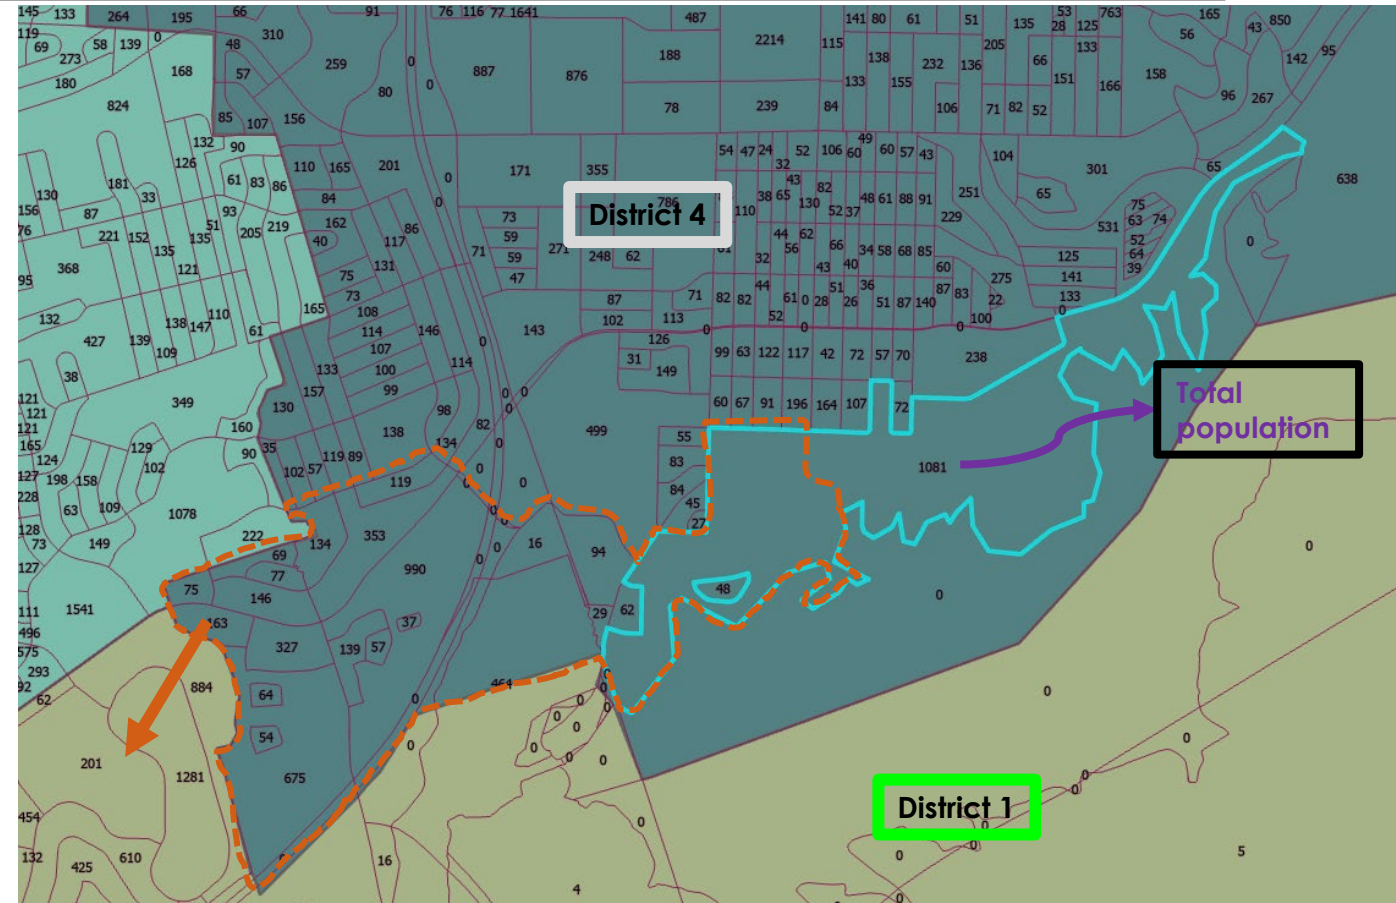

- District 1 is still the least populated and requires more population > enlarge area to include more people
- District 4 could provide population to District 1
- Use **census blocks** to move population to from District 4 to District 1
- Move **census blocks** from one district to another

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	11.1%	1	288,126	-6.0%	-18,301
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	322,099	5.1%	15,672
			5	308,249	0.6%	1,822

- District 1 is still the least populated and requires more population > enlarge area to include more people
- District 4 could provide population to District 1
- Use **census blocks** to move population to from District 4 to District 1
- Select **census blocks**, including a **portion of a large census block**

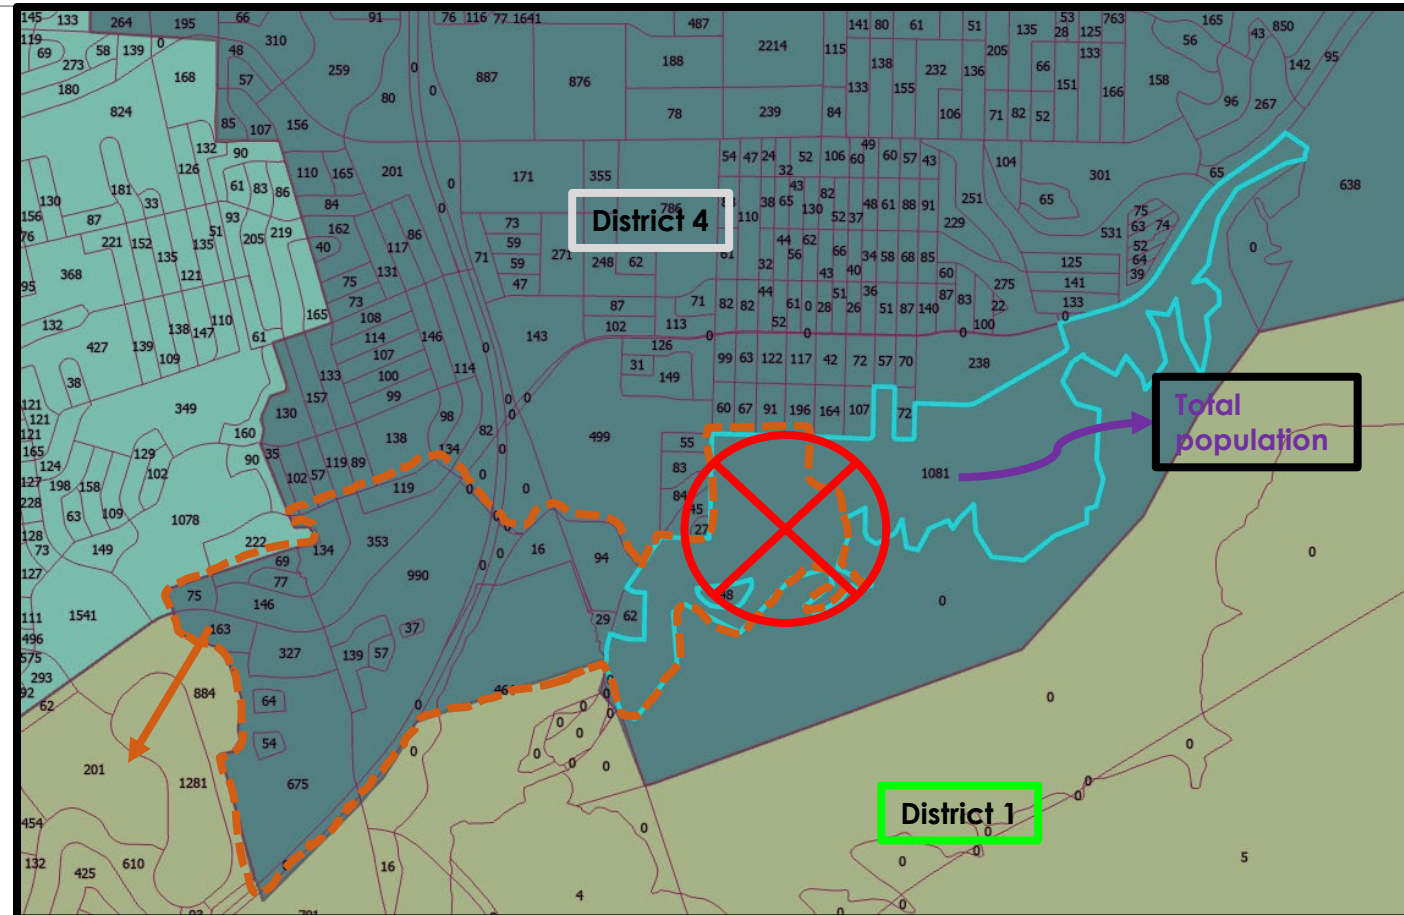

County of San Diego Independent Redistricting Commission
 Website: www.sandiegocounty.gov/redistricting

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	11.1%	1	288,126	-6.0%	-18,301
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	322,099	5.1%	15,672
			5	308,249	0.6%	1,822

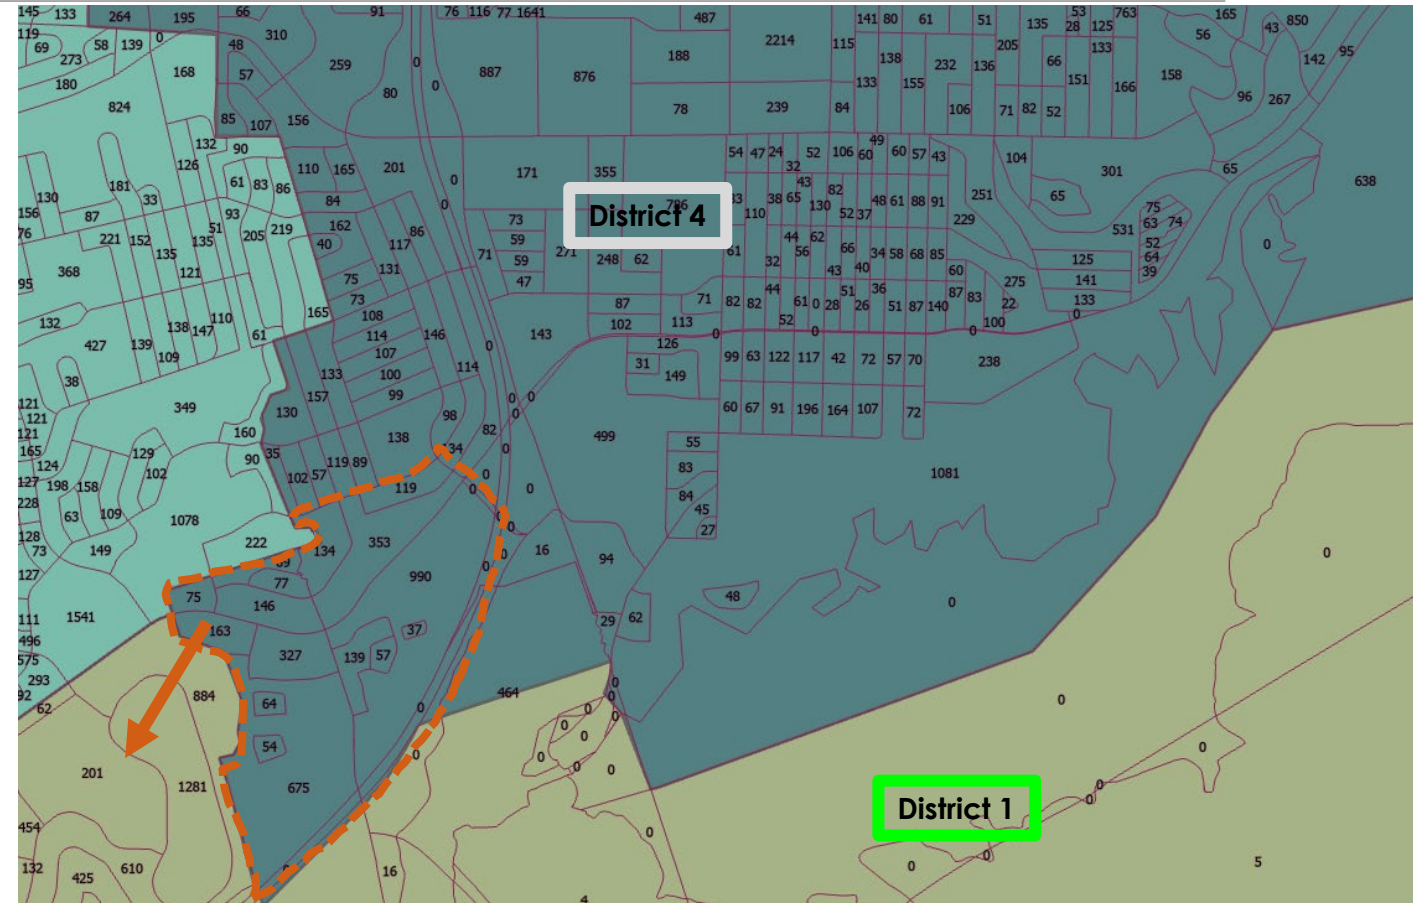

- District 1 is still the least populated and requires more population > enlarge area to include more people
- District 4 could provide population to District 1
- Use **census blocks** to move population to from District 4 to District 1
- Select whole census blocks and ~~portion of large census block~~
- Cannot split census blocks—population of sub-area unknown

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	11.1%	1	288,126	-6.0%	-18,301
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	322,099	5.1%	15,672
			5	308,249	0.6%	1,822

- District 1 is still the least populated and requires more population > enlarge area to include more people
- District 4 could provide population to District 1
- Use **census blocks** to move population to from District 4 to District 1
- Select whole census blocks

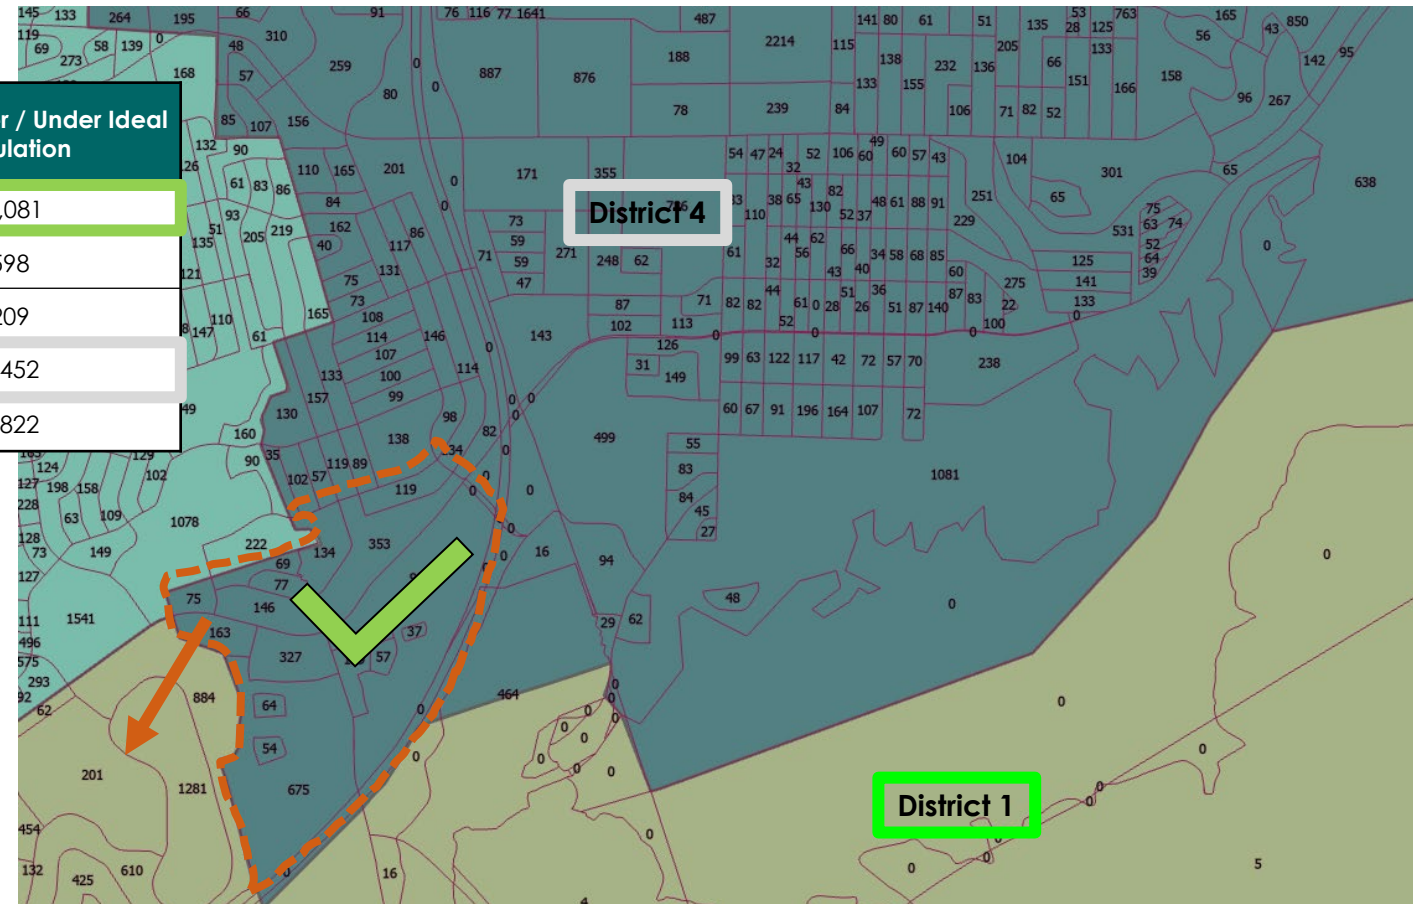

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Example

County Population	Ideal District Population	Overall Range	District	District Population	Percent Deviation	Number Over / Under Ideal Population
1,532,135	306,427	✓ 3.1%	1	300,346	-2.0%	-6,081
			2	307,025	0.2%	598
			3	306,636	0.1%	209
			4	309,879	1.1%	3,452
			5	308,249	0.6%	1,822

- ✓ Changes use Census blocks correctly
- ✓ Changes result in a lower overall range of 4.0%

County of San Diego Independent Redistricting Commission
Website: www.sandiegocounty.gov/redistricting

Redistricting Criteria

- **Have reasonably equal population**
- Comply with the federal Voting Rights Act
- Be contiguous
- Minimize division of local neighborhoods or communities of interest
- Minimize division of cities and census designated places
- Easily identifiable and understandable—bounded by natural and artificial barriers, streets, or the boundaries of the county
- Be geographically compact
- No consideration of residence of incumbents or candidates and not favoring or discriminating against a political party

County-specific criteria

- At least three districts shall include unincorporated territory
- Two district must be primarily unincorporated areas

Criteria included within
AB-801 Section 21552
(a) & (b)
